FOREWORD

NUMISMATIC studies in addition to studies on other antiquities featured in the Journal of the Society since the inception of its First series in the year 1839. Nevertheless, in consideration of the importance of coins as one of the most valuable source materials for the reconstruction of history, political cultural, the Society decided upon issuing Numismatic supplement to each volume of the Journal. Accordingly, the first supplement was appended to the Journal for the year 1904. It included research papers on coins of both the ancient and mediaeval periods of Indian History from the foremost scholarmembers of the Society like E. J. Rapson, George Taylor and others. The practice was continued till 1938, when with the appearance of the Journal of the Numismatic Society of India (1939), further issue of the Numismatic Supplement might have been considered unnecessary, and it was discontinued. However, most of the articles published in the different numbers of the supplement are still considered standard works and essential for the students of Indian History. Hence, this reprint edition. We have included in this volume supplements numbering I to XVI; the rest will be published in a separate volume.

Scholars will please note that in numbering the pages we have to retain the original page numbers of the respective supplements as appended to the Journals for those years. In a photo offset copy we could not do otherwise.

Our thanks are due to Dr A. N. Lahiri, who mooted the proposal of bringing out the supplements in a combined volume as early as 1967. We regret the delay in publishing the volume because even after accepting Dr Lahiri's proposal the Council of the Society could not undertake the work readily due to financial and other difficulties. Our thanks are also due to Dr B. N. Mukherjee, the former General Secretary, who resuscitated the Publication project and himself saw it through the Press. The edition will remove a long-felt want of scholars.

The Asiatic Society 15 August, 1972 S. K. MITRA General Secretary

CONTENTS

SUPPLEMENT I (Vol. 73, 1904)

64-74

NUMISMATIC SUPPLEMENT, pp. 64-65; MEDIAEVAL COINS—1. Samudra Gupta, by H. N. Wright, c.s., p. 65; 2. Notes from R. Burn, c.s., p. 65; Sultans of Delhi—3. Ghiyās-ud-dīn Balban; a new mint, by H. N. Wright, c.s., p. 66; Mughal emperors of hindustan—4. Jahān-gīr,—A new zodiacal mohar, pp. 66-68; 5. On the date of the Salīmī Coins, by Geo. P. Taylor, pp. 68-73; 6. The copper coinage of Murād Bakhsh son of Shāhjahān, by H. N. Wright, c.s., p. 73; Miscellaneous—7. A coronation medal of the first king of Oudh, by H. N. Wright, c.s., p. 74.

SUPPLEMENT II (Vol. 73, 1904)

227-244

I. ANCIENT INDIA-8. The Ksaharāta Dynasty, circā A.D. 100, pp. 227-28; Brāhmī Inscription (Reverse), p. 228; Kharosthī Inscription (Obverse), by E. J. Rapson, III. SULTANS of DELHI-9. Shamsu-d-din Kayūmurs, by G. B. Bleazby, p. 229; 10. Shihābu-d-dīn Umar Shāh, by G. B. Bleazby, pp. 229-30; 11. Muhammad bin Tughlak-A coin struck in memory of his father, by H. N. Wright, pp. 230-32; 12. Muhammad IV bin Farid. by W. Vost, p. 232; 13. Report on 110 silver coins forwarded by the collector of Malda to the Asiatic Society of Bengal as treasure trove, by H. N. Wright, pp. 233-35; IV. MUGHAL EMPERORS-14. On the coins of "Gujarāt fabric," by Geo. P. Taylor, pp. 235-39; 15. Some rare coins of the Mughal Emperors, by H. N. Wright, pp. 239-43; 16. Bahādur Shāh II (A.H. 1253 to 1275), by W. Vost, pp. 243-44; V. MISCELLANEOUS-17. A coin of Ghazni, by R. Burn, p. 244.

SUPPLEMENT III (Vol. 73, 1904)

368-381

II. MEDIAEVAL INDIA—18. On the Gadhaiyā Coins of Guzrat, by Geo. P. Taylor, pp. 368-73; III. SULTANS OF DELHI—19. Muhammad bin Tughlak, by G. B. Bleazby, p. 373: 20. Firoz Shāh III, by G. B. Bleazby, pp. 373-74; 21. Sher Shāh, by G. B. Bleazby, p. 374: IV. MUGHAL EMPERORS—22. Mughal coins changed hands ..., by Ed., pp. 374-75; 23. Rupees of Akbar of the Allahabad Mint, by Ed., p. 376; 24. On Two Recent

Mint Lists, by Geo. P. Taylor, pp. 376-81; IV. MISCEL-LANEOUS—25. Bengal—Nāşir-ud-dīn Maḥmūd I?, by R. Burn, p. 381.

SUPPLEMENT IV (Vol. 73, Extra Number, 1904)

103-116

26. Akbar's Copper Coins of Aḥmadābād, by Geo. P. Taylor, pp. 103-108; 27. A New Mint of Aurangzeb, by H. N. Wright, pp. 108-09; 28. Coins of the Murshidābād Mint between 1748 and 1793 A.D., by H. N. Wright, pp. 109-13; V. MISCELLANEOUS—29. Note regarding a silver coin found near Gargāon in the Sibsāgar district, by P. R. T. Gurdon, pp. 113-14; 30. A local copper currency in the Dewās State, Central India, by H. N. W., pp. 114-16.

SUPPLEMENT v (New Series, Vol. 1, 1905)

121-135

III. SULTANS OF DEHLI—31. Muḥammad bin Tughlak, by H. N. Wright, p. 121; IV. MUGHAL EMPERORS—32. Jalāl-ud-dīn Akbar, by Geo. B. Bleazby, pp. 121-23; 33. A Zodiacal Half-rupee, by Geo. P. Taylor, p. 124; Note—H. N. Wright, p. 124; 34. Some rare Mughal coins, by Framjee J. Thanawala, pp. 125-26; Note, by H. N. Wright, pp. 126-27; 35. Dāwar Bakhsh, by H. N. Wright, pp. 127-28; 36. Two rare coins of Shāhjahān and Aurangzeb, by H. N. Wright, p. 128; 37. Note on Kām Bakhsh and Bahādur Shāh, by William Irvine, pp. 129-30; 38. Aḥmad Shāh Bahādur—A New Mughal Mint—Mujāhidābād, by H. N. Wright, pp. 130-33; 40. Two double rupees of Sūrat Mint, by H. N. Wright, pp. 133-34; 41. "Mumbai-Sūrat" or "Mahīsūr which?", by Geo. P. Taylor, pp. 134-35.

SUPPLEMENT VI (New Series, Vol. 1, 1905)

261-274

II. MEDIAEVAL INDIA—42. A Hoard of Rājput Coins found in the Garhwal district, by E. J. Rapson, pp. 261-63; 43. IV. MUGHAL EMPERORS—Some Rare Mughal Coins, by F. J. Thanawala, pp. 263-65; 44. A New Type of the Coins of Shāh Shujā', by R. Burn, pp. 265-66; 45. On the Identity of the Coins of Gujarāt Fabric and the Sūrat Maḥmūdīs, by Geo. P. Taylor, pp. 266-71; V. MISCELLANEOUS—46. On some "Genealogical" Coins of the Gujarāt Saltanat, by Geo. P. Taylor, pp 271-74.

SUPPLEMENT VII (New Series, Vol. 3, 1907)

51-65

II. MEDIAEVAL-47. A New Mediaeval Gold Coin, by R. Burn, p. 51; III. PATHANS OF DELHI, &c., &c,-

48. Some rare Copper Coins of the Nizām Shāhī or Ahmadnagar Dynasty of the Dakhan, by Framjee Jamasjee, pp. 51-53; 49. The Bahmanī Kings, by R. Burn, pp. 53-56; IV. MUGHALS—50. Mughal Mint Towns, by Wm. Irvine, pp. 56-57; 51. Some Dates relating to the Mughal Emperors of India, by Geo. P. Taylor, pp. 57-64; 52. Shāhjahān III., by R. Burn, p. 64; V. MISCELLANEOUS—53. Coins of 'Alā-ud-dīn of Khwārizm, by R. Burn, p. 64; 54. A Coin of 'Alā-ud-dīn of Khwārizm, by J. A. Bourdillon, p. 65.

SUPPLEMENT VIII (New Series, Vol. 3, 1907)

1

587-592

III. PATHAN AND BENGAL COINS—55. A find of 85 silver coins in the Moorshidabad District, by R. Burn, pp. 587-88; 56. Four Rare Mughal Rupees. by Geo. P. Taylor, pp. 588-91; 57. A find of coins at Mahadpur in the Betul District, Central Provinces, by R. Burn, pp. 591-92.

SUPPLEMENT IX (New Series, Vol. 4, 1908)

441-446

58. Notes on the List of Coins in the Indian Museum, compiled by the late Mr. C. J. Rodgers, by Geo. P. Taylor, pp. 441-46.

SUPPLEMENT X (New Series, Vol. 4, 1908)

589-592

59. On the brief note by Mr. Beveridge on Salīmī Coins, by Geo. P. Taylor, pp. 589-92.

SUPPLEMENT XI (New Series, Vol. 5, 1909)

307-346

60. A Find of Graeco-Bactrian Silver Coins, by W. Vost, pp. 307-08; 61. Governors of Sind, by W. Vost, pp. 308-09; 62. Some Rare Silver and Copper Coins of the Bahmanī Kings of Gulbarga or Aḥsanābād, by Framjee Jamasjee Thanawala, pp. 309-14; 63. Addenda to the Mälwä Coinage, by H. Nelson Wright, pp. 315-17; 64. The Quṭb-Shāhīs of Haidarābād or Golconda, by R. Burn, pp. 317-18; 65. Some New Mughal Mints and Kare Mughal Rupees, by W. Vost, pp. 318-28; 66. On the Bijāpūr Rupee of Kām Bakhsh, by G. P. Taylor, p. 328; 67. Was there a Zafarābād Rupee of Shāh 'Ālam I?, by Geo. P. Taylor, pp. 328-29; 68. The Mughal Mint of Gokulgarh, by R. B. Whitehead, pp. 329-30; 69. Old Coins in the Bahāwalpūr State Toshakhānā, by R. B. Whitehead, pp. 331-46; 70. The Date

of the Salīmī Coins: Addendum, by Geo. P. Taylor, p. 346.

SUPPLEMENT XII (New Series, Vol. 5, 1909)

377-389

71. Salīmī Coins, by H. Beveridge, pp. 377-79; 72. Note on Mr. Beveridge's Article on the Salīmī Coins, by G. P. Taylor, pp. 379-81; 73. Mughal Mint Towns, by W. Irvine, pp. 381-82; 74. Treasure Trove (Mughal), by H. Nelson Wright, pp. 382-84; 75. Where was the Minttown Zafarābād?, by Geo. P. Taylor, pp. 384-89.

SUPPLEMENT XIII (New Series, Vol. 6, 1910)

227-245

76. Punch-marked Coins from Afghanistan, by Rakhal Das Banerjee, pp. 227-31; 77. Rare Mughal Coins, by H. Nelson Wright, pp. 232-38; 78. Treasure Trove (Mughal), by H. Nelson Wright, pp. 238-40; 79. Treasure Trove (Mughal), by H. Nelson Wright, pp. 240-42; 80. Dāms of Akbar struck at Jaunpūr and Ajmēr Mints, by R. B. Whitehead, c.s., pp. 242-44; 81. Mughal Emperors—Rafī'u-d-Darjāt, by J. Allan, pp. 244-45.

SUPPLEMENT XIV (New Series, Vol. 6, 1910)

557-581

82. Some Rare Indo-Greek and Scythian Coins, by R. B. Whitehead, pp. 557-65; 83. Some Rare Coins of the Pathān Sultāns of Dchli, by R. B. Whitehead, C.S., pp. 565-69; 84. Some Coins from the Limbdī Treasury, by Geo. P. Taylor, pp. 569-73; 85. A Post-script to the Article on "Some Coins from the Limbdī Treasury", by Geo. P. Taylor, pp. 573-74; 86. On the Symbol 'Sāhib Qirān', by Geo. P. Taylor, pp. 574-79; Post-script, by G.P.T., p. 580; 87. Mughal Mint Towns—Firoznagar, by William Irvin, pp. 580; 88. The Qandahār Rupee of Muḥammad Shāh, by H. Nelson Wright, pp. 580-81.

SUPPLEMENT XV (New Series, Vol. 6, 1910)

651-691

89. Notes on Some Mughal Coins, by R. B. Whitehead, I.C.S., pp. 651-77; 90. On Some Copper Coins of the 'Ādil Shāhi Dynasty of Bijāpūr, by Geo. P. Taylor, pp. 678-87; 91. On the Bijāpūr Lārī or Larin, by Geo. P. Taylor, pp. 687-89; 92. On the Bijāpūr Mughal Rupee of A. H. 1091, by Geo. P. Taylor, pp. 689-90; 93. On the Half-Muhr No. 172 of the British Museum Catalogue, at Jaunpūr and Ajmīr Mints' and 'Some rare Paṭhān Coins', by R. B. Whitehead, I.C.S., p. 691.

SUPPLEMENT XVI (New Series, Vol. 7, 1911)

697-712

95. Gold Coins of Shamsu-d-dīn Muzassar Shāh, of Bengal, by Rakhal Das Banerji, pp. 697-98; 96. Some rare Coins of the Paṭhān Sulṭāns of Dehli, by J. Allan, pp. 698-700; 97. On an unpublished Mediaeval Coin, by R. B. Whitehead, I.C.S., pp. 700-01; 98. Some Rare Mughal Coins, by J. Allan, pp. 701-03; 99. A Silver Dirham of the Sassanian Queen Pūrāndukht, by Framjee Jamasjee Thanawala, pp. 703-05; Post-script, by F. J. Th., p. 705; 100. Ilahī Synchronisms of Some Hijrī New Year's Days, by Geo. P. Taylor, pp. 705-12.

NUMISMATIC SUPPLEMENT

No. I

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1904

Vol. 73, Pp. 64-74

NUMISMATIC SUPPLEMENT.

[With Plates I and II.]

This supplement has been started primarily in the hope that coin collectors in India may find it convenient to chronicle in its pages notices of unpublished or rare coins which they may obtain from time to time.

It is also meant to include notes on other subjects of antiquarian and philological interest which by themselves might not afford sufficient material for a paper in the main body of the Journal.

It is a matter of common experience that casual finds by private persons of highly interesting coins are not made public with the freedom that is desirable. Almost all private cabinets contain specimens which their owners have not had any inclination or inducement to publish in any recognised journal.

Public cabinets are also not entirely free from reproach in this matter. Supplements to printed catalogues are brought out at inconveniently long intervals and new acquisitions of interest may thus remain unknown for years except to casual visitors.

The search for Indian coins since the days of Prinsep and Thomas has continued to be keen. The enthusiasm of General Cunningham and Mr. C. J. Rodgers in this direction has made itself widely felt, and the result is that every year brings to light numbers of coins previously unknown to numismatists. This is particularly noticeable in the case of the period covered by the later Muhammadan Sultāns of Dehli whose coins were struck not only at the capital but at many of the more prominent towns in their territories. The list of these towns which is a matter of historical and possibly geographical interest is being yearly added to in consequence of private research.

Similarly for progress in the study of ancient Indian history the publication of finds of new coins is all-important.

It is in the help that such notices afford to those engaged on the larger work of tabulating the numismatic records of specific periods and dynasties that this supplement should be found useful, if coin collectors and those interested in philological and antiquarian matters will but commit their observations to writing, to use the words of Sir William Jones, and send them to the Asiatic Society in Calcutta.

MEDIEVAL COINS.

1. Samudra Gupta.—A new variety of the Battle-axe type. Pl. I. 1. Obverse.—King, standing, leaning on battle-axe and facing left; attendant in left field supporting a standard tipped with a crescent.

Between attendant and king the word

ב

Between king and battle-axe the words.

H

(Note.—The final "ra" and "ta" of "Samudra" and "Gupta" are absent owing to want of space on the coin).

Legend .- To right of battle-axe 7 7 7 krtanta.

To left of attend an Z È πΤΕ È πΕπ tyājitārāja jitajatā Reverse.—Goddess on throne facing front with feet on a single lotus flower in full bloom.

In right hand a fillet, in left hand a lotus flower.

Monogram. . . .

Legend. 不不 司 以下瓜 kritāuta-paraśu i.e. the battle-axe of Krtānta. Weight: 118 grs.

The novel features in this coin, which was obtained in Lucknow, are (1) the fuller legend on the obverse, (2) the position of the king's name, (3) the lotus flower on the reverse in the goddess's left hand and at her feet.

H. N. Wright, C.S.

2. In our proceedings for 1881, at page 39, a gold coin belonging to the late Mr. R. Nicholson is described. The inscription was read "Sri Dhairyyarājā" by Dr. Hoernle. The coin is now in my possession, and it seems to me certain that the inscription should be read a faute or Sri Vigharaha. The style of the letters would connect it with the same period as the very common silver coins, of the Indo-Sassanian type, which bear the same name, though the devices (obverse, bull Nandi, and lingam; reverse, cow suckling calf) are purely Indiau. Pl. I. 2.

R. BURN, C.S.

SOUTANS OF DEHLI.

3. Ghiyās-ud-dīn Balban; a new mint. Pl. I. 3. 4.

Towards the close of 1902 a rupee of Ghiyas-ud-dīn Balban was brought to me, similar in type to the coin illustrated by Thomas (Chronicles of the Pathan Kings of Dehli, Pl. II. 42), but differing in its marginal legend. Unfortunately the latter is not perfect. A portion of it is, however, sufficiently preserved to enable the place of mintage to be deciphered with clearness. The legend on the reverse runs exercises.

[Struck in the district of Sultanpur......in the year 679 A. H.]
On the obverse, too little of the margin is left to be of any further

help. The coin weighs 165 grs.

Twelve months later I came across a confirmation of the above reading on a small copper coin of the same king of the type given by Thomas on p. 135 of his Chronicles No. 115, Plate II, Fig. 45. This little coin on the reverse has instead of تعفرت دهلي the words

بسلطان پور

The coin weighs 31 grs.

To which Sultanpur this coin should be assigned I am unable to say. It cannot be the Sultanpur (Warangal) of the coins of Muhammad bin Tughlak, as Warangal was not named till late in the reign of Ghiyasud-din Tughlak. There was a Sultanpur within a short distance of old Debli, but it is unlikely that there should have been two mints in such close proximity.

It is more probable that the "Khita Sultanpur" of Balban was in or near the province of Bengal which was the scene of the principal expedition of that monarch's reign.

H. N. Wright, C.S.

MUGHAL EMPERORS OF HINDUSTAN.

4. Jahangir. -- A new zodiacal mohar. Pl. I. 5.

Obverse.—Ram (Aries) to right looking backward over shoulder within rayed circle.

Reverse. - Within dotted circle.

نگیر شاه اردوي جها سکه بادروان تاکه بود مهر ۲۲ و ماه ۱۰۳۲

The legend forms the following couplet:—

Bād rawān tā ki buwad mihr o Māh

Sikka-i-urdū-i-Jahāngīr Shāh

May the coin of the camp of Jahangir Shah remain current as

long as the sun and moon exist.]

This interesting coin which was found by me in Dehli in October 1902, stands by itself in almost every particular. The most recent publication on the zodiacal coins of Jahangir is Monsieur Drouin's article in the "Revue Numismatique" in 1902 (p. 259), in which are described the zodiacal coins in the French "Cabinet des Medailles." The British Museum Catalogue contains an account of the 43 gold specimens in that Museum and Mr. J. S. Gibbs had a valuable paper entitled "Notes on the zodiacal Rupees and Mohars of Jahangir" in the Journal of the Bombay Branch of the Royal Asiatic Society, 1878. These are the most important publications of recent date bearing on the subject, and in none of them is any reference made to a coin resembling the one now described.

Hitherto the only names of mints noticed on the zodiacal coins of Jahangir have been-

On gold coins: Agra, Lähore, Ajmir, Ahmadābād, Fathpur

Sikri.4

On silver coins: Aḥmadābād, Agra (from gold die), Kashmir,

Fathpür Sikri.5

The present coin must have been struck in the camp (Urdū) of Jahangir, and is so far the only coin known to have been so struck by that king. Coins struck by Akbar in his "Urdu" or "Urdu-i-Zafarqarin" are met with. The sign of the Ram shews that my coin was struck in the first month (Farwardin), possibly on the Nauroz, of Jahangir's 22nd year, corresponding to the seventh month (Rajab) of 1036 A. H. or March 1627 A. D. Where Jahangir actually was at that time I have not been able to ascertain with any exactitude. In the sixth month of his 21st year he left Kābul for Hindustān (Elliot and Dowson, Vol. VI, p. 429). He went to Lahore (idem p. 431), and in his 22nd year appears to have gone to Kashmir (idem p. 435). He died 8 months later (28 Safar 1037 A.H.) on his way back to Lähore. Probably he was on his way from Lahore to Kashmir when the present coin was issued.

Further, no other zodiacal coin is known of so late date. The latest specimen in the British Museum is dated 1033.

8 B.M.C. No. 357 and Drouin (p. 9 of paper).

¹ M. Drouin describes and figures a Sagittarius struck at Lahore in the name of Nūrjahān.

⁹ Gibbs A.S.B. Prog. 1883.

See Gibbs, J.A.S. Bom: 1878; the coins belonged to Col. Guthrie

White King and Yost, Num. Chron: 1896, Vol XVI, p. 155.

The engraving both of the obverse and reverse dies is particularly fine, and I believe that no other zodiacal mohar is known with the figure of the Ram to the right. The reverse legend adds a new couplet to those hitherto recorded on the coins of Jahängir. The coin weighs

168 grs.

5. On the date of the Salīmī Coins. Pl. I. 6. 7. 8. 9. 10.

It is well-known that a series of coins issued from the Ahmadābād mint in the name of Sultān Salīm Shāh, son of Akbar Shāh. Now this Salīm on mounting the imperial throne assumed the name of Jahāngirl and accordingly it is not strange that the Salīmī silver rupees and copper tānkīs have generally been assigned to some period prior to his accession. The British Museum Catalogue, for instance, attributes them to Jahāngīr as Governor of Gujarāt. Unfortunately for this hypothesis, however, the prince Salīm never was Governor of Gujarāt. Below is the list of all the viceroys appointed by the Emperor Akbar from the date of his subjugation of the province in A.D. 1573 until the accession of Jahāngīr in A.D. 1605.

- Mirzā 'Azīz Koka ... A.D. 1573-1575.
 Mirzā 'Abd al Raḥīm Khān ... 1575-1577.
 Shihāb al dīn Aḥmad Khān ... 1577-1583.
- l Jahängir, the eldest son of the Emperor Akbar the Great, "was named "Mirzā Salīm on account of his coming into the world, as supposed, by the prayers of Shaikh Salīm Cishtī, a venerable Shaikh and dervish who resided in the village of Sikrī, now called Fatehpūr Sīkrī, in the province of Agra." Beale: Oriental Biographical Dictionary (1894), page 191. My friend, Mr. J. J. Ghose, M.A., of Ahmadābad, has kindly supplied me the following extract from the Tūzak-i-Jahān-"lips of my father address me either seriously or in jest as Muḥammad Salīm or "Salṭān Salīm. He always called me Shekho Bābā When I became King it blance to the names of the Qaişars of Turkey. The Heavenly Inspirer put into "Jahāngīr."

4.	I'timād Khān Gujarātī	•••	1583-1584.
5.	Mirzā 'Abd al Raḥīm Khān (2nd time).	***	1584-1587.
	Ismā'il Qulī Khān		1587.
	Mirzā 'Azīz Koka (2nd time)	***	1588-1592.
8.	Sultān Murād Bakhsh		1592-1600.
	Mirzā 'Azīz Koka (3rd time)	•••	1600-1606.
υ,	MILES WELL HORG (old sime)		

Not only is Salim's name absent from this list, but, inasmuch as in all the thirty two years the viceroyalty was never vacant, no loophole even remains for the conjecture that Salim may at some time have held the Office of Governor.

It is true that towards the end of Akbar's reign Salim rose in rebellion, but the disaffection was shortlived and apparently was confined to the Allahābād District. No trace of it seems to have reached the distant Aḥmadābād.

If then Salim's coins were not struck by him either as Viceroy or as rebel, we are evidently shut up to the conclusion that they were issued by his orders as Emperor. And if this be the case, we may safely affirm that they must have been struck in the very earliest part of his reign-before his newly adopted name Jahangir had quite come into vogue. On this point the evidence of the coins themselves is instructive. They bear no Hijrī year, but, as generally read, they have alongside of the name of the month of issue either the year 2 or the year 5. Not a single Salimi coin is known of the year 1 or 3 or 4, and none of any year later than 5. How to account for the strange lacuna was long a puzzle. The first clue to a solution was given by Mr. Nelson Wright who noticed that the coins supposed to read the year 5 do, as a matter of fact, read 50. The Persian figure 5 is here written as a small circle, and accordingly the following digit, zero, is represented merely by a dot. On several badly struck specimens the 5 appears clear enough, but in the process of coining the 0, which came nearer the edge of the die, has simply missed the flan altogether. On other specimens again the dot has been quite worn away. My own collection, however, contains five of these Salimi rupees with the 50 written distinctly as O. With this clue in our hand the tangle all unravels. And in this way: -

Clearly the 50 represents the 50th (or last) solar year of Akbar's reign, his Ilāhī 50, and the 2 the next succeeding solar year. In the earlier months of the Ilāhī 50 Akbar was still on the throne, and the coins of these months bore his name. In the first week of the 8th

I Referring to Salim's rebellion Manouchi writes: "He repaired the disobedience of a few months by a sincere application ever after to all the offices of a dutiful son." Catron's Manouchi (English Translation, 1709), page 134.

month of that year—on the 6th day of Aban—Salim mounted the throne. Forthwith in that same month of Aban coms were struck at the Ahmadabad mint in the name of Salim, but bearing still as their date the year 50. Each succeeding month of that year Salim's coins issued from Ahmadābād, these coins showing the name of the month of issue and the year 50. When the new solar year began the same type of coin was struck, but with the date Farwardin 2, and during the first four months of this year 2 that issue continued with the mere change consequent upon the change of month. In the fifth month Salim (or, as he was now called, Jahangir) introduced his new type of coin-the well known "heavy rupees"1-with their entirely new legend. Besides substituting his imperial name Jahangīr for his birth-name Salīm, he also so far at least as the Ahmadābād coins are concerned, dropped the year 2 from these coins, and now for the first time admitted the year 1. As yet only one New Year's Day (of the solar year) had occurred in his reign, and he now elected to count from that day his Ilāhi year 1.2

Thereafter most of his coins bore both the date of the Hijri (lunar) year and also the number of the regnal (solar) year—thus 1015-1, 1015-

2, 1016-2, 1016-3, 1017-3, &c &c.

In order to indicate the precise period to which the coins struck for Salīm at Aḥmadābād should, in my opinion, be assigned, I have drawn up the following Table of Synchronisms of the Arabic and Persian months for the three years beginning 10th March, O.S., 1605. In the Wāqi'āt-i-Jahāngīrī it is definitely stated that the third solar year of Jahāngīr's reign opened on a "Thursday, the 2nd of Zu'l hijja, corresponding with the 1st of Farwardīn." Dowson-Elliot: VI. 316. With this as starting-point the construction of a Table of monthly synchronisms for the three preceding years presents no difficulty. It is only necessary to bear in mind—

(a) that in the Hijrī year months of 30 and 29 days alternate, one day being added to the last (short) month of any intercalary year;

(b) and that in the Persian year each month is of 30 days, but that 5 days—the gathas—are always added to the end of the last month.

I The Hahi rupees of Akbar and Salim's rupees invariably weigh each just a few grains under 180, but Jahangir's heavy rupees rose at a bound to 215, and three years later to 222 grains.

[&]quot;year of his reign as commencing on the New Year's Day next after his accession, with the entrance of the Sun into Aries, which corresponded with the 11th Zu'l VI. 290, note 2.

From this Table it appears that the Salimi coins find their place between Akbar's and Jahāngīr's, and that the period of their issue covered nine consecutive months. In complete accord with the arrangement indicated in the Table my collection shows, either in silver or in copper, Akbar's coins struck month by month from Farwardīn till Mihr of the Ilāhī year 50, but none later than Mihr. Next in evidence are the Salīmī coins of the year 50 beginning with Ābān (Pl. I. 6) and continuing without a break till Isfandārmuz (Pl. I. 7. 8).; and thereafter month by month from Farwardīn till Tīr (Pl. I. 9. 10) the Salīmī coins of the year 2. Then follow, last of all, the "heavy rupees" of Jahāngīr, dated not 1014-1 but 1015-1, 1015-2, 1016-2, 1016-3, &c.

In support of the opinion that the Salimi coins of the year 50 precede those of the year 2, one further piece of evidence is noteworthy. Ex hypothesi, the first Salimi coins to be struck were those of Aban 50.

¹ Cf. D. E. VI, 302. On line 12 of page 302 correct 22nd to 21st, and 1603 to

^{*} D. E. VI, 316. 1016 H. being an intercalary year, its month Zu'l hijja

Now it is precisely the coins of this month that differ in their legend from all aubsequent issues. The difference consists largely but not solely in the arrangement of the words, and extends both to the obverse and to the reverse. The coins struck in the following month, Azar are of that modified type which was maintained till the close of the series. Now the explanation of this change is clear if, as our theory assumes, the Aban coins were the first struck. They simply did not meet with complete approval. The obverse was pronounced too crowded and the reverse too diffuse. Orders were accordingly given to omit altogether the one word Ilāhī and further to so rearrange the component words of the legend that a portion only should find a place on the obverse and the remainder on the reverse. The new dies were ready before the coins of the second month were struck, and thereafter, so long as the Salimi series issued, no further variation was deemed necessary.

This Aban 50 rupee is an evident link between Akbar's of the preceding month and Salim's of the succeeding. While its obverse bears Salim's name and the Salimi legend, its reverse is identical in type with the reverse of the rupees struck at Ahmadabad in the last year of Akbar's reign. Ahmadabad.

6. The copper coinage of Murad Bakhsh son of Shahjahan. Pl. I. 11.

When Shahjahan fell ill in A. H. 1067 (1657 A:D.) and his sons asserted their claims to the throne of the Mughal, Murad Bakhsh was in Gujarat. The mints from which he issued coins in his own name were confined to that province.

His silver coins are not infrequently met with struck at either Aḥmadābād, Sūrat or Cambay (Khambāyat). The gold coins are extremely scarce and but one or two struck at Ahmadabad are known. One of these is figured in the British Museum Catalogue (No. 692). Hitherto his copper coinage has been unknown. Mr. Framjee Jamasjee Thanawala, of Bombay, however, was fortunate in securing two specimens of dams (fulus) struck by Murad Bakhsh at Surat, and one of these he has kindly presented to me. The coins are of the usual size of Akbari dam and weigh 316 and 333 grains, respectively. They bear the following legends :-

Obv. سورت أحد Rev. m-i-- n ضرب

H. N. WRIGHT, O.S.

MISCELLANEOUS.

7. A coronation medal of the first king of Oudh. Pl. II.

Obverse.—Bust of king, three quarters face in high relief, crowned and garlanded—within circular area—remaining ground occupied by flowered tracery—marginal legend in florid characters beginning under the king's left shoulder.

سكة زد برسيم و زر از فضل برب ذر المنن غازى الدين حيدر عالي نسب شاة زمن سنة احد

Reverse.—Arms of the king in high relief within circular area. Two lions rampant holding flags on each of which appears a fish. Between them a dagger (katār) surmounted by a crown. Below the flags two fishes forming a circle, head to head below streamer. In right-hand corner of area the letter ϵ . Marginal legend beginning opposite the right flag.

تا هزار سال شاها بقاي عمر تربادا هزار سال باشي تو در زمان خدا Weiaht.—1,260 grs. Size 2.6".

This interesting medal was obtained in Allahabad whither it had been brought from Jhunsi in the Allahabad district. It apparently commemorates the assumption by Ghāzinddin Haidar of regal dignity in October, 1819 (1234 A. H.). This monarch was the eldest son of Nawab Sa'adat Ali Khan of Awadh and had five years previously succeeded his father as Nawab Wazir. At this coronation ceremony the crown was delivered to the king by the British Resident. Ghāzī-uddīn Haidar reigned as king of Awadh for eight years. One of the titles assumed by him at his coronation was Shah-i-Zaman, and this title appears on the medal. Beyond the wish on the obverse, which doubtless refers to the first year of the newly assumed sovereignty, there is no date recorded, nor does the reverse legend appear to be a chronogram. The workmanship is of a high order, and the appearance on the medal of the king's portrait contrary to orthodox custom indicates that the design was probably entrusted to some European artist. oil-painting and a marble bust representing the king similarly diademed and arrayed are in the Lucknow Museum, but the name of the artist has in neither case been preserved. A second specimen is in the cabinet of Mr. R. Burn, C.S., and was also obtained in Allahabad.

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1904

Vol. 73, Pp. 227-244

NUMISMATIC SUPPLEMENT. (With Plate III).

Note - The numeration of the articles below is continued from p. 74 of the Journal.

I. ANCIENT INDIA.

8. The Kşaharāta Dynasty, circâ A.D. 100 (Cf. "Indian Coins" §§ 77-79)

Of this dynasty which preceded that of the Western Kşatrapas as governors (probably originally under the Saka princes of Northern India-the line of Maues, Azes, Azilises, &c.) of Surastra and Malwa, ouly one member, Nahapāna, has hitherto been certainly known from coins.

I have recently discovered another, who, I think, may have been

the predecessor of Nahapāna.

Pandit Bhagvanlal Indrajī in his account of "The Western Kşarapas," edited by me in J.R.A.S., 1890, p. 643, attributes certain copper coins to Nahapāna. He notes that they bear on the reverse the symbols which appear on Nahapāna's silver coins—an arrow and a thunderbolt. They are found "in the coasting regions of Gujarāt and Kathiāwad, and also sometimes in Malwa." They bear on the obverse "the Buddhist symbols, a standing deer and a dharmacakra, and also show traces of inscriptions which have not hitherto been deciphered." (A

specimen is given in his Plate, la.)

Now, the copper coinage which has been assigned with certainty to Nahapāna is rather different. An undoubted specimen, actually bearing the name of Nahapana, is given in Cunningham's Coins of Mediæval India, p. 6, Pl. I, 5. No. 4 in the same plate belongs to the class described by Pandit Bhagvanlal. On studying the six specimens of this latter class in the British Museum, I was fortunate enough to succeed in reading one of the inscriptions—the Brāhmi inscription—with cer-The inscription which is found on the opposite side is certainly in Kharosthi characters, but these are so fragmentary and so carelessly executed that without the help of this Brahmi reading I should not have been able to suggest any restoration of the Kharosthi inscription. We may, however, assume that, as on the coins of Nahapana, practically the same inscription occurs in the two characters; and the fragments of the Kharosthi inscription which remain, certainly justify us in taking this view.

The following is a description of the coins. The fragments of the inscriptions are given as they appear on the different specimens.

Obv. Arrow and Thunderbolt: Brahmi inscription (restored)

Kşaharātasa Kşatrapasa Bhūmakasa.

Rev. A Deer and a Dharmacakra, together forming what may be intended for the capital of a pillar. Kharosthi inscription (restored) Chatrapa-Chaharata-Bhumakasa or Chaharadasa chatrapasa Bhumakasa.

Brāhmī Inscription (Reverse).

The clue to the inscription is given by a coin in the Bhagvānlāl collection, No. 70. The Brāhmi inscription on its reverse is quite clearly

(1) Kṣahar[ā] . . . pasa Bhūmakaṣa.

The name $Bh\bar{u}maka$ is fairly clear on another specimen from the same collection (No. 4=Pl. 1a. of the Pandit's article in the J.R.A.S.).

The other specimens do little to confirm this reading, and I cannot explain, either as Brāhmi or as Kharoṣṭhī, the curious inscription on the reverse of the coin published by Cunningham, C.M.I., Pl. I. 4.

Kharosthī Inscription (Obverse).

Cunningham, C.M.I., Pl. I. 4.

(2) Ch . . . rata Bhumaka [sa].

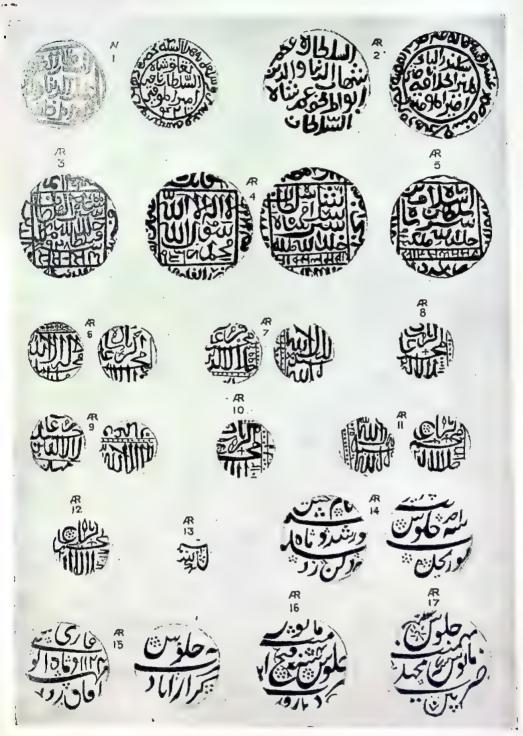

E. Conolly (Oct. 1837).

(3) Chaharadasa cha [sa].

On No. 70 of the Bhagvānlāl collection, there is a full obverse inscription in, apparently, Kharosthī characters, but I am unable to read it. It must, no doubt, have been the same as the reverse Brāhmī inscription.

There can be no doubt that the name is Bhūmaka, and that, like Nahapāna, he takes the titles "Kṣaharāta" and "Kṣatrapa." The readings (1) and (3) show the family title Kṣaharāta in the first place, the military title Kṣatrapa in the second place, the two titles as well as the name being in the genitive case. The reading (2) seems to change this order, and also to denote that only the name was in the genitive case.

I may add that these copper coins, by reason of their fabric and their types, seem to take us one step farther back in the direction of the Saka princes of Northern India, whose governors the Kṣaharātas have been supposed, on other evidence, to have been. They somewhat resemble the copper coins of Spalirises with Azes, which have for their

reverse type a bow and arrow and a discus (v. Gardener, B.M. Col. p. 102, Pl. XXII., 4.1) E. J. RAPSON.

Brit : Mus :

TII. SULTANS OF DEHLI.

9. Shamsu-d-din Kayumurs.

R. Weight, 169 grains. Size, 1"0.

Mint, Dehli.

This extremely rare coin was obtained in October, 1903, nearly 40 years after the first specimen was discovered by the late Pandit Ratan Narain of Dehli, with whose collection it passed into the possession of Mr. J. H. Durkee of New York (U.S.A.) many years ago. That coin was edited by Mr. J. G. Delmerick in the Journal of this Society for 1881, and again by Mr. J. Gibbs in the Numismatic Chronicle in 1885. The coin recently acquired is similar in type to other rupees of this period and bears the following legends:-

السلطان الاعظم شبس الدنيا والدين ابوالمظفر كيوسرث السلطان

بعضرت دهلی همرت دهلی

Shamsu-d-din, the son of Muizzu-d-din Kaikubad, was only 3 years old when he was placed on the throne of Dehli as the ostensible Sultan by Jalalu-d-din Firoz Shah after the murder of the Sultan Kaikubad. Three months later when Jalalu-d-din had succeeded in consolidating his own power, the infant Sultan was also put to death. This was in the year 689 A.H.

G. B. BLEAZBY.

Shihabu-d-din Umar Shah. A. Weight, 172 grains. Size, 1"0 Date, 715 A.H. Mint, Dehli.

Pl. 111, 2.

¹ The discus is regarded by Prof. Gardener as a mere symbol on the coin; but I think the actual weapon is intended. I think it is represented also on the silver coins of Nahapana by the round dot which always occurs in conjunction with the Arrow and Thunderbolt. (see Cunningham, C.M.I., Pl. I. 8; Bhagvanlal, J.R.A.S., 1890, Pl. I: Rapson, J.R.A.S., 1899, Pl. I.)

This coin which is in perfect condition has the following legends enclosed in circles:—

السلطان الاعظم شهاب الدنيا والدين اوالمظفر عمر شالا السلطان سكندر الثاني يمين الخلافتة ناصر اميوالمومنين

Margin :-

ضرب هذلا السكة بعضوت دهلي في سنة خمس و مشر و سيعمالة

The brief history of this puppet king is told by Thomas in his Chronicles of the Pathan Kings of Dehli, pp. 176 and 177.

The first rupee of this Sultān turned up at Jaunpūr a few years ago. It was acquired by the Government of the United Provinces and is now in the Lucknow Museum. That coin, however, is in comparatively poor condition. The coin now being described was acquired subsequently at Nāhan (Sirmur State), and judging by its appearance cannot have been in circulation for any length of time, every letter on both sides being perfect. These two specimens in silver and a few copper coins are all the coins known of this unfortunate young Sultān.

G. B. BLEAZBY.

11. Muhammad bin Tughlak. A coin struck in memory of his father.

Pl. III. 1.

The striking of coins in the name of his father is a well-known incident in the reign of Muhammad bin Tughlak. Two such coins—one gold, the other silver—are noticed by Thomas on p. 212 of the Chronicles. Though the name of the Mint is indistinct on the gold coin and is not recorded on the silver piece, it is probable from their appearance that the coins were issued in the Dekhan. Another coin bearing the name of Ghiyāşu-d-dīn Tughlak but struck after his death is described on p. 190 of the Chronicles, and the crude rendering of the word on the reverse area, together with the absence of any distinct margin, led the author to catalogue the coin as one struck by the first Tughlak in A.H. 721. Subsequent finds have however fixed the dates of issue of this class of coin as 726 and 727, and their origin was the Dekhan, specimens being known struck at both Daulatābād and Telingāna.

The object of the present note is to draw attention to a similar gold coin struck at the capital Dehli. This coin I believe has only once been noticed—by Major F. W. Stubbs in the Proceedings of the Asiatic Society of Bengal for 1870, p. 302. On that occasion it was

pronounced counterfeit for reasons which appear to be inconclusive The coin has as far as I know never been figured.

The legends are as follows:—

Obverse.

Reverse.

In a square with traces of an

outer circle.

In a circle.

السلطان الغازي غياث الدنيا والدين أو المظفر

تغلق شاة السلطان ناصر اميوالموسنين اعمر

Margin.

هذا السكة المضوة دهلي في سنة سبع وعشرين و سبعماية

The weight is 173 grs., and size '9"

Major Stubbs gave the following six reasons for believing the coin to be not genuiue:—

- 1. نامير is written نامير. This criticism is obviously due to a mistaken assignment of the dots on the coin. The two dots which have been taken to represent the letter "ye" really belong to the two "nuns" in the word just below it viz.: مرمنین. It is noticeable that on this coin as in several other specimens of Muhammad bin Tughlak's coinage the dots distinguishing various letters are scrupulously recorded. Cf. Chronicles No. 182. It is true the curve of the من is not very full. It is, however, not unlike the form of the same letter on some other coins of the period.
 - (2) Date in figures impossible.
 - (3) Difference of date in words and figures.

These remarks refer to the figures [7] in the reverse area. Major Stubbs assumes that they represent a blundered date, a different date being given in words in the margin. It is difficult to conceive that anyone who was able to imitate with such precision and intelligence the entire inscription of a coin, and must have been aware of the meaning of that inscription, should stumble through ignorance over a date in figures and for vrv should substitute the figures [7]. Some other explanation of these figures must, I think, be sought for. This I am unable to supply, but it is worth remembering that equally unexplained figures appear on coins of Islām Shāh Sūri, vide Chronicles No. 359, Pl. V. 190.

From the above considerations it may, I think, be assumed that the figures pri were not a blundered representation of vrv. They possibly have no connection with the date of the coin.

is omitted. فرب 4)

This does not appear to me a serious objection to the authenticity

of the coin. Instances of a similar omission are to be found on other coins of the period, cf. Chronicles Nos. 173 and 174 and J.R.A.S. 1900, p. 775, where the margins commence هذا السكة or هذا السكة

(5) M of "Miat" is omitted.

This "m" is clear enough on the coin now figured.

(6) The usual forms of the letters alif, $l\bar{a}m$, toe, had thick clavate shapes; in this coin they have the more elegant form first introduced on his coins by Sher Shāh.

It is possible that Major Stubbs had not seen any of Muhammad bin Tughlak's more finely engraved coins. Anyone who had handled many of these could not fail to be struck by the similarity between them and the reverse of the coin now figured. In fact it would not be too much to say that the form of the letters on the reverse is characteristic of the coins of Muhammad bin Tughlak. Compare especially nos. 173, 174, 179, 180 and 182 in Thomas's Chronicles. It is probable that for the obverse either the actual die of one of Ghiyāsu-d-din Tughlak's coins was employed, or that one was used as a pattern.

It will thus be seen that the conclusions at which Major Stubbs has arrived will not bear close examination, and it is a little surprising that they have been allowed to lie for 34 years unchallenged. The rarity of the coin may be the reason. During the past ten years I have heard of only two. One of these is the present coin which I obtained by exchange from Mr. Bleazby who has the second specimen. Both were obtained at Lahore. Mr. Bleazby and Mr. Burn, C.S., who have devoted much time to the study of "Pathān" coins, have authorised me to say that they share in my opinion that the coin now figured is a genuiue one struck in memory of his father by Muhammad bin Tughlak.

H. N. Weight.

12. Muḥammad IV. bin Farīd.

In the British Museum Catalogue Muḥammad bin Farīd is said to have reigned from 837 to 847 A.H., but a coin—No. 458—therein, and another in the catalogue of the Lahore Museum, give a later year, 848 A.H. His reign was almost certainly from 837 to 849 A.H. Compare Elliot's History of India, Vol. IV, p. 86, note 1, where the years 844, 847 and 849 A.H. are mentioned as the last years of the reign. The reference to Budāoni is to the Muntakhab-ut-Tawārīkh (Ranking) p. 399, which gives 847 A.H. The date (849) given by Ferishta for Muhammad 11 in 64 to 11 in 64 to 12 in 65 the most correct. A coin of that year struck in the name of Muhammad bin Farīd is, however, required to settle the matter definitely.

W. Vost.

13. Report on 110 silver coins forwarded by the Collector of Malda to the Asiatic Society of Bengal as treasure trove.

The Collector states that the coins were found in a field in Mauza Belbari, thana English Bazar, in the vicinity of the old city of Gaur. The field had been ploughed two or three days previously, and on the night preceding the find of the coins there had been a heavy shower which washed away the covering clods. The coins were found in the furrows made by the plough.

They are with two exceptions of the Sūri dynasty of Dehli Sultāns.

IV. MUGHAL EMPERORS.

14. On the Coins of "Gujarat fabric."

But little is known regarding the interesting series of coins designated in the British Museum Catalogue ('Mughal Emperors' Volume) Coins of "Gujarāt fabric." They are unrepresented in the cabinets of the Museums in Calcutta and Lāhor, and thus though one occasionally comes across specimens of them in the province of Gujarāt, they probably never had a really wide circulation. In the British Museum Catalogue eight are registered (Nos. 252a-252h). Five of the eight are dated, one being of the Hijrī year 992, one of 997, and three of 1215. During a residence of now several years in the capital of Gujarāt, it has been my good fortune to obtain 29 dated and 14 undated specimens of this series, and from the study of these I have gathered the information embodied in this article.

Metal. The Gujarāt fabric coins would seem to have been struck in silver alone. Not a single specimen is known in either gold or copper. Two, however, in my cabinet, remarkable for their unusual weight, one of 66 and the other of 71 grains, prove to be copper silver-coated.

Form. All the coins of this series are round, and fairly thick for their diameter. They look somewhat dumpy, are roughly fashioned

and of a generally insignificant appearance. The lettering, though as a rule legible enough, is never deeply engraven.

Weight. Two denominations of these coins are known. The larger ones, of diameter '6 inch, turn the scale at about 85 grains [Maximum 87; minimum, a poor specimen, 78]. Six smaller ones, measuring half an inch in diameter, have an average weight of 40.5 grains [Maximum 44; minimum 39]. Evidently these denominations represent the half and the quarter rupee.

Date. The earliest dated coin known of this series is of the year 989 Hijrī. Except the years 993 and 999, each succeeding year up to and including 1000 H. is represented in my collection. Then come the years 1006, 1009, 1012, 1014, 1016, 1019, 1020, 1025, 1026, and 1027. Hence it seems probable that coins of this Gujarāt fabric were struck each year from at least 989 till 1027. Then comes a blank for nearly two centuries, after which, strange to say, precisely the same type of coin re-appears, but now with the dates 1215 and 1217 H. (A. D. 1800 and 1802). The figures indicating the year are entered on all the coins near the right-hand lower corner of the square area of the obverse—over the jim of جالل الدين The figures appear as though lying on their face, having suffered rotation from the upright position through one quadrant to the left. One extraordinary specimen has the year 1026 in the normal place, but the reverse gives the year 1025 in the diametrically opposite corner—the left hand upper—of the corresponding square area.

Legends. On all the coins the legends, or at least the portions within the areas are the same. Within a square area formed by double lines with dots between, the obverse legend reads

The reverse, within a similar area, contains the Kalima arranged in the usual three lines

All the coins I have yet seen were evidently much smaller in surface than the die, and they show accordingly only mere fragments of the marginal readings. One undated coin in my possession does, however, read distinctly and other country, other in the upper margin of the reverse, and with this slender clue we may perhaps venture the

guess-it is only a guess-that the other three margins bore the names of the other three Khalifas, Abū Bakr, 'Omar, and 'Alī. Until hetter specimens come to hand, it is impossible to say whether—as on the coins of Shah Jahan I.—the distinctive virtues of the Khalifas were associated with their names.

Features. The following five features merit special attention since serving to divide the coins of this series into three more or less definitely marked classes.

- 1. On the obverse the ghain of غازي is written either with a fairly small curve containing no dots, or with a large curve bearing in its bosom a varying number of dots.
- 2. On the obverse over the he of the word a cross of slightly differing forms may, or may not, be present.
- 3. On the obverse the re of takes an unusual upward flourish,
- 4. On the obverse over this strange re of کبر stands a leaf-like or arrow-like ornament, thus ..
- 5. On both the obverse and the reverse over the dal of of is a St. Andrew's Cross, also of varying forms. Having regard to these five features we find that-
- A. Early Coins, dated between the years 989 and 1000 H.,
 - (a) have no dots in the curve of the ghain:
 - (b) have (until 997 H.) no cross over occor on obverse:
 - (c) have only a moderate upward flourish of the re:
 - (d) have the arrow-ornament slanting to the right:
 - (e) have the St. Andrew's Cross tipped with dots or (later) small

Pl. III. 6. 7. 8. 9. 58 × circles, thus

- B. Intermediate Coins, dated between the years 1000 and 1027 H.,
 - (a) have from 4 to 7 dots in the curve of ghain:
 - (b) have a cross, often like r over sees on obverse:
 - (c) have a more elongated upward flourish of the re:
 - (d) have until 1020 H. the arrow slauting to the right, but after that year perpendicular:
 - (e) have a St. Andrew's Cross composed of closed curves Pl. III. 10. 11. thus X
 - C. Late Coins, dated between the years 1215 and 1217 H.
 - (a) have an enlarged curve for ghvin, and in its bosom 8 or 9
 - (b) have a cross resembling an inverted tripod over over on obverse:

- (c) have a still more elongated upward, flourish of the re:
- (d) have the arrow upright. Pl. III. 12.

From the poor specimens to hand of the coins of the latest period it is impossible to say whether the St. Andrew's Cross was present on either the obverse or the reverse.

Mint. The coins themselves supply no clue as to their place of mintage. Mr. Lane-Poole's suggestion that they are of "Gujarāt fabric" is doubtless correct, if the sole implication be that these coins were struck somewhere in Gujarāt. We have already seen that their distribution was practically confined within the limits of that province. But when Mr. Lane-Poole further states that "they have all the appearance of the later Kachh coins,"1 we should be on our guard against the inference that their original home was Kachh. It is true that the coins of Kachh, and indeed of the neighbouring States of Navanagar and Porbandar in Kāthīāwād as well, continued to bear for three centuries the name of Muzaffar (III), the last Sultan of Gujarat, and they are in this respect analogous to the coins of Gujarāt fabric, which invariably present the name of Akbar Bādshāh, whether struck in his reign or in Jahangir's, or even two centuries later. Also in shape and size and workmanship the coins of Kachh and Kāthîāwad do bear some resemblance to those of Gujarat fabric. But their weight-and this is perhaps the crucial test-tells decidedly against the supposition that the Gujarāt fabric coins hail from some mint in Kachh or Kāthīāwād. From the year 978 H. right on till recent times the standard coin of Kachh was the silver kori of 73 grains, bearing unchanged throughout that period the date 978. Now it is extremely improbable that any mint would be issuing at one and the same time this kori and also the Gujarāt fabric half-rupees of 85 grains, bearing as their date the varying years of issue. The kori and the rapee being incommensurable, we may safely assume that no mint would have produced both types of coin together. To have done so would have involved intolerable confusion.

This same objection applies with equal force to the assumption that the Gujarāt fabric coins issued from either Navānagar or Porbandar, for at these mints too koris were struck, all dated 978 H.

According to the Bombay Gazetteer (Vol. VIII, page 465) "a mint was established in Jūnāgadh subsequent to the conquest of the province by the Moghal Government." But that conquest did not take place till the year 1000 H., and hence we may safely affirm that coins, such as

¹ Catalogue of Indian Coins in the British Museum: the Mughal Emperors,

those of the Gujarāt fabric, struck in the name of Akbar as early as 989 H. did not issue from that Mint.

If, however, in our quest for the home of these coins we may turn to the mainland of Gujarāt rather than to the peninsular portion of that province, Surat may well claim our attention. This city, when conquered by Akbar in 981 H., was a port of the first rank, having subordinate to it the ports of Rander, Gandevi, and Valsad. Rejecting, as we safely may, the strange rupee No. 137 of the Lahor Museum Coin Catalogue, provisionally assigned by the late Mr. Rodgers to Surat, it was not till 1032 H. that the first of the ordinary Mughai coins issued from this mint. The latest I can trace (excluding, of course, the East India Company's Surat rupees) is of the year 1197 H. Thus between 1032 and 1197 H. this mint was more or less active in producing coins of the well-known Mughal type. May it not be that prior to 1032 H .and thus from 989 till 1027 H .- the coins of Gujārāt fabric issued from this mint? In that case they were about 1030 H. merely superseded by the larger and finer Mughal coins, which latter continued in favour till the end of the 12th century. Why the former type of cointhe Gujarāt fabric-was revived in 1215 and continued till 1217, I am at a loss to explain. It is, however, noteworthy that in 1215 H. the English, on assuming the undivided Government of Surat, assigned onefifth of the revenues of the city to the brother of the late Nawab. May it have been he who re-issued the Gujarāt fabric coins? Also in 1217 H. by the treaty of Bassein the Peshwa ceded his share of Surat to the English, who henceforward held sole control over the district. Was it on this account that the issue of these coins from the Sürat mint now ceased?

Evidently from the description here given of the coins of this series the main questions that still await an answer are three—What do the margins read? What was the place of mintage? And why the reissue of 1215-1217 H.?

- 15. Mr. Framjee Jāmasjee Thānawālā of Bombay has sent for publication the following rare coins of the Mughal Emperors.
 - 1. Jahängir. A. One-eighth of a rupee. Weight, 20 grs.

 Mint. Ahmadnagar. Size 4"

Obverse. Portions of Kalima.

Below 301 the word

Reverse.

جهانگیر مع—مد نورالدین

Pl. III. 13.

There can be no hesitation in ascribing this coin to the mint Ahmadnagar, one of the principal towns in the province of Aurangabad. It follows in type the rupees of that Mint published in the Lahore Museum Catalogue No. 35, p. 134.

2. Aurangzeb. A. One-sixteenth of a rupee. Weight 10.5 grs. Size '4" Mint. Probably Aurangābād.

> Date. 1083 A.H.

Portions of the usual legend.

او رنگزیب Date in گ of

Reverse. Portions of the usual legend; with the name of the mint at the top of the coin. Cf. No. 702 figured in the British Museum Catalogue.

3. Aurangzeb. R. A quarter of a rupee. Weight 44 grs. Size 6'

Mint. Bijāpūr dāru-z-zafar.

اورنگ زیب of گ of الله علی Date. 1112 in the

Portions of usual legends.

Of. British Museum Cat. No. 717.

4. Kāmbakhsh. R. Weight 175 grs. Size .9" Mint. Nürgal or Nürkal. Date. 1119 ahad.

Obverse.

x (minus

خور شيد و ما ١١١٩

Reverse.

سنه _احد جار*س* ضرب نور ک*ل*

Pl. III. 14.

This mint has been known for some years, but has not been published. Its issues are so far confined to the reigns of Aurangzeb and his son Kāmbakhsh and Farrukhsiyar. Of Auraugzeb three coins are known-one in the cabinet of Dr. Taylor, two in my own. The present coin is the only one found of Kāmbakhsh of this mintage, and Dr. Taylor has an unique specimen of the reign of Farrukhsiyar. To Dr. Taylor is due the identification of the mint with "Nürgal," apparently also called "Nūrkal," the chief town of a sarkār of that name in the province of Bījāpūr, vide "India of Aurangzeb," by B. Jādunāth Sirkār, pp. lxxxix, xci and 154. Kāmbakhsh was made governor of the sūbahs of Bījāpūr and Ḥaīdarābād by his brother Shāh 'Alam Bahādur, and his coins struck at those places have been published. It is therefore not surprising to find him striking coins at the headquarters of one of his sarkārs, and this makes the reading more probable than that of Toragal, a suggestion made to me some years ago by Dr. Codrington.

5. Jahāndār. R. Weight 173 grains. '9"
Mint. Karārābād.
Date. 1124 aḥad.
Obverse. Portions of the usual legend

در افاق زد سکه چون مهرو ماه ا والفتح غازي جهاندار شاه

in three lines—the Hiji i year to the right of the centre line.

Reverse

سنه احد جلوس ضرب کواوااد

Pl. III. 15.

This is quite a new Mughal mint name and its locality is still unsettled. It must probably be sought for in the Dakhan.

6. Farrukhsiyar. R. Weight 176 grains. Size 85"
Mint. Fathābād Dhārūr.
Date 1127—4th regnal year.

Obverse

بیمروبرفرخ سیو) _{لا} ح<u>ق برسیم وزرباد که</u> زدازفضل ۱۱۲۷

Reverse

مانوس میمنت میمنت جلوس سنه ع فتع اباد ضرب دها رور

Pl. III. 16.

J. r. 31

This is also a new Mughal mint. If the reading is right and it appears to be not open to question, the mint must, I think, be identified with Dharur in the province of Aurangabad, a fort which, we read, was celebrated throughout the Dakhan for its strength and munitions of war (Elliot's History of India Vol. VII, p. 20). It also seems to have been a large centre of trade; and was made the object of attack and plunder by 'Azam Khān general of Shāh Jahān in 1040 A.H. It is further mentioned in the Muntakhab-ul-lubāb as a place where supplies of fodder and corn sufficient for a large army were available (Elliot Vol. VII, p. 278). Fathābād was a Sarkār of Aurangābād and in the list of the forts of that Province given on p. lxxxvii of "India of Aurangzeb," by B. Jādu Nāth Sirkār, is mentioned one called "Fathābād or Dhāri." It seems likely that this is the same place as the "Dhārūr" of the historians. If so, there seems no need to look further to identify the mint from which the coin now figured issued. Dharar, I find from a note on p. 12 of Elliot's History, Vol. VII, is situated on the road east of Ahmadnagar.

Farrukhsiyar. A. Weight 179 grains. Size, 1."
 Mint. Machlipatan.
 Date 1131—7th regnal year.

حق فرخ سير) المحروبر الزفضل باد بحروبر المال كلا المال كلا المال كلا المال كلا المال الما

Pl. III. 17.

This is a fine coin and adds another to the list of this Emperor's mints in silver. Mr. Bleazby has a second specimen and the mint is also known in copper.

8. Shāhjahān II. R. weight 177 grs. Size. 1"

Mint Gwālior

Date 1131—ahad.

شالا جهان Obverse. بادشاه فازى سكة إسرا میارک Reverse. سنه احد جلوس ضرب گواليار

A hitherto unpublished mint of this Emperor. Specimens of this coin are contained in my own cabinet and that of Mr. Bleazby.

It will be noticed that with the exception of the last and possibly the fifth, the identification of which is uncertain, all of the above coins issued from South Indian mints. With the disturbed state of affairs in South India between 1650 and 1750 A.D., it is not surprising to find numerous towns of little importance, except as the temporary headquarters of the wandering royal forces, issuing their own coins. There seems to be still a wide field for work on the Mughal coinage of South India. H. N. WRIGHT.

Bahādur Shāh II (A. H. 1253 to 1275). Obverse. In double circle with dots between.

محمد شالا بهادر 1709 بادشالا فازى سکھ مبارک 1259 A.H. Reverse. سنة ٦ جلوم ضرب جهالاوار 6th year. Jhālāwār.

AR. 1-15" Weight 162 grs.

The above coin was recently acquired by me. It is in perfect condition. It is not given by Webb in "Currencies of Rajputana," p 97.

At p. 100 he figures the mint mark on the reverse above and speaks of it as the panch pakhrī kā jhār.

W. Vost.

V. MISCELLANEOUS.

17. A coin of Ghazni

A (impure) or brass. Wt. 50 grs. '7"

Obverse. In circle of dots, Siva and bull. Mint mark Wood On right Ohpo (to be read from outside).

Reverse. In circle with dots ontside.

عدل لااله الا الله وحدة لاشريك له القادر بالله يميني

Apparently no margin.

This coin of Mr. G. B. Bleazby's is a most curious combination. The obverse shows a not uncommon Kuşana type, while the reverse exactly resembles the inscriptions on some of Maḥmūd of Ghazni's silver coins (Cf. No. 25, p. 314, J.R.A.S., 1847).

II. MEDLEVAL INDIA.

18. On the Gadhaiyā Coins of Gujarāt.

HISTORICAL SUMMARY.

- Cir. A.D. 420. The Hūṇas, also known as Ephthalites, a people of Tātar origin, settled in the Oxus territories, and soon thereafter commenced hostilities against the neighbouring Sassanian monarchy. Twice they suffered defeat in the reign of Varahrān V. (A.D. 419-438).
- A.D. 443-451. Yezdegerd II. (A.D. 438-457) carried on a long war against the Hūnas on the north-eastern frontier of his kingdom. Almost every year from Λ.D. 443-451 witnessed a campaign against them.
- Oir. A.D. 448. An offshoot of the Hunas invaded India, perhaps as early as A.D. 448, and made repeated invasions during the reign of Skandagupta (A.D. 455-480).
- A.D. 456. Yezdegerd II., having repelled an invasion of the Hūṇas at Khurāsān, the following year led his own forces into the country of the Ephthalites, where, entrapped in an ambuscade, he suffered a severe defeat. Encouraged by this victory, the Hūṇas, year by year made destructive inroads into the N.-E. provinces of the Sassanian Kingdom.
- A.D. 457-459. On the death of Yezdegerd II., in A.D. 457, his elder son Firuz and younger son Hormisdas contested the succession. After a civil war, lasting two years, Firuz gained the throne through the aid rendered him by the Hunas.
- A.D. 465. Firuz invaded the country of the Hunas but with ill-success. A treaty of peace being concluded, Firuz agreed to strengthen the compact by a matrimonial alliance between his daughter and the Khaqan of the Ephthalites. Firuz, however, sent not his daughter, but one of his female slaves, whereupon the Khaqan killed, or mutilated, some 300 of the Sassanian officers. Hence the war was renewed.
- A.D. 470.

 Firūz, captured with his army in a cul-de-sac, submitted to an ignominious treaty with the Hūņa Khāqān, to whom he did homage by prostration and before whom he swore to a perpetual peace. The Sassanian provinces bordering on India now came under the dominion of the Hūņas.

The Hunas under their leader Lae-lih (perhaps identical with the Rājā Lakhana Udayādita) conquered the Kingdom of Gandhāra (the Kābul Valley and the Pānjāb), dispossessing the Little Kuşanas, who about the year A.D. 425, had under Kidāra Shāh settled in that country.

- A.D. 484. Firuz in violation of his oath again assailed the Huṇas, but on a plain near Balkh his army suffered a crushing defeat. He himself and several of his sons, perished in the battle. Persia now acknowledged the Huṇas as the paramount power, and Balas, the new Sassaniau King (A.D. 484-487), paid tribute for two years. Kobād, a son of Firuz, advanced his own claim to the throne but without success, and accordingly, leaving Persia, he sought the assistance of the Huṇas.
- A.D. 487. The Khāqān of the Hūṇas eventually supplied a large army for the support of Kobād's claim. This force was on its way to Persia when news came that Balas had died without nominating any successor to the throne. No rival thus remained, and Kobād assumed the crown unchallenged. There can be little doubt that in acknowledgment of his obligation to the Hūṇas he had pledged himself to resume the subordinate position his uncle Balas had been content to hold for two years. He would thus pay tribute to the Khāqān and recognise him as lord paramount.
- A.D. 490-515. Toramāṇa, son of Lae-lih, brought under subjection to the Hūṇas the Lower Indus country and Western Rajpūtāna, also the later Gupta Kingdom of East Mālwā.
- A.D. 515-544. Mihirakula, son of Toramāṇa, overthrew the Gupta power in Western and Central India.
- A.D. 544. Viṣṇuvardhana of Mālwā in alliance with Yaśodharma, a feudatory of Narasimhagupta Balāditya of Magadha, finally defeated Mihirakula at Kahror, who on the breaking up of his Indian Kingdom retired to Kashmīr.

 "The limit of date for Hūṇa coinage is probably A.D. 544," (Rapson's "Indian Coins" page 30).

Hūṇa Coinage.

It is specially noteworthy that the Hūṇas, as their territory increased, either adapted or imitated the coinage current in the countries that they conquered. Hence we find Hūṇa varieties of (a) Sassanian, (b) Gupta, and (c) Kuṣana coins.

(a) By the year A.D. 484 the Hūṇas had become the paramount power in Persia, and accordingly they struck coins after the pattern of the Sassanian money that Firūz had issued during the latter part of his reign, say from A.D. 470-484. It would seem, however, that Sassanian coins of a considerably later date were also imitated by the Hūņas.

(b) Subsquent to the Hūṇa conquest of the Gupta Kingdom of East Mālwā, Toramāṇa caused small silver coins, hemidrachms, to be struck, resembling these of Budhagupta (A.D. 484-510).

(c) Mihirakula issued copper coins of the usual Kuşana type.

The Gadhaiyā Coins.

The Gadhaiyā coins of Gujarāt are in all probability imitations of these Hūṇa coins which themselves were imitations of the Sassanian coins struck in the reign of Fîrūz or later.*

The first Hūṇa imitations—simply rude copies of the original Sassanian thin silver pieces—were probably made by the orders of Toramāṇa. Their presence in large numbers in Mārwār justifies the influence that the Lower Indus ranges and Western Rājpūtāna came under the sway of the Hūṇas.

Later imitations show "as they recede from the prototype a more degraded representation of the original types and an increasing thickness of fabric." Mewār, Mārwār, and all Rājpūtānā are the districts in which coins of this intermediate type are still found in large numbers.

The Gadhaiyā coins exhibit this degradation in stages even more and more advanced, till to the eye of the uninitiated they seem to

^{*} That the Gadhaiya coins are ultimately derived from coins of the Indo-Sassanian type has long been known to numismatists. Cunningham in the Eleventh Volume (pages 175-176) of his Archæological Survey Reports writes: "The silver coins found near the ruins of Vajrusau Vihara of Viradeva are all of the class known "as Indo-Sassanian. Similar coins are found in Malwa and Gujarat, but they are "never inscribed. The earliest coins of the class are of large size, and their imita-"tion of the Sassanian money is direct and obvious. But the latter coins depart "more and more from the original, so that it is not easy at first sight to trace "their descent. Several specimens selected by me from the Stacy collection were "published by James Prinsep in 1837 to illustrate this descent, with a graceful "acknowledgment that the fact had been previously pointed out by me in January, "1836 (Bengal As. Soc. Journal, VI. 295, Plate XIX, Figs. 7-14). 'It is,' he says, "to Captain Cunningham that we are indebted for the knowledge of balusters, "parallelograms, and dots being all resolvable into the same fire-altar and its at-"tendants.' In 1876, or just one generation later, the same fact was proved over "again by Mr. Codrington, Secretary of the Bombay Asiatic Society. 'He select-"ed,' says Pandit Bhagwanlal Indraji, 'a series of coins to show the graduel "change of the Persian head on the obverse, and the fire-altar on the reverse, of "the Sassanian coins into the oblong button and the series of dots and lines "found on the Gadhaiya coins.' (Bombay As. Soc. Journal, Vol. XII, 325)."

present merely an oblong button or mace on the obverse, and on the reverse a medley of dots and lines. While, however, the Sassanian prototype of the reign of Firuz and the intermediate imitations are little more than thin laminæ of silver, these Gadbaiyā coins are distinctly thick for their diameter, so thick as to be almost dumpy.

Copper Gadhaiyā coius are not very uncommon, but all the specimens I have seen are of a particularly degraded type. They apparently issued from the mints long after remembrance of the original design had been entirely lost. The name Gadhaiyā Paisā still in vogue in Gujarāt applies to both the silver and the copper varieties of this type of coin.

Description of Coins.

A. Sassanian Coins of Firūz: A: Diameter 1.2 in.: very thin; weight 59 grains.

Obverse: within circle:

King's face in profile to right: pronounced nose: short beard: ear-ring with triple pendant: rose behind lobe of ear: tight-fitting necklace: sash over each shoulder: high crown with star on either side.

Legend: Kadi Piruzi (King Firūz)

Or Mazdisn Kadi Piruzi (the Ahura-mazda-worshipping Fīrūz).

Outside circle:

Above crown a crescent with star in its bosom (on some of the coins of Firuz the King's crown has two wings, one in front and the other behind).

Reverse: within circle:

Fire altar, narrow at middle, and surmounted by four rows of flame: a wing on each side of altar, near its centre: standing on each side an attendant with sword reaching to ground: to left of flame a star, and to right a crescent moon.

B. Hūņa imitations of A. R: diameter reduced but thickness increased: average weight of five coins 57 grains.

Obverse: Original design crudely copied with much blurring and loss of detail: face recognisable but nose long and very attenuated: in front of lips a snake like wavy line: legend represented by mere strokes.

Reverse: Fairly clear outline of fire-altar, flame being represented by a pyramid of dots: attendants shrunk to curved

lines.

C. Gadhaiyā Paisa imitations of B: R: diameter much reduced but thickness pronounced: average weight of twenty-one coins 62 grains.

Obverse: Face less and less discernible, resembling at last a mallet or globe-headed stud: ear much elongated and separated from head: wavy line still present.

Reverse: Arrangement of lines, parallelograms, and dots distantly suggestive of a fire-altar.

With the exception of the crescent above the crown, the latest Gadhaiyā coins in silver and all in copper have scarcely a trace remaining of the Sassanian prototype. They exhibit on one side a thick unwieldy mace in a field of dots and on the other mere rows of dots and lines.

The accompanying two Plates have been prepared from exquisite photographs taken from plaster casts of the coins by my kind friend Mr. H. Cousens, M.R.A.S., Superintendent of the Archeological Survey of Western India. On one Plate the obverse, and on the other the reverse, impressions have been so arranged as to exhibit their further and further departure from the original type.

Periods of Currency.

A. The Sassanian monarch Firûz reigned from A.D. 457-484, and the Hûna imitations followed the type of the coins of the latter part of this reign, say from A.D. 470-484.

B. The first Hūṇā imitations were current in Western Rājpūtānā during the reign of Toramāṇa in the first quarter of the sixth century. Subsequently throughout Mewār, Mārwār, and all Rājpūtānā the later Hūṇā imitations had a large circulation. They were also probably current in Gujarāt and even perhaps in Kāṭhīāwāḍ side by side with the Valabhī coinage. This latter ceased to issue after the fall of Valabhī about the year A.D. 766, and thereafter the Hūṇā imitations served as the currency for those provinces.

O. The Gadhaiyā coins, increasingly degenerate imitations of the Hūṇa imitations, were probably issued during the Chāvaḍa (A.D. 746-942), the Chālukya (A.D. 942-1243), and Vāghelā (A.D. 1244-1297) dynasties of Gujarāt, and continued to be the accepted coin of the realm till 'Alā-ul-dīn's conquest of the province at the close of the 13th century. Thus the period of currency for these Gadhaiyā coins covers more than five hundred years—a long period, but not too long if regard be exhibited by these coins.

Name.

The name Gadhaiyā or, as sometimes pronounced, Gadhiyā, is said

to be derived from the Sanskrit Gardabhiya, meaning "asinine," "of the Ass dynasty." How so strange a designation came to be attached to the coin is not very evident, but I venture to suggest the following as a possible explanation. For some twenty years after the settlement of the Hūnas on the banks of the Oxus, the reigning Sassanian king was Varahran V (A.D. 419-438), who from his devotion to the chase, and especially to the chase of the wild-ass, gained the nick-name of Varahran Gur, or Bahram the Ass[-hunter]. Now when the coins of this king began to circulate amongst his enemies, the Hūnas, these by a very evident jeu d'esprit may have dubbed the thin insignificant-looking silver pieces "Ass-money," a name that would readily "stick." Later on when imitations of coins of the same Sassanian type were struck by the Hūṇas themselves in India, the name would fall to be translated by some Prakrit form of the Sanskrit equivalent, Gardabhīya: and this designation, by a process of phonetic degeneration proceeding pari passu with the more and more degraded workmanship of the coins themselves, finally dwindled down to Gadhaiya, the term in use to-day by the common people.

[Gardabhīya=Gaddahīya=Gādahīya =Gādhaiya=Gadhaiya—ka. =Gadhaiyā].

GEO. P. TAYLOR.

III. SULTANS OF DEHLI.

19. Muhammad bin Tughlak.

Metal. Silver.
Weight. 167 grains.
Mint. Lakhnauti.
Date. x 33 A. H.

Pl. IX.

This coin has the same legends as coin No. 187 described by Thomas (vide Chronicles, Plate VI. Fig. 6), but instead of one of the legends being within a circle, both legends are arranged in square areas. This coin is unique so far as is known.

G. B. BLEAZBY.

20. Firoz Sháh III.

Metal. Silver.

Weight. 93 grains. Mint and date absent.

This is the only coin of Firoz in silver so far as our information

J. 1. 48

The legends are similar to those on coin No. 226 of the Chronicles, but that is a gold coin. The margin is too fragmentary to be read with any confidence. The coin looks perfectly genuine, but its weight is extraordinary. Could it possibly have been struck from the gold die by mistake, or was it intended for a "half-rupee"?

G. B. BLEAZBY.

Sher Sháh. 21.

Metal. Silver. Weight. 180 grains. Mint. Agra probably. Date. 948 A. H. A square rupee, believed to be unique.

Pl. IX.

G. B. BLEAZBY.

IV. MUGHAL EMPERORS.

22. An important collection of Mughal coins changed hands during the early part of the year, when the Government of the United Provinces, aided by a grant from the Director General of Archæology, acquired for the cabinet of the Lucknow Museum the coins of Mr. R. W. Ellis, recently of Lahore and now of Jubbulpore. This acquisition brings the Lucknow Museum cabinet into the very front rank as regards the Mughal period, and it is to be hoped that the authorities will take an early opportunity of issuing a descriptive and fully illustrated catalogue of their fine collection. An abstract of the rarer coins in the Ellis cabinet (which included 84 gold, 1,670 silver and 533 copper coins) has been compiled by Mr. Burn for the annual report of the Lucknow Museum for the year ending 31st March 1904, and is given

Babar. - Seven silver coins.

Humāyūn.—Three silver coins.

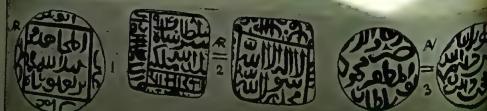

Akbar. M Two coins weighing 7.7 and 5.5 grains, respectively. One is dated 964 and has no mint, while the other is of the Fatehpür mint but is not dated.

R. The early rupees are very fine. In the Ilahi series are two round rupees of Dehli, a dated coin (48 Ilahi) of Allahābād with the couplet, and some coins of Bairāt.

Æ.—The following rare mints are represented:—Kālpi, Hissār Sirhind, Ajmir Salemgarh(?), Akbarpūr, Mālpūr Mīrath, Atak, Sahāranpūr. Jahangir.—R. Elichpar, Ahmadabad (the rare couplet of 1027

A.H.), 10 zodiacal rupees (5 signs), and a half rupee of Nur Jahan and Jahangir of the Surat mint.

Æ.-Ahmadabad coin struck in the name of Salim.

Shāh Jahān. -N. Daulatābād.

R.-Kashmir, Daulatābād, Ujain.

Æ.—Akbarābād, Bairāt, Dehli.

Two coins of the Multan mint (one in gold and one in silver) are dated 33 (julus) = 1069 (A. H.)

Aurangzeb.-R. Alamgîrpūr, Gwālior, Kābul, Nārnol, Chināpatan, Machhlipatan, Makhsusābād, Ahsanābād, and a Nithar of Shahjahanabad.

Æ.—Multān, Haidarābād, Bairāt and Akbarābād.

Shāh Alam Bahādur .- R. Multān, Chināpatan, Junagarh, Sirhind, Karimābād and Ahmadnagar.

Farrukh Siyar.—R. Murshidābād, Burhānpūr, Gwālior.

Æ.—Sūrat (?)

Rafi-ud-darjat .- R. Ujain. Muhammad Shah .- M. Kora.

R.-Ujain, Islamābād, Elichpūr.

Æ.-Machhlipatan.

Ahmad Shāh.—R. Mahindrapūr.

Alamgir II.—R. Balwantnagar, Baldat-i-Safa, Murādābād and Najibābād.

Æ.-Najibābād.

Shāh Jahān III.—R. Ahmadābād, Mahindrapūr.

Shah Alam II.—A. Najibabad, Moradabad, Narwar, Deogarh, Srinagar, Gohad, Gokalgarh, Bhopāl, Husainābād. Brindaban, Muminābād Jammun, Islāmābād Mathura, Pānipat, Najibgarh, Krishnagar, Hardwar, Muzaffargarh and Sahāranpur.

A.—Narwar, Najibābād, Sahāranpur, Islāmābād Mathura, Muminābād, Kachrauli, Baroda, Brindaban, Najafgarh.

Akbar II. R.-Muzaffargarh, Dholpur, Sheopur, Braj Indrapur and Gohad.

Æ.—Ahmadābād, Baroda, Jodhpūr and Jaipūr. Ed.

23. Rupees of Akbar of the Allahabad Mint.

A recent find of 21 silver coins in the Rai Bareli district of Oudh contained 9 rapeés of Akbar struck at Allahābād, of which three were dated 46 Ilāhi and four 47 Ilāhi. These rupees, especially those of the former year, are very scarce. The coins were acquired by Government and are in the Lucknow Museum.

Ed.

24. On Two RECENT MINT LISTS.

The current year (1904) has witnessed the publication of two noteworthy Lists of Mints-one prepared by Dr. Oliver Codrington, I.M.S., and forming not the least valuable portion of his invaluable "Manual of Musalman Numismatics"; the other compiled by Mr. R. Burn, I.C.S., and communicated to the Journal of the Asiatic Society of Bengal. The former List is characterised in a marked degree by the special qualities that distinguish the "Manual" as a whole. In order to its preparation not only scholarship and skill, but, that much rarer qualification, the faculty for patient plodding was requisite, inasmuch as the entire range of literature on the numerous classes of coins bearing either Arabic or Persian legends would seem to have been placed under contribution. It is not strange then that the resultant Mint List has assumed somewhat formidable proportions. It comprises in all the names of no less than 1,067 mints ranging from Spain in the Far West to Malaysia in the Far East. Of the various coin-groups included in this aggregate List that of the Mughal Emperors of India-or, as the "Manual," in the effort after brevity, styles them, of the "Dehli Emperors"—is not the least extensive. We find here registered 189 Indian Mughal Mints, a sufficiently remarkable advance upon the 80 recorded in the Coin Catalogue of the British Museum, or the 105 in the Lähor Museum Catalogue. work covering so vast a range, yet all comprised within 240 pages, one cannot in fairness expect detailed information regarding the coin-issues from the individual mints. It is just this detail, however, that Mr. Burn's Mint List supplies in abundant measure. we learn not merely the names of the Mughal Mints in India, but the reigns during which each several mint was in operation, and-for coin-collectors most welcome information—a cabinet in which can to-day be found specimens, whether in gold or silver or copper, of the coins struck at the different mints in the different reigns. As to place, this List is restricted to Indian Mints; and as to time, to the three centuries preceding the Indian Mutiny: yet, notwithstanding this comparatively narrow range, no less than 204 mints fail to be registered. Thus the two Lists, Dr. Codrington's and Mr. Burn's, will be found to supply material mutually complementary. Their almost simultaneous publication has placed coin-collectors, and especially those in this country, under a debt of more than ordinary obligation; and the two Lists together constitute quite the most valuable contribution of recent years to the study of (modern) Indian Numismatics.

The following notes on these two Lists may perhaps be of use for reference.

A. Re Codrington's Lists.

Mints of "Dehli Emperors;" Total 189.

But Atak and Atak Banāras are merely variant names of one mint. Similarly Aḥmadnagar Farrukhābād and Farrukhābād;

Akhtarnagar Awadh and Awadh;
Urdū, Urdū dar rāh-i-Dakhin, and Urdū Zafar Qarin;
Indrapūr, Braj Indrapūr, Maharandurpūr, and Mahapūr;
Aujan and Ūjain;
Banāras and Muḥammadabād Banāras;
Dāral taṣawwur and Jodhpūr;
Zīnat al Bilād and Aḥmadabād;
Sawā'i Jaipūr and Jaipūr;
Sītāpūr and Sītpūr;
Shāhābād Qanauj and Shergarh Qanauj;
Mustaqirral Mulk and Akbarabād;
Mūminābad and Bindrāban;
Nāgpūr and Nāgor.

*Thus the total number of mint falls by 18, that is to say from 189 to 171.

Further, the following mint-names are too doubtful to be accepted for inclusion:—

Ajāyūr, Jalūnābad, Kānān, Kāndī, Kalkata, and Nagar.

Hence the total 171 falls now to 165.

However, in Codrington's List (but not in Burn's) "Hasanabad or Husainabad" is counted as only one mint. It seems safer to regard them as two, Ḥasnābād and Ḥusainābād: in which case the total rises

^{*} In conformity with the prevailing practice both variants have been retained in the case of the following well-known doublets:—Agra and Akbarābād, Dehli and Shāhjahānābād, Aurangābād and Khujista Bunyād, Patna and 'Azīmābād, Makhauāā bād and Murshidābād.

from 165 to 166. Of these 166 mints 23 are not recorded in Burn's

B. Re Burn's List.

Mints of the Mughal Emperors of India: Total 204.

Here also each of the following groups contains merely variant names of a single mint:—

Atak and Atak Banāras;

Akhtarnagar Awadh and Awadh.

Urdu, Urdu dar rāh-i-Dakhin, and Urdu Zafar Qarin;

Asafābād Barelī and Barelī;

Banāras, Muḥammadābād Banāras, and Banāras Sirsa;

Dār al Jihād and Ḥaidarābād;

Dār al taşawwur and Jodhpür;

Salimgarh Ajmir and Ajmir;

Shāhābād Qanauj, Shergarh Qanauj, Shergarh and Qanauj;

Braj Indrapūr and Maha Indrapūr;

Mūminābād and Bindrāban;

Nāgpūr and Nāgor;

and, as before, Ajāyūr, Būtān, Jalūnabād, Kānān, and Nagar scarcely justify their claim to admission.

Hence the total in this List falls from 204 to 183. Of this latter number 40 are absent from Codrington's List.

C. The following are the 143 mints common to both Lists:-

N.B.—In this sub-list a mint's variant names are indicated by letters (b, c, and d), and the rejected mint-names by brackets. These lettered or bracketed mints may, or may not, be common to the two Lists. They are not included in making up any of the totals.

1. Etāwa or Etāwā; 2. Aṭak, 2b. Aṭak Banāras; (Ajāyūr); 3. Ajmīr, 3b. Salīmgaṭh Ajmīr; 4. Aḥsanābād; 5. Aḥmadābād; 6. Aḥmadnagar; 7. Udaipūr; 8. Urdū, 8b. Urdū dar rāh-i-dakhin, 8c. Urdū Zafar Qarīn; 9. Arkāt; 11. Islāmābād; 14. Asīr; 16. Aʻzamnagar; 17. Akbarābād; 18. Akbarpūr; 19. Akbarnagar; 20. Āgra; 22. Ilahābād; 23. Imtiyāzgaṭh 23b. Imtiyāzgaṭh Adonī; 24. Amīrkoṭ; 25. Indrapūr, 25b. Braj Indrapūr, 25c. Maha Indrapūr, (Maharandurpūr), (Maharpūr); 26. Ānwlā; 27. Ūjain or Ujjain; (Aujan); 28. Awadh, 28b. Akhtarnagar Awadh; 29. Aurangābād; 30. Aurangnagar; 32. Eliohpūr; 38. Burhānpūr; 39. Barelī, 39b. Āṣafābād Barās; 43. Banāras, 43b. Banāras Sirsa, 45c. Muḥammadābād Banāras; 44. Bindrāban, 44b. Mūminābād Bindrāban; 45. Bandar Shāhī;

47. Bankāpūr; 48. Bangāla; (Butān); 49. Bahādurpattan; Bharatpūr; 55. Bhakkar or Bakkar or Bhakkar; 57. Bhīlsa; 58. Bījāpūr; 49. Bairāta; 60. Pānīpat; 61. Pattan Dev; 62. Patna; 63. Panjnagar; 66. Peshāwar or Peshāwar; 68. Tatta; 71. Jalalpur; (Jalunābād); 72. Jalair or Jālair; 73. Jammu or Jammun; 74. Jodhpūr; 75. Jaunpūr; 76. Jūnagarh; 78. Jhānsī; 81. Jahāngirnagar; 82. Jaipur, 82b. Sawa'i Jaipur; 84. Chachrauli or Chhachrauli; 85. Chunar; 87. Chitor or Chaitaur; 88. Chinapattan; 89. Hafizabad; 90. Hasnabad (perhaps Aḥsanābād); 91. Ḥusainābād; 92. Ḥiṣār, 92b. Ḥiṣār Fīroza; 93. Haidarābād; 94. Khārpūr; 95. Khujista Bunyād; 96. Khairpūr; (Dār al jihād); (Dār al taşawwur); 99. Dāmlā; 100. Dilshādābād; 101. Dogām or Dogānw or Adogām; 102. Daulatābād; 103. Dehlī; 104. Dera; 105. Dīngarh; 107. Dewal; (Zīnat al bilād); 116. Srinagar; 119. Sürat; 112. Sārangpūr; 115. Sironj; 121. Sahrind or Sarhind; (Sītāpūr); 125. Shāhjahānābād; 126. Sholāpūr; 128. Sherpūr; 129. Zafarābād; 130. Zafarpūr; 131. Zafarnagar; 132. 'Alamgīrpūr; 134. 'Azīmābād; 135. Fathābād Dhārūr; 136. Fathpūr; 137. Farrukhābād, 137b. Ahmadnagar Farrukhābād; 138. Farrukhnagar; 139. Firozpūr; 140. Firoznagar; 141. Qamarnagar; 142. Qandahār; 143. Qanauj; 143b. Shāhābad Qanauj, 143c. Shergarh Qanauj; 143d. Shergarh; 144. Kabul; 145. Kālpī; (Kānān); (Kāndī); 147. Kaṭak; 148. Kachraulī (perhaps Chachrauli); 151. Karimābād; 152. Kashmir; 153. Kalānūr; (Kalkata); 154. Korā; 155. Khanbāyat or Kanbāyat; 157. Gulburga or Kalburga; 158. Gulkanda; 159. Gangpur; 160. Gwaliar; 161. Govindpür; 162. Guti; 163. Gorakhpur or Gorakpur; 164. Gokalgarh; 165. Lahor; 166. Lakhnau; 167. Lahri Bandar; 168. Malpūr; 169. Mānikpūr; 172. Mathurā Islāmābād; 174. Machhlīpattan; (Muḥammadābād-Udaipūr or Champānīr or Kālpī or Muḥammadābād Banāras); 175. Muḥammadnagar; 176. Makhṣūṣābād; 178. Murādābād; 179. Murshidābād; 180. Mustafa-ābād; 181. Muzaffarābād; 182. Muzaffargarh; 183. Mu'azzamābād; 184. Multān; 185. Maliknagar; 186. Mulhārnagar; 187. Mumbai, 187b. Mumbai Sūrat; 188. Mandū; 189. Mahīsūr; 190. Mīrath; 191. Mailāpūr; 192. Nārnol; 193. Nāgpūr or Nāgor; 195. Najafgarh; 196. Najībābād; 200. Nuṣratābād; (Nagar); 206. Hardwar.

Undermentioned are the 23 mints present in Dr. Codrington's

List but not in Mr. Burn's :--

10. Asfir?; 15. I'zābād?; 34. Budāun; 35. Badakhshān; 46 Binda; 51. Bhāwalpūr; 67. Tānda; 69. Jālandar; 70. Jalālābād; 77. Jahānābād; 79. Jahāngīrābād; 80. Jahāngīrpūr; 83. Chitrakūt or Chatarkot or Chatarkoh; 86. Champānir; 108 Rānajīn?; 117. Sikandarābād; 122. Siyālkot; 123. Sītpūr (perhaps Peshāwar); 126. Shikar al Gah?: 133. 'Alamgirnagar; 146. Kalinjar; 170. Maughir: 203. Hāpūr.

It is desirable that the coins represented by the entries in this sub-list be submitted anew to a careful scrutiny, inasmuch as some five or six of the mint-names stand in need of verification.

The following 40 mints are in Mr. Burn's list but not in Dr. Codrington's :-

12. Islāmbandar; 13. Isma'īlgarh or Isma'īlgarh; 21. Alwar (C); 31. Ausā; 33. Bālāpūr (C); 36. Baroda (C); 37. Burhānābād; 40. Bisaulī; 41. Baldat-i-Ṣafa; 42. Balwantnagar; 50. Bahādurgarh; 52. Bahrāioh; 54. Bharūoh (C); 56. Bhopāl (C); 64. Purbandar or Parbandar; 65. Punch; 97. Khairnagar; 98. Dādar; 106. Devgarh; 109. Ranthor or Ranthur; 110. Röhtās; 111. Zain al Bilād; 113. Sāmbhar; 114. Satgānw (C); 118. Sambhal (C); 124. Sevpūr; Karārābād; 150. Krishnagarh; 156. Kīratpūr; 170. Mānghīr; 173. Mujāhidābād; 177. Madan Kot; 194. Nāhan (C); 197. Najībgarh; 198. Narwar (C); 199. Nașrullanagar; 201. Nürgal; 202. Wālijābād?; 204. Hāthras; 205. Hānsī Ṣāḥibābād.

The nine mints beside which has been placed a bracketed (C) are indeed entered in Codrington's List, but not as mints of the "Dehli Emperor." And it must be admitted that coins from several of these mints, though bearing the names of the later Emperors, were not struck under their authority. As Mr. Longworth Dames has well said, "They merely represent the desire of the Marāthā chiefs to take advantage of the prestige still attaching to the name of Badshah."

We thus arrive at a total of 206 mints, made up as follows:-

In Codrington's Tink		T		OWB.
In Codrington's List and in E In Burn's List alone	urn's	***	143	mints.
In Codrington's List alone	***	***	40	23
enous data carrie	•••	***	23	99
	_			
	Total		900	

206 mints. Mention should here be made of four mints not registered in either of the two Lists. Mr. Nelson Wright's cabinet contains-

- (a) from the Jalnapur mint a rupee of Jahangir,
- " Mandisor Shah 'Alam II. (c) 33 " Jalālnagar " fulūs of Akbar I;

and Mr. Bleazby possesses a copper coin of Akbar II's reign struck at These four additional mints raise the total from 206 to 210. It is interesting to note that this Resultant Total is exactly double the number of Mughal Mints (105) registered in the Catalogue which, till quite recently, was recognised as the highest authority, the Catalogue of the Lahor Museum. GEO. P. TAYLOR.

Ahmadābād

V. MISCELLANEOUS.

Bengal.-Nāsir-ud-dīn Mahmūd I?

الدنيا و الدين Obverse. ناصر محمود ابو المظفر سلطان .85". N. 166 grains.

المو بد بقائيد Reverse. الرحمن خليفة الله الحجب والدروهان

Pl. IX.

This interesting coin belongs to Mr. C. S. Delmerick. ing of the inscription seems certain. Three Mahmud Shahs reigned over Bengal. The latest was Ghiyas-ud-din Mahmud of the house of Husain, and his coins are well-known and differ from this in style. The second is represented in the B. M. Catalogue by two silver coins, Nos. 103 and 104, page 42. In the footnote to the same page it is pointed out that this king used the pseudo-patronymic Abu-l-Mujāhid. There remains Nāṣir-ud-dīn Maḥmūd I. who used Abu-l-Muzaffar, and it appears reasonable to attribute the coin to him. Though the reverse reading given above agrees entirely (except in arrangement) with the inscription on the coin of Mahmud II. referred to above, the obverse reading differs, and the use of the expression Abu-l-Muzaffar seems conclusive. No other coins of Mahmud I. appear to have been published.

NUMISMATIC SUPPLEMENT

No. IV

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1 9 0 4

Vol. 73, Extra No. IV, Pp. 103-116

NOTE-The numeration of these articles is continued from p. 381 of the Journal for 1904.

IV.

Akbar's Copper Coins of Ahmadabad. (With plate). 26.

In the five years that have elapsed since my article on "The Coins of Ahmadābād" was written for the Journal of the Bombay Branch of the Royal Asiatic Society, considerable additional material has come to light, thus rendering it possible for me now to supplement, and in some few particulars to modify, the account then given. Only the other day I noticed for the first time that the Akbari Fulus struck at Ahmadabad in the Rahi years 41 and 42, though of identical type with that of Rahi 39, differed from my copper coins of Ilahī 40. These last, on the other hand, were not Fulus at all but Tankas of the same type as the coins struck in Ilahi 44 and 46. This discovery set me on a thorough reexamination of all the specimens now in my possession, with the resultant conviction that the copper coins assigned in the aforementioned article to the year 40 had been misread, and should have been attributed to the years 45 (the Fo = 45, not 40). In order to rectify this mistake and the errors consequent upon it, and with a view to bringing under contribution the most recent information on the subject, I now submit the following description of the Akbari copper coins of Ahmadabad:-

The copper coins that issued from the Ahmadabad Mint in the name of the Emperor Akbar were of three kinds-the Fulus, the Tanka and the Tanki or Tanki. All were round coins, and each bore on its obverse its distinctive designation.

A .- THE FULUS.

Whole Fulus: weight, 320 grains: diameter, 85 to 9 inch. ·7 inch.

160 ,, 17 6 inch. 80

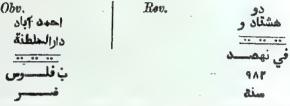

Of the Fulus three varieties were successively current.

I. The Fulus struck on Akbar's subjugation of Gujārāt in H. 980 bore the following legends (Fig. 1):-

احدد اباد الحدد اباد فلسوس فلسوس Rev. Obv. نهصدو

but this variety was issued only during the years H. 980 and 981. A half Fulus of this type is in Mr. Nelson Wright's cabinet.

II. In H. 982 and thereafter for several years the Fulus exhibited a design more elaborate and ornate (Fig 2). On the obverse the honorific epithet Dār-al-saltanat was associated with the mint name Ahmadābād, and across both the obverse and the reverse was inscribed a diameter of dots flanked both above and below by a straight line Thus:—

III. In supersession of this variety there appeared in the year Ilahī 38 (H. 1001), or perhaps earlier, a third form of Fulūs (Fig. 3.) of a markedly different design, the reverse inscription being entirely new. From the obverse legend both the technical term and the mint's title Dār-al-salṭanat are omitted, so that only the two words Fūlus Aḥmadābād survive. On the reverse above the dotted and linear diameter the term Ilahī is written in full, with its final ye swooping backwards right across the coin, while to the right we have in figures the year of issue dating from the Ilahī era. The lower half of the reverse is reserved for the Persian name of the month of issue. Thus:—

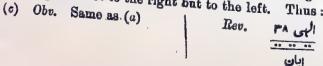

My cabinet contains a sub-variety of this type of Fulūs (Fig 4) in which the ornamental diameter composed of dots and lines is wanting on both obverse and reverse.

Mr. Framji also possesses a Fulus of this type (b) of the same year but of the month Dai.

A second sub-variety (Fig. 5) is represented in my collection but again by only a single specimen. This coin differs but slightly from the normal type (a). The final ye of the word Ilahi in the reverse legend is now protruded instead of retracted, and the figures indicating the Ilahi year of issue are placed not to the right but to the left. Thus:—

Two remarkable specimens of the Fulus are entered in the Indian Museum (Cal.) Catalogue. The obverse of each of the two is identical with that of A. III (a). The reverse, however, in one of the coins exhibits the two halves of the reverse of A. III (a) in inverted position, the normal upper half occupying the lower portion of this coin, and the normal lower half the upper portion. Thus

which is only partially legible, is entered as امرداد ... الي Both these coins

are of so exceptional a character that a full account of them is much to be desired.

B .- THE TANKA.

	Large	Tanka:	weight,	640	grains:	diameter	1:1	inch.
	Small		The state of the s	320	"		-9	
$\frac{1}{2}$	22	33	99	160	37	27	-7	23
1	22	99 1	12	80	35	99	·65	37

The earliest known specimen of an Akbari tanka from the Ahmadābād mint is dated the month Amardād of the Ilahi year 44, (Fig. 6). The tanka, in one or other of its denominations (large, small, $\frac{1}{4}$ small), issued from that mint during the next two years. Its legends read as follows:—

The reverse inscription is thus, it will be seen, of a type identical with that on the special variety of Fulus denoted above as A. III (b).

It may here be remarked that the sub-divisions, whether of the Fulus or of the Tanka, are not expressed on the coins themselves. A Fulus and similarly the Tanka, of any denomination, large or small, is styled simply a Fulus or Tanka and is so inscribed.

C .- THE TANK! OR TANK!.

Chau Tānkī: weight, 250 grains: diameter, '8 inch.

Do ,, 125 ,, 65 ,,

Yak ,, 62 ,, '5 ,,

The year Ilahi 46 witnessed the last change that was to be made in Akbar's copper coinage at Ahmadābād. From that year till the close of his reign the Tānkī took the place of the Tanka (Fig. 7 and 8). The new coin was issued in three denominations, known as the Chau (or Four) Tānkī, the Do (or Two), and the Yak (or One), and on each was inscribed its own special designation. With this exception the legend on

the Tanki was the same as on the Tanka, the component words, however, being differently arranged. Thus:—

Two specimens of a Yak Tanki (not Tanki) are known, one in Mr. Wright's cabinet and the other in my own. These exhibit on the reverse a still further variation in the arrangement of the words. Thus (fig 9.)—

The year of issue is probably 49, but on both the specimens the figures are almost entirely obliterated.

In my collection are also two specimens of "mules," cach dated Ilahi 44, Amardad, and bearing on both faces a legend identical with the normal reverse of a Tanka. Thus:—

The weight of one is 634 grains, and of the other 317, whence we may infer that they are in fact a large Tanka and small Tanka spoiled by some misadventure in the process of minting.

The following list registers all the dated Akbari coins of Ahmadābād known to me. It also includes those coins of the rarer denominations whose dates are wholly or partially illegible.

N.B.—In this list the expression, say 45 (2, 3, 4, 7) indicates coins of the 2nd, 3rd, 4th, and 7th months of the Ilahi year 45, that is to say, coins dated Ardibihisht, Khūrdād, Tīr, and Mihr of Ilahi 45: and a like meaning, mutatis mutandis, attaches to all the other expressions having the same form. Thus xx (x) denotes a coin of an unknown month of an unknown (Ilahi) year.

			A. Fulūs.			
		Whole Fnlüs	H. 980; 981 (Cal.); 98 x (Br. Mus.).			
Type I	}					
			H. 981 (Wright).			
		Quarter Fulüs				

1904.]		
[Whole Fulus	H. 982; 983; 984; 985; 986; 987; 988. Also 994 (Lahor); 995 (Lähor).
Type II	Half Fulūs	
	Quarter Fulüs	Н. 985.
!	Whole Fulus	Halī 38 (8); ? 39 (4) 3x (11); ? 40 (12); ? 41 (6); 42 (5).
Type III (a)	Half Fulüs	
	Quarter Fulüs.	
		27 20 (11)

Type III (b). Whole Fulüs; Ilahī, 38 (10) [Framji]; 38 (11). Type III (c). Whole Fulus: Ilahi 38 (8).

B. TANKA.

	Large	Hehi 44 (5, 6, 7, 8, 10, 11, 12); 45 (3, 4, 5, 7), 46 (2). "Mule." 44 (5).					
Tanka	 Small	Ilahi 44 (5, 8, 9, 11); ? 45 (1); 45 (2, 3, 4, 7 x); 46 (3). "Mule." 44 (5).					
	Half Small	Ilahī 45 (4); 4 x (1); x x (4, 5, 12, x).					
	Quarter Small	Hahī 44 (5, x); x x (x).					

C. TANKI.

	<u>Ch</u> au Tänkī	46 (9); 47 (1); ? 48 (2); 48 (4, 7, 9 x); 49 (1, 8, 4, 5, 6, 7, 9, 12); 50 (1, 8, 5); 5 x (2, 4, 6, 7).
Type I (a)	Do Tānkī	46 (11); 47 (4); 4 x (10); 5 x (4); x x (1, 6, x).
	Yak Tänkī	x x (x).

Type I (b). Yak Tăukī: ? 49 (9).

From this list it will be seen that within the limits of Akbar's

reign the following periods are still unrepresented by any copper coin of Ahmadābād:—

Deest
$$\begin{array}{c} \text{H. 989-993;*} \\ \text{H. 996--Hshi 38 (7);} \\ \text{II. 42 (6)--44 (4);} \\ \text{II. 46 (4)--46 (8).} \end{array}$$

The coins as at present known may thus be roughly classified as follows.

Period.		Class.	Denomination.	
H. 980, 981	***	Fulūs I	Whole Fulus; Half Fulus.	
H. 982—988	***	Fulūs II	Whole Fulus ; Quarter fulus.

GEO. P. TAYLOB.

27. A New Mint of Aurangzeb.

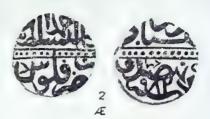

Weight, 177 grains.
Mint, Purbandar.
Date, 1116—4×.

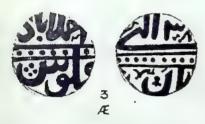

Obv.

عالم گير ۱۱۱٦ اورنگ زيب شـــالا چو بدر منير ســــکه زد در جهان

It should be borne in mind that in the year H. 991 coins were struck at Ahmadabad, by the ex-Sultan, Muzaffar III, during the five months of his resumed sovereignty.

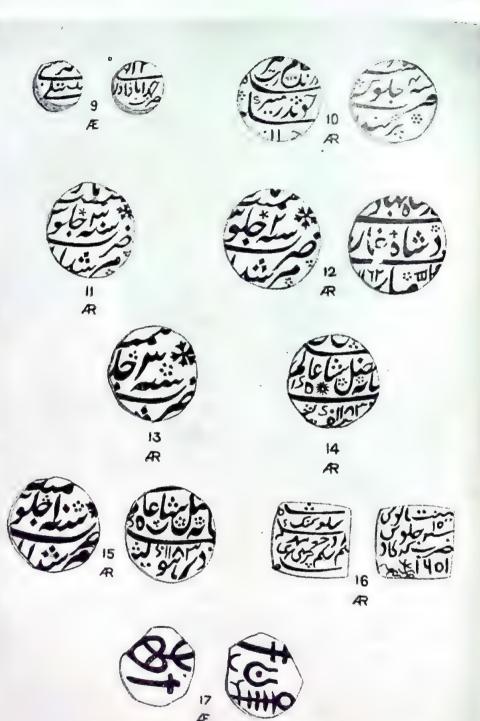

Rev م سنه چلوس

This rupee turned up in a find of 129 coins in the Bhandara district of the Central Provinces. The mint may probably be identified with Purbandar, commonly spelt Porbandar, a town on the west coast of Kathiāwār, long, 70° lat. 22° and a port of importance in early times: cf. Elliot's History of India, Vol. I, p. 444. It is not far from Junagarh which was a well-known mint in the reign of Aurangzeb.

Two other coins only from this mint are known-one in the Cabinet of Mr. G. B. Bleazby of Allahābād, and the other in the Cabinet of Dr. G. P. Taylor of Ahmadābād. The former is of the reign of Shāh Alam Bahādur Shāh, the latter of Farrukhsiyar dated A. H. 1128-

H. N. WRIGHT.

28. Coins of the Murshidabad Mint between 1748 and 1793 A.D. (With plate.)

Great difficulty has always been felt in distinguishing between the native coinage of the Murshidabad mint during the early days of the East India Company's administration of Bengal and the Company's own coinage. There appears to be no record shewing exactly when the native coinage ended and the Company's issues began.

A few facts only stand out definitely.

We know that in 1757, after the recapture of Calcutta, the Company received permission to establish a mint in Calcutta, and coins are known of 1171 A.H. (1757-8) bearing the mint name "Calcutta."

It is further known that in 1765 (1178-79), after the battle of Buxar, the Company assumed the right of coinage in Bengal.

From Regulation XXXV of 1793 we learn that the mints at "Patna, Dacca and Murshidābād" were withdrawn "soon after the commencement of the Company's administration," and that the coinage of sicca rapees was confined thereafter to Calcutta. The latest rapee, so far

1 Mr. Thurston in his paper on the "History of the East India Company Coinage" [J.A.S.B. 1893, p. 61], in talking of the copper coinage, mentions 1772 as the date of withdrawal. He states no authority for this date. The facts I mention indicate an earlier one.

known, bearing the name Calcutta, is of the year 1176 A.H. = 1762-3. Cf. Brit. Mus. Cat. No. 67, p. 277. It is generally supposed that this name was discontinued and Murshidābād substituted when the Company assumed the right of coinage in Bengal; that from 1765 (1178-9 A.H.), till the native mint at Murshidābād was closed, coins were issued bearing the mint name Murshidābād from both the Murshidābād and Calcutta Mints, and that the latter were probably an imitation of the former. Certain facts have, however, come to light which seem to render it doubtful whether the issue of Murshidābād native style rupecs from the two mints was ever carried on simultaneously, at any rate prior to 1792 A.D. when a mint was re-established at Murshidābād.

The most recent paper dealing with this subject is a very useful one by Mr. J. M. C. Johnston in the Numismatic Chronicle of 1903, Part I, p. 71. Mr. Johnston says on pp. 75-76:—

"There is little doubt but that the Nawab of Bengal continued to strike coins at his own mint at Murshidabad side by side with the Company's coins, which bore the same mint name, but were probably struck at Calcutta. The result is that for some years coins of native fabric appear side by side with others struck in a collar in European style, all bearing the mint name Murshidabad."

"In the native style it is impossible to say whether the coins were actually struck by the Nawāb or by the Company, but, as the Province was then under the control of the East India Company, it seems reasonable to place all the coins with the mint Murshidābād after the Hijrah date 1177, or with a higher regnal year than six of the nominal reign of Shāh' Alam, under the British series. All with earlier dates would naturally fall to the Moghul issues."

The classification suggested by Mr. Johnston is a practical one, as coins struck in and after 1765 (1178-9 A.H.) though issued from the Murshidābad mint must have been issued with the permission, tacit or otherwise, of the East India Company, and may therefore rightly be regarded as Company's coins. I venture, however, to hazard the suggestion that the Calcutta mint did not commence to issue Murshidābād native-style rupees until the Murshidābād mint was closed.

A hoard containing, among other coins, 119 native-style rupees of Shāh'Alam, bearing the mint name Murshidābād, has recently been acquired by Government as treasure-trove, and I have had the opportunity of examining them as Honorary Numismatist to the Asiatic Society. The hoard was discovered in the Dinājpur district of the province of Bengal and contains the following specimens of Murshidābād rupees of Shāh' Alam in native style, which give both the Hijra date on the obverse and the regual year on the reverse.

10021	A.H.		A.D.	Number of coins.
Regnal year.	21			
0	1175	`=	1761-62	1
2 3 (1175-6)	1176	200	1762-63	2
	1178	=	1764-65	2
	1180	C	1766-67	4

19	1201	=		
l l	1202	.=		
19	1205	=	= 1791-9	
19)	the above	list that,	taking th	ne mret regnar

It will be observed from the above list that, taking the first regnal year of Shāh'Alam as counting from 4th Jumāda I, 1173 (the day of his accession) to 3rd Jumada I, 1174 and so on, the Hijra dates are correctly given on the coins up to the 10th year. The British Museum possesses a rupee in native style of the 11th year, also with a correct Hijra date 1184. From the 12th year, however, the Hijra dates on the obverse no longer correspond in all cases with the regnal years given on the reverse. For instance, the date 1186 is found on a rupee of the 12th year which closed on 3rd Jumada I, 1185; and, similarly, 1189 and 1190 appear on coins of the 15th regnal year which closed in 1188. The presumption is that no native style rupees were struck in the 13th, 14th,1 16th, 17th and 18th regnal years bearing the correct regnal years. This is strengthened by a sentence in the regulation of 1793 in which it is stated that, while the 19 san rupee is the established coin of the country, "the rupees of the eleventh, twelfth, and fifteenth san were directed to be considered current equally with the 19th san sicca rupee."

¹ I find on p. 107 of the Catalogue of the Indian Museum, Calcutta a coin which is assigned to the year 14; but it seems doubtful from the legend given whether 14 is not a misprint for 10.

This latter sentence suggests the question: if rupees of the 11th. 12th and 15th san were to be considered current along with the 19th san rupee, why should rupees of earlier sanwat have been excluded, if equally struck in the Calcutta mint? A possible answer is. I think, disclosed by a close examination of the earlier Murshidabad The coins of the 2nd, 3rd, 5th, 7th, 8th and 9th years in the Dinajpur find bear, without exception, on the obverse, between the upward curve of the U of die and the s of sta a mint mark which is probably meant to represent a rayed sun. Out of 19 rupees of the 10th year, however, only three coins bear this mark. In the other 16 it is replaced by a crescent. This crescent is borne on all the rupees of the 12th (7), 15th (12) and 19th (51) san. Quære; Does the change, from the sun to the crescent mark the closing of the Murshidabad mint and the transfer of the coinage of Murshidabad rupees to the Calcutta mint? It is of course possible that this change in mint marks was only a consequence of a change in mint masters,1 but it is often a straw which shews the way the wind blows, and the suggestion I have thrown out seems to some extent supported by other circumstantial evidence. We know that the Murshidabad mint was not closed till "soon after the commencement of the Company's administration," i.e, soon after 1765 (the 6-7th year of Shah'Alam's reign). We find that the earliest European style coinage (indubitably from the Calcutta mint) begins in the 10th year or 1768-9 A.D. (see No. 25 of Mr. Johnston's list); and, thirdly, we have the exclusion in 1793 from the currency of rupees of years prior to the 11th regnal year of Shah-'Alam. (It would be natural to exclude the Calcutta-struck rupees of the 10th year because their inclusion would render difficult the exclusion of the Murshidabad-struck rupees of the same year, and the intention of the legislature seems to have been to render obsolete all native mint coins). These three points may not individually be strong ones, but when taken together and in combination with the change of mint mark also in the 10th regnal year of Shah'Alam, they seem to me sufficient to warrant an inference that the coinage of native style Murshidabad rupees was transferred to Calcutta in 1768 or 1769, and that probably before that date the issue of those coins was confined to

The Dinājpur find is also interesting in another way. Mr. Johnston, on p. 76 of his paper, suggests another method of distinguishing between native issues and Company's coinage. He says: "Fortunately

l The sun mint mark first appears on the coins of Murshidabad in the reign of 'Alamgir II. (1168 A. H.) and continued without interruption till the 10th year of Shah'Alam (1183) A.H.

there is a further distinction than that of date to be drawn between the late Moghul issues, and the continuation of the same series under the Company's rule; it is in the fact that for the first time the latter bear on the reverse the "cinquefoil" a mint mark apparently instituted at Calcutta and adopted at Murshidābād when the Company took over the mint with the administration of the district. The presence, therefore, of this mint mark on a coin bearing the Murshidābād mint name, can be can be taken as evidence that the coin should be classed in the British series."

It is true that the "cinque foil" appears on the earliest Calcutta rupee known (Nb.d in the list appended to Mr. Johnston's paper). The Dinājpur find, however, contains the following rupees of Murshidābād mint bearing, either in whole or part, the" "cinque foil" mark, vis., one rupee of Muhammad Shāh of 30th regnal year, six rupees of Ahmad Shāh of 2nd (3), 3rd, 5th and 6th regnal years, and five rupees of Shāh'Alam of the 2nd, 3rd (2) and 5th (2) regnal years, i.e., before the annexation of Bengal. It seems clear then that the presence of the "cinque foil" on the Murshidābād coins cannot be taken as evidence that those coins belong to the British series, as that mark appears on Mughal issues from Murshidābād some years before any mint was founded at Calcutta, and the right of coinage was assumed by the Company. The Calcutta mint must, therefore, have borrowed the "cinquefoil" from Murshidābād under the Mughals.

To summarise the above remarks, two special features of interest appear to me to be disclosed in the Dinājpur find—(1) the conclusive evidence that the "cinquefoil" mint mark is of earlier than Calcutta origin and cannot therefore be a guide to the classification of the "British series" coins; (2) the inferential evidence afforded by the mint marks on the coins and indirectly supported by other material that the closing of the Murshidābād mint occurred in the 10th regnal year of Shah'Alam or 1768-69 A.D., and that before that date native style Murshidābād rupees were struck at Murshidābād only and after that date at Calcutta only.

H. N. WRIGHT.

V .- MISCELLANEOUS.

29. Note regarding a silver coin found near Gargãon in the Sibsāgar district. (With plate.)

The specimen sent to me for inspection is a square coin weighing 175 grains. The edges have been clean cut, and the general appearance of the coin is of one which has apparently been recently struck.

The coin contains the following inscriptions:-

. Obverse

Reverse

¹ Siva Singha Shāh and also the moon-faced Begam Pramatheswari Shāh. Struck at Gargãon in 1651, being the 15th year of (the king's) auspicious reign.

The year 1651 is of the Sáka Era which corresponds to A.D. 1729. Siva Singha was an Ahom king who reigned from Sáka 1636 to Sáka 1666 (A.D. 1714-1744) according to Kaşi Nath Tamuli Phukon's Burauji.

The interesting point about the coin is the Persian inscription which is unusual, coins of this period generally bearing an inscription in the Assamese character and being octagonal in shape, not square. The tiger or rather dragon occurs on all the Ahom coins It will be observed that the coin bears the name of the Queen Pramatheswari in addition to that of the Rājā, the explanation being as follows: At a period in Siva Singha's reign the Parbatia Gossain and certain Pandits predicted disaster to the reigning Prince who, in consequence, abdicated in favour of his Queen Phuleswari whose name was then changed to Pramatheswari. The Queen's name was then struck on the coins in conjunction with that of her consort the Rājā Siva Singha (see page 132 of Gunabhiram Barua's Buranji, Calcutta edition).

P. R. T. GURDON.

The find contained no less than 143 of these coins.

H. N. W.

30. A local copper currency in the Dewas State, Central India.
(With plate.)

The following note has been communicated by the Minister to His Highness the Raja of Dewās, Junior Branch, through Mr. W. E. Jardine, formerly Assistant to the Hon'ble the Agent to the Governor-General in Central India. Similar notes on the other local currencies alluded to in the Minister's memorandum would be interesting, it being desirable to preserve records of such local currencies before they disappear under the spread of Brit ish Indian coinage.

H. N. W.

[&]quot;Inquiry into the payment of wages to relief-labourers has forced

The following would appear to be a more literal translation: "The coin of Siva Singha Shāh resembling the sun is struck by order of the Queen Pramathes-wari Shāh."—H. N. W.

upon my attention the copper coin difficulty similar to that I noticed at Ringnode. In this pargana, the copper coins current are the "Allote" pice. It is very strange that Allote, a pargana subordinate to Dawas, Senior Branch, should have a copper currency of its own-Whatever may have been the case before the adoption of the British Indian currency in the State, it is certainly inexplicable how, after that event, the Senior Branch should not only maintain the Allote copper currency, but even go on manufacturing new pice and putting them on the market. I at first thought that, although the Allote pice are still current, they must be the relics of times prior to the introduction of the British Indian coinage; but on careful inquiry I learn that they are manufactured anew from time to time, and I have actually secured a number of brand-new ones from a shroff, who vouches for their being not more than one month old. I examined the shroff's whole stock-several bagsful-and found "Allote" pice of different degrees of oldness or newness, call it what you like. The shroff tells me that at this very moment the manufacture is going on at Allote. To corroborate his statement, I actually sent for the artizan who is employed in the Senior Branch for the manufacture and have had it verified. He gets Rs. 7 a maund when he makes pice from plates of copper, and Rs. 3 when he simply coins ready pieces. The Allote tahsil turns out pice with a particular mint mark (an image of Siva with a "Bael" tree). The difference between the metal-value and token value, I presume, comes to the State as profit. The manner in which they manufacture the 'Allote' pice is this: They either cut up new plates of copper of the required thickness into pieces and strike the impression upon them, or recently, since plates have become dearer, they use for this purpose the copper coins of some of the neighbouring States, which are similar to the Allote pice in all respects, except the impression—such as the Kotah pice, the Gangrar pice, the Sitamau pice, the Sailana pice and so on. They get these pice, and after effacing the first impression, produce the 'Allote' impression on them, and then the pice pass off as 'Allote' pice. They get the former at 36 annas, which when converted into Allote pice sell at 32 annas. The difference, less cost of conversion, is the Senior Branch's profit."

Note by the Superintendent of the Dewas State, Senior Branch.

1. There are no means to ascertain as to the origin or exact date from which this pice was introduced in the pargana: the oldest surviving residents declare they have seen it current for generations past.

- 2. Looking at the oldest pice now current, it is seen that the design on the obverse is that of Trisūl (a three-pointed weapon) and drum with the word Shri on either side. As these are the emblems of the deities worshipped by the Puār Rājās, it is clear that this pice must have been introduced some time after the rule of the Puār dynasty was established.
- 3. Among the pice current, there are some which, in addition to the above designs, bear the mark of a tree as well, and in others there are some other modifications. These changes appear to have been introduced subsequently on additional quantities being struck to meet the requirements of the pargana.
- 4. It appears that interested parties (bankers) have, on different occasions, bought and withdrawn from circulation a large proportion of these copper, coins, in order to force up the rate of exchange and make a profit by selling the same at a higher rate. To counteract such proceedings, the Kamasdārs concerned ordered new supplies to be struck with certain modifications in the original designs of the coin, which accounts for the different changes in the designs on the obverse and reverse of the coin.
- 5. In Sambat 1928, corresponding to A.D. 1870-71, some change in the design was introduced; and again in the years 1893-94 the mark of a tree was added on to the design. This coin appears to be the latest now in circulation. The weight of the old pice is 13 mashas and that of the new ones is from 10 to 11 mashas.
- 6. Whenever a new supply was required a contractor was engaged to do the work (with rude moulds or rather iron stamps) without any cost to the State, and so the transaction never appears in the State account.
- 7. In the year 1893-94 copper coins worth Rs. 5,000 were struck, and the contract was given to Onkurlal Supkaran Das, banker, who had stipulated to buy at 16½ annas and sell at 16 annas for the rupee of Pratapgarh mint. This contract continued for two years only without any fluctuations in the rate of exchange.

III.

SULTANS OF DEHLI.

31. Muhammad bin Tughlaq, Pl. IV. 1.

A new variety of Muhammad bin Tughlaq's lighter gold coins has recently been obtained at Agra by Mr. G. Bleazby who has sent it to me for publication. An almost similar coin of the same mint was described by me in the Journal of the Royal Asiatic Society 1900, p. 775. The date of the present coin, however, is different, and Daulatābād is given the title of instead of inst

IV.

MUGHAL EMPERORS.

32. Jalāl-ud-din Akbar.

(i) Metal, Gold. Pl. IV. 2. Weight, 168 grains. Mint, Hājīpūr. Date, 983 A.H. This unique mohur was acquired from a Hindu priest shortly after the last Magh Mela at Allahābād, to which it is said to have been brought by a pilgrim from Bengal. No coins from the Hājīpūr Mint were previously known. The place is situated in the Muzaffarpūr District, Bengal, and lies on the east bank of the Little Gundak, a short distance above its confluence with the Ganges opposite Patna. Hājīpūr figures conspicuously in the history of the struggles between Akbar and his rebellious Afghān governors of Bengal, having been twice besieged and captured by the Imperial troops in 1572 and again in 1574 A. D. This mohur was struck in 1575, when apparently order was again restored. It is in fine condition and of the type of the mohur illustrated as Figure 65, Plate III. of the British Museum catalogue of Coins of the Mughal Emperors.

(ii) Metal, Gold. Pl. IV. 3. Weight, 167 grains. Mint, Jaunpür. Date, 988 A.H.

This is, I believe, the only square modur of Akbar known from the Jaunpur Mint. His square rupees from the same mint are extremely rare. The date on this modur appears in the right-hand lower corner of the obverse—a comparatively rare occurrence.

(iii) Metal, Silver. Pl. IV. 4. Weight, (looped.)
Mint, Jaunpür-Chaitaur.
Date, 976 A.H

This strange combination of names has long been a puzzle to me, which I have not yet succeeded in solving. There seems no doubt about the reading, and the coin is certainly genuine. It is of the usual type of Akbar's broad rupees from the Jaunpūr Mint (No. 96, Plate IV of the B.M. Catalogue), but with this difference that, while the name Jaunpūr appears in the usual place in the lower margin of the reverse, the word Chaitaur occurs in the upper margin on the same side of the coin. Hitherto only copper coins of Akbar were known from the Chaitaur Mint and none with two Jahānpanāh-Ujjain Mint. This coin was acquired in Lāhore some years ago.

(iv) Metal, Silver. Pl. IV. 5. Weight, 44 grains. Mint, Lahore. Date, 987 A.H.

The inscription on one side of this coin reads الله الله الله is God" and not the usual الله الله "God is great." A four-anna piece with a similar legend was published by Dr. L. White King and Captain Vost in 1896 in the paper already referred to, but although it bore the same year, it was from the Ahmadābād Mint.

It has been stated by some writers, among them the late Mr. C. J. Rodgers, that in the thirtieth year of his reign, when Akbanfounded a new religion, he changed the legends on his coins, his object apparently being that he should be looked upon and worshipped as God; and coins of the kind described above have been quoted as strengthening the assertion regarding the object he had in view. But, so far at least as these pieces are concerned, is it not more reasonable to suppose that the transposition of the words was due to a mistake in the dies which was almost immediately rectified, for if Akbar really intended to assume divine honours and to proclaim himself as God, surely these coins instead of being of the greatest degree of rarity, would be abundant even now, and the inscription would also have been found on coins of the higher denominations instead of being confined to four-anna bits?

> (v) Metal, Silver. Pl. IV. 6. Weight, 177 grains. Mint, Lahore. Date, 997 A.H.

The rupee is apparently unique, or at any rate extremely rare, by reason of the mint name appearing in the upper margin of the reverse. On this side, the name and titles of the king are given in a square with loops at the four scorners. The Kalima, with the usual accompaniment, appears on the obverse in a quadrilateral area with three curves in each side.

(vi) Metal, Silver. Weight, 176 grains. Mint, Urdū Zafar Qarin. Date, Alif = 1000 A.H.

This rupee, which is precisely similar to the mohur portrayed as Figure 79, Plate III, of the B.M. Catalogue, is probably unique. It is the only round rupee of Akbar discovered so far from the camp mint and of the year (1000) alif. It was acquired in Amritsar some years ago.

Metal, Silver. (vii) Weight, 175 grains. Mint, Ahmadnagar. Date, 4-Ilāhī.

This rare coin is of rude fabric, and, in this respect, much resembles the rupees of Akbar from the Bairat Mint. The legend on the reverse is-

مالا شهريور الهي ۴ احيد نكر ضرب

The obverse has the inscription usual on Hahi rupees.

GEO. B. BLEAZBY.

A Zodiacul Half-rupee. Pl. V. 1. 33.

A few days ago I came across in the Ahmadābād bazar a zodiacal Leo half-rupee [Legend, normal: Date, Hijri year wanting. regnal year 13; Mint, Ahmadabad]. If this be, as it seems to me to be, a genuine specimen, it furnishes evidence, hitherto wanting, of the existence of zodiacal coins of that denomination. Imitation halfrupees, indeed, bearing representations of the signs of the Zodiac. are well known (See Br. Mus. Catal. Nos. 386-401), and these themselves, qua imitations, may fairly be taken as proof more or less substantial of the currency of the original coins they counterfeit. Had there been no genuine half-rupees, it is hard to see why the so-

called "imitations" should ever have been fabricated.

Beside the recently-discovered half-rupee, three full rupees of Leo type lie before me on the table at which I am now writing. Two of the three were evidently struck from one and the same die, but the third not less evidently from a die slightly different. the two, for instance, the word نور is written as زيور with no superscribed dot over the "ze" (Pl. V. 2), but on the third as with no subscribed dots under the "ye" (Pl. V. 3). Also on the duplicates after the word in of Jahangir Shah comes a small curved flourish distinctly to the left of the "ha"; but on the third we have a longer sprawl, not to the left at all, but directly above the "ha." The two are evidently indentical with the coin No. 385 figured on Plate XI of the Br. Mus. Catal., and there styled an "imitation rupee." If these be imitations, then the third (of the type) is certainly genuine, and it is with this third specimen that the half-rupee agrees in every particular.

But, indeed, on what ground the Br. Mus. rupee No. 385 is adjudged to be an imitation I fail to apprehend. A complete statement of the differentiæ that serve to discriminate between a genuine Zodiacal muhr or rupee and the beautifully-executed "imitations," a statement more detailed, and thus more practically helpful, than the paragraph on pp. LXXXIII, f. of the Br. Mus. Catal., would, I feel sure, be very acceptable to the collectors of the coins of

this fascinating series.

GEO. P. TAYLOR.

Ahmadābād.

Note. I take the opportunity to figure yet a third variety in which the word is written without any dots (Pl. V. 4.) All three types appear to be equally genuine. I note also that on the two specimens of the "Cancer" rupee in my cabinet, the reverse legend of which is similar to that on the "Leo" rupee above mentioned, the word just also appears without dots.

H. N. WRIGHT.

Vol. I, No. 4.] [N. S.]

34. Some rare Mughal Coins.

In the hope that the following coins from my collection may be of some interest to numismatists, I beg to offer some short descriptive remarks regarding them:—

(i) Akbar. Pl. V. 5.

Æ. Weight, 306 grains. Size, '85." Mint, Sironj.

Obverse. In double circle with dots between.

مسرونے فلوس ضرب ۱۳ لہے مالا مہو

Reverse.

Date, Ilahi 38.
Month, Mihr (7th Persian month).

This is a new Mughal Mint. The coin was obtained in Bombay two years ago.

(ii) Jahangîr and Nür Jahan. Pl. V. 6.

R.
Weight, 176 grains.
Size, '85."
Date, 1035-21
Mint, Lähore

ز نام جهانگیر[بو] ۲۱ سکه د بر نور

Reverse.

Obverse.

نور جهان زد بیگنیم هورلا ۲۵ [۱۰]

The legends on both obverse, and reverse of this rupee read downwards—omitting the regnal year 21 and Hijri year (10)35, —form the following couplet:—

Zi Nām-i-Shāh Jahāngīr tā buwad sikka-i-bar nur. Fazūdah Nūr Jahān Begum ru-i-Lāhor. (May the coin by the name of King Jahangir, remain with light; And may the face of Lähore be made by Nür Jahan Begam bright).

i.e., may this coin which is struck at Lahore remain for ever shining with lustre, both from King Jahangir, and his

(Queen Consort) Begam Nür Jahan.

This rare rupee was obtained by me at Ahmadābād on my short visit to that city on 29th of January last. Rupees of Jahāngīr and Nūr Jahān from the Lāhore mint with legends forming a couplet are known. This is a new couplet altogether*:—

(iii) Aurangzeb. Pl. V. 7.

Æ. Weight, 103 grains. Size, '7" Mint Burhānpūr.

ریب زیب اورنگ [هم] اورنگ [هم] فلوس [ها] فلوس [ها] Reverse. برهانپور

A new mint of of Aurangzeb in copper, I got it at Burhanpur some two years ago.

#E. (iv) A'lamgîr II. Pl. V. 8. Weight, 105 grains.

Size, *65."
Date, 1171—4?
Mint, Machhlipatan.

Obverse. مبارک الاس الالا Reverse. به فرب فرب

This is a new mint of A'lamgîr II. in copper. The name of the Emperor is not engraved on the coin, but the year helps us in assigning it to him.

Framji J. Thanawala.

Bombay.

*Note.—The reading of the interesting coin of Jahangir suggested by Mr. Thanawālā, appears capable of improvement.

Owing to the coin being somewhat worn, it is difficult to say with certainty what the couplet is. The following is given as an alternative suggestion.

ز نام شالا جهانگیر تا شدلا پر نور Reverse. کو دور دی نور جهان روے سکھ لاهور

The words on the reverse read by Mr. Thanawala as use and so are, I think, unmistakeably and so. Similarly, I do not think that the penultimate line of the obverse can be read as a second letter is much more like a sthan a so, and it is followed by what is clearly a so. The rhythm of Mr. Thanawala's couplet also appears to be defective. Dr. Taylor of Ahmadābād, who has also seen the coin, has suggested that the last three words on the obverse read in the would make the state at the end of the penultimate line the last letter of the word stan in the second line. It is true the so of stan is not visible elsewhere on the coin but the coin is very much worn to the left of the where one would expect to find the letter so. Also there is no "alif" on the coin, and as far as I can see no room for any.

35. Dāwar Bakhsh. Pl. IV. 7.

The coins of this grandson of Jahāngir who occupied the throne of Dehli for three months as a stop-gap for Shāhjahān are so scarce that it is worth while chronicling any finds. A rupee of Lāhore mintage has been described and figured in the Catalogue of the British Museum (Moghul Emperors, No. 527). A second was contained in the collection of the late Pandit Ratan Narāin of Delhi, and the coin described below, which was obtained by me at Meerut in March last, is, I believe, the only other known. All three are identical in legend. No gold coins of Dāwar Bakhsh have apparently come to light yet, but doubtless some were struck.

R
Weight 172 grains.

The coin, but for three shroff marks on one side and four on the other, is in very good condition.

H. N. WRIGHT.

√36. Two rare coins of Shāhjahān and Aurangzeb.

Among 246 silver coins recently acquired as treasure-trove in the district of Bhandāra C.P., and sent to me for examination, two are of sufficient rarity to warrant special notice. One is a coin of Shāhjahān of Katak mint but of a new type; the second of Aurangzeb, struck at the Town of Allahābād. This latter is, I believe, one of two known, the other having been presented to me some years ago by my friend Dr. G. P. Taylor of Ahmadābād. It has not, however, been previously described.

(i) Shāhjahān. Pl. IV. 8.

H. N. WRIGHT.

37. Note on Kām Bakhsh and Bahādur Shāh.

I notice on p. 241 of the Journal, Vol. LXXII, Part I, for 1904, a statement by Mr. H. N. Wright that "Kām Bakhsh was made Governor of the Sūbahs of Bijāpur and Haidarābād by his brother, Shāh 'Alam Bahādur" [should be S.'Á., Bahādur Shāh]. I do not think that such an error, coming from a leading numismatist, should be allowed to pass without a protest. The mere fact that Kām Bakhsh issued coin in his own name suffices to

show that he claimed sovereignty.

Kām Bakhsh never held his authority from Bahādur Shah; he was either an independent sovereign, as his father intended, or a rival who had usurped part of Bahādur Shah's kingdom. By his alleged will 'Alamgir attempted to make a partition of the country between his three surviving sons; and it was in pursuance of this design, no doubt, that on the 14th Zū,l Qa'dah 1118 H. (17th February, 1707 N.S.), he nominated Kām Bakhsh to be Governor of Bijāpur and Ḥaidarābād. Kām Bakhsh started from the court at Aḥmadnagar at once to take up his appointment. 'Alamgir died on the 2nd March, 1707 (N.S.)

The exact words used in the will, as translated by James Frazer "Nadir Shāh," p. 36, are: "Whoever of my fortunate children "shall chance to rule the empire, let him not molest Mahommed "Kām Bakhsh, should he rest content with the Two New Sūbāhs." The text from which James Frazer translated was, apparently, that now in the Bodleian Library, see Sachau and Ethe's "Catalogue of Persian MSS." No. 1923 (Frazer MSS. No. 118) fol. 13a.

After doubting for a long time, I have at last come to look on this will as authentic. Khāfi Khan, II, 549, says it was made over to Ḥamīd-ud-dīn Khān, a confidential servant in the Emperor's entourage; Kāmwar Khan states that 'Alamgīr kept it, after signature, under his pillow. Immediately after 'Alamgīr's death, its provisions were appealed to by Bahādur Shāh when writing early in June, 1707 to his brother A'zam Shāh, then advancing on Agrah to contest the succession; and a copy had reached Sūrat as early as the 18th October, 1707, as may be seen from F. Valentyn, Oude en Nieun ost Indie," IV, 274. The probabilities are in favour of the document having been executed;

1 The statement quoted above was based on the following extract from the Muntakhabu-i-lubāb (Text Vol. II. p. 605) as translated by Professor Dowson (Elliot's History of India, Vol. VII, p. 405).

[&]quot;A kind and admonitory letter was addressed by the Emperor (Shāh 'A'lam I) to his brother Prince Muḥammad Kām Bakhsh to the following effect: 'Our father entrusted you with the government of the Şūba of Bijāpūr; we now relinquish to you the government of the two ṣūbas of Bijāpūr and Ḥaidarābād, with all their subjects and belongings, upon the condition, according to the old rule of the Dakhin, that the coins shall be struck and the khutba read in our name. The tribute which has hitherto been paid by the Governors of these two provinces we remit.'

and in any case, the dates show that Kām Bakhsh was appointed to, and started to take possession of, Bijāpur before his father's death.

WILLIAM IRVINE.

38. Aḥmad Shāh Bahādur. A new Mughal mint. Mujāhidābād.

This coin was obtained by me in Cawnpore two years ago. I have been unable to identify the locality of Mujāhidābād. Aḥmad Shāh at his accession took the title of Mujāhid-ud-dīn (Elliot, VIII., p. 112.).

The mint is entered in Mr. Burn's list of Mughal Mints (J.A.S.B., Pt. I., No. 2, of 1904) but the coin has been nowhere

described.

39. A find of coins at Manbhum.

A large and interesting find, containing 540 coins, from Shāh-jahān I to Shāh Alam II was recently made at Ghorati in the Manbhūm district. The find was especially rich in the Bengal and Benāres mintages of the later Mughals, Muḥammad Shāh, Aḥmad Shāh, 'Alamgīr II and Shāh 'Alam II as the following figures

	Muhammad Azimābād Jahāngīrnagar Katak Muḥammadābād Benāres Murshidābād Mūngīr	8hih 39 1 1 26 17	Abmad Shah 10 33 20	'Alamgīr 31 7 123 31	Shāh 'Alam II. 5 = 85 5 = 13 = 1 31 = 213 1 = 69 2 = 2
--	---	-------------------	---------------------	----------------------	--

Of the Muḥammadābād Benāres Mint there were coins of the 16th regnal year, and of each regnal year from the 18th to the 30th of Muḥammad Shāh, a complete series of the coins of Aḥmad Shāh and 'Alamgīr II, and coins of the first five years of Shāh 'Ālam II. The latter coins and those of 'Ālamgīr II shew a great variety of types and mint marks. The find also contained a complete series of the rupees of Aṭāmābād for the reigns of Aḥmad Shāh and 'Ālamgīr II, except in respect of the 4th year of the former sovereign; and it appears from them that the mintmark identified with the Aṭīmābād Mint in later times was first placed on the coins in 1163 A.H.—the 3rd year of Aḥmad Shāh. Rupees of Katak of Muḥammad Shāh, of Jahāngīrnagar of Muḥammad Shāh, and 'Ālamgīr II, and of Mungīr of Shāh 'Ālam II have not, as far as I know, been previously found.

The find further contained a rupee of 'Alamgir II of Calcutta mintage, a rupee of Shāh Alam II of Allahābād, with a date which, it seems to me, must be read as 1172 A.H., i.e., two years before he ascended the throne of Dehli; and a rupee of Shāh Jahān III of

Azimābād, dated 1174 A.H.

The Mūngīr rupee of Shāh 'Alam II calls for special notice. In Dr. White King and Captain Vost's paper "Some Novelties in Moghul Coins," published in the Numismatic Chronicle, Vol. XVI, a dām of Akbar was described and figured, on which the mint name Mānghīr مانكين was read, though no 'ye' is visible in the illustration of the coin. This place was identified with Monghyr in Bengal. The latter, however, is always in Persian characters spelt مرنكير, and this is the spelling found on the coin of Shāh 'Alam II in the Manbhūm find. It seems certain, therefore, that the mint town of the copper coin of Akbar above mentioned cannot have been Monghyr in Bengal. It is more probable that it was "Mānghar," a fort built by Islām Shāh Sūrī, 76 miles north of Amritsar (see Thomas's Chronicles, page 414). This would account for the Sūrī type of the reverse.

The Allahābād rupee of Shah 'Alam II, dated 1172 A.H., is puzzling. It is, I understand, not the first found, but I have myself seen no other. In Elliot and Dawson's History of India, Vol. VIII, page 172, it is stated that in the 5th year of 'Alamgīr's reign, which would correspond to 1172-73 A.H., Shāh 'Alam left Dehli after fighting a battle with Ghāzī-ud-din Khān and proceeded eastward. He was joined by the Governor of Allahābād, and proceeded to invade Bengal, with a view to "establishing his claim to the viceroyalty of the eastern Sūbahs" (Br. Mus. Cat., page 12). After his defeat at Buxar and the signing of the Treaty of Allahābād in 1765 A.D. (1178-79 A.H.) the latter place became the headquarters of Shāh 'Alam for some years.

40. Iwo double rupees of Sürat Mint.

Mr. R. F. Malabārwālā, of Bombay, has sent me for publication a double rupee of the Sūrat Mint struck in the name of Alamgir II. The Hijra date is unfortunately wanting, but the regnal year on the reverse fixes it as 1176 or 1177. Below is a description of the coin. As far as I know, the only other double rupee known is the one in the cabinet of Dr. G. P. Taylor of Ahmadābād, which he has kindly permitted me to describe in this note.

Rupees of the type of the Sūrat rupee of the Moghul Emperors were coined by the Bombay Mint. Mr. Thurston in his History of the East India Company's Coinage says (page 43): "The Nawāb's rupees, however, were soon found to contain 10, 12 or even 15 per cent. of alloy, in consequence of which the Bombay rupees were melted down and recoined at Sūrat. The coinage of silver in the Bombay Mint was suspended for twenty years, and the Sūratis alone were seen in circulation. At length in 1800 (1214 A.H.) the Company ordered the then Sūrat rupee to be struck at Bombay." As both the present rupees were issued before 1780 A.D. (1194 A.H.) it cannot be definitely stated whether they were struck by the Mughal Emperors whose names they bear or issued from the Bombay Mint.

41. " Mumbai-Sūrat" (صوبى سروت) or " Mahīsūr (مهبى سرو) which?

Grave doubt should, it seems to me, be entertained regarding the existence of the so-called "Mumbai-Surat" Mint. And for the following five reasons:-

1. The only coin attributed to this mint is the quarter-rupee registered as No. 80 on page 280 of the British Museum "Cata-

logue of Indian Coins, Moghul Emperors."

2. Neither element of this compound-name, "Mumbai-Sūrat," can be regarded as an adjectival epithet subordinate to the other element. We have here co-ordination pure and simple, produced by the mere juxtaposition of the names of two distinct mint towns. In the long list of the Mughal Mints in India I can recall no other instance of a name built up in this agglutinative fashion.

3. If the legend given in the British Museum Catalogue is true to the original, then amongst contemporary coins this quarterrupee is exceptional in recording the name of its mint simpliciter,

without the prefixed term "darb, "غرب

The crescent symbol here present, when found on other coins of this period, is held to be a mint-mark distinctive of the

French Compagnie des Indes. Now, in the 45th regnal year of Shah 'Alam II A.H. 1218 A.D. 1803-4, the year of the issue of this quarter rupee, France was still a belligerent power, harbouring hostlle designs against British India. It is thus well-nigh incredible that any coin struck in that year by the English at either Bombay on Surat, cities remote from the sphere of French influence, should hear this acknowledged symbol of French ascendency.

An autotype representation of the quarter-rupee is included in Plate XXXI of the British Museum Catalogue; but the mintname as there shown—at least in my copy—does not admit of

decipherment as Mumbai-Sūrat.

Rejecting for the above reasons the British Museum version, I venture to submit the following as the true rendering of the legend that is contained, so far as the plan admits, on the reverse of this coin :-

میبنت سده ن ۱۵ چلرس ضرب مهي سور

If this reading be correct, the quarter-rupee was struck at the Mahisur (Mysore) Mint. At Mysore the French held a dominant position till the fall of Seringapatam in 1799, and doubtless the crescent on this coin of 1803-4 stands as a survival from that

earlier period of power. A comparison of this quarter-rupee (No. 80) with the Pondicherry and Machhlipatan rupees (Nos. 128 and 143) reveals the fact that all three are of the same (French) type, bearing not only the crescent symbol, but an identical obverse impression. In all the arrangement of the words of the legend is precisely the same, and the row of diamond-shaped clusters, each of four dots, is a distinctive feature of the field.

The Lähor Museum Catalogue registers a full rupee of Mahisur, dated the 47th year of Shah 'Alam II, but unfortunately the description given of this rupee is imperfect. It would be interesting to examine the coin anew, and see whether in type and make

it is allied to the "Mumbai-Sūrat" quarter-rupee.

Query: -In the L. M. Catal. Rodgers's brief note reads:-"Year ve (for ev) and mint "." May this ve $(?=r_v...)$ stand for the regnal year "4x" preceded by a rudely formed or misshapen crescent?

GEO. P. TAYLOR, Ahmadābād.

^{*} I have ascertained from Lahor that the reverse of this coin bears the crescent symbol to the left of vis.-H. N. W.

42. A HOARD OF RAJPUT COINS FOUND IN THE GABHWAL DISTRICT.

The following analysis of a hoard of Rajput coins found at Lansdowne, in the Garhwāl District of the United Provinces, is of some interest, both on account of the contents of the hoard and on account of the place of its discovery.

The circumstances of the find cannot be better described than in the words of the owner, Major M. B. Roberts, 1/39 Garhwal Rifles. In a letter to the British Museum, dated 29th May, 1905,

he savs:-"The following is the history of the finding of these coins: My Regiment is permanently stationed at Lansdowne (a cantonment which came into existence on 4th November, 1887) in the Garhwal District of the United Provinces of Agra and Oudh (late North-Western Provinces). The station is situated on the outer range of the Himalayas between 5,000 or 6,000 feet above sea level, and lies just about half-way between Naini Tal and Mussoorie. The district is populated for the most part by Raiputs, who were supposed to have immigrated there from Rajputana at various periods up to about 1,000 years ago, I believe. On the 22nd October last, whilst having a building site for my house excavated on the top of the ridge, a number of these coins, all exactly alike, were discovered buried in a small earthenware pot about two feet below the surface. Unfortunately the earthenware pot was broken into minute fragments by the pickaxe."

The coins were 157 in number; they were of copper, often showing traces of silverplating, and they were all of the well-known Rājput typės "the bull and horseman." They are distributed as follows:—

Tomāra Dynasty of Dehli and Qanauj. Sallakṣaṇa-Pāla Deva, A.D. 978-1003.1		No.

Madana-Pāla Deva, A.D. 1080-1115. (<i>ibid.</i> page 85, Pl. IX. 15)	••	39

I The dates given are those of Cunningham.

Chauhan Dynasty of Ajmir and Dehli.

Somesvara Deva, A.D. 1162-1166.
(Soid. page 86, Pl. IX. 9) ... 21

Rājpūts of Narwar.

Chāhada Deva, A.D. 1234-1255.
(Thomas, Pathāns, page 70, referred to but not illustrated in Cunningham, op. cit. page 92)
72

Coins not completely identified.

(cf. Cunningham, op. cit. page 88) ... 14

It will be seen that the coins, which are at the same time both the most numerous and the latest in date, are those of Chāhaḍa Deva; and it is, therefore, not unreasonable to suggest that the hoard was most probably concealed during his reign.

An excellent summary of the chief events of the reign of Chāhada Deva is to be found in Thomas, Pathāns, page 67ff. His position seems to have been that of "the recognised leader and lord paramount of the Hindu princes of Central India, struggling to preserve their kingdoms from the foreign invader" (op. cit. page 68). He is described in an inscription of his descendant Ganapati (Vikrama 1355, A.D. 1298) as the founder of a family of Rajput princes reigning at Nalapura (Narwar), and his coins of the Narwar type bear dates varying from 129x to 1311 Vikrama (A.D. 1233+x to $1254)^2$; but such of his coins as occur in the persent hoard are not of the well-known Narwar type, and they would certainly seem to indicate some extension of his dominion. Ajmir would be a far more probable attribution for these coins, though the varieties of Rajput coinage have not yet been studied with sufficient minuteness to enable us in most cases, to determine their different localities with precision.8 All that can be said with certainty in regard to the locality of these coins is that they do not belong to Narwar, the characteristic types of which are quite different.

As Thomas points out (page 70), the coins bearing the name of Chähada Deva represent him either (1) as an independent sovereign, or (2) as a tributary to the Muhammadan conqueror, Shamsud-din Altamsh. All the seventy-two coins of his which are included in this hoard belong to the former class; and we may

¹ Indian Antiquary, XXII, p. 81.

Cunningham, Coins of Medieval India, p. 90, Pl. X. 5-7.

⁸ Cunningham (op. cit. p. 91) attributes these coins to Ranthambhor. But if the chronological table given by Thomas, p. 45, is correct, Ranthambhor was captured by Altamsh in Hejira 628 = A.D. 1226; and Chāhadadeva seems not to be heard of before A.D. 1234 (Thomas, p. 67).

perhaps conclude that the hoard was buried in the earlier part of

his reign before the date of his submission to Altamsh.

Major Roberts has noticed the tradition which is still preserved of immigrations of the population from Rājputāna to Garhwāl. It is extremely probable that the Muhammadan conquests were one of the chief causes of such immigrations; and the hoard, which we have examined, may, therefore, be regarded as an historical record of considerable interest.

It remains only to add that, through the generosity of Major Roberts, specimens of each variety represented in the hoard have

been added to the collection of the British Museum.

احمداباد زینت البلاد ضرب جلوبی میمنت مانوس سنة احد

I have had a rupee similar in design to this gold mohr presented by my kind friend Dr. Geo. P. Taylor, of Ahmadábád. It was Dr. Taylor who pointed out, for the first time, that Ahmadábád, like other epithets, was associated also with the tille Zinat-ul-Bulad (the Beauty of Towns). Vide his interesting article on "Coins of Ahmadábád," pages 436-437, Plate V. Volume XX. No. LVI, Journal Bombay B.R.A. Society.

F. J. THANAWALA,

Bombay.

44. A NEW TYPE OF THE COINS OF SHAH SHUJA'.

The coin described below has recently been acquired for the Lucknow Museum from a find in the Banda District.

Margin doubtful.

R. Weight, 143. Size, '75 inch.

No coins of Shah Shuja are recorded in the catalogues of the Calcutta and Lahore Museums. The British Museum Catalogue describes two coins (Nos. 690 and 691). The reading of the new coin differs from these in the case of the reverse. There is no trace of a square area, and in this respect the new coin resembles the early issues of Shah Jahan. The horizontal mark below the first line is probably part of the word sta, and the similar mark above the last line is possibly , the completion of the word I which commences in the last line. I cannot explain the letter read as, which comes between sign and sign in the first line. reading of the last line suggests that the lower margin of the reverse on both the coins described in the B.M. catalogue should is historically improbable. The right margin of Coin No. 691 is read جارت اباد. A comparison with Coin No. 690 shows that it should be صاحبقرات ثاني. The top margin of No. 691 seems to read نصير الدين,, which presents a difficulty.

R. BURN.

45. On the Identity of the Coins of Gujarat Fabric and the Surat Mammudis.

In this article I purpose submitting evidence which, in my opinion, goes to prove that the silver coins designated in the British Museum Catalogue coins of "Gujarāt Fabric" are identical with those known to early writers under the name of "Sūrat Maḥmūdīs."

- I. From the testimony of European travellers in India in the seventeenth century, it is clear that in the first half of that century silver coins of two distinct types were current in and around the city of Sürat.
 - (a) Edward Terry, "Chaplain to the Right Hon. Sir Thomas Row, Knt.," landed from the good ship "Charles" at the port of Sürat on the 25th of September, 1616 (A.H. 1025). In his "Voyage to East India," first published in 1655, he thus writes:—
 - "They call their pieces of money roopes, of which
 "there are some of divers values, the meanest
 "worth two shillings and three-pence, and the
 "best two shillings and nine-pence sterling. By
 "these they account their estates and payments.
 "They have another coin of inferior value in
 "Guzarat, called Mamoodies, about twelve-pence
 "sterling; both the former and these are made in
 "halves, and and some few in quarters; so that
 "three-pence is the least piece of silver current in
 "those countries, and very few of them to be seen.

"......Their silver coin is made either round or square, but so thick as that it never breaks, nor wears out.""

The "meanest" rupees in this passage correspond doubtless to the ordinary rupees issued by Akbar and Jahāngīr, weighing each about 180 grains; but the "best" rupees will be the heavy ones, from 212 to 220 grains each, that were struck in the first few years of Jahāngīr's reign. The ratio of the former to the latter would be 180: 220, or, as Terry has it, 27: 33. But besides these rupees a coin distinctly inferior was also current in Gujarāt, to wit, the "mamoody," worth about 12d., or a little less than half the ordinary rupee of that time.

(b) Sir Thomas Herbert, who, as Secretary to the English Embassy to Persia, journeyed in the East from 1627 to 1629 (A.H. 1037-9), writes in his "Travels"

regarding the money of "Indostan."

"The current money here is pice, which is an heavy "round piece of brass, 30 of which make one "shilling. The Mamoody, which is of good "silver, round and thick, stamped after the manner of the Saracens (who allow no images) with "Arabick letters, only importing the King and "Mahomet, is in value one shilling of our coin; and the Roopee, which is made also of like pure "silver, is 2s. 3d., and a Pardow 4s."

(c) But it is Albert de Mandelslo, resident in Sūrat in 1638 (A.H. 1048), who gives the most precise information as to the money current in "the Kingdome of Guzuratta." In his "Voyages and Travels" he

writes :-

"They have also two sorts of money, to wit, the "Mamoudies and the Ropias. The Mamoudis are " made at Surat, of silver of a very base alley, and " are worth about twelve-pence sterling, and they " go onely at Surat, Brodra, Broitchia, Cambaya, "and those parts. Over all the Kingdome be-" sides, as at Amadabath and elsewhere, they have "Ropias Chagam, which are very good silver, "and worth halfe a crown French mony. Their "small mony is of copper, and these are the "Peyses we spoke of, and whereof twenty-six " make a Mamoudy, and fifty-four a Ropia...... "Spanish Ryalls and Rixdollars are worth there " five Mamoudis.....The Chequines and Ducats of " Venice are more common there (than the Xera-"phins), and are worth eight and a half, and

t Terry: "A Voyage to East India," edition of 1777, p. 113.

2 Harris: "A Compleat Collection of Voyages and Travels," Vol. I.,
p. 411.

"sometimes nine Ropias, Surat-money, accord-"ing to the change and the rate set on the " money."

Reckoning the French crown (ccu), the Spanish real, and the German rixdollar (reichsthaler) each at 4s. 6d., and the Italian sequin and Venetian (gold) ducat each at 9s. 4d., we arrive. according to the above passage, at the following values: The "Ropia Chagam" 27d.; the Maḥmūdī, or "Ropia, Surat-money," 12d., or 13d. or 108d. or 124d. It thus appears that, while the "Ropia Chagam," which is evidently the full Imperial rupee, stood fairly constant at 27d., the value of the Surat Mahmudi fluctuated between a minimum of 10.8d. and a maximum of 13d. We should also bear in mind that the silver of the Mahmudi is here stated to have been inferior to that of the rupee; also that the district in which the Mahmudi passed as current coin was limited to the southern part of the province of Gujarāt, say from Sūrat to Cambay.

II. With what coin may we identify this Surat Mahmudi? Is

it the same as the well-known Mahmudi of Persia?

That any Persian money should have been current in Gujarāt and restricted there to merely the southern districts is certainly

very improbable.

Moreover the value of this Persian Mahmudi is given by Tavernier as one-sixteenth of the Venetian sequin, i.e., 7d. or one-eighth of the Spanish dollar, i.e., 63d. Also in the Table of Equivalences prefixed to J. P[hillips]'s English Translation of Tavernier's "Six Voyages" (1636-1667) the Persian Mahmudi is entered as 8.05d. This, then, is plainly a considerably less valuable silver piece than the Surat Mahmudi ranging from 10.8d. to 13d.

When treating of the Persian coins, Fryer, whose eight letters were written from India or Persia between the years 1672

and 1681, states—

"3 Shahees is 1 Mam. Surat; 2 Shahees is I Mamood. Persia "3

When Fryer thus definitely distinguishes between the Surat Mahmudi and the Persian, we may safely conclude that the two coins are not identical.

III. Can the Sürat Mahmudi have been a silver coin of one or other of the various types that were current in Cutch and Kāthīāwār (Navānagar, Jūnagadh, and Porbandar)?

The trade between Gujarat and Cutch, or Gujarat and Kāthiāwār, was for the most part carried on by land and not by

Mandelslo: "Voyages and Travels": English translation by John Davies, edition of 1662, p. 85.

Ball's edition of "Travels in India by Jean Baptiste Tavernier,"

³ Fryer: "A New Account of East India and Persia": edition of 1698, p 211.

sea, and the influence of this trade would thus be specially felt in the north and north-west portion of the province. It hence appears extremely improbable that any coins from Gutch or Kāthīāwār should become the circulating medium in South Gujarāt, yet not find acceptance as currency for Aḥmadabād and the north.

The coins of Cutch and Kāthiāwar may indeed have been originally called 'maḥmūdis,' but this designation soon gave place to the term 'korī,' the name that still attaches to them. Accordingly, if ever current in the Sūrat district, they would, in all probability, have been denominated not the Maḥmūdīs but the

Koris of Surat.

Lastly, these Koris, like the Persian Mahmūdis, were all of them considerably inferior in value to the Sūrat Maḥmūdī. The latter, we have seen, was reckoned at about 12d., the rupee being 27d., but the Cutch Kori is now, and was probably then too, appraised at 71d., that of Jūnagadh at 73d., of Navānagar at 76d., and of Porbandar at 85d. Or, to express these relative values in another way, in exchange for Rs. 100, 225 Sūrat Maḥmūdis sufficed; but of the Rāṇāṣḥāī Korīs of Porbandar 318 were required; of the Jāmṣḥāī Korīs of Navānagar, 355; of the Dīwānṣḥāī Korīs of Jūnagadh, 369; and of the Korīs of Cutch, 380. In fact it would seem that, while the Surāt Maḥmūdī fluctuated between half a rupee and a third, inclining to the half, the Korī ranged in value between a third of a rupee and a quarter, inclining to the quarter.

For the above reasons the conclusion is inevitable that the Kori, whether of Cutch or of Kāṭhiāwār, cannot be regarded as

identical with the Surāt Mahmūdī.

IV. Were the Surat Mahmudis the same as the silver coins

of the Gujarat Saltanat?

No reason can be given why the Gujarāt Saltanat coins should have remained current in the south of Gujarāt, yet not in the north. Indeed, bearing in mind that during the declining years of the Saltanat, say, after the death of Bahādur in 1536, its coins probably all issued from a single mint—that of Aḥmadābād—we may fairly assume that they would survive in circulation longer in the Aḥmadābād, or northern, districts than in the south. It seems incredible that coins struck in Aḥmadābād should be superseded

there and yet be accepted as the currency of Surat.

It was in A.H. 980 (A.D. 1573) that Akbar conquered Gujarāt and annexed it to his Empire. In that same year he issued coins in his own name from the Ahmadābād Mint, and we may safely affirm that thereafter he would permit no more coins to be struck in the name of the vanquished Sultān Muzaffar III. Save for the five months of A.H. 991 (A.D. 1583) when Muzaffar again held the sovereignty of Gujarāt, the minting of coins of the independent Saltānat must have ceased in the year 1573, thus some sixty-five years before Mandelslo's visit to Sūrat. Now it is surely most improbable that during all these sixty-five years the coinage—never very plentiful—of the conquered province of Gujarāt should have

maintained its standing as the recognised currency of the southern

We have already seen that the Sürat Maḥmūdī was worth just about four-ninths of the Imperial rupee, hence, had both coins been of equally good silver, the Maḥmūdī would have weighed 80 grains over against the 180 grains of the rupee. Its actual weight, however, owing to the presence of a "very base alley," must have been more than 80 grains, say between 85 and 90. Now, no silver coins of the Gujarāt Saltanat are known of this weight: they are all either much lighter or much heavier. Of fifteen silver coins of Muzaffar III, now in my possession, the weights are as follow:—

35, 36, 67, 70, 71, 72 (four), 73, 74, 110, 111, 112, and 114 grains. Of these not one could by any possibility be regarded as in value

four-fifths of a Mughal rupee.

Thus we are compelled to the conclusion that the Surat Mahmudi was not identical with any silver coin of the Gujarat

Saltanat.

V. If, now, this Maḥmūdi current in Sūrat was not the Persian Maḥmūdi, nor the Cutch or Kāṭhiāwār Korī, nor the Maḥmūdi of the Gujarāt Salṭanat, then, by the "method of exhaustion," it must have been the Coin of Gujarāt Fabric—the only remaning type. The identity of these two is confirmed by the following considerations:—

(a) All the Gujarāt Fabric coins bear impressed the name of Akbar, the conqueror of the province, and hence the Imperial Government would readily sanction the use of such coins for currency in a portion of the Empire.

(b) The dates on these coins, ranging, so far as yet known, from A.H. 989 to 1027 (A.D. 1581-1618), bring them easily within the period to which the statements made regarding the Sürat Maḥmūdī by Terry

and Herbert and Mandelslo have reference.

(c) One comes across these coins nowadays in the strip of country between Sūrat and Aḥmadābād, but they are seldom found in Kāthīāwār or in North Gujarāt. Thus it is the area in which the Sūrat Maḥmūdīs were originally current that mainly supplies us at the present day with specimens of Gujarāt Fabric coins.

(d) And—most important of all—the average weight of these Gujarāt Fabric coins which now come to hand proves to be 85 grains. Hence we may infer the original weight to have been about 90 grains. Considering both their base material and their weight, the money-value of such coins would bear to that of the Akbarī or ordinary Jahāngīrī rupee a ratio of just about 12: 27—the ratio affirmed by Mandelslo to subsist between the Sūrat Maḥmūdī and the "Ropia Chagam."

If, then, as the conclusion of the whole matter, we may regard

the Gujarāt Fabric coins as identical with the Sūrat Maḥmūdīs, we may further unhesitatingly accept as true Mandelslo's express statement that these coins were "made at Sūrat." For a currency purely local there was a purely local mintage. The capital city of the province, Aḥmadābād, issued imperial rupees in the very year of the imperial conquest; but soon thereafter the less important city in the south, Sūrat, opened with, we may well believe, imperial sanction, a mint of its own, whence for some forty years issued not indeed "Ropias Chagam" but the Sūrat Maḥmūdī, known to-day as the coins of "Gujarāt Fabric."

Ahmadabad.

GEO. P. TAYLOR.

V.-MISCELLANEOUS.

46. On some "Genealogical" coins of the Gujarat Saltanat.

On the occasion of a recent visit to Bombay it was my good fortune to visit the rooms of the Bombay Brauch of the Royal Asiatic Society in the company of my kind friend Mr. Framji Jamaspji Thanawala. He had previously written me that in the Society's cabinet he had discovered two coins of the Gujarāt Saltanat, remarkable since bearing the pedigree of the regnant Sultān traced back, in each case, to the founder of the dynasty. Two such, if we may so call them, "genealogical" coins of Gujarāt have already been published, one in Thomas' "Pathān Kings," and the other in the Journal of the Bo. Br. R.A.S. No. LVIII. A description of all the four coins now known of this extremely rare type may prove of interest.

1. Vide Thomas: "Pathan Kings," page 352.

R.
Weight, 172 grains.
Date, A.H. 828 (by a misprint entered in Thomas as A.H.
823), A.D. 1424-25.

10. NUMISMATIC SUPPLEMENT No. VII.

Note.—The numbering of the articles is continued from p. 274 of the Journal and Proceedings for 1905.

II. MEDLÆVAL.

47. A NEW MEDIEVAL GOLD COIN.

Obverse and reverse identical बी धिर

Two specimens were found at Pandwaha in the Jhānsī District, United Provinces. They weigh 65 and 66 grains respectively. One is fairly round with a diameter of '8", and the other is irregularly shaped and measures '8" to '9" inches. The full inscription does not appear on either coin, but is fairly certain. In addition to the letters given above there appear to be two symbols at the end of each line, but I cannot read them as letters or figures. Similar marks occur at the end of the

inscription on the coins of Gobind Chandra of Kanauj.

I would identify the king who struck these coins with Siddha Rāju Jaya Simha Chaulukya of Anhilvāda, who succeeded his father in 1098 and reigned till 1143. He was a great warrior and conquered the ruler of Mālwā (Naravarman or Yaśovarman). Some inscriptions referring to him have been published in Ind. Ant. VI, 186; X, 158; and Ep. Ind., I, 295. Much more information has, however, been derived from literary works, and is condensed in the Bombay Gazetteer, Vol. I. Early History of Gujarāt, from notes by the late Dr. Bhagvānlāl Indrajī. For present purposes the most interesting item is his contest with Madanavarman Chandel of Mahobā (1130—1164), the issue of which was doubtful. The two rulers appear to have become friendly in the end.

A peculiar feature of the coins is that they bear no representation of a deity, such as is usual on coins of the period Siddha Rāja was a Saiva, but also had leanings

towards Jainism.

R. BURN.

III. PAŢHANS OF DELHI, &c., &c.

48. Some rare Copper Coins of the Nizam Shahi or Armadnagar Dynasty of the Dakhan.

Burhān I.

No. 1. Weight, 158 grains.

Mint, Nagar.

Date, 929 A.H.

انگر Obverse. انگر Reverse. انگرور في انگرور

Murtaza I.

No. 2. Weight, 243 grains.
Size, '9'
Mint, Murtazanagar.
Date, 993 A.H.

الموب موتفع موتفع المر المورفع Reverse.

In spite of the absence of the names of the kings, from the date and mints on these coins, there is no hesitation in saying—until full specimens are found,—that they were issued by Burhan I. and Murtaga I., respectively.

Burhān I? or Burhān II?.

Nos. 3, 4 and 5. Weight, 146, 148 and 150 grains, respectively.

Size, '75," '7" and '75", respectively.

Mint, Daulatābād.

رهان نظام . Obverse. Reverse. Reverse. دولتا بلا

From the upper halves of the obverses of each of these three Daulatabād coins, we can, with certainty, read that the name of the king is Burhān Nizām. The legends on the lower halves of the obverses are a great puzzle to me, and I hope that some well-experienced numismatists might throw some additional light on these coins.

As these coins are dateless, we cannot say positively whether they were issued by Burhān Nizām II.

All the five (5) coins I obtained some eight years ago from Sholapur, through my kind friend Mr. Cowasjee Eduljee Kotwall of this place.

That well-known numismatist, the late Mr. C. J. Rodgers,

has described and figured two copper coins (among others) No. 1 and No. 2 in his interesting article on "Rare Mughal Coins," published in Journal A. S. Bengal, Part I, Vol. LXV, 1896, from Burhānābād Mint, as coins of Akbar of the year 1001 A.H. Mr. Rodgers writes: "What the mint may be I cannot conceive. Is it a capital "","

The style and lettering of these coins very closely resemble those of the three Daulatābād Burhān Nizām's coins, and assuming Burhanābād to have been founded by one of the two Burhān Nizāms, could it not be possible that they may have been issued by Burhān II, a contemporary with Akbar the great in A.H. 1001 instead of by Akbar himself.

In order to have a close comparison of Burhānābād coins with the Daulatābād coins (Nos. 3, 4 & 5) the following coin No. 6 from my cabinet, will, I think, prove useful, as it is a complete

coin : -

No. 6. Weight, 220 grains.

Size, '85'.

Date, both in words and in figures, 1001.

FRAMJEE JAMASJEE.

49. THE BAHMANI KINGS.

Dr. Codrington has given a valuable summary of what is known regarding the numismatic history of the Bahmani dynasty in an article published in the Numismatic Chronicle for 1898 (p. 259). A more recent study by Major Haig, entitled Some Notes on the Bahmani Dynasty, which appeared in our Journal for 1904 (extra number, p. 1.) is chiefly concerned with the genealogy of the line. A few additions can be made to Dr. Codrington's list, and some conclusions of Major Haig's confirmed, from a find of coins which was recently discovered in a village called Bedidhana, in the Betül District, Central Provinces

Provinces.
The coins, which are all of copper, and numbers 869, may be roughly classified as follows:—Firoz Shāh (22), Aḥmad Shāh III (363), Humâyūn Shāh (36), Shāh I. (29), Aḥmad Shāh III (363), Humâyūn Shāh (36), Nizām Shāh (26), Muḥanımad Shāh (375), and Maḥmūd Shāh (13). The remaining five were illegible. Almost all the coins (13). The remaining five were illegible. Almost all the coins were in excellent condition, neither worn nor corroded. A complete description has been recorded in MS. as Report

No. 21 B. of 1906, from which the following notes are extracted as they refer to novelties. In quoting Dr. Codrington's paper, the initial O.C., with the page of the Numismatic Chronicle and the numbers of the coin-type there quoted, will be used. The British Museum Catalogue, Muhammadan States, is referred to as B.M.C.

FIROZ SHAH, 8th KING.

The type B.M.C. No. 453 is represented by 22 specimens. The B.M.C. notes that the reverse has traces of a marginal inscription. O.C. No. 1, p. 266, does not refer to this. One of the coins now found reads... عمر عمر and the other... It is uncertain whether these dates should be read as (8)11 and (8)15 or as (8)21 and (8)25.

AHMAD SHAH I, 9th KING.

(a) The parentage of this king is discussed by Major Haig (p. 8), who refers to a copper coin bearing the inscription 'Ahmad Shāh bin Ahmad Shāh bin Bahman Shāh.' Unfortunately that coin is not dated, and the Kunya (not quoted) is said to differ from that on coins which can certainly be attributed to Ahmad Shāh I. Dr. Codrington publishes a coin with the following inscription:—

المسدّرتق بالله الحنان المذان الغني

سلطان احمد شالا بن احمد بن الحسن اليهمني

He ascribes it to Ahmad Shāh II, but gives no grounds for this assumption (No. 1, p. 267). A coin in the find now being described bears exactly the same inscription, but is dated (8) 33. The new date is fairly conclusive that both these coins should be assigned to Ahmad Shāh I, while other evidence confirms this ascription. In the first place, the coins are of what is known as the first size (weight about 245 grains), but their inscription differs completely from that of the coins of this size, which can positively be assigned to Ahmad Shāh II (O.C. No. 2, p. 268; B.M.C. No. 461), and I cannot trace a given standard during the reign of a single king. Secondly, Major Haig pointed out that the ascription of his coin to Ahmad apparently the son of Ahmad Khān. The latter never ascended as 'Shāh' on his son's coin. The two coins, which I now propose to assign to Ahmad Shāh I, purport to be of Ahmad Shāh, son of Ahmad Shāh I, purport to be of Ahmad Shāh, son of Ahmad, the father's name having no title, either

of Shāh or Khān, affixed to it. Dr. Codrington's coin seems to have no room for such a title, and the specimen now described has even less, though it is not so valuable for this purpose as the other is. I have some doubt whether the last line of the reverse should read ابر العباني or بالعباني or العباني or العباني or. Codrington's remark that this type is common is hardly borne out by the Betūl find, which had only one specimen.

(b) In describing another type of the copper coinage of Ahmad Shāh I (O.C. No. 1, p. 267; B.M.C. No. 454), Dr. Codrington refers to two doubtful matters. His reading of the third line of the obverse as الملك العنان is confirmed by some of the specimens now found. The words on the top of the reverse are also now read with certainty as بعضري, the coin being held upside down for this purpose. To the dates read by Dr. Codrington (836—3) may be added 832. I also read 827 on one coin of this type, but the mint is not legible.

AHMAD SHAH II, 10th KING.

(a) A single coin like O.C. No. 2, p. 268 (B.M.C. No. 461) confirms the reading of مختل for the top line of the obverse, but is not absolutely free from doubt.

(b) To the dates given by Dr. Codrington for B.M.C. No. 462 (O.C. No. 4, p. 268) may be added 842, 845, 848,

850, 852—3, 859 and 860.

(c) Neither by Dr. Codrington (O.C. No. 3, No. 268), nor in the B.M.C. is it noted that No. 467 in the lutter has a marginal inscription on the obverse. This is not complete on any one of the 76 coins of this type now found, but it certainly includes منجة الله first of which is probably منجة, the second being quite uncertain. New dates for this type are 850—2, 856 and 860.

(d) To the dates given by Dr. Codrington (No. 5, p. 268)

for the type B.M.C. No. 470 can be added 83 and 853.

Humayun Shah.

(a) Dr. Codrington describes a new type of Humāyūn's coins in No. 2, p. 269. He has not been able to complete the reading of the obverse, and describes the reverse as similar to that on B.M.C. No. 472. Ten coins in the Betūl find give the following reading:—

همايونشالا المقوكل المقوكل بن احمد شالا علي كرم الله الولي البهمذي الحذان الغذي

(b) I first read the coin described below as a new type of Humāyūn Shāh (4th size).

بالله المعتصم ابو المظفر

همايونشالا السلطان

The unit figure is, however, doubtful (possibly 9), and there is almost certainly a line above the name, so that the coin is probably one of Nizām Shāh or Muhammad Shāh.

NIZĀM SHĀH, 12th KING.

(a) Dr. Codrington gives only the date 866 for his type No. 3, p. 269. To this can be added 867 (reversed on the coin—768).

MUHAMMAD SHAH, 13th KING.

To the dates given by Dr. Codrington for the type B.M.C. No. 474, can be added 869, 884 and 886 in the first size, 873 in the 2nd size, 807 (? 870) and 882 in the 3rd size.

Specimens of all the varieties referred to in this note

will be acquired for the Indian Museum.

R. BURN.

IV. MUGHALS.

50. MUGHAL MINT TOWNS.

Toragal.

In Part I of the Journal, Vol. LXXIII (1904), Numismatic Supplement, pp. 240-241, Mr. H. N. Wright identifies a mint town of Aurangzeb, Kam Bakhsh, and Fairukhsiyar, as Nurkal or Nürgal, "the chief town of a surkār in the province of Bijapur." He relies on entries upon pp. lxxxix., xci, and 154 of Mr. Jadunath Sarkār's "India of Auraugzeb." It is hardly necessary, perhaps, to point out that Mr. Sarkar was working from Persian manuscripts only; and that the correct decipherment from them of personal and place names is exceedingly difficult, and the result in obscure cases is nearly always open to question. The manuscripts of the Chahar Gulshan, the work which Mr. Sarkar was using, are more than usually corrupt and indecipherable. Thus no great reliance can be placed on the reading Nurgal until verified by independent evidence. So far this identification on paper has not been followed by any attempt to locate the town upon the map. This farther stage, I think, I can now supply, coupled with an emendation of the reading by substituting Torayal for Nurgal.

In the Ma, õsir-ul-umarā, I, 288, line 11 (biography of Amānat Khān No. 2), there is the following passage: "When in the end

of year 33" [First Ramazān 1100 to 30 Sha'bān 1101 H., June 20th, 1689 to June 7th, 1690] "the victory-bearing standards were "set in motion from Qasbah Badari, seventeen kos to the north "of Bijāpur, the victorious tents were erected in the vicinity of "Kalkalah in the division of Toragal [variant, Nūrgal], which "is situated to the south of Bijāpur, at a distance of twelve "kos and on the banks of the river Kishna, the said Khān....."

This Kalkalah is evidently identical with the Galgali of Sheet No. 41 of the Indian Atlas, a place on the right bank of the Kishna (or Kistna) river, and in the present Bijāpur district. It was more than once the site of 'Ālamgīr's camp, and, on one occasion, he remained there for more than four years—See the Ma,āṣir-i-'Ālamyīrī' pp. 335 (arrival in year 33), 338 (departure for Bijāpur for fourth time in year 34), 345 (leaves Bījāpur for Galgali in year 35), 370 (departure for Bijāpur for fifth time in year 39). It was at Galgalī that the Neapolitan traveller, Gemelli Careri, paid

his visit to the emperor's camp.

If Kalkalah (Galgalī) in the S.-W. corner of the Bijāpur district was within the division of Toragal (Nūragal), it follows that the latter place cannot be very distant. Turning to the maps in Vol. XXIII (Bijāpur) and Vol. XXI (Belgaum) of the "Bombay Gazetteer," we find on the south-western boundary of the one and the eastern boundary of the other a name "Toragal," having Mudhol on the north and Ramdurg on the south of it. These are the names of two southern Mahrattah native states, and an account of them will be found in Vol. I, Part II, of the "Bombny Gazetteer."

Referring next to Sheet No. 41 of the Indian Atlas, we find in the Ramdurg state a town Toragal on the Malprabha river, an affluent of the Kishna. It is situated in 75°17′ long. 15°57′ lat. (approximately), and about 36 miles as the crow flies to the south of Galgali The delineation on the maps shows it to have been an extensive place, and, apparently, it was at one time fortified. It is a town of considerable antiquity, the head of the Toragal "six-thousand" [villages?] in the Kalyāni kingdom of the Western Chālukyās, and is mentioned in 1187 and 1222 A.D. ("Bo. Gaz." I, Part 2, pp. 431, 465, 523).

I submit that this Toragal is the Mughal mint town we are in search of, and that the reading of Nūrgal should be abandoned for that of Toragal. As the Mughals did not occupy the Bijāpur kingdom until 1097 H (1686), in the 30th year of Aurangzeb, none of their coins can have been issued at Toragal before that year.

WM. IRVINE.

51. Some Dates relating to the MUGHAL EMPERORS OF INDIA.

The following two Lists embody the results of a recent endeavour to ascertain, as accurately as may be, all dates that go to determine the periods, during which coins were issued by the

باللة المعتصم ابو المظفر

همايونشالا السلطان

The unit figure is, however, doubtful (possibly 9), and there is almost certainly a line above the name, so that the coin is probably one of Nizām Shāh or Muhammad Shāh.

NIZĀM SHĀH, 12th KING.

(a) Dr. Codrington gives only the date 866 for his type No. 3, p. 269. To this can be added 867 (reversed on the coin—768).

MUHAMMAD SHAH, 13th KING.

To the dates given by Dr. Codrington for the type B.M.C. No. 474, can be added 869, 884 and 886 in the first size, 873 in the 2nd size, 807 (? 870) and 882 in the 3rd size.

Specimens of all the varieties referred to in this note

will be acquired for the Indian Museum.

IV. MUGHALS.

50. MUGHAL MINT TOWNS.

Toragal.

In Part I of the Journal, Vol. LXXIII (1904), Numismatic Supplement, pp. 240-241, Mr. H. N. Wright identifies a mint town of Aurangzeb, Kam Bakhsh, and Fairukhsiyar, as Nürkal or Nūrgal, "the chief town of a surkār in the province of Bijapur." He relies on entries upon pp. lxxxix., xci, and 154 of Mr. Jadunath Sarkar's "India of Aurangzeb." It is hardly necessary, perhaps, to point out that Mr. Sarkar was working from Persian manuscripts only; and that the correct decipherment from them of personal and place names is exceedingly difficult, and the result in obscure cases is nearly always open to question. The manuscripts of the Chahar Gulshan, the work which Mr. Sarkar was using, are more than usually corrupt and indecipherable. Thus no great reliance can be placed on the reading Nurgal until verified by independent evidence. So far this identification on paper has not been followed by any attempt to locate the town upon the map. This farther stage, I think, I can now supply, coupled with an emendation of the reading by substituting Torayal for Nūryal.

In the Ma, ñgir-ul-umarā, I, 288, line 11 (biography of Amānat Khān No. 2), there is the following passage: "When in the end

of year 33" [First Ramazān 1100 to 30 Shabān 1101 H., June 20th, 1689 to June 7th, 1690] "the victory-bearing standards were "set in motion from Qasbah Badari, seventeen kos to the north "of Bijāpur, the victorious tents were erected in the vicinity of "Kalkalah in the division of Toragul [variant, Nūrgal], which "is situated to the south of Bijāpur, at a distance of twelve "kos and on the banks of the river Kishna, the said Khān....."

This Kalkalah is evidently identical with the Galgali of Sleet No. 41 of the Indian Atlas, a place on the right bank of the Kishna (or Kistna) river, and in the present Bijāpur district. It was more than once the site of 'Ālamgīr's camp, and, on one occasion, he remained there for more than four years—See the Ma,āṣir-i-'Ālamyīrī' pp. 335 (arrival in year 33), 338 (departure for Bijāpur for fourth time in year 34), 345 (leaves Bijāpur for Galgalī in year 35), 370 (departure for Bijāpur for fifth time in year 39). It was at Galgalī that the Neapolitan traveller, Gemelli Careri, paid

his visit to the emperor's camp.

If Kalkalah (Galgalī) in the S.-W. corner of the Bijāpur district was within the division of Toragal (Nūragal), it follows that the latter place cannot be very distant. Turning to the maps in Vol. XXIII (Bijāpur) and Vol. XXI (Belgaum) of the "Bombay Gazetteer," we find on the south-western boundary of the one and the eastern boundary of the other a name "Toragal," having Mudhol on the north and Ramdurg on the south of it. These are the names of two southern Mahrattah native states, and an account of them will be found in Vol. I, Part II, of the "Bombny Gazetteer."

Referring next to Sheet No. 41 of the Indian Atlas, we find in the Rāmdurg state a town Toragal on the Malprabha river, an affluent of the Kishna. It is situated in 75°17' long. 15°57' lat. (approximately), and about 36 miles as the crow flies to the south of Galgali The delineation on the maps shows it to have been an extensive place, and, apparently, it was at one time fortified. It is a town of considerable antiquity, the head of the Toragal "six-thousand" [villages?] in the Kalyāni kingdom of the Western Chālukyās, and is mentioned in 1187 and 1222 A.D. ("Bo. Gaz." I, Part 2, pp. 431, 465, 523).

I submit that this Toragal is the Mughal mint town we are in search of, and that the reading of Nūrgal should be abandoned for that of Toragal. As the Mughals did not occupy the Bijāpur kingdom until 1097 H (1686), in the 30th year of Aurangzeb, none of their coins can have been issued at Toragal before that year.

WM. IRVINE.

51. Some Dates relating to the Mughal Emperors of India.

The following two Lists embody the results of a recent endeavour to ascertain, as accurately as may be, all dates that go to determine the periods, during which coins were issued by the

several Mughal Emperors of India or by the Claimants to the Imperial throne. The lists hitherto published are not only extremely meagre but inconsistent in at least some of their details, and hence one feels a natural hesitation in accepting any of the figures they contain. In preparing the List A now submitted, I have consulted various authorities, which, in order to facilitate verification, have, in every case, been duly recorded. The dates entered are given first according to Hijri reckoning, but, with the aid of Sir A. Cunningham's well-known "Tables," have all been converted into the corresponding dates of the Christian era.

In List B will be found, opposite the name of each Mughal Emperor or Claimant, the period during which he may be held to have caused coins to be struck, and next, on separate lines, are given the dates of the earliest, and of the latest, known specimens in gold or silver or copper, of each reign. In order to discover in every case which were the earliest and which the latest coins known, I laid under contribution the published catalogues of the British, the Indian (Calcutta), and the Lahor Museums, but for the purposes of my search quite the most valuable material consisted of certain MS. "returns" kindly supplied me by the following gentlemen, to all of whom I desire to tender hearty thanks:— Messrs. G. B. Bleazby, R. Burn, Framji J. Thanawala, L. White King, and H. Nelson Wright.

Abbreviation :-

E.D. = Elliot's "History of India as told by its own Historians," edited by Ďowson, 8 vols. Ersk. = Erskine's " History of India under Baber and Huma-

yun," 2 vols.

Beale = Beale's "Oriental Biographical Dictionary," revised by Keene.

A.A. = "Ain-i-Akbari," translated by Blochmann and Jarrett,

When three separate figures are employed to express a date, the first represents the day, the second the month, and the third the year; thus:--

29: X: 1627 A.D. = 29th of October, 1627 A.D.; 26: VIII: 1076 A.H. = 26th of Rajab, 1076 A.H.].

LIST A.

1. Bābar:

Accession, 15: VIII: 932 A.H., Fri., 27: IV: 1526 A.D.; Death, 5: V: 937 A.H., Sun., 25: XII: 1530 A.D. See Ersk. I: 437, 517; E.D. IV. 257; V. 118.

2. Humāyūn: (a) First Reign:

Accession, 9: V: 937 A.H., Thur., 29: XII: 1530 A.D.; Defeat, 10: I: 947 A.H., Mon., 17: V: 1540 A.D. See E.D. V: 118; Ersk. II: 187.

(b) Second Reign:

Vol. III, No. 1.] Numismatic Supplement VII.

Victory, 4: IX: 962 A.H., Tues., 23: VII: 1555 A.D.; Death, 15: III: 963 A.H., Tues., 28: I: 1556 A.D. & See Ersk. II. 520; E.D. V. 240.

3. Akbar I:

Accession, 2: IV: 963 A.H., Fri., 14: II: 1556 A.D.; Death, 12: VI: 1014 A.H., Tues., 15: X: 1605 A.D. See E.D. V. 241, 247; VI. 115.

4. Jahangir:

Accession, 20: VI: 1014 A.H., Wed., 23: X: 1605 A.D.; Death, 28: II: 1037 A.H., Mon., 29: X: 1627 A.D. See E.D. VI. 284, with correction in A.A. J. 212, 213; E.D. VI 435.

Dāwar Bakhsh:

Accession, circa 28: II: 1037 A.H., Mon., 29: X:1627 A.D.; Deposition, 2: V: 1037 A.H., Sun., 30: XII: 1627 A.D.; Death, 26: V: 1037 A.H., Wed., 23: I: 1628 A.D. See E.D. VI. 435, 436, 438 and note 2.

5. Shāh Jahān I:

Accession, 18: VI: 1037 A.H., Thur., 14: II: 1628 A.D.; Deposition, 17: IX: 1068 A.H., Tues., 8: VI: 1658 A.D.; Death, 26: VII: 1076 A.H., Mon., 22: I: 1666 A.D. Coins continued to be struck in the name of Shāh Jahān I. till 4: IX: 1069 A.H., Mon., 16: V: 1659 A.D. See E.D. VII. 6, 226, 229, 241, 275.

Shujā'.

Rebelled early in 1068 A.H., which year began on Tues., 29: IX: 1657 A.D.;
Defeated, circa 1: IX: 1070 A.H., Tues., 1: V: 1660 A.D.;
Died in 1071 A.H., which year lasted from 27: VIII: 1660 till 16: VIII: 1661 A.D.
See E.D. VII. 213, 214, 241, 253, 254; Beale, 392.

Murād Ba<u>khsh</u>:

Rebelled early in 1068 A.H., which year began on Tues. 29: IX:1657 A.D.;
Arrested, 4: X: 1068 A.H., Fri., 25: VI: 1658 A.D.;
Died, 21: IV: 1072 A.H., Wed., 4: XII: 1661 A.D.
See E.D. VII. 132, 213, 214, 229.

6. Anrangzeb 'Alamgir I:

Accession, I: XI: 1068 A.H., Wed., 21: VII: 1658 A.D.; Death, 28: XI: 1118 A.H., Thur., 20: II: 1707 A.D. Aurangzeb deferred the issuing of coins struck in his own name till 4: IX: 1069 A.H., Mon., 16: V: 1659 A.D. See E.D. VII. 229, 241, 386. A'zam Shāh:

Accession, 10: XII: 1118 A.H., Tues., 4: III: 1707 A.D.; Defeat and death, 18: III: 1119 A.H., Sun., 8: VI: 1707 A.D See E.D. VII. 387, 391, 398—400.

Kām Bakhsh:

Assumed imperial power soon after the death of Aurangzeb, q.v.;
Defeated and killed, circa 1: XI: 1119 A.H., Tues., 13: 1: 1708 A.D.
See E.D. VII. 389, 390, 406—408.

R. BURN.

V. MISCELLANEOUS.

53. Coins of 'All-ud-din of Khwarizm.

At p. 484 of the Journal of the Royal Asiatic Society for 1900, Mr. H. Nelson Wright published a coin of 'Alā-ud-dīn of Khwārizm. He pointed out that the word Joe appeared on the body of the bull, and suggested that Mr. C. J. Rodgers was wrong in reading and on coins Nos. 36—40, Punjab Catalogue, Part II, p. 73—74. The reading on the coin figured by Mr. Wright is clearly Joe, but some coins in my collection bear letters which are certainly not Joe and may, perhaps, be read as add.

The first three letters are certain and the final s is also clear though the letter preceding it, if it is meant for ω , is amalgamated with δ .

R. Burn.

54. A COIN OF 'ALA-UD-DIN OF KHWARIZM.

Early in 1905, a friend in Bangalore who went to Kābul on a commercial mission, brought me back a good many coins of various kinds. Among them was a gold coin which I could not read. I showed it to one or two friends who were equally puzzled, but, on sending it to Dr. O. Codrington, he identified it and returned it with the following note:—

"Your coin is one of the Khwārizmī Shāh 'Alā-ud-dīn Muḥammad biu Takash (A.H. 596—617): mint Tirmidh; undated. It is similar, I think, to No. 49 of Hoernle's "Central Asiatic Coins" published in J.A.S.B. for 1889, and to No. 9358 of Rodgers' Catalogue of the Coins of the Indian Museum,

Part I, p. 22.

The word on top of the reverse is read by both Hoernle and Rodgers doubtfully as but on your coin I read without much doubt i.e. Tirmidh or Termez. This place is in Bukhara 38° 17′ N. and 67° 38′ E., and was a mint town from t'e time of the Abbasid Khalifs to that of the Timurids, but this is the first time that I have seen the name on a Khwarizm Shah coin.

'Alā-ud-din Muḥammad extended the great dominions of his father Takash by subduing Bukhārā, Samarkand, Oran and Afghanistan: it is quite reasonable, therefore, that he should have

Termez as one of his mint towns."

It will be seen that the coin in the I.M. Catalogue weighs only 47-81 grains instead of 71 grains as mine does: the dimensions of the former are not given in the Catalogue, but my coin measures 9 of an inch.

J. A. BOURDILLON.

NUMISMATIC SUPPLEMENT

No. VIII

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1907

New Series, Vol. 3, Pp. 587-592

NUMISMATIC SUPPLEMENT No. VIII.

Note. - The numeration of the article below is continued from p. 65 of the "Journal and Proceedings" for 1907.

PATHAN AND BENGAL COINS.

A find of 85 silver coins in the Moorshidabad District contains a number of rare specimens and some novelties. Of the total number 57 coins were in such poor condition that they were returned by Mr. Nelson Wright as useless. The remaining coins may be classified as follows:--

Pathans.

Shams-ud-din Altamsh.—Two coins, like Thomas No.

XXVIII, p. 46.

Rukn-ud-din Firoz.—One coin, as published by Mr. Nelson Wright at p. 772, Journal, Royal Asiatic Society, 1900. The mint (Hazrat Dihli) is clear, but not the date.

Razia.-One coin, like Thomas No. 90.

Muizz-ud-din Bahram.—Two coins. One is the same as Thomas No. 92. The other differs in the reverse inscription which is in a circle, instead of a square, and reads:-

> السلطان الاعظم المستدن الأسام معز الدنيا و الدين ابو المظفر بهوامشاة ابن السلطان ناصر امير المو منين

Plate vi, 1.

The margins are unfortunately illegible. Nāşir-ud-din Mahmud.—One coin, like Thomas No. 106.

RULERS OF BENGAL.

Rukn-ud-dîn Kai Kāŭs,-Eight coins like Thomas No. 125. One is dated in 697 A.H., apparently a new date for coins, though known from inscriptions. (See Blochmann, J.A.S.B., 1873, pp. 247-9).

Shihab-ud-din Bughda.—Eleven coins, like Thomas No. 168.

The mint Lakhnautī is legible on one.

Ghiyas-ud-din Bahadur.-One coin, like Thomas No. 186 (said to be unique) in perfect condition, with mint Sunarganw, and date 728.

'Ala-ud-din 'Ali.—New type.

Obverse.

In square of double lines.

السلطان الاعظم عال الدنيا و الدين سكندر الزيمان ابوالمظفر عليشاد السلطان Margin illegible. Reverse.

In square of double lines, enclosed in circle.

الاصام المستعصم امير الموصدين مر البلدة فيروزة ... Margin ? ... Plate vi, 2,

BENGAL.

A small error seems to have occurred in reading the coins of Shams-ud-din Ilyās Shāh of Bengal. The first line of the reverse has been read in the British Museum Catalogue of Muhammadan States (p. 15) as السلطان العادل, and this reading is repeated in the Indian Museum Catalogue, Sultans of Delhi, p. 140 (obverse). Mr. Thomas (J.A.S.B., 1867, p. 57) read السلطان العادي on coins of the Firozābād mint, and this reading is borne out by a number of coins recently found in the 24-Parganas. It should, however, be noted that Mr. Thomas gave العادل on coins of Sunargāon.

The same find contained the coin described below, which is of the greatest interest, as being the first half-rupee known of the Bengal Kings.

Obverse. Reverse.

56. FOUR RARE MUGHAL RUPEES.

In June last one of the money-changers, who have occasionally supplied me coins, brought to my house a friend of his from the village of Sarkhej, some six miles from Ahmadābād. This man, telling me he had some coins for sale, forthwith divested himself of a very shabby-looking bundle, from which he poured forth on the table before me some 120 rupees, all of them in fairly good condition, though in all, without exception, the silver had become so tarnished as to appear of a dingy black colour.

From this single heap it was my good fortune to secure, along with other very welcome additions to my collection, four coins of extreme rarity. So far as I am aware, not one of the four has hitherto been published, and accordingly it gives me pleasure to communicate the following note regarding them.

1. A Rupee of A'zam Shāh; Mint, Aḥmadnagar.
Date, 1118— •• 1.

Date, 1118— •>1. Weight, 175 grains. Diameter, 1 inch.

Obverse.

ممالک اعظم شالا ۱۱۱۸ شــــــالا ددولت و جالا پاد ســــکه زد دو جهان

Reverse.

احمد نگر فد-رب جلوس ف----

Plate vi, 4.

A few years ago, my friend Mr. Nelson Wright showed me a beautiful rupee in his possession of this same reign and mint, and, if I remember right, of the same date. Till now that coin has been held to be unique. The A'zam Shāh muhr, No. 848 of the British Museum Catalogue, bears no mint-name. Agreeing, as it does, so closely with the rupee here described, it may, I fancy, be safely assigned to the Ahmadnagar Mint.

2. A Rupee of Kām Bakhsh; Mint, Gokalgarh (?).

Dute, Hijrī year wanting; regnal year sal.

Weight, 176 grains.

Diameter, '9 inch.

Obverse.

دین پذالا پاد کام بخش شـــــالا نو خورشدد و صالا سکــــه دو دکن زد Reverse.

مانوس میمذـــت سنة احد جلوس فــــوب

Plate vi, 5.

This coin issued from a mint of Kām Bakhah otherwise unknown: but some uncertainty attaches to the mint-name, as unfortunately in this specimen only the upper portions of its letters are present on the Reverse. If Gokalgarh, it cannot, of course, be the Gokal near Muttra. It may, however, with some probability be identified with the fort, \$\frac{3}{3}\$, named Gokalpūr in the province of Bijāpūr. See No. 48 in the List of Forts given on page 164 of Sarkar's "India of Aurangzib."

3. A Rupee of Shāh 'Ālam I; Mint, Gūtī.

Date, Hijrī year wanting; regnal year 2.

Weight, 177 grains.

Diameter, '9 inch.

Obverse.

فازي شــــاء مالم پاد شــــاه سکه مبارک

Reverse.

مانوس میبذ—حد سنه جلوس فسرب

Plate vi, 6.

The only coins hitherto known from the Gūti mint are the tiny gold piece of Farrukh-siyar (No. 901 of the British Museum Catalogue), and a rupee of Aurangzeb described by Mr. Longworth Dames in his article "Some coins of the Mughal Emperors," published in the Numismatic Chronicle, Fourth Series, Vol. II. The specimen now to hand supplies proof that the same mint was in operation in the reign of Shāh 'Alam I.

4. A Rupee of Farrukh-siyar; Mint, Karārābād.
Date, Hijrī year wanting; regnal year 2.
Weight, 175 grains.
Diameter, 1 inch.

Obverse.

بحو و برفوخ سيو حق بر سیم و زو پاد باکه زد از

Reverse.

Plate vi, 7.

In the Numismatic Supplement, No. IV (page 15), Mr. Nelson Wright in describing Mr. Framji Jamaspji Thanawala's rupee, struck by Jahandar at Kararabad, states, "This is quite a new "Mughal mint, and its locality is still unsettled. It must probably "be sought for in the Dakhan." Mystery still enshrouds the locality; but from the specimen now to hand we learn that the mint was active not only during the few months that Jahandar occupied the throne, but also during, at least, the early years of the reign of the Emperor Farrukh-siyar.

GEO. P. TAYLOR.

Ahmadabad: 8th August, 1906.

A find of coins at Mahadpur in the Betul District, Central Provinces, has yielded some novelties in Mughal rapees. The coins covered the reigns of Shah-Jahan, Aurangzeb, Jahandar, Farrakh-siyar, Shah Jahan II, Muhammad Shah, and Shah Most are in poor condition, and many are shroffmarked.

NUMISMATIC SUPPLEMENT

No. IX

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1908

New Series, Vol. 4, Pp. 441-446

46. NUMISMATIC SUPPLEMENT No. IX,

Note.—The numeration of the article below is continued from p. 592 of the "Journal and Proceedings" for 1907.

Catalogue of the Coins in the Indian Museum, Calcutta, including the Cabinet of the Asiatic Society of Bengal: Vol. III, Mughal Emperors of India, by H. Nelson Wright, I.C.S., pages lxxxiv—360: Oxford, Clarendon Press, 1908.

58.—The List of Coins in the Indian Museum, compiled by the late Mr. C. J. Rodgers, and published at Calcutta in 1894, could not possibly be regarded as in any sense an adequate or final presentment of the contents of the Museum Cabinets. In the preparation of that list Mr. Rodgers laboured under conditions of exceptional difficulty. In a letter in my possession he mentioned: "When I look back upon the work I had to give to this Catalogue I am astonished I ever finished it. Imagine about 7,000 coins, all higgledy-piggledy. They had to be arranged with the original numbers. I was not allowed to number them consecutively. It took me two years of constant work. It had all to be written three times before things came into order." These brave efforts notwithstanding, the final result left much to be The illustrations were few and poorly executed; the method of coin-numbering was a hidden mystery; and the transcription of the legends, while always correct, yet in many cases failed to indicate the arrangement of the constituent words. That the List, despite its defects, has during the past fourteen years proved serviceable, all collectors of Indian Mughal Coins will gratefully testify; but that it was a production worthy of the noble Museum in Calcutta, no one would for a moment maintain.

It thus became in every way desirable, and especially in view of the large additions recently made, that the work of arranging and registering the coins should be undertaken entirely de novo, and that a complete and illustrated Catalogue, as distinct from a bare List, should be prepared. By the publication within the past few weeks of Volume III of the "Catalogue of the Coins in the Indian Museum, Calcutta," the volume treating of the Coins of the Mughal Emperors of India, from Bābar to Bahādur II, the Trustees of that Museum have now at length admirably supplied this long-felt want. They were fortunate in securing the services of Mr. H. Nelson Wright, I.C.S., for the compilation of the Catalogue, and did well in having it printed at the Clarendon Press, Oxford. The illustrations, twenty-two large beautiful Plates, and the Map of India, showing the Mint-towns, add immensely to the numismatic value of the work. It is not too

much to say that now for the first time the combined cabinets of the Indian Museum and of the Asiatic Society of Bengal have been made really available to the public. Comparatively few persons can visit Calcutta to explore the Coin Department of its Museum; but, thanks to this admirable Catalogue, the Coins have now been placed virtually in our hand, and admit of inspection whenever we will. For the Mughal Period, say, from 1526 to 1858, no other treatise is at all as definitely helpful to the student of Indian Numismatics; for not only has Mr. Wright with an infinite patience and accuracy marshalled numerous details, but he has grouped and correlated them with singular skill. One scarcely knows which more to admire, the ample stock of minute

information or its lucid presentment.

More than 2,500 coins pass under review, and some of the specimens, registered here quite unpretentiously, furnish legends which till now have baffled the ingenuity of numismatists. For example, one has long wished to discover the marginal readings on the rupees early struck by Akbar in the Ahmadabad Mint. Well! No. 111 in the Catalogue gives these legends in full. is also a pleasure to note the entry of some of the very recent finds, such as the square Akbari fulus from the Ujjain Mint (No. 527). Reference is further made to the Mint-name Ujjainpur, even though the Museum evidently does not possess a specimen bearing the name in this enlarged form. Two rupees of the Purbandar Mint, Nos. 1503 and 1697 are given on Plates XIII and XIV, and a Narwar rupee, No. 2249 on Plate XIX. An excellent specimen is shown of the Zinatu-l-bilad Ahmadabad rupee, No. 1816, and the Bandar-i-mubārak Sūrat rupee, No. 1539, is also figured. Of the reign of Shah 'Alam II alone coins of the following rare mints are represented in the Plates XX—XXII: Chhachrauli, ? Khārpūr, Jammūn, Gokulgarh, Barēli Qit'a and Anwala.

But the most distinctive feature of the volume is the able and luminous Introduction, pages xiii-lxxxii, devoted to notes on the various Mint-towns recorded on the coins in the Indian Museum. In the treatment of each mint a due proportion has been preserved; and the gathered information supplied regarding the coins struck at the more important Imperial Mints is of especial value. Every page of this Introduction evidences wide numismatic research and also an intimate acquaintance with the presently existing coin cabinets. In his Preface Mr. Wright makes mention of the "considerable impetus" that has in recent years been imparted to the study of the coins of the Mughals, and the chief sources of this newly-awakened interest he also indicates. But most assuredly no more inspiring work has been produced, and none more practically helpful, than just this volume itself. It certainly should avail to enthuse many a student in the field of Oriental research, and bring him under the spell of those quaint coins that once passed freely from hand to hand but are now so difficult of acquisition.

If under the impulse of this Catalogue fresh numismatic

efforts be made, we sincerely hope they will be on the lines Mr. Wright has suggested. Let a series of monographs be prepared. each dealing with the issues from a separate mint. For work of this nature Mr. Wright's Introduction has already paved the way, and by its help quite a number of such monographs might be readily outlined: the filling in alone is now needed. In one of the last letters that I received from Mr. C. J, Rodgers, he expressed a desire identical with that which Mr. Wright now voices. He stated that he would like to see the whole of Indiaor, at least, all that had at any time been subject to the Mughal sway-parcelled out into a dozen or so different districts, and in each district he would have a competent person set apart for the collecting and cataloguing of its coins. Thus, one after another, the requisite local monographs would be forthcoming, from which could readily be prepared, it might be merely by co-ordination, an authoritative Corpus Nomismatum. This plan is certainly simple enough, and Mr. Wright's Introduction goes far to encourage the hope that the cherished scheme will yet be realized.

Naturally the chief value of this Catalogue consists in the fullness and accuracy of its details, and it is to these that any serviceable criticism of the book must mainly relate. No one will be more thankful than Mr. Wright himself for any information elicited that will supplement or modify the statements in his volume. In a Review, however, one's attention must be directed not so much to details as to the general principles that have been observed in the compilation of the Catalogue. Mr. Wright having the courage of his convictions, his work has not been carried out just on the lines laid down by earlier writers. He has, indeed, made a distinct forward movement. Yet, along with much that we cordially appreciate and welcome, there are two matters regarding which opinion will surely be divided. First and foremost, why should there have been any need for a "Table showing the method of Transliteration adopted in this Catalogue"? It is a dozen years since the Royal Asiatic Society set its imprimatur on a now well-known system of transliteration, strongly urged its general employment, in order that "Criental studies may thereby be facilitated." Several of the coins described by Man West Strongly by Mr. Wright are the property of the Asiatic Society of Bengal, and accordingly in the Catalogue that registers them one would have expected that the method of transliteration so definitely approved by the Royal Asiatic would have been adopted. It seems a pity that this course has not been pursued. However, for only three letters do the transliteration-equivalents accepted for this Catalogue differ from those in the Asiatic Society's Scheme. In its English dress & now appears as a instead of the as ? instead of d, and is as z instead of dh. So, alas! the reader has now to discriminate between four z's, to wit, j=z, =z, and i = z. It should also be noted that and are represented by the z. by the digraphs oh and sh without the usual subscribed line; and,

moreover, the long vowels are now distinguished by the slanting stroke (accent aigu), a sign that should naturally be reserved to indicate word-stress or an accented syllable. It is true the changes thus introduced are, after all, but few, and, as they concern only letters of infrequent occurrence, any inconvenience occasioned is but slight. None the less one would have preferred a cordial and complete compliance with the urgent recommendations of a Society that has proved itself so true and constant a friend of Oriental scholarship.

Further, when consulting this volume, one must bear in mind that the order in which the mints are arranged is the English alphabetical order. In the Preface Mr. Wright expressly states: "I have purposely avoided an arrangement according to the Persian alphabet, in the belief that the majority of those using the volume are likely to be more readily conversant with the former than with the latter." Now in this belief Mr. Wright is quite probably correct; but even so it might still have been well to arrange these mints, written as they were originally in Persian characters, as Persian scholars would arrange them. In high-class work, such as this volume abundantly evidences, the methods adopted need not be determined solely in accordance with the qualifications of the readers. A judicious care must be exercised, lest, in consulting convenience, the presentment of the subject itself be prejudiced. If only this Catalogue had been a less scholarly production, one might have been more content to accept the English order, but, just because it is rich in scholarship and so fine a piece of honest work, one feels that, if only for consistency's sake, the Persian alphabetical order of the mints should have been For here assuredly not utility alone but "Wissenschaftlichkeit" too may well press its claims. Could one imagine, for instance, a German "Gelehrte" permitting an arrangement, shall I say, so Philistine? But clearly Mr. Wright is willing to be, even in his scholarship, English rather than German. Well! we, as Englishmen, must try not to complain.

Except for the method of transliteration and the alphabetical arrangement—and these, after all, relate merely to the form not to the matter—all else in the Book is of distinctly the highest quality. Though crowded with details and cross-references, its accuracy is beyond all praise. [But Ūrdū should not only occasionally but always be written Ūrdū with its first vowel short; and on page xv, line 37, the date 1009 should be changed to 1007.] Two features of special excellence merit detailed notice; one is the clear definition supplied of the "obverse" of a coin, and its consistent application; and the other the strict grouping of all the coins (of the same metal) that issued during any one reign from one and the same mint.

Many coin-collectors have, we are sure, felt at times a doubt as to which side of a coin should be called the "obverse" and which the "reverse," but, thanks to Mr. Wright's lucid explanation, no one henceforward need hesitate. It is only necessary to bear in mind that the obverse of a coin is conventionally held to he the side more honourable. Now obviously the sacrosanct Kalima or else its Akbarī substitute (الله اكبر جل جلاله), since enshrining the holy name of Allah, is essentially pre-eminent in honour. Next in rank, at least within his own dominion, will come the name of the Emperor, that "shadow of the favour of Allah" (هاية فصل الله); while at a lower grade in the scale of precedence will stand the mint-name. Hence arises the following rule :-

The "obverse" of a coin is, and absolutely, that side (a) which bears either the Kalima or the Akbari for-

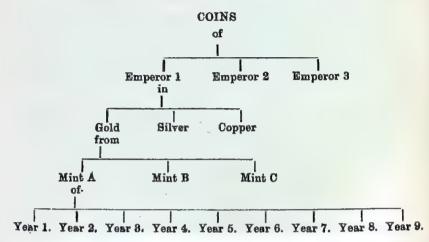

Only in the absence of these should the side on which (b) stands the Emperor's name be regarded as the

And, further, where none of the three occurs, neither Kalima, nor formula, nor Emperor's name, the presence of the mint-name suffices to constitute its side the "obverse,"

Naturally, however, where the legends on the two sides of a coin, read continuously, form a single couplet or quatrain, the "obverse" is reserved for the first half, even though it be the second half that carries the distinction of containing the name of

the Emperor.

Next with reference to the distinctive method of grouping the coins that are recorded in this volume. In the British Museum and other Catalogues the order in which coins of the same Emperor and the same metal are entered is simply that of chronological sequence; and hence specimens differing widely amongst themselves are yet found placed side by side, owing to the merely fortuitous circumstance that they happened to have issued from their several mints at approximately the same time. The registering of coins by mere rule of thumb-earlier date then earlier entry—is certainly an easy process; but no less certainly such arrangement has only the very slightest scientific value. Recognizing the inutility of this method of grouping, the method hitherto in vogue, Mr. Wright, by boldly adventuring to follow a new principle of classification, has immensely enhanced the usefulness of his book as a practical working catalogue. First the coins are grouped under the different Emperors; next the coins of each Emperor are separated according to their metal, gold or silver or copper; and lastly under each Emperor the coins of each metal are classified according to their mints, the several members of these mint-sub-groups being arranged chronologically. Here, then, we have a distinctly scientific presentment of the coins that issued in different years from each mint during each reign. A couple of years ago at Mr. R. Burn's suggestion I rearranged my own cabinet in accordance with this new method, and can bear personal testimony to the decided advantage that has since accrued. Our hope is that this system of classification will ere long meet with general adoption. The scheme of division and sub-division is clearly indicated in the following "Tree":—

Every student who even cursorily runs through this Catalogue will perceive that the mere rearrangement as above of the coins sets them before us so naturally and in so orderly a manner as to ensure a more accurate and intelligent acquaintance with them. Slight variations in any one given type, and the passage, whether abrupt or gradual, from one type to another are by the present grouping evidenced each in its own sequence; and this volume now for the first time supplies material duly arranged for tracing any improvement or deterioration that may have taken place in the design of the coins, also any development in their legends. To have rendered this high service is no small achievement, and by his compilation of a Catalogue thus distinguished Mr. Wright has amply earned the grateful thanks of every worker in the fascinating field of Indian Numismatics.

New Series, Vol. 4, Pp. 589-592

53. NUMISMATIC SUPPLEMENT No. X.

Note.—The numeration of the article below is continued from p. 446 of the "Journal and Proceedings" for 1908.

The Date of the Salimi Coins-A Rejoinder.

59 .- It was with no little surprise I read in the Journal and Proceedings of the Asiatic Society of Bengal for May, 1908, a brief note by Mr. Beveridge, in which the old fiction is again advanced, that the Salimi coins were issued during Akbar's lifetime, either because the Prince Salim was de facto governor of Gujarat or because he was a rebel. I say "fiction," for in support of the view now advocated by Mr. Beveridge, not a shred of satisfactory evidence has been adduced. However, as the subject is thus being broached anew, it may be well to indicate once more the evidence the coins themselves supply, subversive of the deservedly discredited hypothesis. The Salimi coins, whether in silver or in copper, are all dated, and not a single one of the dates they bear admits of reference to any period in Akbar's lifetime. the other hand, every one of the dates finds a simple and natural explanation when assigned to the term, extending over just nine months, immediately subsequent to Akbar's death. The month in which he died was the 6th (Jumādā II) of the Hijrī year 1014, corresponding in the Persian calendar to the 8th month (Aban) of his 50th regnal year. For coin purposes it suffices to know the month and year of the Emperor's decease. As to the exact day of Akbar's death the Histories are not concordant. See on this subject an informing note on pages 212 and 213 of Blochmann's volume of the translation of the "Ain-i-Akbari." Mr. Beveridge is, however, alone in assigning the Emperor's death to the 10th day of Jumada II. The correct date, according to Blochmann, is the 12th of that month, which works out as the 10th of the Persian month Aban. In my article in the Numismatic Supplement, No. 1, 1904, I accepted as the date of Jahangir's accession the 8th of Jumada II. Mr. Beveridge now rightly corrects the 8th to the 20th, an emendation, however, that I myself made a year ago in the Numismatic Supplement, No. 7. But, be the day what it may, it is quite certain that Akbar died in the early half of the month Aban of his 50th regnal year, and that in the same month his son, the Prince Salim, ascended the throne as the Emperor Jahangir.

Thus the question that now falls to be answered is, Were the Salimi coins issued in Akhar's lifetime, that is to say, Were they issued before Abān 50? Now these coins, as we have already said, are themselves dated, and not one of them bears a date prior to that month of Abān. The dates are, and quite distinctly,

Abān (the 8th month), Adhar (the 9th), Dai (the 10th), Bahman (the 11th), and Isfandārmuz (the 12th) of the year 50, and then Farwardin (the 1st month), Ardībihisht (the 2nd), Khūrdād (the 3rd), and Tīr (the 4th), of the year 2. Such is the evidence of the coins themselves, evidence absolutely counter to the supposition that any of them were struck during Akbar's lifetime.

Mr. Beveridge holds it unlikely that Salim would use on his coins the regnal year of his father (50). But, whatever the 50 may denote, it is certainly present; and it would be interesting to know how Mr. Beveridge explains the number, if it do not represent Akbar's regnal year. It stands in juxtaposition with one or other of five of the nine month-names, and hence we may safely infer that it indicates some year, some 50th year. It certainly was not the 50th year of Salim's "rebellion," nor was it

the 50th year of his "de facto governorship."

But if, as we maintain, the Salimi coins were struck immediately on Akbar's death, the number 50 presents no difficulty whatever. In the month of Mihr there had issued, quite normally, from the Ahmadabad mint, rupees on which was impressed the regnal year 50. Within a fortnight after the close of that month (on the 10th of Aban) Akbar died. Before this new month Aban had ended, the Salimi coins were issued, and these bore the same regnal year as had been entered on the coins of the preceding month. Now this is the procedure that would in ordinary course have been adopted had the date been according to the Hijri era; and it was not unnatural to carry out the same procedure when reckoning the date from the new epoch approved by Akbar, the epoch, to wit, not of Muhammad's Flight but of Akbar's own accession to the throne. As a matter of fact the 50 did remain on the coin-dies until the next New Year's Day came round, and only then, coincident with the change of year, was a change made in the year's number as exhibited on the coins.

Mr. Beveridge thinks it extremely improbable that after his accession Jahangir would use on his coins the name Salim. Well, Jahangir was not by any means the only Emperor to insert on the current coins of the realm the 'Alam, or "Christian name,"

given soon after birth :--

1. On the well-known Lähor rupee Shah Jahan I. found room for the name Khurram that he had borne

while a prince (Br. Mus. Catal., No. 578).

Of the coins issued in his first regnal year by Shāh
 'Alam I. there are two distinct types, on each of
 which appears that Emperor's birth-name, Mu'azzam
 (Lah Mus. Catal., p. 197, Nos. 4 and 5). One type
 hails from the Tatta mint, and the other probably
 from Murshidābād.

3. Shah 'Alam II. before he mounted the throne was known as the Prince 'Ali Gauhar, and this latter name occurs on rupees dated—so my own cabinet shows—as late as the 13th and 14th years of Shah Alam's reign. A regnal year so late suffices to dis-

prove the hypothesis brought forward by Mr. Longworth Dames that the 'Ali Gauhar coins were struck in the lifetime of that prince's father, 'Alamgi II.

It is thus evident that Jahangir is but one of at least four Emperors whose coins bear the sovereign's birth-name. So far as I am aware, no one has suggested that the Khurram or Mu'azzam or 'Ali Gauhar rupees were issued by these princes while in rebellion. But if in each of these three cases the coins were those not of a rebel prince but of a reigning emperor, one need not shrink from the supposition that the Salimi coins too were issued not by the Prince Salim but by the Emperor Jahangir.

Mr. Beveridge sets much store by the fact that the Prince Salim had large interests in the province of Gujarāt. He was, of course, a man of wealth, and quite possibly a considerable portion of it came from this "Garden of India." But how does all this bear on the Salimi coins? If the prince ever was, which I very much doubt, de facto governor of Gujarāt, and even if he held the province in fief, he would not thereby have been entitled to issue coirs in his own name. Such action on his part would at once have constituted him a rebel, and, had he ventured on it during his father's lifetime, the autocratic Akbar would have insisted on knowing the reason why. In the whole range of Indian Mughal numismatics there is not a single instance of a coin known to have been issued by a provincial governor-all without exception were struck in the name either of the reguant Emperor or of some aspirant to the imperial throne. Thus the Salimi coins, if struck before Akbar's death, were struck by Salim not as governor nor as fief-holder but simply as rebel. Yet of any rebellion in Ahmadabad, fomented in the interests of Salim, the histories supply not a word. His revolt in the year 1600 was apparently confined to the Allahabad district. In Irvine's recent translation of Manucci's "Storia do Mogor" (Vol. I., p. 131) this rebellion is described in the following terms:-" Jahangir, then a youth (he was about thirtytwo) allowed himself, in spite of his natural goodness, to be led astray by the soft words of traitors, and rose against his father, hoping that Fortune, abandoning Akbar, would transfer herself to his side. But it was not so. Akbar was able to make such efforts that in a short time Jahangir was taken a prisoner." Clearly then the revolt was shortlived. That it extended at any time to the distant Ahmadabad we have no evidence whatsoever. It should further be remembered in this connexion that several of the Salimi coins bear the date 2. If these rupees really were issued by a rebel prince, we are shut up to the conclusion that at the time of their issue the rebellion was already in its second year. Of a revolt thus protracted some mention would assuredly have been made in the histories of Gujarat, yet not a hint of it is forthcoming. One may then safely relegate to the domain of fiction Salim's rebellion in Ahmadabād, and and with it we may, I feel sure, also consign his de facto governorship. These discredited, the hypothesis that the Salimi coins were issued "either because the Prince was de facto governor of Gujarāt or because he was a rebel" of itself falls to the ground. Tested alike by the evidence of the coins themselves and by the histories of the time, the hypothesis is untenable. All the evidence to hand leads definitely and consentaneously to the conclusion that these coins were first struck within a few days after Akbar's death, and that they continued to issue for nine consecutive months.

It is true that in the year 1014 H. some of Jahangir's heavy Kalima rupees issued from the Ahmadabad mint. A specimen. dated distinctly 1-1014 and weighing 211 grains, is contained in the Bombay Asiatic Society's Cabinet. Evidently then, if our theory of the date of the Salīmī coins be correct, the Ahmadabad mint must have been producing simultaneously some rupees bearing the Emperor's princely name Salim and others his regal name Jahangir. This fact, I admit, did impress me for a time as being adverse to the theory here advocated; but my esteemed friend Mr. Framji J. Thanawala has recently supplied me what is, I believe, the true explanation of this double issue. The Ilahi rapee that Akbar favoured to the very end of his reign weighed just a few grains less than 180: but Jahangir signalised his accession to the throne by raising this weight, and for some five years the current rupee turned the scale between the limits of 210 and 222 grains. Now it would appear that in Ahmadabad, though there alone, during the first nine months of Jahangir's reign, coins of both types, the lighter and the heavier, were permitted to be struck. But each denomination had its own legend. Hence it came to pass, and quite in accordance with the fitness of things, that, while the heavier Kalima rupee bore invariably the imperial name Jahangir, for the lighter Salimi coin the less exalted princely name sufficed.

60. A FIND OF GRÆCO-BACTRIAN SILVER COINS.

Towards the end of 1899, owing to erosion of the west bank of the Indus river at the village of "Parehwar" near Amarkot in the Rajanpur Tehsil of the Dera Ghazi Khan-District, an earthen vessel was exposed containing 221 demidrachmas of Apollodotus ii, Philopator (B.M.C., Greek and Scythic Kings, p. 37).

They were sent to me from Calcutta for report. After much trouble in cleaning them I found they fell into the follow-

61. GOVERNORS OF SIND. W. VOST.

In 1907 I examined for the Society 74 small silver coins of these rulers sent from Ajmir with the Assistant Commissioner's No. 3552, dated 12th August 1899, and No. 1239, dated 2nd May 1901. They were found "on the site of an old demolished fortress" near "Jaola."

The find contained coins for the most part given in L.M.C., pt. ii, pp. 9, 10:—

The name 'Amrāō on coins of Sind also appears to be new. The two specimens examined are illegible on one side, and on the other have

'Amrū is a common name in early Sind history (Elliot, History, i, 126 127) The 'Amrāo of the coins is perhaps "Umaro, son of the unfortunate Muhammad, son of Kasim, the Conqueror of Sind, [who] was made Governor of Mahfúzah, and was greatly trusted by Hakam, * * * and was elevated to the rank of Amír'' (Elliot, *History*, i, 126; Raverty in J.A.S.B., 1893, 256, quoting the Balaziri who wrote about 270 H.=883-84 A.D.).

W. Vost.

Some rare Silver and Copper Coins of the Bahmani Kings of Gulbarga or Aņsanābād.

In April 1906 I went to Gulbarga for a day, and was fortunate in securing there no less than 25 silver Bahmani coins. Of these I describe eight below (Nos. 1-8). Nos. 9 and 10 are also from my cabinet.

1ST SULTÁN.

Alāu-d-dīn Bahman Shāh I (Ḥasan Gángú), A.H. 748—759.

No. 1. R

Weight, 169 grains. Size, 1.1 inch.

Obverse. السلطان الاعظيم علا الدنيا و الدين ابوالمظفر بهمن شالا السلطان

Reverse. In a square inscribed in a circle. سكندر الذاني يعين الخلافة ناصر امير المومدين

Margin on the reverse, outside the circle, partly visible, بعضرت احسنا بأد reads

Date, in the lower segment reads (v) pov

Pl. XII.

PI. XII.

No. 2.

Weight, 169 grains. Size, 1.1 inch.

Obverse.

As No. 1.

Reverse.

As No. 1.

Date in lower segment.

APA

No. 3. R

Weight, 170 grains. Size, 1.1 inch.

Obverse.

As No. 1.

Reverse.

As No. 1.

Date ves in lower segment. Pl. XII.

Coin No. 1 is remarkable both for the early date and the partial presence of a marginal legend. In No. 2 the substitution of small circle for the "v" in the first digit of the date is noticeable. My friend Mr. Cowasjee Eduljee Kotwall bas a coin similar to this one.

No. 3 is similar to the coin described by Mr. Gibbs (Num. Chronicle 1881, No. 1) and is published for the sake of comparison with the other two.

2ND SULTÁN.

Muḥammad Shāh I bin Bahman Shāh, A.H. 759-777.

No. 4. \mathcal{A} R

> Weight, 170 grains. Size, 1.05 inch.

Fírúz Sháh's silver coins of the type similar to No. 8 are well-known. No. 7 is a different type. The words و الوطفو occur on the reverse of the coin instead of the obverse as is usual.

Coins of the same type as No. 8 are known with dates

from 800 to 825.

I know of no other coin of the type of No. 7.

I therefore conclude that the type must have been changed

in the latter part of A.H. 800.

Some change appears to have been made in the character of the writing during the year 804. Coins of this year present two types. The difference is to be seen in the formation of the of of and the interpretation of the seen in the formation of the second and the

Pl. XIII.

In his notes of the Bahmani dynasty—written in November 1904, Major W. Haig (vide J.A.S.B., Part I, Extra No. 1904)

expresses some doubt, like others; regarding the parentage of Kalim-ullah, whether he was son or younger brother of Ahmad Sháh III. He says he has seen copper coins of Kalim-ullah, and has a specimen, but unfortunately they do not bear his father's name.

I have some half-a-dozen copper coins (like No. 12) of this Sultan on which the word Maḥmúd is quite plain. We can therefore assume that Kalím-ullah was a son of-Maḥmúd, and consequently brother of Aḥmad Shah III the 15th Sultan, 'Alau-d-dín Shah III the 16th Sultan, and Walí-ullah Shah the 17th Sultan.

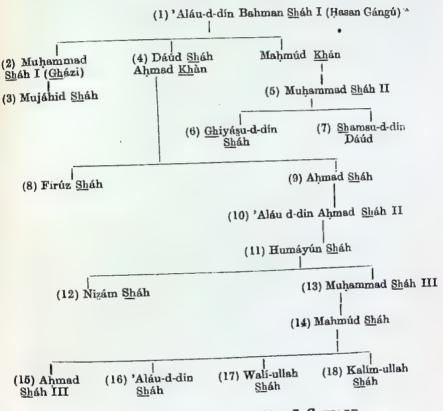

For easy reference I give below a list of the Bahmani Sultáns and also a table showing their pedigree gathered from different sources.

My special thanks are due to Mr. H. Cousens, Superintendent of the Archaeological Survey, Western India, for his kindness in taking casts and photographs of the coins above described for the purpose of plates to illustrate this note.

PEDIGREE TABLE.

63. Addenda to the Malwa Comage.

A large find of nearly three thousand copper coins from Naosar village in Harda Tahşil of the Hoshangābād district was recently sent to me for examination. A very large proportion of the coins were of the Mālwā Sultāns of the usual square type, the remainder being round coins of the Gujarāt dynasty—evidently brought in by that conquering power during its supremacy in Málwa. Out of some 700 selected for distribution among the various Museums, no less than 653 were of Mahmūd II, son of Nāṣir Shāh, who reigned from A.H. 916 to 937. Each year of the reign except 916 and 933 was represented, the most common date on the coins being 931. But the chief interest of the find lay in sixteen coins, of which six were of Maḥmūd's rival, Muḥammad, bearing dates 917 and 921, two of Maḥmūd's rival, Muḥammad, bearing dates 917 and 921, two of Maḥmūd's rival, Muḥammad, bearing dates 917 and 921, two of Maḥmūd's rival, Muḥammad, bearing dates 918 and 945. None of these latter ten have been previously published.

Dr. White King in his monograph on the coins of Mālwā published in the Numismatic Chronicle, 1904, pp. 62—100 and 356—398 has ascribed two square dateless coins to Bahādur

316

Shāh of Gujarāt but has not figured them or given their legends. They were probably of the usual Mālwā type. In the absence of special notice it is unlikely that they were of the type now published, which is quite distinct from that used by the Khalji Sultāns.

The legends are as follows:-

و الدين و الدين قطب الدنيا قطب الدنيا ٩٣٨ ابو الفضل الفضل العادر شالا Reverse. بين مظفر شالا السلطان

Of Qādir Shāh no coins have hitherto been described. As stated by Dr. White King, this king, "though practically independent, owned nominal allegiance to Bahādur Shāh of Gujarāt." Bahādur was killed in A.H. 943 and after a short interval the throne of Gujarāt was occupied by Maḥmūd son of Latīf. Dr. White King has recorded that "through the good offices of his friend 'Imādu-l-Mulk. the Wazīr of Sultān Maḥmūd III of Gujarāt, Qādīr Shāh was granted the privilege of the Royal Umbrella and the right of striking coins."

The eight coins now found bear testimony both to the exercise of the right of coining by Qādīr Shāh and his acknowledgment of the suzerainty of Mahmūd. The legend on the obverse is not altogether free from difficulty owing to the fact that the coin is not large enough to contain the whole of it, and the specimens found are not in very good condition.

I read the legends as follows:-

السلطان السلط

Above the b of the lower السلطان is the ornament figured as No. 21 in the Catalogue of the Indian Museum, 1907, p. 261,

Vol. V, No. 8.] Numismatic Supplement. [N.S.]

and above the b of the upper السلطان the ornament figured as No. 23 in the same plate.

The words following sta in the third line of the obverse are a difficulty. None of the coins give then very distinctly. After much consideration I am inclined to think they may be a ين لطيف blundered

These coins of Bahādur Shāh and Qādir Shāh are of special interest as filling up a gap in the history of the coinage of the Malwa dynasty.

H. NELSON WRIGHT.

THE QUEB-SHAHIS OF HAIDARABAD OR GOLCONDA.

A large find of 3,800 copper coins dug up in the Wun District, Berär, contained a considerable number of coins which may be assigned to 'Abdullah Qutb Shāh. For the complete reading I am indebted to Major W. Haig, I.A., who writes: "I have been looking into the question of the Haidarabad coins of 1068 H. (A.D. 1657-58). The obverse, as you say, is clear :-

In that year 'Abdullah Qutb Shah (1626-72) was king of Golconda, but his name does not appear on the reverse, where the legend is a very touching one. He had already been attacked by Aurangzeb and compelled to marry his second daughter to Aurangzeb's eldest son, Sultan Muhammad, whom he made his He foresaw the speedy downfall of his kingdom, which came to an end with his successor, Abu'l Hasan, and predicted it on his coins in a legend which was also, I believe, used after him by his son-in-law Abū'l Hasan, viz:-

I have coins with the legend arranged as follows: -

'It has come to an end, well and auspiciously.' I think that this is the best conceit I know in Oriental Numismatics."

The coins under reference were of the second variety described by Major Haig. They were evidently current for some time as the other coins in the find bore later dates, being chiefly dams of Aurangzeb from the Sūrat mint, as far as they could be read. Major Haig's supposition that Abū'l Hasan also used this type is borne out by the dates on some specimens, which read 1095 A.H.

R. BURN.

65. Some New Mughal Mints and Rare Mughal Rupees.

The rupees in Plates i, ii, and iii, with the exception of the last two in plate iii, are from a find of 1,388 coins in the Jhānsī District, U.P., in 1907. It contained specimens from two new mints of Akbar, Nahrwāla Pattan and Gazraula, or Gadraula, and new or rare rupees of the Ujjain, Ājmīr, Bangāla, Akbarpūr-Tānda, Āgra. Ḥiṣār-i-Fīrūza, Elichpūr and Bālāpūr mints of Akbar, and of the Bairāta and Jālnapūr mints of Jahāngīr. Plate iii, 7 and 8 illustrate two new mints of Shāh 'Alam ii, Bālānagar-Gaḍhā and Ravishnagar-Sāgar, from coins found in the Central Provinces.

They are described in the following notes. Casts of them were made by me and photographed by Mr. Henry Cousens with his usual courtesy, kindness, and care.

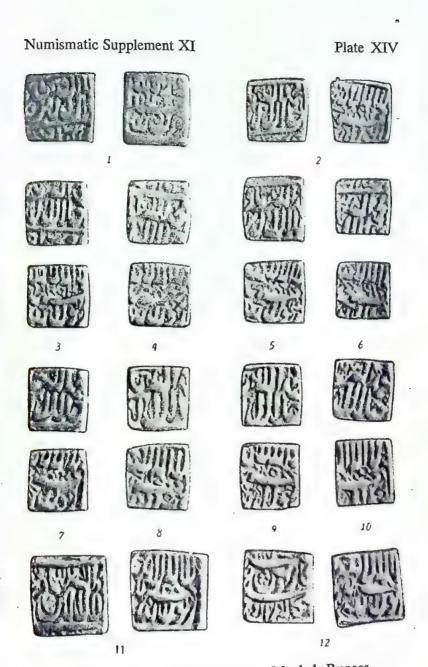

PLATE XIV.

AKBAR.

Nos. I to 10. These rupees form an interesting series from the Ujjain mint. Nos. I, 2, and 3, of the years 995, 999, and 1000 H., show in the lowermost line traces of ضرب اجين preceded on that of 1000 H., by what appears to be j of join. No. 4 is of 1001 H. Nos. 5 to 10 are dated 37, 38, 39, 40, 41, and 43 Ilāhī, without, however, either the word الهي or the month on them.

In the series محمد and الخبر on the obverse side are so alike I think we are able to assign with a tolerable degree of certainty those of the years 38 to 43 Ilāhī to the Ujjain mint. Ujjain seems not to have issued square rupees with مال and the Persian month on them until 44 Ilāhī (see L.M.C. No. 207).

The weights and measurements are:—995, 173 grains (rubbed), $.7 \, \cdot .7$; 999, 176, $.65 \, \cdot .65$; 1000, 175, $.625 \, \cdot .625$; 1001, 174, $.65 \, \cdot .65$; 37, 175, $.65 \, \cdot .65$; 38, 175, $.55 \, \cdot .6$; 39. $.65 \, \cdot .65$; 40, 175, $.65 \, \cdot .65$; 41, 176, $.65 \, \cdot .65$; 43, 176,

New Mughal Mints and rare Mughal Rupees.

ض∫ رب اج ...

There is a second specimen of this rupee of the same year in the Lucknow Museum, but it gives no more assistance in reading the mint which seems to begin with +1 possibly for Ajmīr. The of following sty may refer to the "weight or fineness of metal" and represent the initial letter of the word - 'regular', for which refer to Manual of Musulman God is great. .

No. 12. Bangāla. D. 1011 H. W. 173.5. S. 7×.75.

Obverse.

Reverse.

Kalima.

1.11 كابرويش ضرب ش_____ بنگاله زاند لخوالا

The legend translated is:- "This coin of Bangala became attractive on this account, that its value (honour) [increased because it was] struck by Akbar Shāh."

Another Jhansi hoard recently furnished a rupee of this mint with 39 (=1002-1003 H.) on the Kalima side above the are clear بنگاله of بنگاله and on it محمد and the dotted محمد

It is now in the Lucknow Museum. The reading Bangala was first suggested by Mr. Rodgers in the L.M.C., p. 245, which gives two rupees. Mr. H. Nelson Wright has also two, Nos. 315 (a), (b), in the I.M.C. Each of the difference of the state of the sta us differs a little in the obverse reading. In the big Jhānsi find there were 2 of 1006 (date to left of sm), and 2 of 1011 H. (date below 120) below 39). Thus there are in Museums in India rupees of 39 Hāhi (1002—1003 H.), and of 1006, 1009, 1010, and 1011 H. We should keep a look out for gold coins of Bangāla, which are

noticed by Abū-l-Fazl.

Bangāla was another name of Gaur. In the Memoirs of Bāyazīd (Bajczet) Bīyāt we have, "an account of Mun'im Khān's removing his headquarters from Tānda to Gaur (which Bāyazīd also calls Bangāla), and of the pestilence which broke out there,"—(see Mr. Beveridge's article, J.A.S.B., 1898, p. 315).

Margins:-

السلطان الأعظم Left و سلطانه ضو Right ب بهر واله يتن Lower

Ahmadabad issued rupees of this type from 981 to 986 H. the dates reading from inside. The Ahmadabad rupee of 981 H., apparently the only one known of this year and now in Lucknow, is from this find. On it the year is reversed, 144 for 9AL.

The stroke to the right of if I take to be the tail of of ضرب making the name appear to read Anhalwala, a form of the name which does occur. We had before (Pl. ii, 3.) a parallel instance of the division of the letters of a word in this position. The find contained 3 specimens, all of 984 H. from the Nahrwala mint. The obverses of two of them are shown.

Anhalpūr or Anhalwāra was founded about 74 A.D., by Ban Rāj of the Chowra (Chāudā) tribe and by degrees the name became corrupted to Nahrwara or Nahrwala (Forbes, Ras Mālā, 1878, p 29). Nahrwāla is the form it takes in the time of In the Tabaqat-i-Albari (Elliot, History, v. pp. 196, 432) we find mention of "Nahrwāla Patan" and "Nahrwāla, better known as Pattan." The Akbarnāma (Beveridge, ii, p. 200) speaks of "Pattan which is the nearest city of Gujrat and used formerly to be called Nahrwāla."

The Ain-i-Akbari (Thomas, Chronicles, p. 428) mentions , evidently Nahrwala, as one of Akbar's mints for copper, but none of this metal are known. The rupees now noted are the first found. The position of Nahrwäla is indicated on maps by Patan, in lat. 23° 51′ 30" N., long. 72° 10′ 30" E.

PLATE XVI.

Kalima, with L.M.C. mint mark No. 22,

> in left lower corner.

Date 967 vertically above reads ifrom جالل الدين of inside. Right and left margins read from inside and lower from outside:-

السلطان Right خاد الله ماكة Left ملكة لله ضرب گذروله Lower Upper Wanting.

Margins, from inside:-بصدق ابی بکر Upper بعدل Left Right Traces.

In the mint name the, is joined to U. This occurs on some rupees of Akbar, e.g., in رسول.

One rupee of this mint was found. I do not know the position of Gazraula, if that be the correct reading, unless it is the present Gajraula, lat. 28° 50′ 45″, long. 78° 16′ 48″, in the Morādābād District, U.P. Villagers often pronounce j, o, and is as ج; for instance they say گجری for گجری, and for گذري. Gujrāt is often written Guzrāt.

The inhabitants of Gajraula state that their village was founded by Suraj Dhaj, one of Akbar's officers. They have shown me documents, the earliest dated 1137 H., in which Gajraula is spelt with j. The name of the mint on the coin can be read Gadraula. If the early inhabitants of Gadraula were of the Yusufzi tribe the d may have been pronounced or changed to j: a subdivision of the Yūsufzīs named Khwājozī or Khwādozi are descended from one Khwajo or Khwado (see Raverty, Notes on Afghānistān, p. 208).

No. 3. Bālāpūr. D. 48 Ilahi-Di. W. 176. S. 07.

There were 9 like that figured; and one with above and specifically all dated in 1015 H. None show distinctly all the letter before . Section 1015 H.

 trace of , i (I.M.C. (Wright) No. 642); and 3 were from a die with [L] apparently in one line, as on pl. iii, 6. None

had dates or regnal years.]

The Akburnama mentions Jalnapur in connection with Ahmadnagar in the 46th year of the reign (Elliot, History, vi. p. 102). It is the same as Jalna due east of Aurangabad, History, vii, p. 11, note). The distance is 39 miles. Old Jalna city is in ruins. The mint name was first read and the location of the mint identified by Mr. Nelson Wright. (Cp. Num. Supp. III. art 24.)

Shāh 'Alām II.

No. 7. Bālānagar-Gadhā. Lat. 23° 10' N., Long. 79° 56′ 30″ E. D. 1207 H.—33. W. 170.

Obverse. Reverse. 17 -V سم سذہ جلوس ضرب بالا نگہر گدھا شاه عالم بادشاه ی رہ عقت کشور

Over 60 rupees of Shah 'Alam II from the Balanagar-Gadha mint were recently found in Sagar city, C.P., of all regnal years from 26 to 38. The mint is seldom legible. On those of the 26th, and up to and including the 32nd year the legends on both sides correspond, except the mint name, to B.M.C., No. 1170 (a gold coin of Ahmadnagar—Farrukhābād) In the hoard rupees of the 26th year (1199) and 29th year (1202) only of this type had the Hijri years in full. From the 33rd to the 38th year included the type is shown in Pl iii. 7, a rupee from this find. The rupees of the 33rd year only of the latter type had the Hijri year perfect.

I have enquired at Jabalpür and Sagar and have been unable to hear of a Bālānagar-Gadhā. This may for a time have been a name of Garha, or Gadha, now an unimportant town close to the west side of Jabalpur on the road to the

Marble Rocks.

I gather from Prinsep's Useful Tables that the Balanagar-Gadhā rupees formed the class popularly known under the name of Bālāsāhī, so called (p. 28) from Bālājī Pandit, the officer who first issued them. Prinsep (p. 53) refers to the Bālūsāhī as the "Old coinage of Ságar, current in Gurrah and Bundelkhand," and tells us (p. 29) that, " The Sagar mint was set up in 1779, by the Peshwa's officer at Garrah Mandlah, and coined about seventeen lákhs of Bálásáhí rupees per annum."

New Mughal Mints and rare Mughal Rupees.

Bālānagar, thus, may have received its name from Bālājī Pandit, who probably resided in Gadhā, in early times a "large city" which with the village of Kantaka or Katanga, 20 miles to the north, give its name to the immense territory called "Garha," or "Garha Katanka" ("Gadha-Katanga") mentioned in the reign of Akbar (Elliot, History, pp. 169, 288; Beveridge, Akbarnāma, ii, p. 323) and occasionally afterwards.

"Mandlah" mentioned above lies on the Narbadā river about 50 miles to the south-east of Jabalpūr. The Gond Rājas of Gadhā Mandala had their capital for some time at

Gadhā.

The Gadhā mint was in full operation when Mr. Daniel Leckie passed through the place in 1790. (Imperial Gazetteer, 1885, v, p. 12.)

 روش نگر ساگر

This rupee, with "Sagur" below it, is given by Prinsep, Useful Tables, pl. xlv, 9, but the name of the mint on his coin is illegible. He states (p. 66) that, "The trident, star, and flag of Siva are its distinguishing marks"—of the "Ságar" rupee—and there refers to the coin of the 51st year in his plate.

The Sagar hoard just mentioned furnished rupees of every year from 25 to 39 of the type shown in pl. iii, 8, and in Prinsep, but none had Hijiri dates. Over 150 were found. I believe I have seen three or four with Hijiri dates in the thirties over (1)2.

The Deputy Commissioner of Sagar has been kind enough to inform me that the older generation assert that Sagar at one time used to be called Ravishnagar, but they have no evidence

or records in support of their statement.

According to Prinsep the mint in Sāgar city was established in 1782 (p. 59), that is in 1197 H., the 24th or 25th year of Shāh 'Alam, and all the old coins of Sāgar and Gadha were rapidly disappearing from circulation (p. 29) when the new Sāgar mint erected in 1824 began to issue rupes bearing the mint name Farrukhābād. with upright milling (pp. 2, 3).

In J.A.S.B. 1897, pl. xxxiii, 64, Dr. Hoernle has figured

328

one of the 44th year, with illegible mint-name, and (p. 271) has assigned it, for some reason not evident, to the native state of Koc.

W. Vost.

66. On the Bijapur rupee of Kam Bakhsh.

In a letter written a short while ago I was lamenting the scarcity nowadays of rare coins in the Ahmadābād bazar. After posting that letter, I went straight to the bazar, and the very first coin to be put into my hand was a Bijāpūr rupee of Kāmbakhsh!

The rupee is of the same type as No. 853 in the British Museum Catalogue, but earlier by a year, and happily it contains that part of the obverse legend which is wanting in the specimen in the British Museum. Right at the top, above the words كام بخش, stands its every letter beautifully distinct, the laqab دين يناه 'the Asylum of the Faith.''

This addition to the legend thus confirms the statement expressly made by Khāfī Khān in his Muntakhabu-l-Lubāb:—

"The Prince (Kām Bakhsh) then assumed the throne. He was mentioned in the Khutba under the title of Din Panāh, and coins also were issued with this title." Dowson's Elliot, vii, 390.

Further the couplet on this rupee proves to be precisely the couplet that Mr. Rodgers "built up," and subsequently published in the J.A.S.B. (vol. lvii, part 1, No. 1—1888), namely,

در دکن زد سکه بر خورشید و ماه بادشاه کام بخشش دین پناه

'The Emperor Kām Bakhsh, the Asylum of the Faith, put his stamp on the sun and moon in the Dekkan.'

G. P. TAYLOR.

67. Was there a Zafarābād rupee of Shāh 'Ālam I?

A few days ago a money-changer here called to show me a few coins. Amongst them I was delighted to find a duplicate of the "Zafarābād" rupee of Shāh 'Ālam I, a rupee that Mr. Rodgers in his Lāhor Museum Catalogue (page 197, No. 3) has termed "Unique." In that Catalogue it is described as follows:—

Obverse.	Reverse
غازي	عراذويين
8(a	ظفو
عالم باد	احد
شــــاة	سنه جلوس
سکه ۱۱۱۹	ضوب
	11

Zafar[ābād], 1st year, 1119 H.

On the specimen now in my possession the arrangement of the Reverse legend differs slightly from the above, inasmuch as the عناء stands not to the right but to the left of مارس, also in the lowest line no trace is to be seen of the two 'Alifs. But in all other respects the two specimens are precisely alike.

From Mr. Rodgers's attribution of this coin to the Zafarābād mint, it is clear that he read the reverse legend thus:—

is, so far as I can learn, otherwise unknown, and it is, moreover, a combination quite meaningless. For these reasons one may well doubt the correctness of the above reading of the legend. I venture, accordingly, to submit that the constituent words should be read just as they are arranged on the coin itself. We shall then arrive at a legend hitherto unsuspected indeed, but perfectly intelligible, to wit,

سنه احد جلوس ظفر مأنوس ضرب

struck at.....the year I of the accession (reign) associated with victory. The lowest line is thus assumed to contain the name, as yet unknown, of the mint: and it was, of course, just the lowest line of the reverse that in the large majority of the later Mughal coins was reserved for the mint-name.

GEO. P. TAYLOR.

Aḥmadābād; 20-1-1909.

68. THE MUGHAL MINT OF GOKULGARH.

The ruined fort of Gokulgarh is situated two miles to the north of Rewari, a fairly important junction on the Rajputana-Malwa Railway in the Gurgāon District of the South-East Punjab.

The town of Rewari itself is of great antiquity. Tradition assigns its original foundation to Raja Karm Pal son of

Chattar Sál, and nephew of the celebrated Prithvi Rájá. The present town is said to have been built about the year 1000 A.D. by Rájá Reo or Ráwat, who called it after the name of his daughter Rewāti. In Mughal times, although Rewári was the headquarters of a Sarkár or district of the Empire, its Rájás appear to have enjoyed a large measure of independence, paying tribute but coining their own money. They built the fort of Gokulgarh, some of the bastions of which still remain as indications of the former strength and size of the place.

The mint of Gokulgarh is included amongst those of the silver coins of Shāh'Alam II only, in Mr. Burn's 'The Mints of the Mughal Emperors.' It appears to have been published for the first time in 'Some Novelties in Mughal coins' by Major Vost and Mr. White King—see Numismatic Chronicle, 1896, p. 155. The coin itself is No. 4133 in the Third Part of the

White King Catalogue.

In the Numismatic Supplement No. VIII contained in the Journal of the Asiatic Society of Bengal for August, 1907, Dr. Taylor has attributed a coin of Kám Bakhsh to Gokulgarh, but adds that it cannot be the Gokul near Muttra. It also cannot be identified with the town which is the subject of this note.

Mr. Nelson Wright's Introduction to vol. iii of the Catalogue of the Coins in the Indian Museum, Calcutta, contains a brief notice of the mint Gokulgarh. He there notes that it does not occur as a Mughal mint till the reign of Shāh'Alam II. In A.H. 1202 the latter besieged and captured the town, but rupees

of earlier dates are known.

In the Dehli bazar I came across a find of some forty Gokulgarh rupees of Shāh 'Alam II, which had been sent from Rewári. Unfortunately there were two coins only which exhibited the entire name, and it was by their aid that I was able to read the name of the mint on the remainder. This find also enabled me to read the name Gokulgarh on two or three rupees of Shāh 'Alam II, which formed part of a large consignment of Treasure Trove from the Gurgáon District. These coins are said to have circulated in the bazars of Farrukhnagar, a small Gurgáon town, till the time of the Mutiny.

A rupee of Shah 'Alam II, Mint Gokulgarh.

R. B. WHITEHEAD.

69. OLD COINS IN THE BAHAWALPOR STATE TOSHAKHANA.

In December, 1908, I was deputed to examine the old

coins in the Bahāwalpūr State Toshakhānā.

Till recent years the State Treasure was kept intact in the desert Fort of Deräwar, but has been gradually dispersed after its removal to the present capital of the State. In round numbers there are now four lakhs of silver coins, and half a lakh of gold. Fortunately I found that the coins had been roughly classified, and it was unnecessary to open most of the bags as they only contained coins of Bahāwalpur State, and gold and silver issues of the Durrani Kings Mahmud and Shah Shujā, minted at Bahāwalpūr. Next in number came miscellaneous coins of the Durrani Kings. In comparison with these the Mughal coins formed only a residue of the whole, but from a numismatic point of view were of great importance, because there were at least six thousand Mughal gold mohurs. The Mughal rupees were scattered at random throughout the bags of silver, and often only some half dozen would turn up out of a bag of a thousand, but the results I think have justified the labour expended. The time at my disposal, less than three weeks, was altogether inadequate for a thorough examination of so great a number of coins, and many things worthy of preservation must have escaped my notice. For instance it would have been interesting to have compiled lists of dates, but I was unable to do this. Any dates mentioned are taken from coins selected at random.

I confined my chief attention to a search for new or rare

Mughal coins, and for fine specimens of known issues.

GOLD COINS.

Of the whole mass of gold coins, the oldest was a solitary mohur of Sher Shah Suri. Mughal. I found a few gold coins of Akbar, of Shah Jahan, and of Shah 'Alam II, but all the remaining Mughal issues were of the emperors from Aurangzeb to 'Alamgir II. The commonest mohur mint was Akbarábád. There must have been at least two hundred Akbarābād coins of Aurangzeb, fifty of Jahāndār Shāh, and sixty of Muhammad Shāh. Many coins of West Punjab mints such as Dera and Multan were found, but these did not predominate.

In Mr. Burn's, 'The Mints of the Mughal Emperors', published in Part I of Volume LXXIII of the Journal, Asiatio Society of Bengal, a paper to which I have made frequent reference, twenty-four mints of the gold coins of Aurangzeb are shown. In the Rahāwalpūr Treasure mohurs of some thirtyfour mints were found. As it would appear that mohurs of other emperors, in addition to Aurangzeb, have not been pre-

viously published, I have appended to this Note lists of the mints of the various emperors represented, and short references

to the more interesting coins.

I came across two mohurs of Farrukh Siyar of apparently a new mint, Sīkākul. Through the kindness of Mr. Burn I have been enabled to identify this place with Chicacole or Srīkākulam, a town in Ganjam District, Madras Presidency, situated four miles from the sea on the Languliya river, and on the Grand Trunk Road. The town was the capital of the Mughal sarkar of Chicacole.

In his Introduction to Volume III of the new Indian Museum Catalogue, Mr. Nelson Wright says- 'Apparently no gold coins are known of Aurangzeb from the Lahor mint. Some fifteen of various dates were found at Bahāwalpūr. In view of the remarks made in this Introduction, which has been of great assistance to me, the following mohurs are of especial interest.

EMPEROR. Shāh Jahān. 'Alamgir II. Muhammad.

MINT. Lakhnau. Multān. Aurangābād.

Another apparently new mint is Derajāt. What may be a new type of mohur of Shah 'Alam Bahadur I is of interest, as are half mohurs of Muhammad Shah minted at Sind. The reverse side of these exhibits an unusual inscription. Fuller references to these and other matters interesting to the numismatist are made later in this Note.

The lists of selected Durrani coins do not Durráni. call for comment. One mohur of Ahmad Shāh, bearing the Hijrā date on the reverse side, appears to be of an Army Mint-see Army Mint of the Shahs of Persia on page 169 of Dr. Codrington's 'Musalman Numismatics.'

Miscellaneous gold coins included many Miscellaneous. mohurs of Nadir Shah and the Qajar

Shahs of Persia. There were some thousands of ducats.

There are only eleven mohurs of Shah Shāh Jahan. Jahan, but they include 'square area' type coins of Akbarnagar, Bhilsa, Kabul, Kashmir and Lahor mints, none of which are in Mr. Burn's Tables. The Kābul mohur is dated A.H. 1048 (jalus 11), and that of Lakhnau is dated 1051 (jalus 15). Neither appears to have been published before—see Mr. Nelson Wright's Introduction to Volume III of the Indian Museum Catalogue.

The gold coins of Aurangzeb are of at least thirty-four different mints. Those Aurangzeb. not contained in Mr. Burn's Tables are Ilahābād, Ahmadābād, Tatta, Jahangirnagar, Daru-l-Jihad Haidarabad, Zafarabad, 'Alamgirpūr, Katak, Dāru-s-Saļtanat Lāhor, Murshidābād,

and Ahsanābād. In the earlier examples of the Aurangābād mint, the name occurs at the top of the coin (latest date jalus 19). Later it was changed to the bottom (earliest date 1090. jalus 22). Similarly in a mohur of Ahmadnagar dated jalus 14, the name of the mint is at the top of the coin. Later specimens exhibit the name at the bottom (earliest date 1093). The name 'Alamgirpur also occurs in both places. Khanbayat is at the top of a coin dated regnal year one. When the spelling is changed to Kanbayat the mint occurs at the bottom of the coin (earliest date 1082, jalus 14). The mohurs of Dāru-z-Zafr

Bījāpūr exhibit two d stinct styles.

Out of at least two hundred mohurs of Mustaqirru-l-Khilafat Akbarābād, one only had بدر صير in the couplet (date 1097), the rest having مهر منبر (earliest date 1099). Coins exhibiting both versions of the couplet were found of Surat, of Kabul, and of Daru-l Mulk Kabul. There are mohurs of both Gulbarga and Ahsanabad. The gold coins of Daru-s-Saltanat Lahore appear to be new. At least fifteen were found. The selected specimens range from 1097 to 1118, and are of the usual type, the name of the mint coming at the top. The three selected mohurs of Murshidabad are all of 49 jalus date. There are gold coins of Ujjain (1105 A.H.), and of Daru-l-Fath Ujjain (1112). The 'square areas' type of Jahangirnagar mentioned by Mr. Nelson Wright (I.M.C.) is represented by three specimens of jalus years 14 and 15.

There are three mohurs apparently of Shāh 'Alam Bahādur I bearing the follow-Shah 'Alam Bahadur I. ing inscription :-

Reverse. Obverse. جلبس مالوس عالم گير ثاني مستقر الخلافه قوائى بهادر ســنه احد صاحب ضدوب (Probably مباری سکه)

They are coins of Sāḥib Qirān Bahādur 'Alamgir Sāni, struck at Mustaqirru-l-Khilafat, Akbarabad, in 1119 (jalus one), and resemble silver coin No. 3, on p. 220 of C. J. Rodgers' Catalogue of 'The Coins of the Moghal Emperors of India' in the Lahore Museum. It would appear that this rupee was erroneously attributed by Mr. Rodgers to 'Alamgir II, and is a coin of Shah 'Alam Bahadur I.

On a mohur of Mustaqirru-l-Khilafat, Akbarabad, the name is at the bottom of the coin, dated 1119, jalus 1. The mint of another coin, dated 1119, jalus 2, is Mustaqirru-l-Khiláfat only, at the top of the coin. On other mohurs of jalus dates 2, 3 and 4, Akbarābād is called Mustagirru-l-Mulk.

Gold coins of Dāru-l-Fath, Ujjain, display two reverses,

One is:-

The other is :-

دار الفنسم اوجين

Similarly of Farkhunda Bunyád Ḥaidarábád:— (1).

(2).

مانوس حددر اباد فرخنده (بنیاد)

There are mohurs of Etāwa, Tatta, Farkhunda Bunyād, Ḥaidarābād, and Muḥammadābād mints, which are not represented in Mr. Burn's Tables.

Gold coins of Etāwa, Mustaqirru-l-Mulk Akbarābād; Dārus-Sarur, Burhanpur, Klujista Bunyad, ahandar Shah. and Dáru-l-Khiláfat Shāhjahánábád, were found. There are two types of the Sháhjahánábád coins.

The mints of the mohurs of Farrukh Siyar are Etáwa; Dáru-l-Khair, Ajmer, Akbarábád; Dáru-l-Farrukh Siyar. Fath, Ujjain, Arkát, Ilahábád; Dáru-sSarúr, Burhánpúr, Pesháwar, Khujista Bunyád, Sahrind. Súrat, Dáru-l-Khiláfat Sháhjahánábád, 'Azímábád, Farkhunda Bunyad, Kashmír; Dáru-s-Saltanat, Láhor, Murshidábád, Mú'azzimábád, Multán, and Síkákul. Of these Dáru-l-Khair Ajmer, Akbarábád, Dáru-l-Fath Ujjain, Arkát, Ilahábád. Pesháwar, Sahrind, Súrat. 'Azímábád, Farkhunda Bunyád. Kashmir, Mu'azzimábád, and Síkákul are not in Mr. Burn's Tables.

For the first five regnal years Akbarábád is called Mustagirru-l-Mulk. In jalús year 6 the epithet is changed to Mustaqirru-l-Khiláfat. As the reverse of the Ilahábád mohur is pecu-

liar, I figure it here :-

الع اباد

The Arkát coin is dated jalus 5. On 'Azímábád coins of jalus year 1, the name of the mint is not attended by the usual epithet Mustaqirru-I-Mulk, which only appears on mohurs of 1129, jalus 5.

The mohurs of Farkhunda Bunyád (Haidarábád), Kashmír,

and Mu'azzimábád appear to be new.

The name Síkákul, possibly an entirely fresh mint, appears

distinctly on a mohur of this reign, dated 1124.

The gold coin mints represented are Peshawar, Khujista Bunyad, Dáru-l-Khiláfat Sháhjahanabad, Dáru-l-Mulk Kábul, and Dár-us-Salta-Rafi'u-d-Darjat. nat, Lahore. The unpublished mints appear to be Pesháwar, Khujista Bunyád, and Dáru-s-Saltanat, Lahor.

All the mohurs are of the usual couplet type. There are two mohurs of Dáru-l-Mulk, Kábul, companions to the unique

mohur in the Lahor Museum.

Mohurs of Sháh Jahán II of Arkát, Khujista Bunyád, Súrat, Dáru-l-Khíláfat Sháhjahánábad, Dáru-s-Saltanat, Láhor, and Mustaqirru-l-Sháh Jahán II.

Khiláfat Akbárábád mints were found.

The Súrat coin is dateless and may be attributable to Sháh. Jahan III. This remark also applies to the mohur of Mustaqirru-l-Khiláfat Akbarábád.

The gold coin mints of Muhammad Shah are Etawa, Ahmadábád, Akhtarnagar Awadh, Islámábád; Mustagirru-l-Khiláfat Akbarábád, Muhammad Shah. Dáru-l-Fath, Ujjain, Aurangábád, Dáru-s-Sarúr, Burhánpúr, Tatta, Siwai Jaipur, Khujista Bunyád, Súrat, Sahrind, Sháhá-

bád Qanauj, Dáru-l-Khiláfat Sháhjahánábád, Dáru-l-Mulk, Kábul, Katak, Kora, Gwaliar, Dáru-s-Saltanat, Láhor, Muham-

madábád, Murshidábád, Mu'azzimábád, and Multán.

The mints not included in Mr Burn's Tables are, Ahmadábád, Islámábád, Aurangábád, Dáru-s-Sarúr, Burhanpúr, Tatta, Siwáí Jaipúr, Sahrind, Sháhábád Qanauj; Dáru-l-Mulk Kábul, Katak, Kora, Gwaliar, Mu'azzimábád, and Multán.

The date of the later of the two mohurs of Dáru-l-Mulk

Kábul is jalus 10.

The name Mustaqirru-l-Khiláfat Akbarábád occurs both at the top and at the bottom of the disc. Out of a large number of gold coins of this mint I discovered two which presented the Shahjahanabad style of obverse. In these cases the name of the mint was at the top of the coin.

The Aurangábád coin appears to be unique, as it still preserves the name in its old form. This coin is also remarkable as the obverse is in the Sháhjahánábád style. The name of

the mint comes at the top of the coin.

Mohurs of the following mints were found: -Etáwa, Mustaqirru-l-Khiláfat Akbarábád, Siwáí Ahmad Shah Bahá-Jaipúr, Deraját, Dera or Deraját, Sahdur. rind, Dáru-l-Khiláfat Sháhjahánábád,

Farrukhábád, Dáru-s-Saltanat, Láhor, Muḥammadábád, and Multán. Those not included in Mr. Burn's Tables are Etáwa, Siwáí Jaipúr, Dera, Deraját, Sahrind, Farrukhábád, Dáru-s-Saltanat, Láhor, and Multán. The name Deraját distinctly appears on one coin.

The gold coin mints are Ahmadnagar Farrukhábád, Islámábád, Mustaqirru-l-Khiláfat Akbarábád, 'Alamgir II. Siwáí Jaipúr, Sahrind; Dáru-l-Khiláfat Sháhjahánábád, Dáru-s-Saltanat, Láhor Dáru-l-Amán Mul-tán, Mahindrápur and Najíbábád. Of these mints Ahmadnagar Farrukhábád, Islámábád Mustaqirru-l-Khiláfat Akbarábád, Siwáí Jaipúr, Sahrind, Dáru-l-Amán Multán, and Mahindrápur are not represented in Mr. Burn's Tables.

The earliest date of the Ahmadnagar Farrukkhábád coins

is 1170 (jalus 3).

It is unfortunate that the Sahrind mohur is dateless. There are four varieties of the Sháhjahánábád mohur.

(1) The obverse of the usual type:—

عالم گيـــو بادشالا غاز سکه مدار

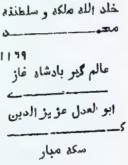

[N.S.]

(2) The couplet obverse as on No. 4092 in Part III of the White King Catalogue. In addition to the ordinary type of reverse, there is something in an additional line at the top.

(3) The obverse is in three lines as follows :-

محود خلد الله ملكه و سلطنته عزيز الدين عالم كيو بادشاه غاز سكه ميار ابو العدل Ordinary type of reverse.

(4) Obverse in four lines is as follows:-

Reverse.

جهان اباد دارالخلافه سنه

In the introduction to volume iii of the Catalogue of Coins in the Indiam Museum, Calcutta, Mr. Nelson Wright says that the latest Mughal issues from Multan mint are of Ahmad Shah, and that after this reign Multan became a mint town of the Durrani dynasty. Amongst the Bahawalpur treasure I came across one mohur and several rupees of 'Alamgir II issued from Dáru-l-Amán Multán mint. They are of the true imperial type, but have a mint mark on the reverse. I shall have something more to say about this in my note on the silver coins.

·Obverse.

عالم گیر ۱۱۷۳ بادشاه غاز سکه مبار

Reverse.

دار الأمان جلوس سنه ب ضرب مُلتان

The mohurs of Sháh Jahán III are of Ahmadnagar Far-Sháh Jahan III. rukhábád, Islámábád, Dáru-l-Khiláfat Sháhjahánábád, and Mahindrápúr mints. The Islámábád coins have no hijri dates, and may be issues of Sháh Jahán II.

The mints of Sháh 'Alam II represented are Mustaqirru-l-Sháh 'Alam II. Khiláfat Akbarábád, Siwáí Jaìpúr, Mahindrápúr, and Najíbábád.

The miscellaneous Mughal gold coins contain duplicates of
Miscellaneous those already reviewed, half mohurs of
Mughal gold coins. Muhammad Sháh of Sháhjahánábád mint,
and interesting half mohurs of the same
Sháhjahánábád type of obverse, but the reverse is remark-

الزمان حد الأمير صا ١٢ سند ضر سند

Alamír Sáhib-uz-Zamán Zarb Sind (jalus) 12.

Mr. Burn has kindly given me his opinion on the uncertain mints of three Mughal mohurs. His sugmints.

Emperor. Aurangzeb.

Elichpúr.

'Azímábád or Háfizábád.

Kumhársain.

The gold coins of Nádir Sháh are of mints Bhakkar, Pesháwar, and Dáru-l-Mulk Kábul, and are of the usual type of this emperor's Nádir Sháh.

coins struck in India. Ahmad Sháh Durráni's mohurs are of mints Attak, Ahmadnagar, Farrukhábád, Bhakkar, Pesháwar, Ashraf-ul-Bilád Ahmad Sháhí (Qandahár), Ahmad Sháh Durráni. Dera, Deraját, Sahrind, Dáru-l-Khilafat Sháhjahánábád. Dárus-Saltanat Kábul, Dáru-l-Mulk Kábul, Dáru-s-Saltanat Láhor, Mashhad Muqaddas, Dáru-l-Amán Multán, Multán, Najíbábád and Hirát.

Most of the coins are of the type p. 166, 1, of Rodgers'

"Catalogue of the Coins in the Láhor Museum," part ii.
One Láhor mohur is of type plate ii, fig. 1, of Rodgers' "The Coins of Ahmad Shah Abdalli," published in the Journal, Asiatic Society of Bengal, volume liv, part i, 1885. Type plate ii, fig. 6, is represented by gold coins of Bhakkar, Dera, and Dáru-l-Amán Multán.

The only words I can read on the reverse of one gold coin are 'Zarb rikáb mubárik,' and 'muḥarram'? The date of this coin is 1173, and is contained on the reverse. Possibly the mint is analogous with 'Zarabkhána rikáb,' or army mint of the Shahs of Persia, mentioned on p. 169 of Dr. Codrington's

'Musalman Numismatics.'

The mohurs of Taimúr Sháh Durráni as Nizám are of mints Dera, Dáru-s-Saltanat Láhor, Dáru-l-Amán Multán, and Multán. Taimúr Sháh Durráni

The mohurs of Taimúr Sháh Durrání as king are of Ashraf-ul-Bilád Ahmad Sháhí, Pesháwar, Dáru-s-Saltanat Kabul, Mashhad Muqaddas, Dáru-l-Amán Multán, Hirát, Taimúr Sháh Durráni as King.

and Dáru-s-Saltanat Hirát.

The issues of Zamán Sháh Durráni are represented by coins of Ashraf-ul-Bilad Ahmad Shahi, Dera, Deraját, Pesháwar, Dáru-s-Saltanat Kábul, Dáru-s-Saltanat Láhor, and Dáru-l-Amán Multán.

Shah Shuja's' gold coins include mohurs and double mohurs of Baháwalpúr and mohurs of Dera, Dáru-s-Saltanat Kábul, and Dáru-l-Amán Sháh Shujá Durráni.

Mahmud Shah's coins are double mohurs of Bahawalpur, of type No. 2861 in part iii of the White King Catalogue. Mahmud Sháh Durráni.

As a general rule rupees of Baháwalpúr mint, whether issues of the later Durráni kings or of the Rupees: Mughal. State, had been separated out, and as in the case of the gold coins, formed the great bulk of the four lakhs of silver coins. The remainder consisted of miscellaneous Durráni rupees, with a sprinkling of Mughal and Persian coins. There was one bag of about a thousand, 'square area' type coins of Shah Jahan. I thought it possible that out of so many rupees of this type, I might come across a coin of Shah Shuja. Muhammadi, but was not successful, although I found three or four 'square area' type rupees of Muhammad Murád Bakhsh of Ahmadábád and Súrat mints, and several coins of Aurangzeb of this type.

Although the number of Mughal rupees was comparatively small, I found many rare coins, which are detailed below. There is a duplicate of the till now unique Murádábád rupee of Aurangzeb in the Lahor Museum. It bears the same dates.

I came across several rupees of Rafí'u-d-darját of Multán

mint of the rare non-couplet type.

'Alamgir Sáni's coins of Baldat Bikánir and Dáru-l-Amán

Multán are worthy of note.

The silver coins may be said to start from Aurangzeb, and to end with 'Alamgir II. Rupees of Aurangzeb and Muhammad Shah predominated. The number of Muhammad Shah's coins of mints Kora and Akhtarnagar Awadh was remarkable. There were about equal numbers of the rupees of Farrukh Siyar and Sháh 'Alam Bahádur I. I found no nisárs, and no rupees of the rare emperors such as A'zam Sháh, Sháh Shujá, Muhammad Ibráhím, and Bedár Bakht.

There is a great mass of material for a detailed study of Durráni silver coins, of which there must Durráni. be a lakh in the State Treasury. The most interesting of the selected coins appears to be a solitary rupee of Taimúr Sháh minted at Khujista Bunyád, Haidarábád

The rupees of Shah Jahan include 'square areas' type coins of mints Ahmadábád, Akbarnagar, Shah Jahan. Burhánpúr, Bhakkar, Bhílsa, Júnágarh, Jahángírnagar, Daulatábád, Súrat, Kábul, Khanbáyat, Láhor, Lakhnau, and Multán.

The obverse of the Burhánpúr coin has margins as

follows:---

Right margin بومانيور . . Bottom margin صاحب قران ثامی ... Left margin خلد الله ماكم . . Top margin شهاب الدين معمد

The left margin inscription is unusual. One of these coins apparently of Khanbayat mint is a curiosity. The obverse was struck from a reversed die, but can be read in a mirror. The reverse is normal.

Coins of miscellaneous types were found of mints Ahmadábád, Akbarnagar, Jahángírnagar, I áhor, Tatta, Burhánpúr,

Patna, Dehli, Súrat, and Bakkar or Nagar.

The reverse inscription of one type, mint and date illegible. is in three lines. The first and third lines contain the names of the four Imams with their attributes. The second line contains the Kalima.

The rupees of Muhammad Murád Bakhsh are of the usual 'square areas' type, mints Ahmadábád Murad Baklish.

and Súrat.

Rupees of Aurangzeb were found of the following mints:-Júnágarh, Akbarábád, Dáru-l-Khair Aj-Aurangzeb. mer, Ahsanabad, Ahmadabad, Ahmadnagar, Islámábád, Akbarnagar, Burhánpúr, Bareli, Dáru-z-Zafr Bíjápúr, Tatta, Chínápatan, Sahrind, Zafarpur, 'Alamgirpúr, Dáru-l-Mulk Kábul, Katak, Kashmír, Kanbáyat, Gulkanda, Lakhnau, Machhlípatan, Murádábád, Multán, Nárnol, Dáru-s-Saltanat Lahor, Etawa, Dáru-l-Khiláfat Sháhjahánábád, Mustaqirru-l-Khiláfat Akbarábád, Súrat, Zafarábád, Dáru-l-Fath Ujjain, Ujjain, Dáru-l-Amán Multán, 'Azimábád, and Jahángírnagar-thirty-four different mints in all.

The coins are of the usual couplet type with the exception of coins of Junagarh and Akbarabad, which are of types p. 182, 13 and 14 respectively of Rodgers' "Catalogue of the

Mughal Coins in the Lahore Museum."

The most important of these coins appears to be that of

Murádábád, which I have mentioned earlier in this note.

Sháh 'Alam Bahádur I's silver coins are of mints Etáwa, Arkat, Akbarábád (Mustaqirru-l-Khilafat, Mustaqirru-l-Mulk), Dáru-s-Sarúr Sháh 'Alam Bahadur I. and Burhánpúr, Bareli, Pesháwar, Chinápatan, Tatta, Kanbáyat, Dáru-s-Saltanat Láhor, Multán, Dáru-l-Khiláfat Sháhjahánábád, Lakhnau, Súrat, Khujista Bunyád, Kashmír, and Dáru-l-Mulk Kábul.

In his Introduction to volume iii of the Indian Museum Catalogue, Mr. Nelson Wright says of Arkat—' The mint appears to have been established in the reign of Farrukh Siyar-the earliest known coins being of 1129 (cabinet of Dr. Taylor).' If my reading is correct, the Arkat coin of Shah 'Alam Bahadur I is new. It is dated 1122 (jalús 4).

The rupees of Pesháwar, Multán, Kashmír, and Kábul are

Rupees of Jahándár Sháh were found of the following rare. mints :- Etáwa, Mustaqirru-l-Mulk Akbarábád, Dáru-s-Sarúr Burhánpúr, Bareli, Jahándár Sháh. Súrat, Dáru-s-Saltanat Láhor, and Dáru-l-Khiláfat Sháhjahánábád.

Farrukh Siyar's coins are of Etawa, Ahmadabad, Arkat. Akbarábád (Mustaqirru-l-Mulk, and Mus-Farrukh Siyar. tagirru-l-Khiláfat), Dáru-s-Sarúr Burhán-Bareli, Pesháwar, Tatta, Khujista Bunyad, Sahrind, 'Azímábád, Mustagirru-l-Mulk Azímábád, Farrukhábád Kanbáyat Gwáliar, Murshidábád, Multán, Dáru-l-Khiláfat Sháhiahánábád, Dáru-s-Saltanat Láhor, Ahmadábád, and Dárul-Khair Aimer.

The rupees of Peshawar, Tatta, Kanbayat, and Ajmer are

rare.

The silver issues of Rafi'u-d-darját are represented by rupees of Dáru-l-Khiláfat Sháhjahánábád. Rafi'u-d-darját. Dáru-s-Saltanat Láhor, and Multán.

The rupees of Multan are of the rare type without the

couplet.

Rupees of Sháh Jahán II of the following mints were found :- Mustagirru-l-Khiláfat Akbarábád, Sháh Jahàn II. Dáru-l-Khiláfat Sháhjahánábád, and Dáru-

s-Saltanat Láhor.

The silver mints of Muhammad Sháh are :- Etáwa, Dáru-l-Khair Ajmer, Ahmadábád, Akhtarnagar Muhammad Sháh, Awadh, Arkát, Islámábád, Ilahábád, Dárus-Sarúr Burhánpúr, Bareli, Siwáí Jaipúr, Tatta, Dera, Súrat, Sahrind, Sháhábád Qanauj, Dáru-l-Khiláfat Sháhjahánábád, Azimábád, Kashmír, Kora, Kanbáyat, Muhammadábád, Gwáliar, Lakhnau. Murshidábád, Multán, Bhakkar, Mustaqirul-Khiláfat Akbarábád, Dáru-s-Saltanat Láhor, Dáru-l-Fath Ujjain, Khujista Bunyád, Pesháwar, and Farkhunda Bunyád Haidarábád.

The coins of Tatta, Lakhnau, Khujista Bunyád, and

Farkhunda Bunyád Haidarábád are rare.

If my reading is correct, the coins of Bhakkar of the

ordinary type are new.

I came across several coins of Sháhjahánábád mint, not of the usual type of the rupees of this city, but of the ordinary type.

Rupees of Ahmad Sháh Bahádur of mints Etáwa, Dáru-l-Khair Ajmer, Mustagirru-l-Khilafat Ak-Ahmad Shéh Bahábarabád, Dáru-l-Mansúr Jodhpúr, Siwái dur. Jaipúr, Dera, Sahrind, Farrukhábád, Kálpí, Dáru-s-Saltanat Láhor, Muhammadábád, Multán, and

Dáru-l-Khiláfat Sháhjahánábád were found. The rupee of Dera appears to be unpublished. It is dated

1161 (jalus 1).

The silver coins of 'Alamgir II are of mints Mustagirru-late Khiláfat Akbarábád, Islámábád, Baldat 'Alamgir II. Bikánír, Siwáí Jaipúr, Dera, Sahrind, Dáru-l-Khiláfat Shahjahánábád, Farrukhábád, Dáru-s-Saltanat Láhor, Muhammadábád, Dáru-l-Amán Multán, Mahindrápúr, Najíbábád, and Ahmadnagar, Farrukhábád.

I came across at least a dozen rupees of the ordinary imperial type without any mint mark, but of poor workmanship, struck apparently at المدة علم . This I presumed was the Baldat-i-Safa (?) of Mr. Burn's Tables, and Mr. Rodgers' Catalogue. At last one good specimen exhibited two more letters at the end of the name which was obviously Baldat Bikánír. From the uniform absence of the last two letters on all the other coins, it would appear that they were struck from defective dies. The coins are of jalús dates 1 and 2.

One type of Sháhjahánábád rupee has the following

obverse in four lines :-

خلد الله ملكه و سلطنته

عالم گيرو بادشاه غاز

ابو العدل عزيز الدين

كرير

There are also coins of Sháhjahánábád of a couplet type (White King Catalogue, part iii, No. 4092), and of type No. 8 on p. 221 of Rodgers' Catalogue of Mughal coins in the Láhor Museum.

I found one coin which apparently exhibits a new coup-

Obverse.

عالم گير بنالا جهان باد دـــــا چو مهر منير دــــا يافت رونق تابان

Reverse.

دار الخلافه شاه جهان اباد جلوس میمنت مانوس

344

The inscription on the obverse is not complete, but the couplet might be:—

Sikka yáft raunaq tábán chún mihr munír Az jahán panáh bádsháh Alamgír.

The mint is Dáru-l-Khiláfat Shábjahánábád, and jalús date 4.

I have already noted the find of a mohur of this emperor coined at Dáru-l-Amán Multán in 1173 (jalús 7), of the true imperial type, and excellent workmanship, but bearing a mint mark on the reverse. I also came across several rupees with similar inscriptions:—

Obverse.

عالم گير ١١٧٣ بادشاه غاز سكة مدر

Reverse.

مانوس میمنت جلوس سذه ۷ دارالامان ضرب ملتان

For purposes of comparison I have included with these coins a rupee of Taimur Shah Durrani as Nizam, and a Sikh rupee, both of Daru-l-Aman Multan. The coin of Taimur Shah Durrani is of his usual couplet type on the obverse, but the reverse is exactly similar to the above with the same mint mark. It is dated 1173 (jalus 2). The Sikh rupee also bears the same mint mark, and is dated 1823, sambat, or A.H. 1180. It would be interesting to know who issued coins at Daru-l-Aman Multan in the name of 'Alamgir Sani in the last year of that emperor's reign

The coin of Dera appears to be new.

Sháh 'Alam II. Sháh 'Alam's rupees are of Aonla, Murádábád, Mahindrápúr, and Najibábád mints.

Muhammad Akbar II. A solitary coin of Akbar II is of mint Dáru-l-Khiláfat Sháhjahánábád.

Rupees of Nádir Sháh were found of mints Dáru-s-Saltanat Is ahán, Dáru-s-Saltanat Tabríz, Mashhad Muqaddas, Shíráz, Deraját, Sind,

Pesháwar, Dáru-l-Mulk Kábul, Bhakkar, and Dáru-l-Khiláfat Sháhjahánábád.

Ahmad Sháh Durráni. The rupees of Ahmad Sháh Durráni are of the following types and mints:—

Type of coin No. 2 on page 167 of part ii of Rodgers' Láhor Museum Catalogue:—Multán, Dáru-s-Saltanat Láhor, Mashhad Muqaddas, Sahrind, Pesháwar, Dera (two varieties), Dáru-s-Saltanat Kábul, Ashrafu-l-Bilád Ahmad Sháhi, Dáru-l-Khiláfat Sháhjahánábád, Súrat, Najíbábád, Aonla, Dáru-l-amán Multán.

Type of coin similar to that of Taimúr Sháh on page 171, No. 10:-- Dera, Deraját, Bhakkar, Dáru-l-amán Multán.

The coins of Taimúr Sháh as Nizám are of :—Bhakkar

Taimúr Sháh Durráni as Nizam. (two reverses), Sind, Dera, Dáru-s-Saltanat Láhor, Multán, Dáru-l-amán Multán (two reverses).

Taimúr Sháh Durráni. The coins of Taimúr Sháh as King are of the following types and mints:—

Type of page 171, No. 5:-

Ashrafu-l-Bilád Ahmad Sháhí (two reverses), Mashhad Muqaddas, Dáru-s-Saltanat Kábul (two reverses), Pesháwar (two reverses), Multán, Dáru-l-amán Multán (two reverses), Deraját, Bhakkar, Dera (two reverses), Hirát, Dáru-s-Saltanat Hirát, Khujista Bunyád Haidarábád, Attak.

I presume that the Khujista Bunyád Haidarábád is the Haidarábád in Sind. The coin is a single specimen in fine

condition.

Type of p. 171, No. 10:—Bhakkar. Type of p. 173, 23:—Bhakkar, Sind.

Zamán Sháh Durráni. Zamán Sháh Durráni's rupees are as follows:—

Type p. 175, 7:—Dera, Dáru-s-Saltanat Láhor, Bhakkar, Ashrafu-l-Bilád Aḥmad Snáhí, Dáru-s-Saltanat Kábul, Pesháwar, Deraját, Dáru-l-amán Multán.

Type p. 175, 3:-Pesháwar.

Type as follows (name of mint in circle, marginal couplet as on page 175, 1 around it, and on reverse second couplet):—
Ashrafu-l-Bilád Ahmad Sháhí.

Coins of Sháh Shujá are of the following mints:—Ashrafui-Bilád Ahmad Sháhí, Baháwalpúr, Dera-

Sháh Shujá Durráni. ját, Dáru-l-amán Multán.

The rupees of Mahmúd Sháh are of:—Baháwalpúr (double rupees), Baháwalpúr, Dáru-s-Sarúr Baháwalpúr, Dáru-s-Sarúr Baháwalpúr (type p. 178, 5), Ashrafu-l-Bilád Ahmad Sháhí, Dáru-s-Saltanat Hirát, Bhakkar, Pesháwar, Dáru-l-amán Multán, Deraját, Ahmadpúr (type page 178, 5).

Ahmadpúr is the old capital of the Baháwalpúr State.

The Baháwalpúr State rupees found were of type p. 198, 2, and of mints:—<u>Kh</u>ánpúr, Dáru-s-Sarúr Baháwalpúr, Aḥmadpúr, and Baháwalpúr.

It was a liberal action on the part of the Baháwalpúr State to afford an opportunity of examination of the old coins, and the inspection of so interesting a hoard was to me a great personal pleasure. I have made proposals that moderate prices should be fixed for the selected specimens, which would then be made available to the Museums and to private collectors.

DELHI:

R. B. WHITEHEAD.

February 28th, 1909.

70. THE DATE OF THE SALIMI COINS: ADDENDUM.

In my article on the date of the Salimi Coins, published in the Num. Supplement No. X, I adduced evidence to prove that these coins were issued by Salim after his accession to the throne. At the time of writing that article I omitted through inadvertence reference to a half-rupee struck by Salīm at Kābul. It was described by Mr. C. J. Rodgers in the Journal of the Asiatic Society of Bengal for 1896, and has now been registered in the Indian Museum Catalogue, vol iii (No. 686, also plate vii). This half-rupee, bearing Salim's name, is distinctly dated 1014 A.H.—thus the very year to which I assigned those of the Ahmádábád Salīmī coins dated (Ilahi) 50. If we are to hold with Mr. Beveridge that the Ahmadabad coins were issued while Prince Salim was de facto Governor of Gujarat, must we now maintain, on the strength of this Kabul coin, that in 1014 A.H. the Prince was also de facto Governor there? It is every way more probable that both at Ahmádábád and at Kábul the coins first struck by Jahángír after his accession bore his princely name Salim, and only the later, heavier, rupees his newly adopted royal name.

> Анмада́ва́д: 17th April, 1909.

GEO. P. TAYLOR.

NUMISMATIC SUPPLEMENT

No. XII

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1909

New Series, Vol. 5, Pp. 377-389

Note.--The numeration of the article below is continued from p. 307 of the "Journal and Proceedings" for 1900

71. SALĪMĪ COINS.1

Dr. Taylor will not allow that any of these coins were struck during the reign of Akbar. But surely the fact that some of them bear the regnal date 50 is evidence that they were coined during Akbar's lifetime, or at least before the news of his death had reached Ahmadabad. If the date 50 means anything, it must mean that Akbar was alive, or was supposed to be alive. And does not the fact that some of them were coined in Aban support this view? For though Akbar died early in that monthapparently on the 10th-the news of his death could hardly have reached Ahmedabad till Azar. It is true that Akbar once rode and drove to Gujarāt from Fathpūr Sīkrī, 23 miles west of Agra, in nine days and nights, but this was always regarded as a wonderful feat, and was described by Jahangir as the accomplishment in a fortnight of a journey of two months (Akbar went by Deesa and the vicinity of Pattan-presumably the best route—and did not reach Ahmadabad under a fortnight). distance of Ahmadabad from Agra was popularly reckoned as 400 kos, or 800 miles, though as the crow flies, it is only about 450 Moreover, Jahangir did not ascend the throne till eight days after his father's death, or about 18 Aban, and it will hardly be contended that he issued orders about coinage before his enthronement. He himself describes in his Memoirs how after his accession he gave elaborate orders on the subject. The mint master of Ahmadābād could, I submit, hardly have known of Akbar's death till Azar, and still less could he have known in Ābān who was to succeed Akbar, for there was a plot to raise Khusrau to the throne, and no doubt this was one reason why the enthronement was delayed.

Dr. Taylor doubts if Jahāngīr ever had political power in Gujarāt, but the M'āsiru-l-Umarā, which says Gujarāt was given to him in fief, is pretty good authority, and it agrees with the statement in the Mirāt Ahmadi, p. 193 of lithograph of 1889, that in 1011 (1602-03) Prince Salīm was assigned an annual income of a lac of rupees out of the revenues of Cambay. Dr.

¹ See Num. Supp. I, art. 5, J.A.S.B., May 1908, and Num. Supp. X, art. 59.

Taylor says that Salim's holding Gujarat in fief would not have entitled him to issue coins in his own name. But the point is not what he was entitled to do, but what he had facilities for

doing, supposing that he was acting as a rebel.

Here I would remark that Dr. Taylor has much underestimated the extent of Jahangir's rebellion. He twice over speaks of it as short-lived and as confined, apparently, to Allahabad. On the contrary it lasted for years, and was accompanied by such incidents as Jahangir's march from Allahabad to Etawah with thirty thousand cavalry, and his murder of his father's minister, Abu'l Fazl. It certainly extended to Jaunpur and Bihār, and there is every probability that when Jahāngīr's servants went off to Gujarāt, as the M'āsiru-l-Umarā tells us they did, they fomented the agitation there. Manucci is too late and too much of a gossip to be an authority on the subject. If Dr. Taylor would read the M'asir Jahangīrī of Kāmgār Husainī, he would see to what lengths Jahangir went on the path of rebellion. It is made a charge by Khāfi Khān against the author of the Iqbālnāma that he has out of subserviency, suppressed the details of Jahangir's misconduct, and of course, Jahangir himself is not much more outspoken, though he does confess to having murdered Abū'l Fazl. It is begging the question too to say that there is no evidence that the rebellion reached Ahmadābad. not the Salīmī coinage potent evidence of the fact? And here I would point out that the legend on the Salīmī coins, as shown in Mr. Nelson Wright's book, seems a most extraordinary one if the coinage was first issued after Akbar's death and after Jahāngir had become emperor. Instead of Sultan Salim's being called Jahangir and Badshah, he is styled Maliku-l-Mulk or lord of the country. It seems to me that such an ambiguous and unusual expression was used by Jahangir or his servants because he was not then emperor, and because he did not wish to admit that he was only governor or fief-holder of Gujarat. Besides, he and his servants knew that his being governor or fief-holder would not justify him in issuing a coinage. these reasons I agree, if I may venture to say so, with the author of the British Museum Catalogue of Mughal coins, in thinking that the Salimi coins were originally issued before Jahangir became emperor.

It seems to me that he or his servants issued them because he was a rebel, and because, as he himself and Kāmgār Husaini tell us, the great saint of Multān had appeared to a disciple in a dream, and had declared that in a few months Prince Salim would be emperor. But it is possible that though the coins bore Salim's name, they were not meant as an assumption of sovereignty. The very fact that some of them, at least, bore Akbar's regnal year, may go to negative the idea of rebellion. Salīm may have issued them in consequence of his having acted as Regent during the last year of his father's life. In the

continuation of Akbarnāma, Bib. Ind., ed. iii, f. 39, it is stated that in 1014, i.e., the 50th year of Akbar's reign, an order was given that the Diwans should carry on the affairs of the empire under instructions from Sultan Salim, and that the appointments of officers (Mansabdars) should bear his seal. He or his advisers may have thought that this included the power of issuing coins, especially if in them he did not call himself em-

peror, and inserted the year of Akbar.

I still think it highly improbable that Jahangir would after his accession begin to issue coins bearing the name of Sultan Salim. He tells us that his father never used the name Salim in addressing him, and that he himself discarded it on his accession because it had been appropriated by the Sultans of Turkey. If he began the Salīmī coins after his accession, why does he not mention them when describing the establishment of his coinage in the first year of his reign? No doubt, Salimi coins continued to be issued from the Ahmadabad mint for some months of Jahangir's reign, but this, I think, must have been merely a continuation—with or without Jahangir's knowledge of a practice that had sprung up in the last year of Akbar's reign.

It is rather a curious circumstance that Salīmī was a coindesignation at least ten years before Jahangir's accession: see Blochmann, p. 30. But in this instance, the term had, I think, nothing to do with Sultan Salim, but was used with reference to Shaikh Salim of Fathpur Sikri, just as M'uini referred to the

saint of Aimer.

H. BEVERIDGE.

NOTE ON MR. BEVERIDGE'S ARTICLE ON THE SALIMI COINS.

Through the kindness of the editor of the Numismatic Supplement I have been privileged to read the manuscript of Mr. Beveridge's interesting article on the Salimi coins, and an opportunity is thus afforded me of reply. My contention that these coins in silver and in copper were issued after Akbar's death is in the main based upon the date—the year and month—exhibited on the coins themselves. Akbar died on the 10th of Aban, 1014 H., and the earlier Salimi coins bear the name of that month Aban and of the four succeeding months of the year designated 50. Mr. Beveridge writes, "If the date 50 means anything, it means that Akbar was alive, or was supposed to be But can this dictum be accepted? Several Salimi coins are dated Isfandarmuz 50, yet before the first day of Isfandarmuz 50, muz Akbar had been nearly four months dead, and certainly at the time of issue of these Isfan. 50 Salimi rupees Akbar was not alive nor was he supposed to be alive. The "50" must evidently bear some other interpretation, and I fancy it is not far to seek. The explanation lies simply in the fact that the number has no reference to any regnal year, but is the number of the year of issue reckoned from the commencement of the Ilahī era. The Ain-i-Akbari states, "The era of the Hijrah was now abolished, and a new era was introduced, of which the first year was the year of the emperor's accession" (Blochmann, I, 195). Thus the 50 on the Salīmī coins means essentially [Ilahī] 50. It might just as easily have been written [Hijrī] 1014; but in this instance Salīm preferred, it would seem, to date his coin in the era that his father had desired to substitute for the Hijrī. That the Ilahī era should close with

the close of Akbar's life was never contemplated.

Mr. Beveridge draws attention to the fact that Salīm's rebellion was not confined to Allahābād, but extended to Etāwa, and Jaunpūr, and Bihār. Now if it was during this rebellion that the Salīmi coins were struck, we should naturally expect they would have been issued from these cities. But the breaking out of a revolt at Allahābād and Jaunpūr can scarcely be regarded as the true cause of the minting of coins at a city so far removed from the seat of disaffection as Ahmadābād. And how is one to account for the Salīmī half rupee struck at Kābul ! (Ind. Mus. Catal. vol. iii, No. 686.) Did the rebellion also extend even to that city in the far north ! If Allahābād, Jaunpur, Bihār, Etāwa, Ahmadābād, and Kābul were really all of them contributory to Salīm's conspiracy, we should, I venture to affirm, have heard far more of it than we do from contemporary historians.

It was only after his reconciliation to his father (in 1013 H.) that the Prince Salīm received Gujarāt in fief (Blochmann's Ain-i-Akbari, I, 412), and accordingly, if in virtue of his being fief-holder of the province coins were issued in his name, we must assume they were struck by him not as a rebel but as his father's regent. It is, however, in the highest degree improbable that Akbar would have sanctioned such action on the part of a son who had so recently given proof of hostile intentions.

of a son who had so recently given proof of hostile intentions. The statement "it will hardly be contended that Salīm issued orders about coinage before his enthronement 's seems too emphatic when one remembers how the Sūrat authorities in their zeal struck coins in Shāh Jahān's name before his coronation (Foster: "The English Factories in India, 1624—1629," pp. xxix, 232). Similar action may readily have been taken by the

partisans of Salim in early avowal of their loyalty.

Mr. Beveridge lays much stress on the improbability of the news of Akbar's death having reached Ahmadābād in time to admit of coins being struck in Salīm's name that same month. Akbar died at Āgra on the 10th of Ābān, thus twenty days before the close of the month. The journey from Fathpūr Sīkrī, 23 miles west of Āgra, to Ahmadābād, say 400 kos, was accomplished by Akbar in nine days and nights—a wonder-

ful feat for royalty, but not so wonderful for relays of trained runners. News travels very quick in India, and such important news as the death of an Emperor would be communicated post-haste to the province held in fief by the heir to the throne. If Akbar, accompanied by at least some small retinue, could travel the distance in nine days, the dak-runners would in a matter of urgency do the journey not less quickly. But even if a fortnight be allowed, the news would have reached Ahmadābād by the 24th of Abān, or about a week before the end of the month, and of that week only a day or so would be required for the engraving of the dies. Hence time-considerations do not in any way bar the supposition that the Aban

50 Salīmī rupees were struck after Akbar's death.

At the close of his article Mr. Beveridge expresses the opinion that the issue of the later Salimi coins " must have been merely a continuation—with or without Jahangir's knowledge-of a practice that had sprung up in the last year of Akbar's reign." But the coins struck after the month Aban happen not to be of the same type as the Aban rupee. That type was subjected to a definite revision, and only in its revised form did it continue to appear month by month for the next eight months. Thus the mere continuance of a coinage already introduced does not suffice to account for the later Salimi On these both the legend was modified and the date, as each month passed, was duly corrected. After all one is surely bound to accept the date registered on the coin itself as the true date of issue, and if only this very natural assumption be made, it follows that the Salimi coins were struck not before but after the death of Akbar.

G. P. TAYLOB.

AHMADĀBĀD: June 1909.

MUGHAL MINT TOWNS.

On p. lxxi of his Introduction to "Catalogue of the Coins NUSBATĀBĀD. in the Indian Museum, Calcutta," vol. iii (1908), Mr. H. Nelson Weight Nelson Wright suggests the identification of Nusratābād with the present town of Dhārwār. I think there is conclusive evidence that it is Sakhhar (or Sagar), now in the Nizām's Dominions, ninety-five miles S.-E. of Sholapur, lat. 16° 35', long 76° 31'. long. 76° 51', see plate 34 in Constable's "Hand Atlas." On the 2nd Safar 1099 H. (Dec. 7, 1687) this place was taken by the

^{&#}x27;Alamgiri is strong evidence of the locality of the mint 'Nugratabad.' but before calling it conclusive I think we must wait for definite information that coins tion that coins were struck "in the country of Sakkar" in the name of Aurangzeb.—H. N. W.

Mughals from Pedā, Nāik, caste Dhedh. He was introduced at court on the 2nd Rabī' I (Feb. 5, 1688) and died five or six days afterwards. "After five or six days from his admission to an audience, he suddenly started on his journey to Hell":

Ān chunān bad-zindagānī murdah bih.

"Such evil livers are better dead than alive. His sons and relations were exalted to appropriate rank. The country (*ūlkah*) of Sakkar by imperial order received the name of Nuṣratābād. It is a pleasing and well-watered region and very productive. To Him (God) the praise that it has been wrested from the hands of ferocious beasts of prey having the shape of men, and has become a portion of the protected realms."—Maāṣir-i-'Alamgīrī, p. 307.

AGRA.

I think it would be difficult, I may say impossible, to prove by any history or narrative, that Agra was effectively occupied by Shāh Shujā. Indeed, it may be doubted whether in 1068 H. or 1069 H. he was ever nearer to it than Khajwah (Fathpur district). In the British Museum Catalogue, "Moghul Emperors," p. 135, and plate xviii, the reading of the mint-town is obviously tentative, the name being difficult to decipher because the whole of the letters are not present. Although a more practised eye than mine may see kbar, I confess my inability to do so; and to me the word is the same as the equally imperfect name on coin No. 691. If that yields a mythical shough a little more obscurely.

W. IRVINE.

74. TREASURE TROVE (MUGHAL). A.

Out of 52 rupees recently found in village Bamhon, Tahsil Gadarwāra, District Narsinghpur, the following call for special notice:—

1. Знанјанан.

Mint, Patna

Date, A. H. absent R. Y. 5.

Obverse. In square area the Kalima.

In the margins the names of the four companions with their attributes—each marginal legend being enclosed in a "mihrāb," the top sides of which meet to form the square of the area.

Reverse. In square area similarly formed

باد شا عازے

Margins. Top سهاب الدين Right معدد صاحب ه Bottom قران ثاني

This coin probably represents the first issue of the square area type. The absence of any Hijra date is noticeable.

2. AURANGZEB.

Mint, Jahangirnagar. Date, A. H. absent R. Y. 5.

بدر for مهر for مهر obverse. Usual couplet but with

Reverse.

ته انوس میمنت جلوس ه ضرب

جها گير نگو سذة

The early issues of this mint in Aurangzeb's reign are of considerable rarity. In a note on page 51 of Vol. III of the Indian Museum Catalogue, 1908, reference is given to a coin, somewhat similar to the present one, in the cabinet of Dr. G. P. Taylor, dated 1071-3. On that, however, the name of the mint is at the top of the reverse. On the present specimen issued two years after, we find it at the bottom. Later on still we get the square area issue.

TREASURE TROVE (MUGHAL). B.

A recent find of coins at Dhanaj, in the Yeotmal District, produced the following two rare rupees of Muḥammad Shāh.

1. A.

Mint, Machhlipatan.
Date, 1134 A.H.—fourth regnal year.

Obverse.

محدد شالا

۱۱۳۳۹ فازے کـــــــ سکھ مبار Reverse.

جلوس میمنت ع مانوس سده مجهلي ضرب

مانوس of سنة ع is in the loop of the سنة ع

2. R

Mint, Khujista Bunyad.

Date, A. H. absent-seventh regnal year.

Obverse. Usual. Date to right of top line but obliterated.

Reverse. Usual. Date at bottom. A five petalled flower
is in the of selection of selection.

There was also a third coin which I am not able definitely to place, owing to the absence of the Hijra date and the top line of the obverse legend; as the inscription is an unusual one I give it below:—

بادشاه غازے فض ۔۔۔ لی فض ۔۔۔ لی ابو الفقع الدین ابو الفقع الدین کے۔۔۔۔ کی سکھ مہار مسکھ مہار جلوس مانوس جلوس مانوس میدنت میدنت میدنت ضوب فصوب

The ابر الفتع on the obverse would cause one at first sight to assign the coin to Jahāndār, but it has not either of the couplets usually associated with the latter's coins, and the 'laqab' is a further anomaly. Perhaps some coin collector may have a fuller specimen of the coin in his cabinet and be able to solve the difficulty.

The coins are in the Nagpur Museum.

H. NELSON WRIGHT.

75. Where was the Mint-town Zafarābād?

In order to determine the locality of the mint-town Zafarābād it will be well, first of all, to ascertain what coins are known to have issued from that mint. None have as yet been discovered either of gold or of copper: all are of silver, and 'all are full rupees. Fourteen are in my cabinet, and, excluding duplicates, five others are mentioned in the Catalogues of the Coins in the British, the Indian, and the Lähor Museums.

The earliest specimen hitherto published is the Shāh Jahān rupee dated 32-1069 (L.M.C., page 173, No. 83). Its Obverse exhibits the Kalima in a square area, while the right-hand margin records the Hijrī year 1069. The legend in the square area of

the Reverse is the normal

with the regnal year * entered over the 17. The left-hand

margin registers the mint-name ظفر اباد.

Next in chronological sequence come four coins of Aurangzēb, dated respectively اهدا—1069, اهدا—1070, 3—1070, and 3—1071, all of which bear on the Obverse the معيد، لدين legend, while غفراباد occupies the top lines of the Reverse.

Then follow five rupees ranging in date from the 6th to the 22nd regnal year of Aurangzeb, with the جرمهر مندر couplet on the Obverse, and ظفراناه now on the lowest line of the Reverse.

From the 27th till the 49th year seven specimens are known, all of the same type as the preceding, but with substituted

for our .

It is safer not to include in this list the one coin of Shāh 'Âlam I that has been conjecturally assigned to the Zafarābād mint (L.M.C., p. 197, No. 3), inasmuch as the attribution is

almost certainly incorrect.

There remain two specimens, now for the first time published, of Zafarābād rupees of the reign of 'Ālamgīr II, one dated 5—xxxx, and the other 6—1171. Both are of identical type, and with legends that read as follow:—

عالم گیر نے نادشاہ عاز کادشاہ عاز کادشاہ عاز کادساں کا ۱۱۷۱ کا ۱۱۷۱ کا معاز کا ۱۱۷۱ کا معازوس کا معانوس ک

The arrangement here shown of the words on the Obverse

is, I believe, unique for coins of this Emperor.

Thus of the total nineteen specimens one is of the last year of Shah Jahan I, sixteen range in date from the 1st to the 49th regnal year of Aurangzeb, and two are of the 5th and 6th years of 'Alamgir II.

We now pass to our special enquiry. Where was this minttown Zafarābād? The town best known of that name-indeed the only one entered on the Map of Mint-towns in Mr. Nelson Wright's Vol. iii of the Indian Museum Catalogue-is situated on the bank of the River Gumti, less than five miles south-east of the city of Jaunpur. Formerly known as Manaich, its name was changed to Zafarābād in 1321 A.D., the year in which Malik Zafar, the third son of Ghiyasu-d-din Tughlaq I, assumed the governorship of the district. Some thirty-eight years later, in 1359, Firoz III, halting here on his way to Bengal, decided to found in the neighbourhood a new city. The work was at once started, and "after the building of Jaunpur the older town decayed'' (Imp. Gaz. of India, New Edition, XXIV, 426). So far as I can discover, Zafarābād, as distinct from Jaunpūr, experienced no revival of prosperity in the reign of Aurangzeb, and that this declining town should possess a mint in active operation throughout that reign seems of itself improbable. improbability is enhanced by the fact that in the immediate vicinity the flourishing city of Jaunpur had a mint of its own, from which were issuing both muhurs and rupees. cabinet contains one of these Jaunpur rupees hearing as its date the 31st regnal year of Aurangzeb, and also a Zafarābād rupee of his 30th year. That two mints situated within five miles of each other should be simultaneously producing silver coins, is scarcely credible, and accordingly we shall do well to look for the home of the Zafarābād mint elsewhere than under the shadow of the stately monuments of Jaunpur.

Can then the mint-town Zafarābād be identified with the place of that name to which Manucci in his Storia do Mogor

makes reference? (Irvine's Trans. I, 322, 323).

"The sixth river and the chief one is called Atak, or otherwise Indus, because it separates the lands of India from the land of the Pathans, from Persia and the province of Kābul. On the western bank of the river Atak is a town named Zafarābād, and on the eastern a castle called by the same name, where all the caravans halt from Persia, Tartary, Balkh, Samarqand, Bukhārā, Kāshgar, Kābul, and many other kingdoms."

On this passage Mr. Irvine in his admirable translation of

the Storia adds the following interesting note.

"Zafarābād must be, I think, another name for Atak, although that place is on the eastern bank of the Indus. is a castle, Khairagarh, on the opposite (western) bank. M. L. Dames is inclined to the same opinion. There is no evidence that Atak was ever renamed Zafarābād; but there is an obscure, insufficiently identified mint-town of that name, which is usually placed at Zafarābād in the Jaunpūr district, though I suggested long ago Zafarābād Bīdar in the Dakhin. Mr. Dames says the shape of the letters on the coins suggests rather a northern than a Dakhinī origin. If Atak was also called Zafarābād, a gap is filled; for Atak, as a mint-town, disappears between Akbar's reign (1556-1605) and that of Muḥammad Shāh (1719-1748), while Zafarābād appears in the interval (coins of Shāh Jahān, 1627-1658; Aurangzēb, 1658-1707; and Bahādur Shah, 1707-1712)."

Further, in his Additional Notes, Mr. Irvine states that this Zafarābād ''may well have derived its name from Zafar Khān, son of Zain Khān, Kokah, who was appointed to the charge of Atak in Jahāngīr's second year (1607)." (IV. 426).

Now this hypothesis that the Zafarābād coins issued from the mint-town Atak, since commending itself both to Mr. Irvine and to Mr. Dames, should receive careful consideration. If I mistake not, however, the numismatic evidence adduced in its support has been greatly overestimated. The facts, briefly stated, are as follow.

The mint-town Atak-or to give it its full name Atak Banāras -was never in brisk operation. Rodgers indeed remarks, "Coins from this mint are very rare indeed" (L.M.C., p. 114). So far as is now known, with two exceptions, or perhaps with only one, the Atak coins are all of copper; the Zafarābād, on the other hand, are all of silver. The Atak fulus was struck during just twelve years of Akbar's reign, from Ilahi 37 to 48, the twelve years, thus, immediately following the completion of the first Hijri millennium (1000-1011 A.H.). Thereafter only two coins from the Atak mint are in evidence, one a rupee of Aurangzeb, ascribed doubtfully to Atak Banaras, and the other a rupee of 1158 H., unique as bearing the simple mint-name Atak without the complementary Banaras. Thus, excluding the doubtful rupee, Atak coins range from 1000-1011 A.H., and after an interval of no less than 147 years a single rupee of this mint appears in 1158 A.H. Now do the Zafarābād coins fill this big gap? They cover just the 48 years from 1069-1117 A.H. Hence for 99 years out of 147 not a single Atak nor a single. Zafarābād coin is known. Verily then, the Zafarābād rupees notwithstanding, the gap still yawns. If, however, the Atak Banāras rupee of Aurangzēb be held to be correctly attributed to that mint, then, accepting the suggested identification, we shall have to admit that in the reign of Aurangzeb from one and the same mint some coins issued bearing the mint-name Atak and others Zafarābād—a procedure extremely improbable.

The statement that the workmanship of the Zafarābād coins bespeaks for them a northern rather than a southern origin should not, I think, be pressed. For what workmanship is

distinctly northern and what southern? In the south the Bijāpūr mint supplied excellent, the Sholāpūr fair, and the Gulkanda poor samples of the coin-engraver's art: even as in the north the Āgra coins are of superior execution to those of Multān, and these again to those of Qandahār. In the matter of workmanship the Zafarābād rupees seem to me quite up to medium quality, and their lettering bears resemblance not less to the calligraphy of Kulbarga in the south than to that Nārnol in the north. Certainly keener eyes than mine are needed to distinguish merely by their make the Zafarābād rupees from those of either the southern mint of Paulatābād or the northern mint of Lāhor.

If then the Zafarābād coins along with those of Atak do not constitute a continuous series, and if the shape of the letters proves nothing as to the place of origin, there remains no evidence, so far as I am aware, to warrant the identification of the

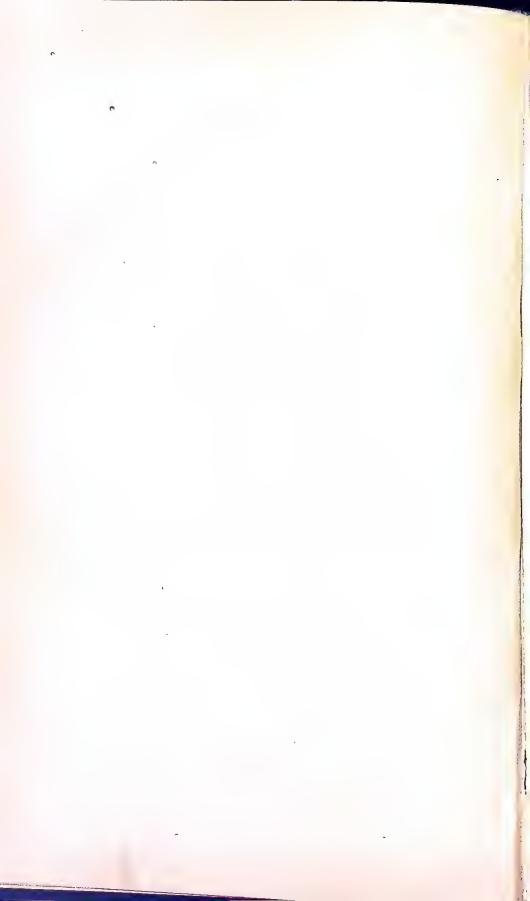

Zafarābād mint with that of Atak.

Yet another town bore the name of Zafarābād—Bīdar in the Dakhin. That this place may have been the mint-town Mr. Irvine suggested "long ago," and Mr. Nelson Wright in his recently published Catalogue of the Coins in the Indian Museum declares in favour of this as the "more probable" location of the mint. Founded by Ahmad Shah I, the ninth king of the Bahmanī dynasty, Bīdar supplanted Kulbarga as the seat of the government, and became about 1430 A.D. the capital of the kingdom. It is the Muhammadābād of the Bahmani coins, and within its citadel are still to be seen the ruins of a mint that was active so late as the reign of Tipū Sultān. It was in 1656 A.D. (1067 A.H.) that Prince Aurangzeb signalised his capture of the town by changing its name to Zafarābād. Thereafter it remained a part of the imperial dominions till Asaf Jah by his victory at Shakar Khelda in 1724 A.D. established his independence and founded the house of the present Nizāms. Zafarābād Bīdar came into the possession of the Mughals at the very close of the reign of Shah Jahan I, and continued subject to them throughout the long reign of his successor. precisely this period that we find covered by the coins of Zafarābād, its earliest rupee dating from the last year of Shāh Jahān, and later issues ranging from the 1st to the 49th year of Aurangzeb. So close a correspondence of the history of Bidar with the dates on the Zafarābād rupees constitutes a strong argument for identifying the mint-town with Zafarābād Bīdar.

How to account for the renewed activity of this mint in the fifth and sixth years of the reign of 'Alamgir II is a problem that still awaits solution. Inasmuch as the term Zafarābād admits of being regarded as an honorific epithet synonymous with Dār al Fath, 'the Seat of Victory,' it is conceivable that Alamgir II's Zafarābād may be an entirely different place from Aurangzēb's. This distinctly improbable conjecture. I

venture to hazard merely from my inability to suggest any adequate reason why Bīdar so late as 1757 A.D. (1171 A.H.)—thus some thirty-three years after its inclusion in the Haidarābād State—should be striking coins in the name of the feeble Mughal Emperor 'Ālamgīr II.

GEO. P. TAYLOR.

NUMISMATIC SUPPLEMENT

No. XIII

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1910

New Series, Vol. 6, Pp. 227-245

Reverse-A spear head and a straight line with a parallel row of dots.

Obverse-Solar symbol, caduceus, sphere with crescents, triskelis.

Reverse—Caduceus and the profile of some animal (?).

22. Size—Rectangular, two corners clipped. Obverse-Two solar symbols, a tree inside a railed enclosure, etc.

Reverse—Stupa and a star.

23. Size-Nearly square, one corner clipped. Obverse-Solar symbol, sphere with crescents and one or two more.

Reverse-Star and another illegible symbol.

Size-Oblong, two opposite corners clipped, injured by 24.hammering.

Obverse-Solar symbol.

Reverse-Star and another illegible symbol.

Size-Oblong, one corner clipped off. · Obverse-Solar symbol, stupa, etc. Reverse-Illegible.

Size—Oblong, two adjacent corners clipped. Obverse-Solar symbol, svastika, linga and three others.

Reverse-Illegible.

Size-Oblong. In good preservation. 27. Obverse-Solar symbol, sphere surrounded by taurines, another surrounded by crescents, etc. Reverse-Illegible.

Size—Oblong, one corner clipped. 28. Obverse-Solar symbol, lower part of standing human figure, etc.

Reverse-Illegible.

Size-Oblong, two adjacent corners clipped. 29. Obverse-Solar symbol, front legs of a quadruped, Reverse-Illegible.

Class IV.—Three or more marks on the Reverse.

Size-Irregular, three corners clipped. Obverse-Solar symbol, taurine, head of an animal,

Reverse-Two boughs, bow and arrow, and four or five illegible ones.

Size-Irregular, in a fair state of preservation. Ohverse-Solar symbol, stupa with hare, Brāhmi na in ellipse and four or five more. Reverse-Stupa with crescent, and two more indis-

tinct symbols.

Size-Oblong, irregular, two opposite corners clipped. Obverse-Solar symbol, stupa, elephant, sphere with 32.arrow heads, etc.

Reverse-Three illegible symbols.

Size—Oblong, irregular. In good preservation. Obverse-Solar symbol, sphere with taurines and 33. arrow heads.

Reverse-Four dots, and four other symbols, more or less indistinct.

Size-Nearly square. Both sides illegible. 34.

Size-Oblong, one corner clipped off. 35.Obverse-Solar symbol, elephant, etc. Reverse-Three illegible marks.

Size—Oblong, irregular, one corner clipped.

Obverse—Solar symbol, humped bull, sphere with 36.taurines, Brāhmī na, etc.

Reverse-Five or six illegible marks.

37. Size-Oblong. Obverse-Sphere with four crescents, stupa with hare, a letter (Brāhmī da), etc. Reverse-Tree in enclosure and five other marks.

Size—Oblong, two adjacent corners clipped off. 38. Obverse-Solar symbol, taurine, etc. Reverse-Sphere with four tridents, and two small

illegible marks.

Size-Oblong, cast silver, only specimen come to 39. light. Both sides illegible.

ROUGHLY CIRCULAR OR OVAL COINS.

Class I.—Blank Reverse.

- 40. Obverse-Palm of the hand, sphere with crescents and
- Obverse-Lotus and other obscure symbols. 41.

Class II.—One mark on the Reverse.

42. Obverse—Bull and another quadruped in square incuse, etc.

Reverse-Man and quadruped.

43. Obverse—Solar symbol, sphere with taurines tree in railed enclosure, etc.

Reverse—Illegible.

Class III .- Two marks on the Reverse.

Obverse-Four or five obscure symbols. Reverse-Stupa and another illegible symbol. 44.

RAKHAL DAS BANERJEE.

77. RARE MUGHAL COINS.

The following have been selected from a number of rare Mughal coins in the cabinet of Mr. W. S. Talbot, I.C.S., Settlement Commissioner, Kashmir.

1. R. JAHANGIR.

Mint—Agra.
Date—1019 A. H.
Regnal year—5.
Month—Bahman.
Weight—219 grs.
Size—1:11.

Obverse.—In an octagon, each side of which is surmounted by a triple arch enclosing arabesques

Reverse.-In octagon, similarly ornamented

The couplet on this coin is the same as that on the gold coin of the same king and mint described as No. 4 in the catalogue of the collection of the late Mr. C. S. Rodgers in the Lāhor Museum. The coins of the last few months of 1019 and the first few months of 1020 mark the high-water mark of beauty in design of Mughal coinage. I know of no duplicate of this particular coin.

2. R. JAHĀNGĪR.

Mint—Tatta.
Date—1027 A.H.
Regnal year—12.
Month—DI.
Weight—174 grs.
Size—75.

The only peculiarity about this coin is an ornament in the shape of a peacock just above to on the obverse. For the legends see No. 799 of Vol. III of the Indian Museum Catalogue, 1908.

233

3. A. SHĀHJAHĀN.

Mint—Akbarābād, Dāru-l-khilāfat. Date—1068 A.H. Regnal year—31.

Weight—175 grs.

Size—'94.

Obverse.—In eight-foiled circle the kalima.

In margin, divided into four partitions

بصدق ابی بکر - و عدل عمر- بازرم عثمان - و علم ۱۹۸ علی

Reverse .- In eight-foiled circle

بادشاه غاز ۳۱ شاه جهان

In margin, divided into four partitions

شهاب الدين محمد - صلحب قران ثاني -ضوب دارالخلافه - اكبر اباد

The coinage of Akbarābād (Agra) in the reign of Shāhjahān after presenting a variety of designs during the first six years settled down to what is known as the 'square areas' type in 1043 A.H., and to this type it appears to have remained constant for the remainder of the reign except for these "circular areas' coins of 1068-31, specimens of which are very rare.

4. A. AURANGZEB.

Mint—Kābul.
Date—1084 A.H.
Regnal year—16.
Weight—175 grs.
Size—81.

Obverse.—Usual inscriptions but مهر for pate to left of middle line.

Reverse.

جلوس میمنت مسائسوس ۲۱ فسوب کاسل The Indian Museum Catalogue, Vol. III, 1908, figures a muhar of this type (No. 1129), and similar muhars were also found in the Bahāwalpūr Toshakhāna by Mr. Whitehead (Num. Supp. XI, art. 69). But no rupees appear in have been published previously.

5. R. AURANGZEB.

Mint—(Akbarabad) Mustaqirru-l-khilāfat. Date—Absent. Regnal year—? 49. Weight—43 grs. Size—625.

This is a quarter-rupee with fragmentary inscriptions following the usual type. I have a similar one of regnal year 45.

6. A. SH $\overline{A}H$ ' $\overline{A}LAM$ BAH $\overline{A}DUR$.

Mint—Tatta.
Date—Absent.
Regnal year—2.
Weight—174 grs.
Size—825.

Obverse.

غاز*ی* شـــاه شاه عالم باد ســــکــــــــــه

Reverse.

مانوس میمنست ۲ سنه جلوس ب

Mr. Whitehead mentions finding rupees of Tatta in the Bahāwalpūr Toshakhana (N. S. XI, art. 69)—probably of this type. Those hitherto published in the Lāhorand Indian Museum Catalogues are of the couplet type on which the king's former name of Mu'azzam is given, and of the first year of the reign.

7. R. SHAH 'ALAM BAHADUR.

Mint—Ajmer, Dāru-l-khair. Date—1119 A. H. Regnal year—aḥd (1). Weight—176 grs. Size—·94.

Obverse.

غازی شــاه عالم باد شــاه سکه ۱۱۱۹

Reverse.

دارالغیر اجمیر فسرب میمنت مانسوس جلسوس احسد سنة

The epithet دارالخير, which clung to Ajmer during the Mughal upremacy, gave place early in this reign to the more pretentious one of مستقر الخلاقة. I know of only one other specimen of the present type—in Dr. Taylor's Cabinet.

8. AR. JAHĀNDĀR.

Mint—Aḥmadnagar. Date—Absent. Regnal year—aḥd (1). Weight—173 grs. Size—94.

Obverse.—The coin is in poor condition, but the arrangement of the inscription appears to be the same as on No. 1722 of the I.M.C., Vol. III.

Reverse.

احده نگر (طعه ؟) ضسرب سنةاحد مانوس میسنت جاوس

This mint appears to be unpublished for Jahandar.

9. R. FARRUKHSIYAR.

Mint—Imtiyazgadh. Date—1124 A.H. Regnal year—Absent. Weight—170 grs. Size—94.

Obverse.

236

Reverse.

ميدهدندت مانسوس ۱۱۲۴ ضسرب امتياز گده

This mint seems new for Farrukhsiyar in silver. The Hijra date on the reverse is unusual.

10. AR. SHĀHJAHĀN II. ?

Mint—Burhānpūr, Dāru-s-sarūr. Date—? Regnal year—2. Weight—169 grs. Size—94.

Obverse.

شاہ جہاں

ارشاہ غازا...

ک

Reverse.

جارس مانوس ميسمدت سنسة دارالسرور ضرب بسرهانپور The attribution of this coin to the second Shāhjahān (Rafi-'u-d-daulah) is not free from doubt, but of whichever king it is, it seems to be unpublished though Dr. Taylor has a rupee of this mint and reign of Shājahān II. The regnal year "2" is noticeable.

11. R. MUḤAMMAD SHĀH.

Mint—Derajāt.
Date—1160 A. H.
Regnal year—30.
Weight—175 grs.
Size—9.

Obverse.

محمد شاه ------۱۱۹۰ بادشاه غاز ک سکمه مبار

Reverse.

مانوس میمنت ۳۰ سنة جلوس ضسوب دیو جات

Mr. Longworth Dames writes: "The Derajāt mint has hitherto only been known on the coins of the Durrānis. The earliest I have seen of Aḥmad Shāh Durrāni is of the year 1171. Its appearance on Muḥammad Shāh's coins is remarkable as Nādir Shāh's invasion took place in 1152 and the Derajāt remained in his possession after that date. He was assassinated in 1160, the year in which this coin is dated, and it would seem that on his death the mint at Dera Ismail Khān (Derajāt) again issued coins in the name of the Mughal Emperors until Aḥmad Shāh's invasion."

Rupees of "Dera" of Muḥammad Shāh and Aḥmad Shāh were found by Mr. Whitehead in the Bahāwalpūr Toshakhāna (N.S. XI, p. 342), and a rupee of Muḥammad Shāh of the same mint is described on p. 214 of the Lāhor Museum Catalogue.

This may, Mr. Dames thinks, be Dera Ghazi Khan.

238

12. R. SHĀH ĀLAM.

Mint—Katak.
Date—Absent.
Regnal year—22.
Weight—176 grs.
Size—1.02.

Obverse.

Reverse.

حامی دیس شای فضل شاه عالم سای فضل شاه عالم سکسه زد بر هفیت کشور عانوس میونیت ۲۲ سنة جلوس ضور

The only other specimen that I know of was in Dr. White King's collection. (Catalogue of sale No. 4111.)

کتے کے

H. NELSON WRIGHT.

78. TREASURE TROVE (MUGHAL).

Sixty-six Mughal rupees were recently found buried in the village of Ladkhed in the district of Yeotmal and sent to me for examination. The following four coins are of special interest:—

1. R. JAHĀNDAR SHĀH.

Mint—Fathābād (Dhārūr?). Date—A.H. 1124. Regnal year—ahd.

Obverse.

Reverse.

The bottom line of the reverse is unfortunately obliterated. The omission may, however, be supplied by comparing the coin with the one described and figured in Numismatic Supplement II, article 15. The arrangement of the reverse is the same and there are similar collections of dots in the curves of the of and the roof.

That coin was of Farrukhsiyar. The mint is new for Jahandar.

2. R. MUHAMMAD SHĀH.

Mint-Satāra.

Date-A.H. 11. Regnal year obliterated.

Obverse.—Usual inscription. Date to right of top line.

Reverse.

مانوس میمنست ... جاوس ضرب ســقــارا

This is an addition to the list of Mughal mints. Is the Satāra of this coin the well-known town in the Bombay Presidency, which bears the same name but is apparently spelt Sātāra (see Imperial Gazetteer)? I have been unable to identify it with any other place.

3. A. MUHAMMAD SHĀH.

Mint—Balwantnagar. Date—A.H. 115 x Regnal year, 28.

Obverse.—Usual inscription. Date to right of top line.

Reverse.—Usual arrangement. Mint name in bottom line.

In Mr. Burn's list of Mughal mints (J.A.S.B., Vol. LXXIII, Part I, No. 2, 1904) is given a coin from my cabinet of this mint struck in the reign of Ahmad Shāh. This coin was

obtained at Jhānsī, and on enquiry from the Taḥṣūldār of that town I was informed that the old name of Jhānsī was Balwantnagar, and that there is still a Muḥalla in the town known as "Taksāl," i.e., mint, which is evidence of the issue of coins. The present coin carries the mint back to the reign of Muḥammad Shāh.

4. R. MUHAMMAD SHĀH.

Mint—? Qandahār. Date—A.H. 115 × Regnal year, 30.

Obverse.—Usual inscription in three lines. Date to right of top line.

Reverse.—Usual arrangement. Mint name in bottom line.

The first two letters of the mint name are not quite distinct, but there are traces of the top of the $\ddot{\mathcal{G}}$ and to its left a dot over the place where the $\dot{\mathcal{G}}$ should be. If, however, the reading is correct, it is not easy to understand how a coin came to issue from Qandahār in A.H. 1159 (A.D. 1746) in the name of Muḥammad Shāh of Dehli. Nādir Shāh, the Persian invader of Hindustān, took possession of Qandahār in 1737 A.D. (A.H. 1150-1151) and built a new city. Qandahār was taken by Aḥmad Khān Durrāni some ten years later, and it is just possible that in the confusion of these troublous times, the Dehli Emperor may have seized the opportunity to renew the old Mughal claim to Qandahār by issuing coins professing to be struck there under his authority. But that there was any striking of coinage at Qandahār itself in the name of Muḥammad Shāh seems extremely improbable.

H. NELSON WRIGHT.

79. TREASURE TROVE (MUGHAL).

Out of a find of 129 silver coins discovered in an earthen pot while digging the foundation for a new building at Hanümän Tāl in the Jubbulpore City, and sent to me for examination, I selected the following five rupees for a note in the Numismatic Supplement:—

1. In the name of Shāh 'ĀLAM II. A.H.—1199. Regnal year—26. Mint—Deogadh? Obverse.

241

Reverse.

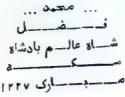

This is a small thick coin (size '75") with lettering much cruder than on the coins of this mint of Shāh 'Ālam II usually met with. This fact probably indicates the loss of influence of the suzerain power. Mr. W. S. Talbot, C.S., has a similar coin dated 1198. A coin of Deogadh in my cabinet of the normal fabric is dated 1190-17.

 Shāh 'Ālam II. Mint—Bālānagar Gadha. A.H.—Absent. Regnal year—36.

A coin of this type has been published by Colonel Vost in Numismatic Supplement XI, p. 326. This coin has as mint marks a *trisūl* and 12-pointed star on the obverse in the second line, and a star to the right of the regnal year on the reverse.

3. Shāh 'ĀLAM II. Mint—Nāgpūr? A.H.—1227. Regnal year—35. Size—'85". Obverse.

Over "badshah" are a trisul and a flower with 11 petals and a stalk.

Reverse.

Below theirs aim is a trisul on its side.

4. In the name of AHMAD SHAH.

Mint?
A.H.—Absent.
Regnal year—56?
Size 82'

Obverse.

احبد شاه بهادر

Reverse.

میرمسنست ۱۳۵ سند جلوس ضسوب گدنارت

An arrowhead to left of the & in the lower line.

5. As on No. 4 but a smaller coin (size = '75") and the mint is written ماكرت. The regnal year is represented by the figures ها.

These last two coins are evidently Mahratta-struck. They resemble in execution the Katak coins on pages 248-250 of the Indian Museum Catalogue, Volume III, 1908. What their mint town was I am not able to conjecture.

All the above coins are in the Nagpur Museum.

H. NELSON WRIGHT.

80. Dams of Akbar struck at Jaunpür and Ajmer Mints.

Jaunpúr.

On the gold and silver coins of Jaunpur mint, Akbar is entitled تاميرالديان and Jaunpur is ordinarily termed 'Dáru-J Khiláfat'—see Mr. Nelson Wright's Introduction to Vol. III of the Catalogue of the Coins in the Indian Museum, Calcutta. That Museum contains different types of Akbar's copper coins struck at Jaunpur, Nos. 449 and 451. The first is of the usual fat', and the obverse inscription 'Fulus Jaunpur Dáru-J Khilāis a quarter dám exhibiting a geometrical device on the reverse, and the inscription 'Dāru-z-zarb Jaunpur' on the obverse side.

Dāms of Akbar struck at Jaunpūr and Ajmer Mints (Suppl. XIII), and some rare Paṭhān Coins (Suppl. XIV).

In the Delhi Bazar I have found a third type, the inscriptions on which are as follows:---

> Obverse. Reverse. محيد اكبر ناصر الدنيا و الدين ابو الفتح جلال الدين

Every word of this reading on the obverse is quite clear, but possibly stable formed part of the legend. Over the last letter of the word Muhammad is ornament No. 25 in the Table of Ornament found on Mughal Coins-Vol. III of the Catalogue of the Coins in the Indian Museum, Calcutta. The first and third lines of the reverse are cut, but there is sufficient to make my reading almost certain. The epithet 'Abū-l-fath' is exhibited in full, and as far as I know this is the first instance of its use on coins in connection with Akbar's name. It invariably formed the reverse inscription on the smaller copper coins of the Jaunpur kings, and the Indian Museum possesses one of these of as late a date as A.H. 887-Catalogue of the Coins in the Indian Museum, Calcutta, Vol. II, Jaunpur, No. 175.

Possibly the use of the epithet on the present coin is a

survival.

Since writing the above I have seen Col. Vost's article 'On some rare Muhammadan Coins' published in the A.S.B. Journal for 1896. I find that this dam was described by him—see Plate II, No 7-but he read it as being a coin of Muhammad Shah, Suri. The only word legible on the obverse of that specimen is Muhammad.

Ajmér.

The Indian Museum possesses two types of dáms struck at Ajmér mint. On one type Ajmér is probably styled 'Dáru-l Mansur' and the second is the common variety presenting the obverse inscription 'Zarb Ajmér sikka fulús' Indian Museum Catalogue, Vol. III, Nos. 358 and 359. Amongst a large number of Akbar's copper coins struck at Ajmér and Chitor mints, I came across two apparently new varieties of Ajmér dam. The inscriptions on the first are:-

Obverse.	Reverse.
اجبير	بو
(دار الخلافه)	sl
سلیم اباد	سهمد و
ضـــرب	************

Those on the second are :-

Obverse.	Reverse.
فلوس	هشت
سكــــــــــــــــــــــــــــــــــــ	هزار
سليما بان	1 * * A
ضــــــوب	

In each case the reverse bears ornament No. 24 of the

Table of Ornaments already referred to.

The first coin is a dám of Dáru-l-khiláfat Salímábád, Ajmér, struck in the year 982. The second is a dám of Salímábád, dated 1008. The style of the obverse of the first is distinct, but that of the obverse of the second follows the usual

style of the copper coins of Ajmér and Chitor.

In his paper, 'The Mints of the Mughal Emperors,' Mr. R. Burn noted on a copper coin of Ajmér of mint Salímgarh, Ajmér, dated 982. On my copper coin of same date, the name is undoubtedly Salímábád. Mr. Burn remarks that this name for Ajmér is doubtless connected with Shaikh Salím Chishtí from whom Prince Salím took his name. Shaikh Salím died in 979, and Prince Salím was born in 977.

Coins of Akbar are now, therefore, known of Ajmér, of Ajmér with its name Salímábád, and of Salímábád alone. I may instance the parallel case of the issues of Shāh 'Ālam II minted at Bindrában, alias Múminábád. Shāh 'Ālam II struck coins bearing the names of Múminábád, of Bindrában, and of the combination Múminábád, Bindrában, the first two in copper, and the last in silver.

R. B. WHITEHEAD, C.S.

81. MUGHAL EMPERORS—RAFI'U-D-DARJĀT. Gold.

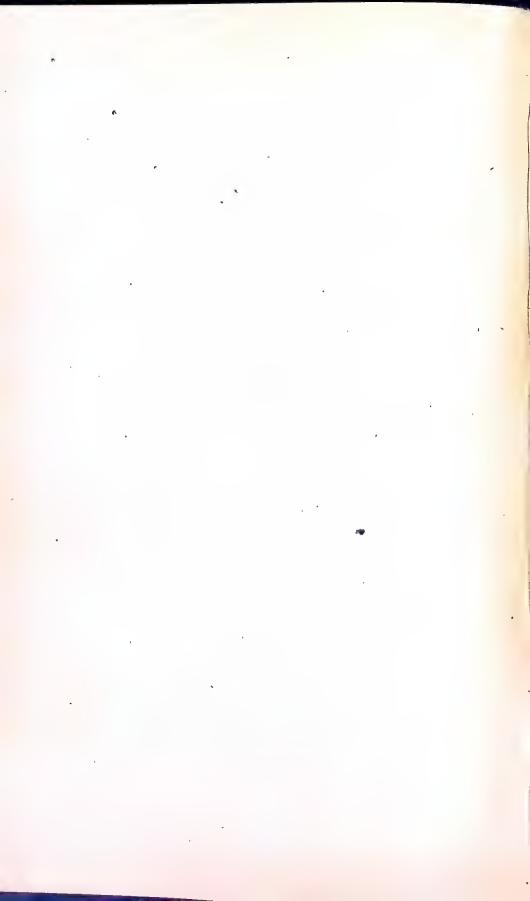

Obverse.	. Reverse,
(رف) يع الدرجات	
	مانوس
(بر) کا شاهنشه افاق	ميمنت
(بر) ۵ ساعتسا ۱۹۰	احد جلوس
(زد)[(۳)—که (۱) ۱۱۳ با هزاران	سذم
(بېنه)	ضرب
(-6)	خعسته بنياد

The above muhar adds another to the list of Rafī'u-d-darjāt's mints. The title شاهنشه ناق in place of the usual is also new. With these two pretentious titles

may be compared شهنشاه زمان (e.g., Jahángír, I.M.C., Vel. III, 564); ادشاه جهان (e.g., Jahāndār, I.M.C., 1713) ادشاه جهان (Farrukhsiyar). The phrase در افاق appears in place of the usual on coins of Jahāndār (e.g., I.M.C., III, •1709). The above coin is at present in a private English collection.

J. ALLAN,

British Museum.

NUMISMATIC SUPPLEMENT

No. XIV

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1910

New Series, Vol. 6, Pp. 557-581

49. NUMISMATIC SUPPLEMENT, No. XIV.

Note,-The numeration of the article below is continued from p. 245 of the "Journal and Proceedings" for 1910.

Some bare Indo-Greek and Scythian Coins.

In the Journal of the Asiatic Society of Bengal for the years 1897 and 1898, Mr. Vincent Smith published an interesting series of papers on some coins of ancient and mediæval India, entitled 'Numismatic Notes and Novelties.' I have written the following brief notes on similar lines, descriptive of a few coins which have come into my hands during the last four years. The references are all to Volume I of the new 'Catalogue of the Coins in the Indian Museum, Calcutta,' by Mr. Vincent Smith. The British Museum Catalogue is that of the coins of the Greek and Scythic Kings of Bactria and India.

ARCHEBIOS.

Silver, round. Weight, 35 grains. Size, .75 inches.

Obverse.—Bust of king r., diad. Legend, ΒΑΣΙΛΕΩΣ ΔΙΚΑΙΟΥ ΝΙΚΗΦΟΡΟΥ, below APXEBIOY.

Reverse.—Zeus standing, facing, holding sceptre in l. and hurling thunderbolt with r. hand; mon., l. Pl. VII, 16; r similar to Pl. VII, 28. Kharosthi legend, maharajasa dhrami-

kasa jayadharasa, below Arkhebiyasa.

This hemidrachm of Archebios is a variety of the common type as illustrated at B. M. Cat., Pl. IX, 2. The bust is different, and apparently depicts the king as a man of more mature age than he appears on the usual variety. On the reverse are two monograms similar to those on coin B. M. Cat., Pl. IX, 5.

2.

Copper, square. Weight, 123. Size, *85.

Obverse.—Bust of Zeus r., diad.; sceptre on shoulder. Legend on three sides as on 1.

Reverse.—The caps of the Dioscuroi, and two palms. Mon. below, similar to Pl. VII, 67. Legend on three sides as on 1.

This has been published in the B. M. Cat., Pl. XXXI, 5, but is a rare type. The monogram of this specimen is different.

3. APOLLODOTOS.

Copper, square. Weight, 145. Size, ·8.

Obverse.—Apollo facing undraped but shod, holding arrow in r. and bow-in I. hand. Legend on three sides $BA\Sigma | \Lambda E \Omega \Sigma A \Pi \circ \Lambda \circ \Delta \circ T \circ \Upsilon \Sigma \Pi T H P \circ \Sigma$.

Reverse.—Tripod of peculiar form on stand, in square of dots; mon. M. Kh. legend on three sides, r. maharajasa, top Apaladatasa, l. tratarasa.

This is a rare variety of a very common type of the copper coinage of Apollodotos. Not only is the tripod strikingly different in shape from that usually occurring, but the attitude of Apollo is distinct. The issue has been recognized as a separate variety by Cunningham in his 'Coins of Alexander's Successors in the East,' and he says that all the specimens of this variety are of inferior execution, which I think is open to question. He only knew of one weight, the chalkons, and the specimens in the British and Indian Museums are of this weight. The coin now published is a dichalkon. I also possess a lepton.

4. Zoilos.

Copper, round. Weight, 230. Size, 85.

Obverse.—Apollo r., clad in chlamys and boots; holds in both hands an arrow; quiver at his back. Legend, $BA\Sigma I \wedge E\Omega\Sigma \Sigma \Omega THPo\Sigma$, $Z\Omega I \wedge oY$ below.

Reverse.—Tripod; I. Kh. figure 4; r. figure 1. Kh. legend, maharajasa tratarasa, below Jhoïlasa.

This is a thick and dumpy coin. It is similar in type to the coins of Apollodotos illustrated at Pl. IV, 7, and bears the same relation to the usual variety with the small elephant in the l. common Apollodotos medallion of Apollodotos bears to the at Pl. IV, 6.

5. MENANDER.

Silver, round. Weight, 35. Size, 6.

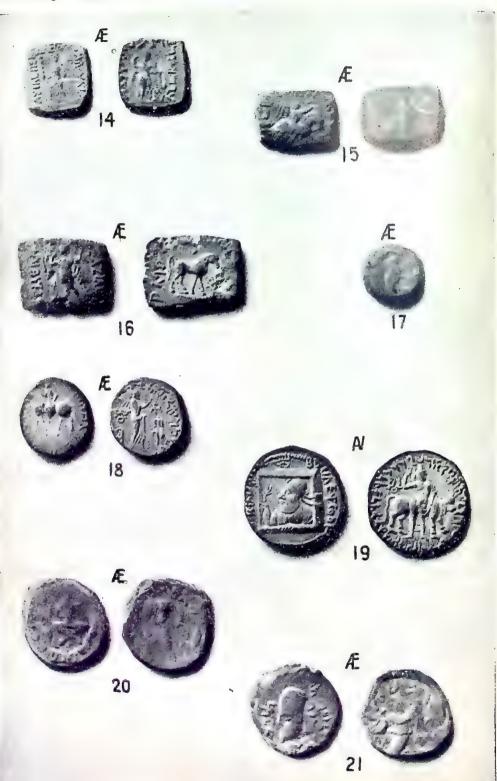

Obverse.—Bust of king l., helmeted, thrusting with javelin. Legend, BAΣIΛΕΩΣ ΣΩΤΗΡοΣ, below ΜΕΝΑΝΔΡΟΥ.

Reverse.—Pallas l., holding aegis in l., and hurling thunderbolt with r. hand; mon. Pl. VII, 86. Kh. legend, maharajasa tratarasa, below Menadrasa.

A very rare variety of the common type in which the king is depicted as diademed and hurling the javelin. It is not described in the existing Brit. Mus. Cat., but is illustrated

Some rare Indo-Greek and Scythian Coins.

Some rare Indo-Greek and Scythian Coins.

in the 'Ariana Antiqua' and in Cunningham's 'Coins of Alexander's Successors in the East.' As both these works are difficult of access, I illustrate a specimen in my possession.

6.

Copper, square. Weight, 60. Size, 6.

Obverse.—Helmeted bust 1. Legend, 1. $BA\Sigma I \Lambda E \Omega \Sigma$, top $\Sigma \Omega T HP \circ \Sigma$, r. $MENAN\Delta P \circ Y$.

Reverse.—Niké r., holding palm and wreath; mon. illegible. Kh. legend, top tratarasa, l. Menadrasa.

The only specimen of this common type of Menander's copper coinage known to me in which the bust is turned to the left, instead of to the right.

7. Dionysios.

Copper, round. Weight, 260. Size, 1.1.

Obverse.—Apollo to r., clad in chlamys and boots; holds arrow in both hands, quiver at back. Legend on three sides, l. $BA\Sigma IAE\Omega\Sigma$, top $\Sigma\Omega THPo\Sigma$, r. $\Delta IoNY\Sigma IoY$.

Reverse.—Tripod; r. trident, l. Kh. letter ji. Kh. legend, r. maharajasa, top tratarasa, l. Dianisiyasa.

A round copper coin of Dionysios is a novelty. It is a counterpart of a well-known copper coin of Apollodotos, as might have been expected, since all the known types of the issues of Dionysios are taken from those of Apollodotos.

8. PHILOXENOS.

Copper, square. Weight, 110. Size, .75.

Obverse.—Deity standing facing with r. hand resting on hip, and cornucopiae in l.; mon. to l. \bowtie Legend, l., and t p illegible but presumably $\texttt{BASIAE}\Omega\Sigma$ ANIKHTOY. To r. apparently HAEEAOY or ΦIAEEAOY.

Reverse.—Humped bull standing r.; below Gr. letter Z. Kh. legend, r. maharajasa, top apadihatasa, l. probably Philasinasa.

When I first acquired this coin, which is obviously genuine, I thought that I had found a specimen of a new Indo-Greek king. The coin is of passable workmanship, and the figure of the deity on the obverse is quite distinct from that found on the usual copper coins of Philoxenos. On the latter she is shown as standing 1. with r. hand advanced. Here she is facing with her r. hand on her hip. Also the style of the design is quite distinct. Although the name of the king is almost

certainly Philasinasa on the Kharosthi side, it is not ΦΙΛοΞΕΝοΫ on the Greek side. In support of the possibility of its being some other name, perhaps new, I may instance the copper coin exhibiting the joint names of Lysias and Antialkidas—Br. Mus. Cat., Pl. XXXI, 2. But the probabilities are that an ignorant engraver blundered the name ΦΙΛοΞΕΝοΥ. Still the coin is a new and interesting one.

9. HIPPOSTRATOS.

Copper; round. Weight 240. Size, 1.

Obverse.—Conventional design of Apollo standing r. holding arrow in both hands, and clad in chlamys and boots. Legend gone but probably $\text{BASINE}\Omega \text{S} \text{S}\Pi \text{HPoS}$, below NOSTPAToY. The first five letters of the name are just visible.

Reverse.—Tripod; mon. r. Kh. letter m; mon. l. Plate VII, 110. Kh. legend maharajasa tratarasa, below (Hipathratasa).

Round copper coins of Hippostratos are very rare, and have so far never been figured. Dr. White King had two, see White King Sale Cat., Part I, No. 161, and supplement to Parts I and II, No. 4549. Of No. 161 it is remarked in the Catalogue that till the time of its publication, such round pieces were unknown. Yet they are mentioned by Cunningham in his 'Coins of Alexander's Successors': see coins of Hippostratos the Great, No. 5a.

10. ARTEMIDOROS.

Copper, square. Weight, 20. Size 45.

Obverse.—Artemis l. wearing short chiton and holding out bow. Greek legend worn and illegible.

Reverse.—Humped bull standing to right. Kh. legend r. maharajasa, top apadihatasa, left probably Artemi

This small coin is a novelty. In weight and size it corresponds with the hemi-lepton of Menander, B. M. Cat., Pl. XII, 7.

11. STRATO.

Billon, round. Weight, 45. Size, '6.

Obverse.—Diademed bust to r. surrounded by barbarous

Reverse.—Pallas to l. with aegis, hurling thunderbolt.
Mon. r. Plate VII, 142; l. Kh. letter. Kh. legend maharajasa
tratarasa, below Stratasa.

Professor Rapson has seen this coin and describes it as a

new variety of Strato. It belongs to the types attributed to Strato II. This coin and another like it were found by me in the Ambala District of the Punjab.

12. TELEPHOS.

Copper, rectangular. Weight, 120. Size, 85.

In No. III of his paper 'Numismatic Notes and Novelties' (Journal A. S. B. for 1898), Mr. Vincent Smith published a copper coin of Telephos, the description of which was as follows:—

Obverse.—Zeus (or king) seated l. on throne with back; his r. hand advanced; in his l. sceptre.

Greek legend, $BA\Sigma I \wedge E \hat{\Omega} \Sigma$ (l.), EYEPLETOY (top), TH \wedge E ϕ OY (r.).

Reverse.—Figure to r., seated in crouching attitude, with r. arm extended; l. arm not visible.

Kharosthi legend, Maharajasa (r), Kalinakrama (top), sa Téliphasa (damaged, on left).

Mr. Vincent Smith remarked: 'The coinage of Telephos is of extreme rarity, and has heretofore been known in silver only. The Elliot hemidrachm in the Bodleian Cabinet was considered unique until Von Sallet identified two duplicates of it among the unnamed coins of the Guthrie collection at Berlin.'

The copper coin of Telephos now described was sent to me four years ago. The obverse is the same as that of the coin described by Mr. Vincent Smith, but the reverse is new.

Reverse.—Soldier (?) walking to r., wearing short cloak which floats behind his shoulders. His right arm is extended, and over his left shoulder he is carrying a spear or long staff. On his head is a Phrygian cap. To r. is the monogram peculiar to the coinage of Telephos, and to the biga type of the silver issues of Maues. Below the monogram is a peculiar object, possibly a stone or an altar. Kh. legend on three sides, r. maharajasa, top, Kalonakráma, l. sa Téliphasa.

The reverse design is unique, but resembles that of the unpublished hemidrachm of Strato I and Agathokleia in the British Museum

Every letter of the Kharosthi word corresponding to EYE PLETOY is distinct. The first character is ka, and the second is l, but the short vertical stroke only extends below the horizontal line of the l, converting the character into lo. The third character is a hook turned to the right, and according to Mr. Vincent Smith is either the cerebral, or the dental n. The fourth letter appears to be clearly kr, but there is a dot below and to the left of the character.

562 Journal of the Asiatic Society of Bengal. [November, 1910.

13. HERMAEOS.

Silver, round. Weight, 150. Size 1.

Obverse.—Bust of king l., diad. Legend, ΒΑΣΙΛΕΩΣ ΣΩΤΗΡοΣ, below EPMAIOY.

Reverse.—Throned Zeus l. radiate, with r. hand advanced,

sceptre in l. Mon. Pl. VII, 72. Kh. legend, maharajasa trata-

rasa, below Haramayasa.

The didrachms of Hermaeos are well known, but I illustrate this specimen as it is in fine condition, and exhibits an -unusual monogram.

14. AZES.

Copper, square. Weight, 50. Size .75.

Obverse.-Male figure striding to l., chlamys flying behind; holds club in r., and trident in l. hand. Legend on three sides BAZINE OX BAZINE ON METALOY AZOY.

Reverse.—Female figure to r., peplum flying; holds out long fillet or garland; mon. Pl. V, 10. Kh. legend on three sides, maharajasa rajarajasa mahatasa Ayasa.

This is a rare variety of the copper coinage of Azes, and has not been figured before. It is identical with B. M. Cat.,

p. 89, No. 185.

15.

Copper, rectangular. Weight, 70. Size, 8 x · 5.

Obverse.—King on horseback r. carrying whip and bow; mon. r. similar to Pl. X, 18. Legend on three sides INEWB.... METANOY AZoY.

Reverse.-Zeus standing l., holding Nike bearing wreath and palm in extended right hand, and long sceptre in l. hand; mon. Pl. X, 3, l.; Kh. letter sm and another character r. legend on three sides maharajasa ... mahatasa Ayasa.

A square copper coin of Azes bearing the presentiment of the standing Zeus Nikephoros, so common on this king's silver

coinage, is a novelty. I know of no other specimen.

16. AZES AND AZILISES.

Copper, rectangular. Weight, 165. Size $1 \times .75$.

Obverse.—Herakles standing facing; holds in l. hand club and lion's skin; and with r. crowns himself; mon. l. Pl. VII, 72. Legend on three sides, BAΣΙΛΕΩΣ ΒΑΣΙΛΕΩΝ ΜΕΓ

Reverse.—Horse walking r.; mon. r. illegible. Kh. legend on three sides (maharajasa rajarajasa mahatasa) Ayasa.

This type of copper coin is neither new nor extremely rare. but the fact that it bears the joint names of Azes and Azilises has not been previously recognized. Professor Rapson, who has seen the specimen now described, agrees that the type should be ascribed to Azes and Azilises jointly. The B. M. Collection contains four examples of this type, two of which has been attributed to Azes-Pl. XIX, 11-and two to Azilises -Pl. XXI, 5. But there is no vestige of the name on the obverse of Pl. XIX, 11, while on Pl. XXI, 5, the name on the Greek side is Azilises, while it is assumed that the corresponding name on the reverse is Ayilishasa. But only the first two characters are visible, and these are not Ayi, but Aya, i.e., the first two syllables of Ayasa.

Silver coins of Azes and Azilises jointly are known-see B. M. Cat., Pl. XX, 3, and Pl. XXXII, 9. See also Cunningham's 'Coins of the Indo-Scythians, Sakas and Kushans.'

17. GONDOPHARRES.

Copper, round. Weight, 65. Size 6.

Obverse.—Conventional presentiment of Apollo standing r. holding arrow in both hands, and clad in chlamys and boots; design in area surrounded by raised beading : no legend.

Reverse.—Area filled by Gondopharrian symbol 💆 . Kh.

legend extant but rubbed and illegible.

This interesting coin was brought to me from Mathura. An Apolline type of the issues of Gondopharres is a novelty. With regard to the reverse design, compare coin B. M. Cat., Pl. XXII, 12.

GONDOPHARRES AND ASPAVARMA.

Copper, round. Weight, 150. Size 8.

Obverse.—The king on horseback to left holding whip. In front of the horse is the Gondopharrian symbol & and J. The Greek legend is corrupt and illegible, resembling that on the coins ascribed to Azes II-Plate IX, 6, or on those of Gondo-

pharres with inscription Sasasa.

Reverse.—Zeus, naked to the waist, standing r., with r. hand raised, and long sceptre in l.; to right symbols Kh. letter α , A, and monogram, Plate X, 11; to left mark Plate X, 33, and symbol 9. Kh. inscription reading from the bottom up towards the left from the outside of the coin-Aspavarmasa (putrasa) Indravarma strategasa; then returning to the bottom and reading up towards the right from the inside of the coin-Jayatasa

This coin is No. 274 in the first part of the White King Catalogue. It is there described as unpublished, and it is pointed

out that the coin possibly shows that Aspa Varma was connected with Gondopharres, and Wema Kadphises, as well as

with Azes.

The usual variety of Azes and Aspa Varma copper coin is illustrated at B. M. Cat., Plate XX, 2, and it will be seen at a glance that the present coin is very different from it. The king on horseback is to the left, and in front of him is the symbol of Gondopharres. On the ordinary Aspa Varma coins the name Azes on the obverse can be plainly read, but the Greek inscription on the specimen now discussed is quite barbarous and illegible. The name Azes cannot be read either on the coin illustrated in the White King Catalogue, or on any of the three specimens in my possession.

The figure of Jupiter on the reverse is identical with that on the coin of Gondopharres illustrated at Plate IX, 9. It seems invidious to call the mark Plate X, 33, the symbol of Wema Kadphises. A symbol with at least an equal claim to that title would appear to be Plate VII, 154. The mark Plate X, 33, or a modification of it, is found on the coins ascribed by Mr. Vincent Smith to Azes II (Plate IX, 6); on those of Azes II and Aspa Varma (Plate IX, 7); of Gondopharres (Plate IX,

9); of Zeionises; and of Wema Kadphises.

The arrangement of the Kharosthi inscription on the reverse is peculiar. Then in addition to the words on the ordinary Aspavarma coins, there is the term tratarasa. I have filled in the word putrasa on the analogy of the usual Aspavarma inscription, but am not sure of it as there is a gap in the same place in all my three specimens, and the White King coin at

this place is indistinct.

The marks on the coin are almost identical with those on the coin of Gondopharres, Plate IX, 9, already referred to. Instead of Kh. pra is Kh. a. The other symbols are the same. So are the obverse and reverse designs and their positions. It seems to me that the coin provides strong evidence to show that Aspavarma was the governor or satrap of Gondopharres as well as of Azes. This is consistent with Mr. Vincent Smith's view that Azes II was succeeded by Gondopharres.

19. KADPHISES II.

Gold, round. Weight, 245. Size 1.

Obverse.—Within square frame bust of king to I. wearing diadem; r. hand grasps thunderbolt or twig, I. hand rests on bottom edge of frame; his coat buttons at the neck. Above and below dotted circle, and over top edge of frame is mon. Pl. VII, 154. To r. and I. legend BACINEYC OOHMO

Reverse .- Siva standing front, head r.; holds trident in r.

hand, round body and over l. shoulder necklace; body radiate: flames arising from head. He is leaning with his left arm on the hump of a bull standing behind him to r.; to left symbol Pl. VII, 152. Kh. legend, maharajasa rajadirajasa sarvaloga

isvarasa mahisvarasa himakapisasa tratara.

This is a new type of double stater of Wema Kadphises, and is a superb specimen. The obverse resembles that of the coin B. M. Cat., Pl. XXV, 10, while the reverse is the same as that of the double staters in the British Museum, except that Siva is facing right instead of left. The coin has been purchased for the Indian Museum.

HUVISHKA. 20.

Copper, round. Weight, 240. Size 1.

Obverse.-King seated to front cross-legged on clouds, head r.; l. hand raised. Greek legend illegible.

Reverse.—Wind-god running l., his hair loose; both arms

raised; tor. OAAO. The presentment of Oado, the wind-god, is common on the copper coins of Kanishka, but very rare on those of Huvishka. In his 'Coins of the Indo-Scythians, Sakas and Kushans' Cunningham published copper Oada coins of Huvishka, but with the elephant-rider obverse only, and remarked 'Very rare; only two specimens.' The coin now described is No. 444 of the first part of the White King Catalogue, but has not been previously figured.

21. Indo-Parthian.

Copper, round. Weight, 110. Size 85.

Obverse.—Bust of the king to l., wearing tiara. Kh. (?) legend.

Reverse.—Winged Nike facing, holds wreath. Kh. legend. This is a new Indo-Parthian coin, but I cannot read the fragmentary inscriptions.

DALHOUSIE:

R. B. WHITEHEAD.

3rd June, 1910.

Some Rare Coins of the Pathán Sultains of Dehli.

The following seven coins of the Dehli Sultans are, to the best of my knowledge, so far unpublished, with the exception of that of Shamsu-d-Din Mahmud Shah, but this does not appear to have been adequately described. All but the gold coin were found by me in the Dehli bazar within the last two years. The gold coin came from Rawalpindi.

I. Ghiyásu-d-Dín Balban.

Copper.

Weight—30 grs. Size—·6.

Mint—Fakhrábád.

Obverse.	Reverse.
In double circle.	In circle.
ا مدل	بفخر
غياتي	إياد

The only mint of Balban published by Thomas was Dehli. Subsequently silver coins of Lakhnautí mint became known, and specimens are in the Indian Museum. Then in the first Numismatic Supplement to the Journal of the Asiatic Society of Bengal, Mr. Nelson Wright published a rupee and a copper coin of Balban struck at Sultánpúr. The copper coin was an 'adlí of the usual type, but on the reverse it bore the words بعضرت دهلي instead of بعضرت دهلي.

The 'adli now published adds a fourth to the three known mints of Balban. It is not a good specimen, but the inscription Ba Fakhrábád appears to be quite clear. Fakhrábád was presumably some place in or near the province of Bengal.

II. Shamsu-d-Dín Mahmúd Sháh.

Billon.

Weight—50 grs. Size—·65.

 Obverse.
 Reverse.

 ابو المظفر
 السلطان

 محمود شاه
 عظم شمس الد

 السلطان
 ۷۱۸

This remarkable coin was picked out of a large number of silvery billon coins of the Dehli Sultans covering the period from Mu'izzu-d-Dín Kaiqubád to Muḥammad Tughlaq. It is of a common Dehli type, but the king's name is new. I could find no reference to Shamsu-d-Din Maḥmúd in any of the usual standard works and catalogues, but ultimately I found a paragraph in Mr. C. J. Rodgers' "Coin Collecting in Northern India," which I proceed to quote verbatim.

"During the reign of Mubárak Sháh a coin was struck bearing the name of Shamsu-d-Dín Maḥmúd Sháh. We do not know who he was. In the second year of his reign the Emperor went a tour in the Dekkan. He took a cousin with him and left Dehli in the hands of one of his creatures. When returning, he suddenly ordered his cousin to be executed, and when he arrived in Dehli the same fate was measured out to the man who had been left as governor of that city. It is surmised that the cousin and the governor were plotting for the throne. The coin was evidently struck in Dehli. The king probably saw it, and as it bore on it the year of his absence, he imagined that either the governor, or his cousin, or both, were plotting against him. No mention is made of Shamsu-d-Dín Mahmúd in history. His name and date are found only on one known coin. If more coins could be obtained, we might get to know more about him."

In the Introduction to his "Catalogue of the Coins in the Government Museum, Lahore," Mr. C. J. Rodgers gives a list of the Dehli Sultans which includes Shamsu-d-Dín Maḥmúd. The date of his accession is given as 718 A.H., and it is stated,

that only one billon coin is known.

These two references are all the information I have been able to find. I cannot ascertain whether the coin was ever described, and to whom it belonged, or now belongs. If it was the property of Mr. Rodgers, he probably disposed of it to the British Museum, yet it is not published in his Supplements.

Possibly the present notice will stimulate further enquiry, but Shamsu-d-Dín Mahmúd can have been nothing more than

the figure head of an obscure palace conspiracy.

III. Muḥammad-bin-Tughlaq.

Gold.

Weight—170 grs. Mint—Tughlaqpúr alias Tirhut. Size—·85. Year—735.

Obverse.

In circle, Kalima.

Marginal inscription within outer circle.

ضرب هذه السكه اقليم تغلق پور عرف ترهت في سنه خمس و ثلثين و سبعمايه Reverse.

In centre of coin المجاهد في سبيل الله سبيل الله محمد بن تغلق On four sides names of the four imāms: all within outer circle.

This mohar is in fine condition. It is a gold coin of Tughlaqpur alias Tirhut mint, and as such is a novelty. Previously the only known coins of Muhammad Tughlaq struck at

568 Journal of the Asiatic Society of Bengal. [November, 1910.

this mint were forced currency issues of the design common to it and to Dehli, Dár-ul-Islám, Lakhnautí, Daulatábád, Satgāon, and Darra Dáhár or Dhár. The date of the coin now published is 735, while the only date so far known to exist on the forced currency issue of Tirhut mint is 731.

IV.

Billon.

Weight -50 grs. Size-6.
Date-734.

Obverse. Reverse.
In circle. In double circle.
الراجي محمد بن
رحمة الله تغلق سفه
الكريم الكريم

This is a variety of a common billon type of the issues of Muḥammad Tughlaq, in which the date is always expressed in words. In one respect the coin is a freak because the word we (year) when used on the coinage of the Dehli Sultáns, is invariably followed by the date in words. Otherwise it is a normal, well-executed specimen. Two of this variety were found in the same lot from which I got the coin of Shamsu-d-Dín Maḥmúd.

V.

Billon.

Weight—52 grs. Size—·7.

Obverse. Reverse.
In circle In circle.
المجاهد في معمد بن تغلق شاع

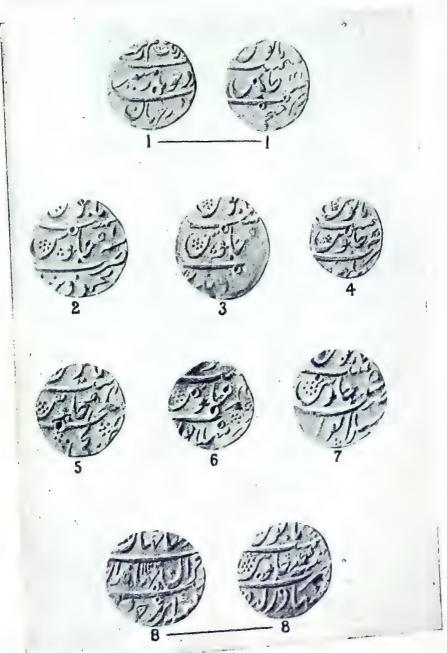

Like the preceding coin, this is a variety of a common billon type of Muḥammad Tughlaq's coinage. Instead of the date in figures appear the words with the coin is thin, and the lettering is distinct in style.

السلطان

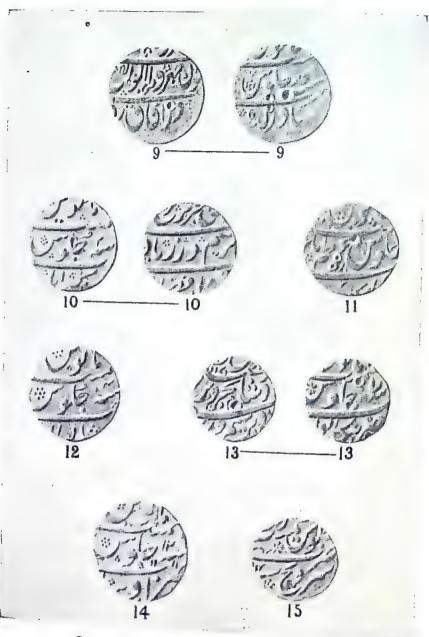

VI. Firoz Shah with Zafar.

Billon.

Weight—75 grs. Size—•5.
Mint—Dehli.

Some Coins from the Limbdi Treasury.

Some Coins from the Limbdi Treasury.

Vol. VI, No. 10.] Numismatic Supplement. [N.S.]

Reverse. Obverse. In circle. في-روز شاع دار الملک ظفو سلطاني دهلي

Muhammad bin Firoz. VII.

Billon.

Mint-Dehli. Weight—120 grs. Date- 790. Size--7.

Reverse. Obverse. In circle. In circle. دار الملک دهلی فيرؤز شاه محجد شام

The last two coins are novelties as they are both of Dáru-l-Mulk Dehli. The first of the two belongs to the dateless varieties, and is a dumpy piece of poor workmanship; the second is well executed and in fine condition.

LAHORE:

R. B. WHITEHEAD, C.S.

569

1st April, 1910.

SOME COINS FROM THE LIMBDI TREASURY.

In June last (1909) it was my good fortune to spend six delightful days at Limbdi, the capital of the State of that name in the Province of Kāthīāwād. Mr. Jhaverbhai Nāthābhai Amin, the capable and trusted diwan, had suggested to His Highness the Thakor Sahib that a hoard of coins which long had been lying untouched in the State Treasury should be examined, and it was on this welcome errand that I visited the place. Every facility was afforded me for the inspection of the coins, each one of which passed through my hands. Numbering some 6,500, they were all, with the exception of a few Native St., 500, they were all, with the exception of a few Native State coins, either rupees or half-rupees of the Mughal Emperors of India. The Great Mughals, Akbar, Jahangir, and Shah Jahan were but poorly represented, the large majority of the control of of the coins ranging from Aurangzeb to Muhammad Shah. The Thakor Sahib very kindly presented me fifty that were new to my collection. A description of these will perhaps be of interest, the more so as several of them have till now remained unedited.

$Aurangz\bar{e}b.$

Of the rupees of Aurangzeb's reign four in the hoard issued from mints hitherto unregistered, but on two of these the mint-names still defy decipherment. One of the new mints is Jinji, جنجي (Fig. 1, Obv. and Rev.). The obverse of this Jinji rupee displays the ordinary چو بدر صنير legend, while the Hijri year 1109 appear in the gāf of بورند زيب. The reverse reads quite distinctly—

مانوس میمذت سڈہ ۱۶۱ جلوس ضرب جنجی

Eighty miles south-west of Madras, "the fortress of Jinjī occupies seven adjacent hills, on each of which stands a fort bearing a distinct name", Elliot (Dowson), VII, 348. In his "History of the Mahrattas" Grant Duff tells at some length the story of the siege of Jinjī. It appears that in 1693 the place was invested by the Mughal troops under the prince Kām Bakhsh, but so languidly were operations conducted that not till January, 1698, was the fortress carried by escalade. The Jinjī rupee must have issued from the mint but a few months after this success, for the year of its issue, 1109 H., closed on July 9th, 1698.

Another new mint that now falls to be registered is Maḥmūdbandar, المحدود بندر (Figs. 2 and 3, Rev. only). Two duplicate rupees, each dated 51-1119, mutually help to reveal the mint-name, one containing its earlier letters Maḥmūdbanand the other its later letters....ūdbandar. Where this Mahmūdbandar was situated is unknown to me.

Yet two other rupees, one dated 30-1098 and the other 4x-1109, are of the ordinary type, but in each case I have failed to read the mint recorded. In the hope that some coin-collector may be able to suggest the correct reading of these names, the two Reverses are shown in Figs. 4 and 5.

Of Aurangzeb's Mailāpūr rupees one was described fourteen years ago in King and Vost's article entitled "Novelties in Mughal Coins." A rupee from this rare mint is also in Mr. Burn's cabinet. At Limbdī two specimens came to light, on one of which the mint-name is entered as Mahīlāpūr with an 'h', ye, and on the other as simple Mailāpūr, without the

¹ My cabinet has long held an Aurangzeb rupee of the regnal year 4x that was struck at Islambandar. This "bandar" too baffles me.

[N.S.]

'h', ميلا ډور (Figs. 6 and 7, Rev. only). "Mylapore" lies on the left bank of the river Adyar, and forms with St. Thomé the southern suburb of the present town of Madras.

Other rare Aurangzeb rupees were two from the mints at

Zafarpūr and Dāru-l-mulk Kābul.

A'zam Shah.

It was an especial pleasure to light upon an Aḥmadābād A'zam Shah in mint condition. The only other specimen known to me is in the British Museum, No. 850.

Shāh 'Ālam I.

Shāh 'Ālam I was represented by rupees from the following mints, all of them rare for that Emperor's reign: Ajmer, Aḥmadnagar, Akbarnagar, Purbandar, Chināpattan, Sholāpur, and both Daru-l-jihad and Farkhunda bunyad Haidarabad. Of two Ajmer rupees, each of the first regnal year, one, probably the earlier issued, bears the mint epithet Daru l-Khair, but the other Mustaqirru-l-Khilafat. This latter title is also present on the rupee No. 866 in the British Museum, which coin, however, differs from the Limbdi rupee in the arrangement both of the Obverse and of the Reverse legends. Evidently then during Shāh 'Alam's first year three several dies were designed and used in the Ajmer mint.

Jahāndār.

The Jahandar rupees included a very early Arkat (1-1124)2 and a good specimen from the exceedingly rare mint Bahadurgarh. This latter displays the ماحب قراك bait, but a second rupee, already long in my possession, of the same Emperor and mint, bears the ببرالفتي distich (Figs. 8 and 9, Obv. and Rev.).

The situation of Bahadurgarh is not known for certain. It was somewhere in the Deccan, and "perhaps the place was on the Man river '', E.D., VII, 383, note 2.

Having these two coins in hand for reference, I have no hesitation in affirming that the muhr and rupee, Nos. 860, 874, in the British Museum cutalogue, there attributed to Sholāpūr (with 'short o'), really issued from the Mailāpūr mint. On coins Sholāpūr is written fully issued from the Mailāpūr mint. (scriptio plena) with a waw present in the first syllable, thus not ملك پور but see med

² In his "Old Coins in the Bahawalpur State Toshakhana," Mr. Whitehead mentions a rupee struck at the Arkat mint still earlier by two years. He says, "If my reading is correct, the Arkat coin of Shah 'Alam Bahadur I is new. It is dated 1122 (jalus 4)."

Farrukh-siyar.

Of Farrukh-siyar's reign one rupee I am inclined to assign, though somewhat doubtfully, to the new mint Gulshanābād (Fig. 10, Obv. and Rev.). It displays the normal legends, but on this specimen the mint-name itself is not very clear. The fort of Gulshanābād, in Baglānā near Junīr, is mentioned in the history of the operations conducted by the Imperial forces against the Marāthās in the early years of the twelfth century after the Hijra (É.D., VII, 337, 345); but I have not succeeded in discovering what connexion the Emperor Farrukh-siyar may have had with this place.

Another rupee of this reign issued from the mint of A'zamnagar (Fig. 11, Rev. only). The lowest line of the Reverse contains several incomplete letters, which may perhaps have served to indicate that the mint's full name was A'zamnagar Gokulgarh. The specimen in the British Museum, numbered 936, seems to be without this supplemental line.

Fig. 12, Rev. only, represents a puzzling rupee. Though its mint-name has not yet been deciphered, enough of its letters are present to render probable the inference that this coin issued from some town hitherto unregistered in any mint-list.

Other noteworthy rupees of Farrukh-siyar were those from Dāru-l-Khair Ajmēr, Dāru-l-Fath Ujjain, Islāmābād, Bankāpūr, Chīnāpattan, and Mustaqirru-l-mulk 'Azīmābād. The Bankāpūr rupee (Fig. 13, Obv. and Rev.), dated 7-1130, differs in the arrangement of its Obverse legend from King and Vost's No. 32.

Rafi'u-l-Darajāt.

Of Rafi'u-l-Darajāt's short reign rupees bearing this Emperor's distinctive couplet were in evidence from the Dāru-l-Fatḥ Ujjain, Aḥmadābād, and Lakhnau mints. There was also a Multān rupee bearing, as indeed seems to be usual in the case of this mint, not the couplet but the simpler legend that is present too on the Multán muhr. The Aḥmadābād rupee, a broad specimen and in perfect condition, is the first one I have seen without the Zīnatu-l-bilād epithet. Just the plain name Aḥmadābād is entered at the bottom of the Reverse. It would be interesting now to discover gold pieces of this simpler type, corresponding to the well-known Zīnatu-l-bilād muhrs.

Shāh Jahān II.

Shāh Jahān II's rare mints at Burhānpūr, 'Azīmābād, and Korā were represented by their rupees. Also a rupee from Dāru-l-Khair Ajmēr was found, which, though wanting the Hijrī year, may be confidently assigned to this Emperor rather than to Shāh Jahān III.

Muhammad Shah.

Two noteworthy coins of Muhammad Shah were from the Ausā and Sironj mints (Figs. 14, 15, Rev. only). Unfortunately neither of the two shows the Hijrl year, but on the Ausā rupee the regnal year is 12, and on the Sironj 4 (or possibly x4). Also of this reign were two Manhlipattan rupees, dated 2-1132 and 8-1139, of the type already described in Numismatic Supplement VIII, 592, and XII, 383.

The Plate illustrating this article exhibits the following

85. A POSTSCRIPT TO THE ARTICLE ON "SOME COINS FROM THE LIMBUI TREASURY."

Note.—May Mahmud Bandar be Porto Novo on the Coromandel Coast? Only yesterday I had the good fortune here in Bombay to pick up a copy of that rare book Alexander Hamilton's "New Account of the East Indies" (1727), and turning over its pages I lit upon the following relevant passage:-

"The next Place of Commerce is Porto Novo, so called by the Portugueze, when the Sea-coasts of India belonged to them; but when Aurangzeb subdued Golcondah, and the Portugueze affairs declined, the Mogul set a Fouzdaar in it, and gave it the Name of Mahomet Bander. The Europeans generally call 574 Journal of the Asiatic Society of Bengal. [November, 1910.

it by its first Name and the Natives by the last "(I, 350).

It is, of course, quite true that Mahomet and Maḥmūd are different names, and that thus this "Mahomet Bander" is not necessarily to be identified with the mint-town Mahmud Bandar. But it would be surprising if the distinction between the two names had been observed by Hamilton, a rough, plain-spoken "Captain", who by his own telling was at Madras officially declared "a rank Pirate". He disavows any claim to exact scholarship. "We Britains, who either go voluntarily or are sent to Neptune's Schools in our Youth, to learn Politeness and Eloquence, very rarely meet with Apollo's bright Sons or Disciples to instruct us in the knowledge of Languages." He openly admits that what he has recorded in his book "came posting through a weak and treacherous Memory with little Elegancy.'' It thus may well be that on occasion his memory played him false, and that from this cause he has handed down in a form slightly altered a name that originally read Mahmud Bandar.

BOMBAY:

GEO P. TAYLOR.

21st May, 1910.

86. On the Symbol 'Sahib Qiran.'

It is well known that the 'alāmat Sāhib Qirān is present as a royal title on many of the coins of the Mughal Emperors of India, and it may be helpful to have on record just when and where and by whom this title was used. But first a word as to its meaning. The term قراك, qirān, indicates in the astrology of Persia a conjunction of two or more planets. Now not all conjunctions are held to be auspicious, for while some planets, such as Venus and Jupiter, are supposed to shed a beneficent influence, others, such as Mars and Saturn, are deemed to exert a malignant power. A pair of planets, each of good omen, is expressed in Arabic by the dual معدين, sa'dain, but if the two import bad luck the term employed is نحسين naḥsain. Hence the full form قران سعدين means definitely an auspicious conjunction, but قران نحسين a conjunction as definitely inauspicious. It would seem, however, that قران when used absolutely can carry with it سمدين understood, and accordingly it admits of interpretation as a conjunction presaging happiness. By consequence the title Sāhib Qirān comes to

l As is well known, "the horned moon with one bright star" is at the present day the felicitous emblem of the 'Öthmānlī Sultāns of

mean 'Lord of the (happy) conjunction,' whence arose the derivative meanings, 'a favourite of Fortune,' 'a great Emperor,' 'a Kaisar,' 'an Augustus.'

Tamerlane is said to have been the first monarch to have borne this title, but the epithet has not been found on his coins. The late M. Ed. Drouin in his paper on "Les Symboles astrologiques sur les monnaies de la Perse'' mentions that Timur in his desire to foster the prosperity of his capital city Samarqand invited thither astrologers and other men of learning. During his reign (A.H. 771-807) a remarkable planetary conjunction took place, and the astrologers, availing themselves of the occasion, fashioned as an adulatory tribute to their imperial patron the title Sāḥib Qirān. Inasmuch as the celestial phenomenon then observed recurs but once in thirty years, they foretold that Timur's reign would last for at least that period of time, and as a matter of fact it did cover the thirty-five years from 1369 till 1404. The title thus assigned to Timur seems to have become for a while a term distinctive of that Emperor. The Tuzuk-i-Jahangiri expressly states:

"In these Memoirs whenever Sahib Qirani is written it

"refers to Amīr Timūr Gūrgān."3 In the Preface to the Persian translation of the Mulfūzāt-

i-Tīmūrī the translator, Abū Ṭālib Ḥusainī, says:

"I saw in the library of Ja'far, Governor of Yaman, "a book in the Turki language, dictated by His Majesty "who now dwells in Paradise, Sahib Qirani."

In Jahangir's time the Royal Signet of the Great Mughal bore, inscribed in the topmost of its nine circles, the words:

امير تيمور صاحب قران

None of Timur's successors on the throne of Samarqand bore the title of Sāḥib Qirān, but in that later Empire of the Great Mughals, founded in Hindustan by Babar, sixth in descent from Timur, the coins of no less than nine of the Emperors (or Claimants to the throne) exhibit the title either

l The Tuzuk-i-Jahangiri, translated by Rogers and Beveridge,

² The Mulfūzāt Tīmūrī, translated by Stewart, page 1.

Turkey. Its origin dates so far back as B.C. 339. In that year Philip of Manadan with dates are far back as B.C. 339. of Macedon, while besieging Byzantium, attempted in the early night hours an escaled hours an escalade of the city; but it is said a sudden silver gleam flashing from the control of the city; but it is said a nemy, and thus flashing from the western sky revealed the advancing enemy, and thus Byzantium Byzantium was saved. In commemoration of the Divine aid so wonderfully youchested. byzantium was saved. In commemoration of the Divine aid so wonderfully vouchsafed, it was forthwith decreed that the city's badge should be a crescent, its light reinforced by a star, and that both star and the crescent should be graven on the city's coins. This emblem was adopted by the Turks after Constantinople fell to Muhammad II in 1453, and ed by the Turks after Constantinople fell to Muhammad II in 1453, and the distinctive since then it has some to be popularly regarded as the distinctive since then it has come to be popularly regarded as the distinctive symbol of Islam. The Market and the Archer a symbol of Islām. To the Muhammadans of India, however, it is a foreign ensign, in no way associated with their religion.

576 Journal of the Asiatic Society of Bengal. [November, 1910.

unchanged or in a slightly varied form. The nine Emperors are—

Shāh Jahān I, Shāh Shujā', Murād Bakhsh, Shāh 'Alam Bahādur I, Jahāndār, Farrukh-siyar, Muḥammad Shāh, Shāh 'Alam II, and Akbar II;

and the variant titles are the following four:

Ṣāḥib Qirāni, Ṣāḥib Qirān Thānī, Thānī Ṣāḥib Qirān, and Thālith Ṣāḥib Qirān.

I. Ṣāḥib Qirān, صاحب قران.

The simple term Ṣāḥib Qirān is present, unaltered, on the coins of Murād Bakhsh and Jahāndār.

(a) Murād Bakhsh caused rupees of two different types to be struck at Sūrat in A.H. 1068. Of the rarer type the legend on the Obverse reads:—

Muḥammad Murād, the victorious King, the Second Alexander,

Took the heritage from (Shāh) Jahān, Lord of the Conjunction.

(b) Jahāndār approved two distichs for his coins, of which the one given below contains his title Ṣāḥib Qirān.

This legend, with occasional slight variation, is present on both muhrs and rupees struck at Khujista Bunyād, and on the rupees that issued from Etāwā, Dāru-l-Fath Ujjain, Dāru-s-Sarūr Burhānpūr, Barēlī, Sūrat, Dāru-l-Khilāfat Shāhjahānābād, and Lakhnau.

[Nādir Shāh is not included among the Emperors of India, but it may here be noted that, during his sanguinary invasion of the country in A.H. 1152, he caused coins to be struck in his name at Dēhlī and Aḥmadābād, on which he too is styled Ṣāḥib Qirān. They bear the legend:

هست ملطان بر سلاطین جهان شاه شاهان نادر صاحب قران]

II. Ṣāḥib Qirānī, صاحب قراني.

The title 'Lord of Conjunction' with the mere change of قراني to the adjectival قراني occurs on the coins of Shāh 'Ālam I and Shāh 'Ālam II.

(a) Mr. Whitehead in his report on the "Old Coins in the Bahāwalpūr State Toshakhānā" (Num. Supp. XI, p. 333) mentions three muhrs of Shāh 'Alam Bahādur I from the mint Mustaqirru-l-Khilāfat Akbarābād bearing the following inscription:—

Instead of the first two words مبارک سکه Mr. Rodgers would read بزر زد سکه.

The same epithet Sāhib Qirānī also occurs on the Akbarābād rupee, No. 3, on page 220 in the Lāhor Museum Catalogue, which, as Mr. Whitehead points out, has been there erroneously attributed to Ālamgīr II. It is, one may confidently affirm, a coin of Shāh 'Ālam Bahādur I.

(b) On both muhrs and rupees of Shāh 'Ālam II from Aḥmadnagar-Farrukhābād and Dāru-l-Khilāfat Shāhjahānābād, and on that Emperor's rupees from Mustaqiru-l-Khilāfat Akbarābād, Barēli Qaţ', Muzaffargarh, and (perhaps) Jodhpūr, we meet with the following legend:

سكه صاحب قراني زد زقائيد اله حامي دين محمد شالا عالم بادشالا

ماحب قران ثاني ,III. Ṣāḥib Qirān thānī

This title, 'the Second Lord of Conjunction,' was adopted by the four Emperors, Shāh Jahān I, Shāh Shujā', Muhammad Shāh, and Akbar II.

l Shāh Jahān I was the first of the Mughal Emperors to have the title Sāḥib Qirān thānī entered on his coins, but M. Ed. Drouin has adduced interesting evidence which goes to prove that the title was as a matter of fact borne by Shāh Jahān's father Jahāngir.

[&]quot;Les poètes persans contemporains qui étaient à la cour de ce "sultan (Djehan Gîr.) et célébrèrent son avènement en 1605, disent "bien qu'il monta sur le trône au moment où avait lieu la seconde con-"jonction (ce qui est faux astronomiquement), mais Djehan Gir n'a "jamais pris ce titre sur ses monnaies ni dans ses protocoles. Je dois

578 Journal of the Asiatic Society of Bengal. [November, 1910.

From the very first year of his reign Shāh Jahān I introduced this epithet on his coins, and it is to be seen on nearly all the muhrs, rupees, and nithars that were issued prior to his death. area of the Reverse of the famous 200-muhr piece exhibits the legend which, with variations as to the arrangement of its constituent words, continued throughout this Emperor's reign to be the normal legend for his coins in gold and silver.

The two rupees of Shah Shuja', Nos. 690 and 691 in (b) the British Museum Catalogue, very probably bear in their margin the epithet Sāhib Qirān thānī. The as the قران ثاني as the reading of the right margin of the Reverse No. 690; and in Num. Supp. VI, pp. 265, 266, Mr. Burn has shown reason for rejecting, as to No. 691, the extremely doubtful rendering "Jal ūnābād," which Mr. Lane-Poole had ventured to suggest, and for accepting in its stead the reading Sāhib Qirān thānī.

On the coins of Muhammad Shah stood the severely (c)

simple legend

but it would seem that some two years after this Emperor's accession the words صاحب قران ثاني were inserted after مبارک on the coins, both gold and silver, that issued from the Shāhjahānābād mint, a change which was maintained till the close of the The legend as thus altered reads— سكه مبارى صاحب قران ثاني محمد شاء بادشاه غازى

(d) 'Akbar II's Shāhjahānābād muhrs and rupees bear a legend identical with the one last recorded, save

Les Symboles astrologiques sur les monnaies de la Perse (Gazette belge de Numismatique, Bruxelles, 1901).

cependant mentionner ce fait que, en 1896, il a été présenté au cabi-'net de France (qui n'en a pas fait l'acquisition) un rubis rapporté du "Turkestan, et sur lequel était gravée une inscription que j'ai cru pouvoir lire de la manière suivante: Djehân Gîr shâh Akbar shâh stique, que ce souverain aurait pris, avant son fils Shâh Djehân, le titre de 'deuxième maître de la conjonction.'"

Les Symboles astrologiques sur les mornoice de la Parse (Gazatte

only that the name Akbar is added after Muhammad. They thus read—

سكه مبارك صاحب قران داني محمد اكبر شاه بادشاه غازي

IV. <u>Th</u>ānī Ṣāḥib Qirān, ثانى صاحب قران.

This variant form, in which is comes first instead of last, appears on two gold coins of Shāh Jahān I, both of them from the Shāhjahānābād mint. One of these is the 200-muhr piece, on which in the left margin of the Reverse the Emperor is styled

ثاني صاحب قران شالا جهان دين پنالا

The other is the beautiful muhr, No. 568 of the British Museum Catalogue, dated 30—1066, which in the margin surrounding the circular area of the Reverse bears the distich

سکه شاه جهان اباه رائع در جهان جاودان بادا بذام ثاني صاحب قوان

V. Thalith Ṣāḥib Qiran, ثالث صاحب قران.

I have seen but a single coin exhibiting this epithet, a Tatta rupee of Farrukh-siyar, dated 1—1125. It is one of the treasures in the cabinet of my kind friend Mr. Framji Jamaspji Thanawala.

The ordinary legend on Farrukh-siyar's coins proclaims the Emperor's title of بادشاء بعر و بر Bādshāh of sea and land,' but on this Tatta rupee he is styled instead ثالث صاحب قران 'the Third Lord of Conjunction.' The whole legend reads—

مكه زد از فضل حق بوسيم و زر ثالث صاحب قسوان فوخ سير

Note.—In several of the Native States of Rājpūtānā their rulers have at one time or another issued coins more or less closely resembling those of the contemporary Mughal Emperors. Of these Native State coins the following exhibit the Emperor's name associated with the title Ṣāḥib Qirān thānī:—

Muhammad Shāh rupees from the mint at Jaisalmēr; Shāh 'Ālam II rupees from Būndī, Bikānēr, and Qaraulī; and Akbar II rupees from Būndī, Bharatpūr, Dholpūr, and Sawāi-Jaipūr.

GEO. P. TAYLOR.

AHMADABAD: 10th June, 1910. P.S.—Through the kindness of Mr. R.B. Whitehead, I.C.S., I am able to add a reference to another coin on which the title Ṣāḥib Qirān Thanī is ascribed to the then regnant Emperor. Shāh Jahān II issued from the Tatta mint a coin bearing a couplet which Mr. Whitehead reads as follows:—

The Second "Lord of the Conjunction," Shah Jahan, Struck coin in gold with security and tranquillity.

G. P. T.

87. MOGHAL MINT TOWNS-FIROZNAGAR.

In the list upon page 174 of his "Manual," Dr. O. Codrington places a mark of interrogation against the name of Firoznagar. I find that it is the new name by which 'Alamar Aurangzeb disguised Rāechor (Nizām's Territories), as he did so many other places. In the M'āṣir-i-'Ālamgīr (Bibl. Ind.), p. 332, line 2 from foot, we have an entry headed "Capture of Rāechor," which states that on the 26th Ṣafar [1101 H. Dec. 29, 1689 N.S.], 33rd year, the Bakhshī-ul-mulk, Rūḥullah Khān, took the fort of Rāechor, which received the name of Fīroznagar. In 1117 H. (1706), year 50, Chīn Qīlich Khān, Bahādur, was appointed faujdār of Fīroznagar vice Yūsuf Khān; ibid., p. 513.

WILLIAM IRVINE.

88. THE QANDAHAR RUPEE OF MUHAMMAD SHAH.

Dr. G. P. Taylor of Ahmadabad writes:—"Just a couple of days after reading your description of a rupee, doubtfully assigned by you to the Qandahār mint, and dated the 30th regnal year of Muḥammad Shāh (N.S. 13: 240), Mr. Qadri, the Oriental Translator to the Bombay Government, very kindly gave me a rupee—normal type—of the same Emperor, on which the mint-name Qandahār is quite clearly written. Its date is the 27th regnal year. It would thus appear that in the 27th and the 30th years of the reign of Muḥammad Shāh (A.H. 1157-1159; A.D. 1744-1746), and presumably from the 27th till the 30th year, coins were issuing from Qandahār in the name of the Dehli Emperor. How is this fact to be explained, if throughout that period the city was under Persian rule? There is another Qandahār, a taluq of Nānder District in the

Numismatic Supplement XIII, J.A.S.B., Vol. VI, No. 4, 1910, p. 240, article 78.

Haidarābād State (Imp. Gaz. XIV, 377). Can this be the true

home of these coins?" The suggestion that the coin described by me may have issued from the South Indian Qandahār was made to me by Mr. R. Burn before I wrote my note, but as I could only find Qandahār given as the name of a taluq, I thought the probability of that source doubtful. Dr. Taylor's rupee of the 27th year of Muhammad, however, is against the theory I put forward in my note, and I have since had the opportunity of reading Major J. S. King's "History of the Bahmani Dynasty," on pp. 8 and 122 of which are references to the "Fort of Kandhar" and "the town of Kandhar and its dependencies." In the map attached to this history the town of "Kandhār" is located on the Manāda River, longitude 77°, latitude 19°. Qandahār was evidently a place of some importance on the border between the Ahmadnagar and Bidar principalities, and I am disposed to agree that the rupees of Muḥammad Shāh of the Qandahār mint more probably issued from the Qandahār of the Dakhan and not from the Qandahār of Afghānistān.1 H. NELSON WRIGHT.

D. M. J. La written. (6 In Roman

¹ Since writing the above Dr. Taylor has written: "In Rogers and Beveridge's Translation of the Tūzuk-i-Jahāngīrī, page 179, occurs a reference to Qandahār as a fort in the Dakhan, and a footnote adds 'Sixty miles north of Bidar, Elliot VI. 70."

56. NUMISMATIC SUPPLEMENT No. XV.

Note.—The numeration of the article below is continued from p. 581 of the "Journal and Proceedings" for 1910.

89. Notes on Some Mughal Coins.

The following notes are to a certain extent supplementary to my paper "Old Coins in the Bahāwalpūr State Toshakhānā," published in the eleventh Numismatic Supplement to the Journal of the Asiatic Society of Bengal. I have also included notices of new and interesting coins obtained from other sources. Where the weight and size are not given, the coins are rupees of the usual dimensions. Where there are no indications to the contrary, the specimens described are in my own collection.

Kāmrān.

Government Collection, Lahore.

I publish the above three rupees of Aurangzeb as specimens of the Ahmadābād, Khambāyat, and Multān mints, struck in regnal year one. The Khambāyat rupee is similar to

the mohur described in the Bahāwalpur paper.

The Multan coin is in the Government Cabinet, Lahore, the catalogue of which was compiled by Mr. Rodgers and published by the Baptist Mission Press, Calcutta, in the year 1891. As this catalogue does not appear to have been consulted by Mr. Burn when he wrote his paper "The Mints of the Mughal Emperors," I will give particulars of one or two other interesting coins in the Cabinet which do not appear to have been previously described.

Supplementary Collection, Lahore Museum.

In a paper entitled "On some rare Muhammadan Coins" (J.A.S.B., 1895), Colonel Vost published and illustrated a mohur of Aurangzeb struck at a mint read by him as Daru-l-Jihād Tatta. This coin is a facsimile of the mohur, and shows that what was read as Tatta is really the first part of the letter sin of manūs. However, the style of the coin is distinct from that of the Haidarābād mintage, but its mint if different has yet to be determined.

1119 81	
مدولت و جاه ماد	سقة إحد ضون
<u>a</u>	
(زد در جهان)	خجسته بثيار

The British Museum contains a mohur of A'zam Shāh struck at Khujista Bunyād, and there was also one in the White King Cabinet—Catalogue, Part III. No. 3951. A rupee is a novelty.

SHAH 'ALAM BAHADUR.

The Rodgers Cabinet in the Lahore Museum contains two coins struck by Shāh 'Ālam Bahādur using his princely name of Mu'azzam Shāh. The first is a rupee struck at Tatta in regnal year one, and bears the following couplet:—

The second is a rupee, the only certain words on the obverse of which, according to Mr. Rodgers, are:—

..... شالا غاز معظم صاحب قرانی He described the coin as being unique, but in poor condition, and could not read the mint. The date is regnal year one—see the Rodgers' Catalogue of the Coins of the Mughal

Emperors in the Lahore Museum, p. 197, No. 5.

I have seen this specimen, and read the mint as Murshidābād. Subsequently Dr. Taylor informed me that he had this coin, probably of Murshidābād mint, so I think the mint may be put down with certainty as Murshidābād. The following coin is of similar type. It is so badly rubbed as to be almost illegible, but fortunately there is enough to make certain that the mint is 'Azīmābād.

No. 18.

Obverse.	Reverse.
	aim
**** * * * *	اعد
شاھ غاز	مانوس
p	ميہنت
قراني	آباه جلوس
صاحب	عظیـــــم

The reverse is exactly similar to that of the 'Azīmābād rupees of Aurangzeh's fiftieth and fifty-first years —I. M. Cat., Pl. XII, No. 1252.

I cannot make even a suggestion as to what the couplet is because both top and bottom lines are illegible on this specimen, and on that of Murshidābād mint just referred to.

In my paper on the Bahāwalpur coins I described mohurs

having the following inscriptions:-

Obverse.	Reverse.
عالم گير ثاني	جلوس مانوس
1119	مومثت
ಜಿತಿ	مستقر الخلافه
قرانی بهادر	سنهٔ احد
صاحب	ضرب .
*****	اكبرآباه

I went on to say, 'They are coins of Sāḥib Qirān Bahādur Ālamgīr Sānī, struck at Mustaqirru-l-Khilāfat Akbarābād in 1119 (julūs 1), and resemble silver coin No. 3 on page 220 of C. J. Rodgers' Catalogue of 'The Coins of the Mughal Emperors of India in the Lahore Museum.' It would appear that this

rupee was erroneously attributed by Mr. Rodgers to 'Alamgīr II, and is a coin of Shāh 'Alam Bahādur I.'

Since writing the above I have seen this silver coin in the Lahore Museum, and find that it is exactly similar in type to the gold coins, and bears the same dates. I figure it here:—

No. 19. A.

Obverse.	$Reverse_*$
عالم گيو ثاني	جلوس مائوس
شاه ۱۱۱۹	ميمنت
قوانی بهادر	مستقر الخلافة
صاحب	سنة أحد
4 2 5 6 8 8	شرب
	اكبراباه

Rodgers' Cabinet, Lahore Museum.

Mr. Rodgers guessed the bottom line of the obverse as being probably نزرزد, and suggested the couplet:—

It does not read convincingly, but will have to stand till specimens are discovered containing the bottom line intact. I should prefer

سکسه زد چسو صاحب قسواسی برادر شایا عالسم کسیسوثانی

This rare variety cannot have been in circulation long, and rupees of the usual type struck at Mustaqiru-l-Khilefat

Akbarābād are known of year 1119, regnal year one.

To sum up, at the commencement of Shāh 'Alam Bahādur's reign, four places at least—Tatta, Murshidābād, 'Azīmābād (Patna), and Akbarābād (Āgra)—struck coin exhibiting unique legends, the first three in the name of Mu'azzam Shāh, and the fourth in the name of his father 'Ālamgīr. These varieties were quickly superseded by the ordinary types, which endured throughout the remainder of the reign.

I read this as a copper coin of Farrukh Siyar struck at Akharābād in regnal year three. It was found at Dehli in the same lot as coins Nos. 4, 5 and 25 of this paper, and copper coins of Salimābād and Salimābād-Ajmīr published previously.

The mint name on the reverse is very similar in style to that of coin No. 8, described and illustrated in Mr. C. J. Rodgers' paper 'Rare Mughal Coins' (Journal AS B. for 1896), as a coin probably struck by Shah Jahan at Agra or Akbarabad. This common peculiarity makes it quite possible that that coin was one of Shah Jahan II. It was described as unique.

Government Collection, Lahore Museum.

This is silver coin No. 4 of Rafi'u-d-darjāt on p. 84 of C. J. Rodgers' 'Catalogue of the Coins in the Government Museum, Lahore.' It is strange that the variation from the usual couplet, in place of particle, escaped Mr. Rodgers' discerning eye, and it has remained for Mr. Allan to publish a Khujista Bunyād mohur with the couplet, nineteen years later—see Numismatic Supplement XIII. The mohurs of this mint, published by me in the Bahāwalpūr paper, exhibited the usual couplet.

SHĀH JAHĀN II.

No. 33. R.

Mint, Tatta.
Date, 1131 A.H.: 1 R.

This interesting coin can be nothing but a couplet coin of Shāh Jahān II, and as such is quite a novelty. The mint is Tatta, and there is a Tatta rupee of Shāh Jahān II of the ordinary type in the Lahore Museum.

The couplet is probably something like this:—

MUHAMMAD SHĀH.

In my Bahāwalpūr paper I mentioned half mohurs of Muhammad Shāh struck at Shāhjahānābād and Sind mints.

The legends of the first are identical with those on the usual type of gold and silver coin struck at Dehli during this reign. The Sind coin is different, and I give a revised reading below.

No. 34. Al Weight, 85; size, 5.

Supplementary Collection, Lahore Museum.

In the Bahāwalpūr paper I mentioned the interesting discovery of a mohur of Muḥammad Shāh of Aurangābād mint, in spite of the fact that from 1100 A.H. the town is known on its coins solely by its honorific epithet 'Khujista Bunyād.' The reason for the existence of this unique specimen is that an old die of Aurangzeb was used for the reverse side, and in fact the reverse is absolutely identical with that of coin I. M. Cat., Vol. III, No. 1246. The hijri and regnal years of the specimen now described do not agree.

At Bahāwalpūr I found a rupee, the obverse of which had been struck from a die of Shāh 'Ālam Bahādur, and the reverse

of Shahjahanabad mint, was plainly of Shah 'Alam II.

This specimen was sent to me from Rawalpindi. Although it was of good workmanship and in excellent condition, I could not but regard it as a freak because of the unique combination Muhammad Shāh Bahādur. But I subsequently found two more like it at Bahāwalpūr, so presume that it must be regarded as a definite type of Muhammad Shāh's coinage. There is no trace of a hijri date on any of the three specimens, and though on the reverse of two the date is clear, it is difficult to read. It may be two, four, twenty-two, or twenty-four. I am inclined to read it as two, and to consider what looks like a tens figure, to be a peculiarly shaped ornament.

Reverse. مائوس مبيذيت اهد سذه جلوس ديرجات

The above are three coins of Ahmad Shah struck at Bhakhar, Dera, and Derajāt mints respectively. No. 41 was published in my Bahāwalpūr paper as being a coin of Muhammad Shah of Bhakhar mint, but I now find that the name is unmistakably Ahmad Shāh, and Bhakhar coins of Muhammad still remain to be found. The remarkable thing about these three coins is the absence of the usual title Bahadur after Ahmad Shāh.

Coin No. 45 is a Dera rupee of Ahmad Shah Bahadur, dated 1162 A. H.; 2 R, and coin No. 46 is a rupee of the same emperor struck at Derajāt in 1161 A. H.; 1 R. Their dates are the same as those of Nos. 42 and 43, respectively, and it is strange that rupees were struck in the same places in the same years, some of Ahmad Shāh, and some of Ahmad Shāh Bahādur. Can the above three coins be issues of Ahmad Shah Durrani? They are of poor workmanship, but are Mughal, and not Durrani in type and style.

Three other Dera rupees of this type bear dates 1163 A.H.,

2 R, - A.H., 3 R, and - A.H., 5 R.

Another coin, the present attribution of which appears to me doubtful, is the following rupee.

AR. No. 44.

Mint, Kashmir. Date, 1166 A.H.; 6 R. الفرس سكة رد بر زر بفضل اله مانوس سكة رد بر زر بفضل اله مينت شاة عالم يناة احبد شاة الم بناة احبد شاة عالم يناة المناة المناق المناة المناة المناق ال

This is a counterpart of coin No. 1 on p. 167 of Part II of the Rodgers' Collection Catalogue (Lahore Museum), but that coin is dated 1162 A.H., 2 R. Mr. Rodgers attributed it to Ahmad Shāh Durrāni, and described it as unique. I found

two duplicates in Bahāwalpūr.

I do not know the exact state of politics in Kashmir in the years 1162 and 1166 A.H., but from the internal evidence of the coins themselves I think their attribution to the Mughal Ahmad Shāh is more probable for the following two reasons. In the first place the coin is distinctly Mughal in style. Then again the couplet appears on rupees of Ahmad Shāh struck at Imtiyāzgarh where the Durrāni certainly never penetrated, and could have had no influence. The Imtiyāzgarh coin is No. 4082 in the Third Part of the White King Catalogue, and No. 2104 in Vol. III of the I. M. Catalogue, and is illustrated in both works.

Kashmīr rupees of Aḥmad Shāh Durrāni, bearing his usual couplet, are not uncommon. Silver coins were struck at Kashmīr by 'Ālamgīr II, the successor of Aḥmad Shāh Bahādur.

Supplementary Collection, Lahore Museum.

This is a rupee of Ahmad Shāh Bahādur struck at Sīkākul mint in the second year of his reign. The obverse of this specimen is strikingly different from that of the usual type. I published this Mughal mint in the Bahāwalpur paper, the coin being a mohur of Farrukh Siyar.

Dr. Taylor has referred me to p. 379 of Malleson's 'French in India,' showing that at the time this coin was struck there seems to have been a good deal of political activity in the

districts near Chicacole.

'ALAMGIR II.

No. 48. A. Mint.

This is a copper coin of Bahādur Shāh II of Ḥaidarābād mint. The White King Collection contained a gold coin,—Catalogue, Part III, No. 4203,—and a silver coin of the same dates and similar inscriptions as this copper coin, was published by Mr. Longworth Dames in his paper 'Some Coins of the Mughal Emperors,' Numismatic Chronicle, Vol. II, pp. 275-309.

I only publish this coin because the mint has been recognized by Mr. Burn in his Tables as one of Bahādur Shāh II. On the other hand the power of this emperor was entirely bounded by the walls of Fort Dehli, and the coins struck elsewhere in his name are not even of the type of those struck in Shāhjahānābād, that is, they are not of the imperial type. I should prefer to see only the Shāhjahānābād coins recognized as being imperial issues, while those struck at other mints designated as what they really are, the issues of independent States.

Since writing the above I have come across the following rare coins, on which I add brief notes. The monurs and rupees are of the usual weight and size.

SHĀR JAHĀN.

No. 59. Allahābād mint; date 1052 A.H., 15 R. Square areas type as illustrated in I.M. Catalogue, Vol. III, Plate X, No. 918, only name of mint in bottom margin.

Mr. Burn mentions a copper coin of Shāh 'Alam II of Islāmābād Mathurā mint as one of the rare coins in the Ellis Cabinet,-N.S. III,-but it has so far not been described. A rupee is contained in Mr. Burn's Tables, and a muhar has just been acquired by Mr. Nelson Wright.

The ordinary Islāmābād silver and copper coins of Shāh

'Aiam II are not uncommon.

R. B. WHITEHEAD, I.C.S.

90. -On some Copper Coins of the 'Adil Shāhi Dynasty of Bijāpūr.

In the month of August last (1910) Mr. Henry Cousens, M.R.A.S., then Superintendent of the Archæological Survey of India, Western Circle, forwarded to me 249 copper coins. sent him from Bijāpūr, the well-known capital of the District of that name in the Southern Division of the Bombay Presi-Though with an occasional good specimen amongst them, most of the coins were in poor condition, battered and worn. Seven of them were square, all the others being round. From this material, sufficient indeed in quantity, but of inferior quality, Mr. Cousens set himself a task of reconstruction. Skilfully piecing together a bit from one coin and a bit from another, he was able finally to build up both the Obverses and the Reverses of nine different types of coin. As I now write, photographs of the coins thus reconstructed, and the copper coins themselves, lie before me, and a comparison of both reveals how remarkably true to the originals are these reconstructions. Not a stroke nor a dot is lacking, and the proportions and shapes of the letters have been reproduced with an almost absolute fidelity. Thus the accompanying Plate of these reconstructed coins may confidently be accepted as exhibiting

facsimile representations of the original dies.

I have said that the coins came from Bijāpūr, and the question at once suggests itself, Are these then coins of a distinctive Bijāpūr currency? On this point the coins themselves are tantalizingly reticent, giving no clue as to the affinities of the kings who caused them to be struck. Not one records the place of mintage, and with eight exceptions they are dateless. They do, however, give the name (though never the father's name) of the regnant king, and hence we learn that the 249 coins were struck during the reigns of just five kings, an 'Alī, an Ibrāhīm, a Muḥammad, a second 'Alī and a Sikandar. But, when the names are written in this order, anyone familiar with the history of Bijāpūr will at once see that these are the very names of the last five kings of the 'Adil Shahi This fact of itself affords strong presumptive evidence in favour of the attribution of the coins to that dynasty. Confirmatory evidence is supplied by the dates on the eight dated coins. Six are of the reign of Ibrahim, and the years recorded are 1022 and (perhaps) 1024, 1025, years thus that fall within the reign of Ibrāhīm II of Bījāpūr (A.H. 988—1037). Two other coins, struck in the name of the Sultan Sikandar, are dated A.H. 1086, 1087, and Sikandar of Bijāpūr reigned from A.H. 1083 to 1097. Then, too, the inscription on one of the types (No. IX) bears associated with the king's name 'Ali the title 'Adil Shah, a title distinctive of the dynasty that held sway in Bijāpūr from A.H. 895 till 1097. Lastly, my esteemed friend, Mr. Framji Jamaspji Thanawala of Bombay, was so good as to send me for inspection from his own collection twenty-five coins, and from that of Mr. Kavasji Edalji Kotwal seven, all of the same kind as those sent by Mr. Cousens, and the "find-spot" of these additional thirty-two specimens was Sholapur, a town distant from Bijāpūr just fifty-eight miles, and intimately connected with the history of that city. For these cumulative reasons one may with perfect confidence assign all the 281 copper coins 1 to the last five 'Adil Shāhī rulers. So far as I am aware, no coins of this dynasty have hitherto been published, and a Bījāpūr currency, prior to Aurangzeb's annexation of the kingdom, has not been registered in any book on Numismatics. But, having regard to the pomp and splendour of the 'Adil Shahs, a glory attested by the noble monuments and graceful memorials that still remain in the city of Bijāpūr, 'the Palmyra of the Dakhan,' it is well nigh incredible that these proud monarchs, during the two centuries of their independence, should have been content to use an alien currency. More than once, indeed, had the conjecture been hazarded that they did strike coins of their own, and to-day some of these coins of theirs we hold in our hand.

The only reference I have yet found to any actual Bijāpūr currency is in Beale's 'Oriental Biographical Dictionary,' where that writer states, with reference to Muhammad 'Adil Shah, "He was the last king of Bijāpūr who struck coins in his "own name." This article will demonstrate that both 'Ali II and Sikandar, the two successors of Muhammad, did issue coins, though not indeed so freely as their three predecessors, still, while mistaken in respect of this detail, Beale was correct in his implication that the 'Adil Shahs nad a special currency of their own. As yet we are in a position to report of their copper coins only, but a State marked by such magnificence and grandeur would surely not have restricted its currency to the baser metal. We venture therefore to express the hope that, if still further search be made, it will some day be rewarded by the welcome discovery of Bijāpūr coins in both silver and gold.

As preliminary to an account of the various types of the copper coins, it may be well to enter here a List and a Genealogical Table of the kings of the 'Adil Shāhī Dynasty of

Bijāpūr.

Chronological List of the 'Adil Shāhī Kings of Bījāpūr.

Yūsaf 'Ādil Shāh reigned A H. 895—916 (A.D. 1489—1510).
 Isma'īl , A H. 916—941 (A.D. 1510—1534).

¹ From Mr. Cousens 249, from Mr. Thanawala 25, and from Mr. Kotwal 7: Tota' 281.

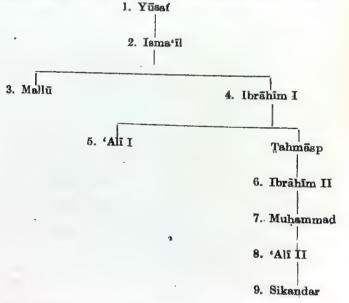

```
3. Mallū 'Ādil Shāh reigned A.H. 941 [7 mos.] (A.D. 1534—1535).
                                       (A.D. 1535—1557).
                         A.H. 941—965
4. Ibrāhīm I
                        A.H. 965—988
5. 'Ali I
                                         (A.D. 1557—1580).
6. Ibrāhīm II
                        A.H. 988-1037 (A.D. 1580-1627).
                   ,,
                        A.H. 1037-1067 (A.D. 1627-1656).
7. Muhammad
                   ,,
                        A.H. 1067-1083 (A.D. 1656-1672).
8. 'Alī II c
                   . .
9. Sikandar
                        A.H. 1083-1097 (A.D. 1672-1686).
```

The last king, Sikandar, deposed by Aurangzeb in A.H.

1097, died three years later.

It may be noted that the entire period of the rule of the dynasty was a little more than 200 lunar years, or from A.H. 895 to 1097, and a little less than 200 solar years, or from A.D. 1489—1686.

Genealogical Tree of the 'Adil Shahī kings of Bijapur.

This table shows that Ibrāhīm I was a brother of Mallū, and Ibrāhīm II a nephew of 'Ali I, and that with these two on the throne.

Controversy still gathers round the question as to the parentage of Yūsaf, the founder of the dynasty, but, whence-soever sprung, he rose to influence at the court of Sulţān Muḥammad Shāh III of the Bahmanī dynasty of Kulbarga, who, when appointing him Governor of the Bijāpūr District, conferred on him the title of 'Ādil Khān. On this Sulţān's death internal dissensions hastened the disintegration of the Bahmanī kingdom. "Yūsaf 'Ādil Khān, collecting around

"him a strong force of Turks and Mughals, and feeling himself " pretty secure, began by degrees to sever his connexion with "the capital; and, finally, in A.D. 1489 he openly declared his

"independence by ordering the Khutba to be read in the

"mosques in his own name."

Of the first four kings of this Dynasty no coins have as yet been discovered, but of course it by no means follows that no coins were struck by them. The coins hitherto found are of ten several types, nine of which Mr. Cousens has "reconstructed.' The one additional type is represented by only five specimens, and these of a coarse and clumsy make. The ten types range over the last five reigns. Two should in all probability be attributed to 'Ali I, three to Ibrāhīm II, three to Muhammad, one to 'Ali II and one to Sikandar. Of each type we now proceed to give a detailed description.

TYPE I.

Number of specimens 5 (Cousens).

Reign: 'Ali I: A.H. 965-988.

Diameter: (a) '8; '75; (b) '65 inch. Weight: (a) 186, 182, 174, 157 grains.

(b) 117 grains.

Obverse:

علي ابن ابي طالب

arranged thus :-

علی ایے

On the smallest of the five coins the is written ابي, and on the lowest line.

Reverse:

اسد الله الغالب

arranged thus :---

الغالب

TYPE II (Plate XXXIX, Figure 1).

Number of specimens 27: (a) 10 (Cousens); 2 (Thanawala).

(b) 5 (Cousens); 1 (Thanawala).

9 (Cousens). (c)

¹ Cousens: Guide to Bijāpūr, 2nd Edn., p. 115.

Reign: 'Alī I: A.H. 965-988.

Diameter: (a) .75; (b) .7; (c) .55 inch; also of one square coin the side measures .5 inch.

Weight: (a) 177; (b) 110; (c) 52 grains; and of the 3. square coin 58 grains.

Obverse:

على ابن ابي طالب arranged as in Fig. 1.

Reverse:

اسد الله الغالب

arranged as in Fig. 1.

'Alī I, as a convinced Shī'a (his father was a Sunni), would delight to associate himself in every possible way with 'All the fourth, or, as Shi'as maintain, the first rightful Khalifa. Now this 'Ali Khalifa was a son of Abu Tālib, and hence the king 'Alī, by striking on his coins the words 'Alī son of Abī (=Abū) Tālib, was suggesting at least his oneness with the revered Khalifa.

On the Reverse of this 'Alī's coins he is styled Asad Allah, 'the Lion of God.' It is noteworthy, in this connexion, that a noble bearing the title Asad Khān was married to a sister of the king. He was "one of the greatest men in Bijāpūr story. "and since his death, for some reason or other, he is still "remembered and treated as a wall or saint."

Type III (Plate XXXIX, Figure 2).

Number of specimens 46: (a) 18 (Cousens); 4 (Thanawala).

(b) 22 (Cousens). (c) 2 (Cousens).

Reign: Ibrāhīm II: A.H. 988—1037.

Diameter: (a) .75; (b) .65; (c) .55 inch.

Weight (a) 172 grs. (average of 22 specimens).

(b) 115 grs. (average of 22 specimens).

(c) 60 grs. (average of 2 specimens).

Obverse:

ابواهيم ثلا اللي arranged as in Fig. 2.

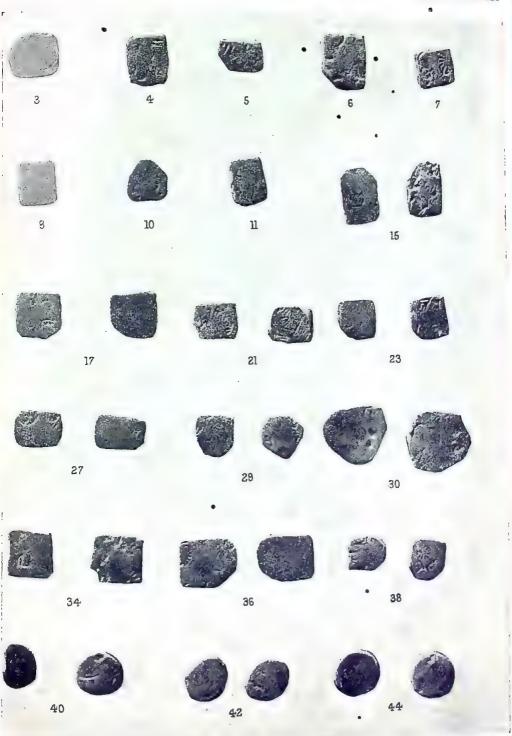

Reverse:

غلام على مرتض

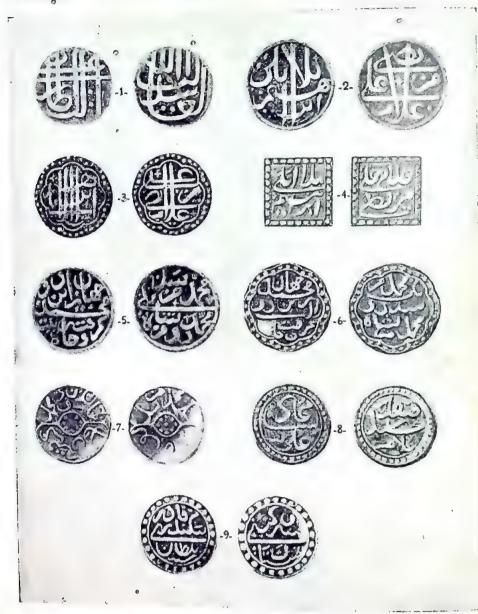

arranged as in Fig. 2.

A slight variant of this Type is preserved to us in a single coin. Its distinguishing feature is a four-petalled cruciform

Cousens: op. ct., p. 135. See also Briggs's Ferishta: III, 101,

Punch-marked coins from Afghanistan.

Copper Coins of Bijapur.

flower, markedly in evidence at the middle of both the Obverse and the Reverse. The long strokes of the lām and alif of clis on the Reverse are not upright, but inclined, so as to form nearly a right angle, thus client and the flower ornament comes just above their point of intersection. The exact arrangement of the words on the Obverse cannot be clearly determined from the solitary specimen to hand, but certainly the arrangement here differs considerably from that of Type III.

TYPE IV (Plate XXXIX, Figure 3).

Number of specimens 50: (a) 12 (Cousens); 1 (Thanawala).

(b) 17 (Cousens); 1 (Thanawala).

(c) 19 (Cousens).

1. Reign: Ibrāhīm II: A.H. 988-1037.

2. Diameter: (a) .75; (b) .7; (c) .55 inch.

3. Weight: (a) 174 grs. (average of 13).

(b) 123 grs. (average of 18).

(c) 73 grs. (average of 19).

Obverse:

ابراهيم ثلا ادلى

arranged as in Fig. 3.

Reverse:

غلام علي صرتض

arranged as in Fig. 3.

TYPE V (Plate XXXIX, Figure 4).

Number of specimens 6: (a) 2 (Cousens); 1 (Thanawala). (b) 2 (Cousens); 1 (Thanawala).

Reign: Ibrāhîm II: A.H. 988—1037.

2. All the 6 specimens are square;

length of side: (a) .65; (b) .6 inch.

3. Weight: (a) 183 grs. (average of 3).

(b) 120 grs. (average of 3).

Obverse:

ابراهيم لله اللي

arranged as in Fig. 4.

Reverse:

غلام علي صريضے ١٠٢٢

arranged as in Fig. 4.

After many attempts to decipher them, the last two words on the Obverse of Types III, IV, and V still remain doubtful. They may possibly read if it is athni, 'without a second,'

684 Journal of the Asiatic Society of Bengal. December, 1910.

'the unique,' but cortainly the penultimate letter seems on

every specimen to be not nun, but lam.

The Reverse legend is غالم على مرتضع. Murtada, 'the Chosen,' is a title frequently applied to 'Alī, the Khalīfa, and Ibrāhīm II, himself a Shī'a, might thus gladly style himself 'Slave of 'All the Chosen.'

All these six coins are dated. On the three heavier the year is 1022, 102 [? 4], 102 [? 4], and on the three lighter 1022,

102 [? 5], and xxxx.

TYPE VI (Plate XXXIX, Figure 5).

Number of specimens 70: (a) 1 (Thanawala).

(b) 54 (Cousens); 3 (Thanawala).

(c) 11 (Cousens); 1 (Thanawala).

Reign: Muhammad: A.H. 1037-1067.

Diameter: (a) ·85 (Thanawala); (b) ·8; (c) ·7 inch.

Weight: (a) 267 grs. (Thanawala).

(b) 179 grs. (average of 57).

(c) 117 grs. (average of 12).

Obverse and Reverse legends together make the following couplet, arranged as in Fig. 5:-

The world from these two Muhammads received beauty and dignity;

The first is Muhammad the Apostle, the second Muhammad Shāh.

One of the queens of Muhammad Shah was named Taj Jahan Begam, and possibly there may be a veiled allusion to this lady in the distich inscribed on the king's coin. The lines would then bear this interpretation :-

The world (Jahan) received beauty and dignity from Muḥammad the Apostle, the queen (Tāj Jahān) from Muḥam-

mad Shāh.

Or can the statement that Muhammad Shah conferred beauty and dignity on the world find its explanation in the marvellous tomb that this Sultan began to build soon after his accession to the throne? Dwarfing every other edifice in Bijāpūr, the Gol Gumbadh covers a larger area than any other dome in the world. Second to it, but longo intervallo, comes the Pantheor, at Rome.

Probably, however, we had better not seek too exact a justification of the distich on these coins, and just be content to regard it as a felicitous sample of the fibrid verses that the Persian court-poets have always been willing to supply for the gratification of their royal patrons.

Type VII (Plate XXXIX, Figure 0)...

Number of specimens 16: (a) 10 (Cousens); (b) 6 (Cousens).

Reign: Muhammad: A.H. 1037-1067.

Diameter: (a) .75; (b) .65 inch.

Weight: (a) 173 grs. (average of 10).

(b) 115 grs. (average of 6).

Obverse and Reverse together furnish the same couplet as on Type VI, but arranged as in Fig. 6.

TYPE VIII (Plate XXXIX, Figure 7).

Number of specimens 27: (a) 9 (Cousens); 2 (Kotwal).

(b) 13 (Cousens); 1 (Kotwal).

(c) 1 (Cousens).

(d) 1 (Cousens).

Reign: Muhammad: A.H. 1037-1067.

Diameter: (a) .75; (b) .65; (c) .5; (d) .5 inch.

Weight: (a) 174 grs. (average of 11).

(b) 118 grs. (average of 14).

(c) 66 grs.

(d) 56 grs.

Obverse and Reverse together furnish the same couplet as

on Type VI, but arranged as in Fig. 7.

This Type is distinguished by an outlined leaf, enclosing nine dots, set in the middle of both the Obverse and the Reverse.

Type IX (Plate XXXIX, Figure 8).

Number of specimens 18: (a) 8 (Cousens); 5 (Thanawala); 3 (Kotwal). .

(b) 1 (Cousens).

(c) 1 (Cousens).

Reign: 'Alī II: A.H. 1067-1083.

Diameter: (a) .75; (b) .6; (c) .55 inch.

Weight: (a) 179 grs. (average of 16). 3.

(b) 116 grs.

(c) 58 grs.

على عادل شاء سنه (٩) Obverse: arranged as in Fig. 8.

Reverse:

غلام حيدر صفدر

arranged as in Fig. 8.

The word aw on the Obverse is a conjectural, though probable, reading. Above it comes on some specimens what seems to be a date, perhaps 1.94, but only the two middle figures are quite clear. The year 1068 Hijri was the second regnal year of 'Ali II.

Haidar, 'the Lion,' is one of the many honourable epithets bestowed on that 'Ali whom the Shi'as revere so profoundly. Thus by the Reverse legend, 'Slave of Haidar, the Rankbreaker,' 'Alī II, the Shī'a king, proclaimed his fealty to 'Alī

the Khalifa.

Type X (Plate XXXIX, Figure 9).

Number of specimens 16: (a) 5 (Cousens); 4 (Thanawala); 1 (Kotwal).

(b) 3 (Cousens).

(c) 3 (Cousens).

Reign: Sikandar: A.H. 1083-1097. 1.

Diameter: (a) '75; (b) '65; (c) '6 inch. Weight: (a) 178 grs. (average of 10). 2.

(b) 117 grs. (average of 3).

(c) 58 grs. (average of 3).

Obverse:

سنج ۱۰۸۹ سلطان سکندر قادری

arranged as in Fig. 9.

Reverse:

خسرو گیتی سقان

arranged as in Fig. 9.1

On another specimen the date recorded on the Obverse is I . AV.

The title on the Reverse, "Khusrau (Chosroes), the Conqueror of the World," is also present on some of Nādir Shāh's Persian coins, and on some of the Durrani king Mahmud Shah.

From the foregoing description it is clear that the Bijāpūr copper currency consisted for the most part of coins of three denominations, weighing, respectively, about 60, 120, and 180 Evidently, however, some of the coins that were

I The first two letters of the word were not decipherable on the coins from which Mr. Cousens made his "reconstruction." Both these letters are, however, distinctly seen on the specimen that Mr. Kotwal kindly sent me for inspection.

issued did not fall within this range of weight. Of these a notable example is Mr. Thanawala's beautiful specimen struck in the reign of Muḥammad Shāh and weighing 267 grains. Too few coins are yet known to warrant a detailed statement as to the metrology of the Bījāpūr coinage, but for the present the 100-ratī weight (or about 180 grains) may be held to have been the standard for the normal heavy coin. The normal light coin was only one-third as heavy; and the intermediate coin was in weight the arithmetic mean of the other two.

GEO. P. TAYLOR.

AḤMADĀBĀD: 20th October, 1910.

91.—On the Bijapur Lari or Larin.

That silver coins of a type similar to the copper were current in the territories of the 'Ādil Shāhī monarchs seems every way probable, but no specimens are as yet forthcoming. A silver currency of quite a different, and indeed of foreign, pattern was, however, in existence, the curious Larin currency, which, originating in the district of Lār at the head of the Persian Gulf, and thence deriving its name, was adopted by the kings of Bījāpūr, and, in a somewhat variant, the fish-hook, form, by the kings of Kandy in Ceylon. Describing this coin Pietro della Valle (1614—1626) writes:—

"The lari is a piece of money that I will exhibit in "Italy, most eccentric in form, for it is nothing but a "little rod of silver, of a fixed weight, and bent double "unequally. On the bend it is marked with some "small stamp or other. It is called Lari, because it was "the peculiar money of the Princes of Lar, invented by "them when they were separated from the kingdom of "Persia."

Jean Baptiste Tavernier indicates the district in which, at his time (1640—1667), this currency obtained.

"The Larins are one of the ancient coins of Asia; and "though at this day they are only currant in Arabia and "at Balsara, nevertheless, from Bragdatt to the Island "of Ceylan, they traffick altogether with the Larin, and "all along the Persian Golf." 2

As the territory of the monarchs of Bijāpūr embraced a large portion of the Konkan littoral, it was probably with a

¹ Quoted in Yule and Burnell's "Hobson-Jobson," s.v. Larin.
2 Tavernier: Travels in India: Made English by J. P., 1678, pages

view to meeting the local demand for this strange coast-money that they caused larins to be struck in their own names. That these, 'Adil Shāhī larins were at any time current over the whole extent of the 'Adil Shāhī dominions is very doubtful.' Their circulation was, one may well believe, restricted to a narrow tract of country bordering the sea.

The larin being merely a piece of silver wire, or slender rod, doubled on its middle, affords but a scanty surface for receiving an inscription. Hence many letters on the coins are incomplete. However, by collating several specimens it has become possible to decipher the "some small stamp or other."

One prong of the coin seems to read-

سلطان على عادل شاة

ضرب لاري دانگ سنه and the other

The Sultan 'Ali 'Adil Shah struck the lari coin, year.....

One cannot be quite certain, however, that either ضرب or is a correct rendering of the original. In favour of the combination لاري دانكي it may be remarked that the early writer (A.D. 1525) of the Lembranças das Cousas da India mentions that 60 reis equal in value 1 tanga larin.

Some specimens bearing the above legend are dated 1071 and some 1077, which goes to prove that this 'Alī 'Ādil Ṣhāh was 'Alī II (A.H. 1067—1083).

As other coins, so larins too bore different legends at different periods. One in my possession has thus far defied decipherment, but the words ابوالمطفر شاة stand out quite clearly on one prong, and (perhaps) علي on the other: so just possibly —for this specimen is dateless—this 'Alī may be 'Alī I (A.H 965—988), one of whose titles was Abu'l Muzaffar. Can it be that both the silver larins of Bijāpūr and its copper currency were first issued under the auspices of this king?

Mr. Cousens has taken some admirable photographs of larins, sent him from Ratnagiri, from which Plate XL has been prepared. It exhibits the actual larins, and also their inscriptions, the latter attached to a plaster background. The sixth, seventh, and eighth inscriptions of the upper portion recur as the first. third, and fifth, respectively, of the lower portion. Unfortunately I am not able to give details as to the weight of each of the coins there represented, but the lengths shown are, I understand, the same as those of the originals. Of the only

¹ Voyage of Pyrard de Laval: Hakluyt Society's Edn., I, 232, note 2.

two specimens in my cabinet, one measures in its double length 3.75 inches and weighs 74 grains: the other, though measuring only 1.75 inch, is so much thicker that it weighs 78 grains. Mr. Thanawala kindly informs me that the average weight of four larins in his possession is 71 grains.

GEO. P. TAYLOR.

92.—On the BIJAPUR MUGHAL RUPEE OF A.H. 1091.

It was in the year 1097 H., the 30th regnal year of Aurangzeb, that the Bijapur garrison capitulated to the Emperor, and the erstwhile kingdom of the 'Adil Shahs became but a Province of the Mughal Empire. The coins thereafter struck at Bījāpūr in the name of Aurangzēb, especially those of the years 1098 and (one issue of) 1116, were remarkable for the beauty of their lettering and for their exquisite workman-Also on these coins the mint-name appears in association with the proud title Dar al Zafar. But how is one to account for the fact that Mughal rupees bearing the name of Aurangzeb and purporting to have issued from Bijāpūr were struck so early as the Hijri year 1091, the 24th regnal year-that is to say, six years before the capture of the mint-town? One such rupee is No. 763 of the British Museum Catalogue, and a second is in my own cabinet. Both these specimens, however, are of very ordinary make, without any claim to distinction as trophies of the engraver's art. The mint-name too is entered on them as plain Bijāpūr with no ennobling title. Under what circumstances, then, can these earlier rupees have been uttered?

Now, though Bijāpūr finally surrendered to the Mughals in A.H. 1097, it had previously often undergone siege at their hands. One of these occasions was in the year 1090, when Dilāwar Khān with his Imperial troops closely invested the city. The sister of Sikandar 'Adil Shah, in the hope of saving her brother and country, had already devoted herself and gone down to the Mughal camp to be the bride of Sultan Mu'azzam, the second son of Aurangzeb. But even this sacrifice proved of no avail. The siege was still pressed sore, and in his despair the Bijāpūr regent, Mas'ūd Khān, applied to Sivāji for aid. The latter at once made a diversion by a vigorous attack on the Mughal possessions in the Dakhan. But the Mughal general, Dilāwar Khān, was not now to be drawn aside from the capture of Bijāpūr, and so closely did he beset the city that Mas'ud Khan was under the painful necessity of making further supplication to the Marāthās. When at last these did come, and, hovering round the investing army, succeeded in cutting off its supplies, then only did Dilawar Khan raise the siege and retreat by rapid marches westwards. There can be little doubt that it was while this siege was proceeding and capitulation seemed imminent that the powerful Mughal faction in the city, thinking to anticipate an inevitable surrender, caused the 1091 Hijr rupees to be struck in the name of the Emperor Aurangzeb. Or just possibly they may have been issued from some mint accompanying the Imperial forces in the field. Certainly no sufficient proof has come down to us that the Mughal assailants did actually capture the city in the year 1091; but no less certainly that year witnessed the circulation of Bijāpūr coins of Aurangzāb.

GEO. P. TAYLOR.

93.—On the half-muhr No. 172 of the British MUSEUM CATALOGUE.

Mr. Stanley Lane-Poole, in his Catalogue of the Mughal Coins in the British Museum, has suggested that the very interesting gold piece No. 172, depicting a crowned archer followed by a woman veiled, may have been struck in order to commemorate the submission to Akbar of Ibrahim II, king of Bijāpūr, and the subsequent marriage of Ibrāhim's daughter to Akbar's third son, the Sultan Daniyal Mirza. This interpretation of the coin rests, however, on very slender foundation. The late M. Ed. Drouin, in an article contributed in 1902 to the Revue Numismatique, describes, and gives a vignette of, a half-muhr closely resembling this one in the British Museum, save that the specimen in the Cabinet de France bears on its Obverse the legend, in Devanagari characters, रामस्य, Ramasatya, 'the Truth of Rāma.' Arguing mainly from this new feature of the coin, M. Drouin arrives at the following conclusion :-

> "Notre médaille représente donc, suivant moi, le "prince Rāma reconnaissable à sa couronne, avec l'arc "et les flèches célestes, suivi de Sītā, la fille de Djanaka, "roi de Mithila, 'la belle Mithilène,' comme l'appelle le "poète, tous deux partant pour l'exil; il ne manque "que Lakshmana."

If this explanation, so consonant with the legend on the coin, wins, as it well may, our acceptance, we must then surely relegate to the same class with it the sister coin, No. 172 of the British Museum. That either of the two stands in any special relation to the 'Adil Shahs of Bijāpūr is very improbable.

GEO. P. TAYLOR.

Compare the mention, on other Mughal coins, of the Khalifas and their virtues, e.g., بصدق ابي بكر, ' By the Truth of Abū Bakr.'

94.— DAMS OF AKBAR STRUCK AT JAUNPÜR AND AJMIR MINTS' AND 'SOME RARE PATHAN COINS.'

Two papers entitled 'Dams of Akbar struck at Jaunpur and Ajmir Mints' and 'Some rare Pathan Coins' appeared in Numismatic Supplements Nos. XIII and XIV, respectively. Since their publication I have made casts of the coins described, and a plate has been prepared which is published with the present paper. A reference is invited to the papers themselves, but for convenience I append an abbreviated list of the coins.

Dams of Akbar struck at Jaunpur and Ajmir, Mints.

No. 1. New type of Jaunpur dam, dateless.

No. 2. Dām of Salimābād Ajmīr, dated 982 A.H.

No. 3. Dam of Salimābād, dated 1008 A.H.

Some RABE PATHAN COINS.

No. 1. Copper coin of Ghiyāsu-d-din Balban struck at Fakhrābād.

No. 2. Billon coin of Shamsu-d-din Mahmud Shah of

Dehli, dated 718 A.H.

In the list of 'Books on the Coins of Northern India' at the end of C. J. Rodgers' 'Coin Collecting in Northern India' is the following—(57) Coins of Shams-ud-diu Mahmud Shah. 1 cut, C. J. Rodgers. I have not seen this pamphlet, but the paragraph I quoted in my paper 'Some Rare Pathan Coins' from 'Coin Collecting in Northern India,' was written after it, and obviously recapitulates the information contained in it.

No. 3. Mohur of Muhammad Tughlaq struck at Tughlaq-

pūr alias Tirhut, date 735 A.H.

No. 4. New variety of a common billon coin of Muhammad Tughlaq, date 734 A.H.

No. 6. Coin of Firoz Shāh Tughlaq with his son Zafar, of mint Daru-l-Mulk Dehli.

No. 7. Coin of Firoz Shah Tughlaq with his son Muhammad Shah, of mint Daru-l-Mulk Dehli, date 790 A.H.

JOURNAL AND PROCEEDINGS

OF

THE ASIATIC SOCIETY OF BENGAL

1911

New Series, Vol. 7, Pp. 697-712

NUMISMATIC SUPPLEMENT No. XVI. 51.

Note.—The numeration of the article below is continued from p. 691 of the "Journal and Proceedings" for 1910.

95 GOLD COINS OF SHAMSU-D-DIN MUZAFFAR SHAH, OF BENGAL.

In 1873 Sir E. C. Bayley published a drawing of a gold coin of this king. But at that time he could not read the mint and date and consequently was obliged to discuss the question of its assignation at length. These were correctly read by S. L. Poole in his catalogue.2 The same scholar also published the full name of the king correctly for the first time. Bayley's coin remained an unique specimen for a very long time, and seems to be the only gold coin of Muzaffar Shah recorded up to date. Recently I came across two gold coins of this prince in The first coin belongs to Bābū Debî Prasād Mārwāri. of Bhagalpur, and was sent to me for examination with the major part of his collection. It is almost a duplicate of Bayley's coin :-

Obverse.

In ornamental double circle, In ornamental double circle, خزاله the Kalima and ۱۹۹

In ornamented circle containing the smaller circle, the names of the four Companions.

Reverse.

الدنيا

شهش

والدين ابونصر مظفر شاد السلطان

خلد الله ملكه

(و) ساطائج

The coin was purchased by the owner at Bhagalpur. The second coin was found in the ruins of Gaur, and is at present in the possession of Babū Krishna Lal Chaudhurl, Zemindar of Maldah. This coin is an exact duplicate of Bābū Debi Prasād's coin, but is in a far better state of preservation.

It should be noted that the name of Muzaffar Shah differs

on different coins:-

- as on the gold شمش الدنيا والدين ابو نصر وطفر شاء السلطان (إ) coin and I. M. No. 17519.1
- , (2) Similar, the only difference being in the form of writing the name Muzaffar, which is written in the usual form, see No. 16151 Ic M.²
- .as on I. M شهش الدنيا والدين ابو المظفر مظفر شاة السلطان (3) No. 16158.8

Rākhal Dās Banerji.

Indian Museum, Calcutta.

96. Some bare coins of the Pathan Sultans of Dehli.

The following coins, which have been acquired by the British Museum since the publication of the Catalogue of Coins of the Sultans of Dehli, in 1885, appear to be unpublished:

Muhammad bin Sam.

AR (base) wt. 49.5: size 55. No mint; year 59 x.

Obverse.

tlla

Y ILS IK

محيد

رسول الله Reverse.

السلطان المعظم

معر الديا و الد ين ابو المظفر

محدد بن سام

Around between two concentric oircles: تسعيوس mye وخبس مائة

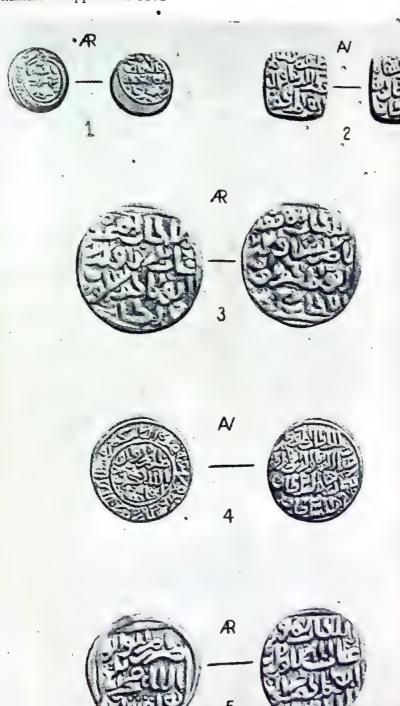

Pl. XVI

There is no mint on this coin, but its Ghorid faloric shows that it was probably struck at Ghazni. It is quite a new type for Muhammad bin Sam, and as the name of Ghiyagu-d-din al-Ghori does not appear it was probably struck in 599 A.H. The coin was acquired in Bannu by Dr. T. L. Pennell and presented by him to the Museum.

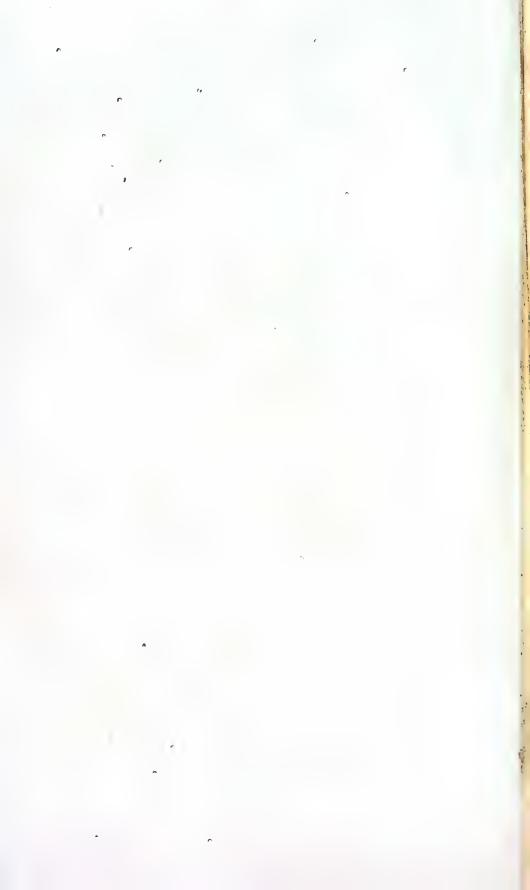

II. Quibu-d-din Mubarak.

N wt. 55.7: size 6: square. No mint or date.

¹ H. N. Wright, I. M. Cat., Vol. II, part ii, p. 171. 3 Ibid., p. 171.

Coins of the Pathan Sultans of Dehli.
(Article No. 96)

Reverse. Obverse. مداری شالا خليفة رب العالمين السلطان بن قطب الدنيا و الدين السلطان ابو المظفر

Pl. XVI This remarkable coin appears to be the third of a gold tanka which would be quite a new denomination. For the obverse legend cf. I.M.C., Vol. II, p. 45, No. 253, and for the reverse No. 263, but I am unaware of any other coin which combines these legends The coin is evidently undated, and was formerly in the collection of the late Dr. Leitner.

III. Ghiyaşu-d-din Tughlaq I and Nasiru-d-din Ibrahim Shah, Governor of Bengal, 723-725, A. H.

R wt. 168.6: size 1.15.

Pl XVI

Reverse. Obverse. السلطان المعظم السلطان الاعظم نامر الدنيا والدين غياث الدنيا والدين ابو المظفر ابراهيم شاه ابو المظفو تغلق شالا السلطان بن السلطان السلطان

both inscriptions enclosed in a double square.

There is unfortunately no trace of a marginal legend on either side, but the coin may be attributed to Lakhnauti, as the fabric is distinctly that of Bengal. It was most probably struck during Tughlaq's visit to Bengal, when "the ruler of Lakhnauti, Sultān Nāsiru-d-dīn, came forth with great respect to pay homage to the Sultān ' (Tārikh-i Fīroz Shāhī; Elliot Dawson III, p. 234). This specimen came from the Sonpat hoard, and was purchased by the British Museum from the Panjab Archæological Survey in 1889.

IV. Muḥammad III bin Tughlaq and Ghiyāsu-d-dīn Bahādur, Governor of Bengal (restored), 725-731 A.H.

A wt. 165: size 9. Sunārgāon; 728 A.H.

Pl. XVI

Obverse and reverse legends exactly as on the silver coin of the same mint and date described by Thomas in his Chronicles, p. 215, no. 186. This coin is of remarkably neat workmanship, closely resembling the contemporary gold coins of Muhammad III struck in Dehli. The contrast in fabric between it and the following piece, which is of the usual Bengal fabric, suggests that the dies may have been engraved at the Dehli mint, when Muhammad, amid many other tokens of his esteem for Bahādur Shah, whom he had just restored, agreed that their names should appear together on the coins.

V. At 165.5: size 1. Pl. XVI.

Obverse in square in circle as preceding coin. Reverse in double square as preceding coin. No trace of marginal legend on either side.

This coin bears no remaining trace of mint or date but must have been struck before 730 when Bahādur reverted to a coinage which showed his independence as the coins of that year of thiyāspūr show. Both the above pieces formerly belonged to General Cunningham.

J. ALLAN,
British Museum.

97. On AN UNPUBLISHED MEDIAEVAL COIN.

The coin described below came from a find made four years ago near Rūpar in the Ambāla District of the Panjāb. It appears that the actual finders persuaded an acquaintance that the find was a valuable one, and sold the original hoard to him as the result of their representation. When the purchaser discovered that the coins were in reality of debased metal, and that he could get little or nothing for them in the bāzār, he instituted a criminal case against the finders in the Court of the Subdivisional Officer, Rūpar. Some time subsequently my friend the Subdivisional Officer happened to mention the case to me, and I was able to obtain a number of the coins, which included twenty-one specimens of a type of mediaeval currency as yet to the best of my knowledge unpublished.

Obverse. - Figure apparently facing.

Reverse. - Representation of a quadruped standing to right;

round it inscription and symbols.

This coin I think represents the last stage in degradation of the original Greek design. The obverse shows a human figure copied from the Kushān coins, which though even still more crude, resembles the figures on the copper coins ascribed by Mr. Vincent Smith to the Kings of Kalinga of the fourth or fifth century after Christ—see Vol. I of the Catalogue of the Coins in the Indian Museum, Calcutta, Plate XIV, 14. The reverse design is that of some animal which I cannot identify. The massive body and rope-like tail point to the elephant, but this supposition is negatived by the thin neck, small head, long upstanding ears, and the equally rope-like legs. The animal is strangely like what would be delineated by a modern child in its first attempts to draw.

The coin is die-struck. The above illustration is the result of a mutual comparison of all twenty-one specimens, and is somewhat larger than the coin itself. I do not know the language of the inscription, but it is possible that the two central markings \(\) O and \(\) are symbols or monograms.

These coins were accompanied by two or three copper coins of the white Hun chiefs Toramāna and Mihirakula of types I. M. Cat., Vol. I, Plate XXV, 4 and 5, which fixes their probable date at approximately A.D. 500.

DALHOUSIE:

R. B. WHITEHEAD, I.C.S.

1911.

98. Some RARE MUGHAL COINS.

Since the publication of the Catalogue of Coins of the Moghul Emperors, the British Museum has acquired a fair number of coins of this series, of which the following appear to be worth notice:—

Aurangzéb.

- Metal, Gold.
 Weight, 168.2 grns.
 Size, 85 inch.
 Date, 1112: 45.
 Mint, Aḥsanābād.
- 2. Metal, Gold.

 Weight, 109.6 grns.
 Size, 8 inch.
 Date, 1077: 10
 Mint, 'Ālamgīrpūr.

702 Journal of the Asiatic Society of Bengal. [November, 1911.

3. Metal, Gold.

Weight, 170.5 grns.
Size, 8 inch.
Date, (10) 77: x.
Mint, Junagarh.

4. Metal, Gold.

Weight, 170 grns. and 169 grns.
 Size, 8 inch.
 Date, 1098: 31 and 1114: 46.
 Mint, Zafarābād.

Rupees of Aurangzeb are known of all the above mints, and muhars of Aḥsanābād, 'Alamgīrpūr and Zafarābād were found by Mr. Whitehead in the Bahāwalpūr treasury (N. S. XI). The legends call for no remarks.

Shāh 'Ālam I.

Metal, Silver.
Weight, 174 grns.
Size, 9 inch.
Date, 1122: 4.
Mint, Nārnöl.

Obverse.	Reverse.
^{غازي}	۽ انوس
بالشكالا	ميہذت
عالم بهادر	į. Įė
شالا	مانھ چاوس
11rr asm	ضــــوب
	کار نول

For a second specimen see the Catalogue of Mr. C. T. Rodgers's Mughal Coins in the Lahore Museum, p. 199, No. 15.

Farrukhsiyar.

Metal, Gold.
Weight, 168 grns.
Size, 1 inch.
Date, (11) 27: 5.
Mint, Pûrbandar.

This coin is no. 893, pl. xxii, of the British Museum Catalogue where it is doubtfully attributed to Barell. At this period, however, يربلي is never placed as on this coin but written

مالي and there can be little doubt that this adds another to the few coins known of Purbandar. Dr. G. P. Taylor has a rupee of Farrukhsiyar of this mint (Num. Suppl. No. IV, 27, and Catalogue of the Indian Museum, vol. iii, p. lxxiii.

Ahmad Shah.

Metal, Gold.
Weight, 168.8 grns
Size, 8 inch.
Date, 1164: 4.
Mint. Lähor.

Rupees of this mint of Ahmad are not uncommon. For notice of the muhar see Num. Suppl. xi, 69.

'Ālamgir II.

Metal, Gold.
Weight, 167.9 grns.
Sizo, .75 inch.
Date, 1171: 5.
Mint, Jaipūr (Sawāi).

There is another muhar of this mint of the year 6 in the Indian Museum Catalogue, no. 2183.

J. ALLAN,

British Museum.

99. A SILVER DIRHAM OF THE SASSANIAN QUEEN PURANDUKHT.

Mr. Maneckjee Rustomjee Sethna of Bombay has kindly supplied a photograph, and has also given me permission to publish a description of a rare dirham obtained by him so recently as last January (1911) in the local bazár. When at his request I set to classifying his Sassanian coins, I thought at first this dirham should be attributed to Shirin, the Queen Consort of Khusrau II (Parviz), but further examination revealed the name Búrání, written in Old Pahlaví characters. Evidently then the coin must be assigned to that Púrán-dukht who in her own right reigned over Persia for some sixteen months of the years A.D. 630 and 631. Superintending, like the kings before her, the various departments of the State, she gave proof of high ability to manage imperial affairs. In the exercise of her royal powers she was not duly capable but just, and was also generous in rewarding her councillors and provincial Governors for the services they rendered.

704 Journal of the Asiatic Society of Bengal. [November, 1911.

Description of the Dirham.

Metal: Silver. Mint: Rám.

Obverse:—Bust of Queen to right within two dotted circles with a crown—similar to that of her father Khusrau II, but slightly varied—surmounted with wings. Between and above the wings a crescent bearing a small globe. Outside the circles at the extreme right and left and bottom a crescent with enclosed star. Jewels encircling the crown, and others interwoven with long curls reaching to the breasts. A necklace of two strands. Below the right wing of the crown a star, and below the left wing a crescent with a star in its bosom.

Legend:—To left behind the back of bust (reading from right to left) Pahlavi characters = فزودك 'increase.'

. To right, in front of face, Pahlavi characters = بوراني = Búrání.

Reverse:—Within three dotted circles an Atish-dan, Fire-receptacle—by European writers commonly called a Fire-altar—with flames ascending, and at base two steps, on either side guardian mobeds (Pársee priests), facing front, and each holding in his two hands a long sword, point downwards. To right of flames a crescent, and to left a star.

Legend:—To left, reading from inside, Pahlavi characters =

To right, reading from outside, Puhlavi charlicters = راي, Rám (the mint-town).

For the reading compare the reverse of the coin of Khusrau I (Naushírwán), given in Dorn's Collection de Monnaies Sassanides," Pl. XXII, fig. 1; also for the reading (i) see the Reverse of another coin of that same King in Dorn: Pl. XXIV,

fig. 38.

When deciphering this dirham, I was under the impression that none of Puran-dukht's coins had as yet been published: but in a book-catalogue received from Paris in April last there is an entry, "Monnaies de la reine Sassanide Borán ou Paurandokht '' by M. Ed. Drouin, 1893. This monograph I have not yet seen.

BOMBAY:

FRAMJEE JAMASJEE THANAWALLA.

1911.

P.S.—After I had completed the above article my kind friend Mr. Cawasjee Eduljee Kotwall placed in my hands a copy, recently sent him from Paris, of the late M. Drouin's monograph above mentioned. It contains a description of four of that Queen's dirhams of the regnal year 1 (mint not stated), and one dirham of each of the regnal years 2 and 3. Both of these latter coins are from Yezd Mint, whereas the dirham described by me issued from the Mint at Ram. M. Drouin held that the Queen Purandokht (or as he preferred to read the name Borándokht) reigned from May 630 till October 631.

Aḥdi, can be read as Aīoki. Aīoki is preferable to Aḥdi.

BOMBAY;

1911.

ILAHI SYNCHRONISMS OF SOME HIJRI 100. NEW YEAR'S DAYS.

The following list, giving the llahi date corresponding to the initial day of each Hijri year from 1015 to 1037, may prove of service in the study of the coins of Jahangir's reign.

Jahangir ascended the throne on 20 Jumada II of 1014 A.H.,

or 18 Aban of 50 Ilahī.

1 Ilahi. New Year's Day of 1015 A.H. = 20 Ardībilnisht of 1016,, =10of 1017 ,, = 28 Farwardîn of 1018 ,, =18 of 1019 , = 7,, 2.2

```

Jahangtr died on 28 Şafar of 1037 A.H., or 24 Ābān of 22 Ilahī.

A list of Hijri synchronisms of the Ilahi New Year's Days of Jahangir's reign is given in the "Indian Museum Catalogue," III, p. 357, from which the converse list, now supplied, may be easily deduced. In making this conversion the two following Tables will be found useful for ready reference:—

2

* It is only in the Intercalary Year that Dhu'l hijja (2ii) contains 30 days.

This Table shows the interval (in days) between New Year's Day and each subsequent day of the Hijri year. For example, 19 Safar comes 48 days after, or 24 Shawwāl 289 days after, the first day of that same year.

^{*} Each year of the Persian era of Yazdijard consists of 365 days, or of 12 months, each of 30 days, followed, at the end of the twelfth month, by 5 days, called Gathas,

This Table shows the interval (in days) between New Year's Day and each day of the immediately preceding Ilahi year. For example, 29 Di comes 67 days before, or 28 Mihr 158 days before, the first day of the next year.

A few examples will illustrate the process of determining the Ilahi date corresponding to New Year's Day of the Hijri year.

- A. 1: i: 4 Ilahī = 14: xii: 1017 A.H. (See I.M.C., p. 357)

 by Table I, = 1: i: 1017 A.H. + 338 days.

 1: i: 4 Ilahī—338 days = 1: i: 1017 A.H.

 by Table II, 28: i: 3 Ilahī = 1: i: 1017 A.H.

 or the New Year's Day of 1017 A.H. fell on the 28th
- day of Farwardīn of Ilahī 3.

 B. 1: i: 10 Ilahī = 18: ii: 1024 A.H. (See I.M.C., p. 357),
 ∴ by Table I, = 1: i: 1024 A.H. + 47 days
 ∴ 1: i: 10 Ilahī—47 days = 1: i: 1024 A.H.
- .. by Table II, 19: xi: 9 Ilahī = 1: i: 1024 A.H.

 C. 1: i: 17 Ilahī = 9: v: 1031 A.H. (See, I.M.C., p. 357),
- C. 1: i: 17 Ilahī = 9: v: 1031 A.H. (See I.M.C., p. 357),
 ∴ by Table I, = 1: i: 1031 A.H. + 126 days
 ∴ by Table II, 30: viii: 16 Ilahī = 1: i: 1031 A.H.
- D. 1: i: 21 Ilahī = 21: vi: 1035 A.H. (See I.M.C., p. 357),
 ∴ by Table I, = 1: i: 1035 A.H. + 168 days
 ∴ by Table II, 18: vii: 20 Ilahī = 1: i: 1035 A.H.

From Abu'l Fazl's list, (corrected in Cunningham's "Book of Indian Eras," page 225), of the Hijri dates corresponding to the initial days of each of the Ilahī years of Akbar's reign, has been prepared the following converse list, showing the Ilahī synchronisms of all the New Year's Days from Hijri 964 to 1015.

Akbar ascended the throne on 2 Rabī' II. 963, A.H. The next Nauroz, or New Year's Day, fell 25 days later, or on 27 Rabi' II. 963 A.H., and by Akbar's order this Nauroz was held to be the first day of the Ilahī era.

New Year's Day of 964 A.H. = 30 Aban 1 Ilah; 2 of 965 A.H. = 192.3 3 33 of 966 A.H. = 79.1 of 967 A.H. = 27 Mihr 4 2 3 ,, 1 3 of 968 A.H. = 169.3 6 969 A.H. = 5,, of of 970 A.H. = 24 Shahrewar 29 8 of 971 A.H. = 13,, 9 of 972 A.H. = 2973 A.H. = 22 Amardad 10 of 11 of 974 A:H.=11 93 12 of 975 A.H. = 30 Tir 13 of 976 A.H. = 19 ,, 25 14 of 977 A.H. = 9,, of 978 A.H. = 27 Khūrdād 15 16 of 979 A.H. = 1617 of 980 A.H. = 623

```

Akbar died on 12 Jumādā II of 1014 A.H., or 10 Ābān of 50 Ilahī.

Though it seems impossible to glean from the histories of the reign of Shāh Jahān I a helpful list of synchronisms, still the Ilahī date—day and month and year—corresponding to each Hijrī New Year's Day of that reign can be readily determined. One has only to bear in mind that each Ilahī year consists of 365 days, each ordinary Hijrī year of 354, and each Intercalary Hijrī year of 355 In Shāh Jahān's reign the following were the Intercalary years:—

1038, 1041, 1044, 1046, 1049, 1052, 1055, 1057, 1060, 1063, 1066, and 1068.

From the List of Synchronisms for Jahangir's reign we learn that

```
1:i:1037 A.H. = 27: vi: 22 Tlahs.
       1:i:1038 \text{ A.H.} = 27:vi:22 \text{ Ilahī} + 354 \text{ days.}
                        = 27 : vi : 23 Ilahī - 11 days.
                        = 16: vi: 23 Ilahī of Jahāngīr,
                       or 16; vi: 1 Ilahī of Shāh Jahān I.
                                    1 Ilahi + 355 days.
Hence 1: i: 1039 \text{ A H.} = 16: vi:
                        =16: vi : 2 Ilahī -10 days.
                         = 6 : vi :
                                    2 Ilahi.
Hence 1: i: 1040 A.H. = 6: vi: 2 Ilahī + 354 days.
                         = 6: vi: 3 Ilahī-11 days.
                         =25 : v :
                                    3 Ilahī.
Hence 1:i: 1041 A.H. = 25: v: 3 Ilahī + 354 days.
                        =25: v: 4 Ilahī-11 days
                         = 14 : v : 4 Ilahī.
                        &c., &c., &c., &c.
```

By this simple method we obtain the following results :-

```
New Year's Day of 1038 A.H. = 16 Shahrewar
                                                           1 Ilahī.
                                                            ^{2}
